Section 1:

INTRODUCTION

A. Role of the Housing Element

The Housing Element of the Newport Beach General Plan identifies and analyzes the City's existing and projected housing needs and contains a detailed outline and work program of the City's goals, policies, quantified objectives, and programs for the preservation, improvement, and development of housing for a sustainable future. The Housing Element is one of the seven mandatory elements to be included in a city's General Plan. The Housing Element identifies ways in which housing needs of current and future residents can be met. The Housing Element ensures that the City establishes policies, procedures and incentives in its land use planning and development activities to ensure the maintenance and expansion of the housing supply to adequately accommodate households currently living and expected to live in Newport Beach. The Housing Element institutes policies that will guide City decision-making and establishes an implementation program to achieve the City's housing goals for the 2021-2029 period.

B. State Policy and Authorization

1. Background

The Housing Element identifies and analyzes the City's existing and projected housing needs. The Housing Element contains a detailed outline and work program of the City's goals, policies, and quantified objectives for the preservation, improvement, and development of housing for a sustainable future. This includes timelines for the City to accomplish each identified action within the Housing Plan.

2. State Requirements

California State Housing Element Law (California Government Code Article 10.6) establishes the requirements for the Housing Element. California Government Code Section 65588 requires that local governments review and revise the Housing Element of their comprehensive General Plans not less than once every eight years.

The California Legislature has determined that a primary housing goal for the State is ensuring every resident has a decent home and suitable living environment. Section 655880 of the California Government Code states:

- a. The availability of housing is of vital statewide importance, and the early attainment of decent housing and a suitable living environment for every Californian, including farmworkers, is a priority of the highest order.
- b. The early attainment of this goal requires cooperative participation of government and the private sector in an effort to expand housing opportunities and accommodate the housing needs of Californians in all economic levels.
- c. The provisions of housing affordable to low- and moderate-income households requires the cooperation of all levels of the government.
- d. Local and State governments have a responsibility to use the powers vested in them to facilitate the improvement and development of housing to make adequate provision for housing needs of

all economic segments of the community. The Legislature recognizes that in carrying out this responsibility, each local government also has the responsibility to consider economic, environmental, and fiscal factors and community goals set forth in the general plan and to cooperate with other local governments and the state in addressing regional housing needs.

Table 1-1 summarizes State requirements for Housing Element and identifies the applicable sections in the 2021-2029 Housing Element where these requirements are addressed.

| Table 1-1: Housing Element Requirements | | |
|--|--------------------------|-------------------------------------|

The City's Housing Element was last updated in September 2013 for the 5th cycle from years 2014 to 2021, as part of the new update cycle for jurisdictions within the SCAG (Southern California Association of Governments) region to allow for synchronization with the Regional Transportation Plan and Sustainable Communities Strategy (RTP/SCS). The Element sets forth an 8-year strategy to address the City's identified housing needs, including specific implementing programs and activities.

Amendments have been made to Housing Element law since the adoption of the City's 5th Cycle Housing Element; such amendments and subsequent housing laws change the required analysis, reporting and policies contained in the Housing Element. The contents of this updated Housing Element comply with these amendments to state housing law and all other federal, state and local requirements.

3. Regional Housing Needs Assessment

Section 65583 of the Government Code sets forth the specific content requirements of a jurisdiction's housing element. Included in these requirements are obligations on the part of local jurisdictions to provide their "fair share" of regional housing needs. Local governments and Councils of Governments (COGs) are required to determine existing and future housing need and the allocation of this need must be approved by the California Department of Housing and Community Development (HCD). Newport Beach is a member agency of the Southern California Association of Governments (SCAG). SCAG is

responsible for preparing the Regional Housing Needs Assessment (RHNA) for all jurisdictions within the SCAG region.

HCD established the planning period for the current Regional Housing Needs Assessment (RHNA) from October 15, 2021 to October 15, 2029. For the 2021-2029 planning period the City was allocated a total of 4,845 units, including 1,456 for very low-income, 930 for low-income, 1,050 for moderate-income, and 1,409 for above-moderate income households.

4. Relationship to Other Community Plan Elements

The Housing Element is one element of the City of Newport Beach General Plan. The goals, policies, actions, and programs within the Housing Element relate directly to, and are consistent with, all other elements in the Newport Beach General Plan. The City's Housing Element identifies programs and resources required for the preservation, improvement, and development of housing to meet the existing and projected needs of its population.

The Housing Element works in tandem with development policies contained in the Land Use Element, most recently amended in 2013. The Land Use Element establishes the location, type, intensity and distribution of land uses throughout the City, and defines the land use build-out potential. By designating residential development, the Land Use Element places an upper limit on the densities and types of housing units constructed in the City. The Land Use Element also identifies lands designated for a range of other uses, including employment creating uses, open space, and public uses. The presence and potential for jobs affects the current and future demand for housing at the various income levels in the City.

The Circulation Element of the General Plan also affects the implementation of the Housing Element. The Circulation Element establishes policies for a balanced circulation system in the City. Consequently, the Housing Element must include policies and incentives that consider the types of infrastructure essential for residential housing units in addition to mitigating the effects of growth in the City.

The Housing Element has been reviewed for consistency with the City's other General Plan components, and the policies and programs in this Element are consistent with the policy direction contained in other parts of the General Plan. As portions of the General Plan are amended in the future, the Housing Element will be reviewed to ensure that internal consistency is maintained.

5. Public Participation (UPDATED AS WE PROCEED)

Section 65583 of the Government Code states that, "The local government shall make diligent effort to achieve public participation of all economic segments of the community in the development of the housing element, and the program shall describe this effort." Meaningful community participation is also required in connection with the City's Assessment of Fair Housing (AFH). A discussion of citizen participation is provided below.

As part of the 6th Cycle Housing Element Update process, the City of Newport Beach conducted extensive public outreach activities beginning in 2019.

Outreach for the 6th Cycle Housing Element to the community, includes the following actions:

- **Community Workshop #1** (October 20, 2020) – Provided an overview of the Housing Element Update process, community and housing characteristics, and engagement activities.
- **Community Workshops #2 and #3** (November 16 and 17, 2020) – Engaged participants in a suitability analysis for housing types and densities for focus areas in Newport Beach.
- **Community Workshop #4** (February 24, 2021) – Discussion of opportunity sites and policy strategies.
- **Online Community Survey** – Participants considered potential policies and programs to include in the Housing Element, as well as potential housing types and opportunities for housing. The survey also solicited feedback regarding potential barriers to housing access and constraints to the development of housing.
- **Planning Commission Study Session** - Provided a presentation with an overview of the Public Review Draft Housing Element and Housing Element update process to date. Community members had the opportunity to give public comments.
- **Housing Element Update Advisory Committee (HEUAC) Meetings** – Tracked and provided feedback on outreach efforts, made recommendations and provided guidance on policies and programs, provided general comments and feedback.
- **Housing Element Update Website** - Provided relevant information about the update process, key features of the housing element, project timeline and a calendar of events for outreach activities. The website also provided a link to the community survey tool, past recorded meetings and summaries, as well as the contact information of the City for residents and community members to send additional comments or request additional information.
- **Listen & Learn** – Series of community workshops in each Council District to guide and inform the General Plan Update in 2019.

As required by Government Code Section 65585(b)(2), all written comments regarding the Housing Element made by the public will be provided to each member of the City Council.

Appendix C will contain a summary of all public comments regarding the Housing Element received by the City during the update process.

6. Data Sources (To be updated in final draft)

The data used for the completion of this Housing Element comes from a variety of sources. These include, but are not limited to:

- 2010 Census
- American Community Survey
- Regional Analysis of Impediments to Fair Housing (AI)
- Point-in-Time Homeless Census by the Regional Task Force on the Homeless, 2019
- Home Mortgage Disclosure Act (HMDA) lending data
- California Department of Economic Development
- California Employment Development Division Occupational Wage data, 2002

- Department of Housing and Urban Development, Comprehensive Housing Affordability Strategy (CHAS), 2013-2017
- California Department of Finance
- Southern California Association of Governments (SCAG) Local Housing Report

The data sources represent the best data available at the time this Housing Element Update was prepared. The original source documents contain the assumptions and methods used to compile the data.

7. Housing Element Organization

This Housing Element represents the City's policy program for the 2021-2029 6th Cycle Planning Period. The Housing Element is comprised of the following Chapters:

Chapter 1: Introduction contains a summary of the content, organization and statutory considerations of the Housing Element;

Chapter 2: Community Profile contains an analysis of the City's population, household and employment base, and the characteristics of the housing stock;

Chapter 3: Housing Constraints and Resources examining governmental and non-governmental constraints on production, maintenance, and affordability of housing and provides a summary of housing resources, including sites identification and funding and financial considerations;

Chapter 4: Policy Plan addresses the City's identified housing needs, including housing goals, policies and programs.

Appendices provides various appendices with supplementary background resources including:

- **Appendix A** – Review of Past Performance of 5th Cycle Programs
- **Appendix B** – Summary of Adequate Sites Analysis
- **Appendix C** – Summary of Outreach

Section 2: COMMUNITY PROFILE

The Community Profile for the City of Newport Beach provides an overview of the City's housing and population conditions. The community profile serves as the foundation for the Housing Elements policies by describing and assessing the factors and characteristics that contribute to the supply and demand for housing in Newport Beach. Specifically, the community profile describes the community's population, employment, economics, and household characteristics. Special Needs groups and housing stock characteristics are also described. The community profile develops context for the goals, programs, and policies, established in the Housing Element.

The data used for this community profile has been collected using the most current available data from the Southern California Association of Governments (SCAG), 2010 U.S. Census, 2010-2018 American Community Survey, the California Department of Finance, the California Employment Development Department, the California Department of Education and other currently available real estate market data. Data has also been collected from the SCAG Local Housing report for Newport Beach, which provides facts and figures pre-certified by the California Department of Housing and Community Development (HCD) for use in the 6th Cycle Housing Elements.

A. Population Characteristics

Population characteristics affect current and future housing demands in a community. Population growth, age compositions and race/ethnicity influence the type and extent of housing needed and the ability of the local population to afford housing costs. The following section describes and analyzes the various population characteristics and local trends in Newport Beach.

1. Population Growth

Table 2-1 below displays the forecasted population growth for Newport Beach, as it compares to the County and other surrounding jurisdictions/cities. The U.S. Census reported a population of 85,186 individuals for the City in 2010. This is the second smallest population for this area after Laguna Beach, which has a population of 22,723. The 2010 population of Newport Beach represents about 3 percent of the Orange County total population.

The Southern California Association of Government (SCAG) Final Growth Reports calculates estimates for future population counts and economic and housing trends through 2045. The SCAG data shown in Table 2-1 estimates a population growth for Newport Beach of 7,100 individuals, or an 8.4-percent increase, between 2016 and 2045. The growth calculation is consistent with that expected in Costa Mesa and is double that of Huntington Beach. In comparison, the City of Irvine anticipates a population surge of about 25 percent through 2045. Between 2016 and 2045, Newport Beach population is forecasted to grow by about 2 percent less than Orange County.

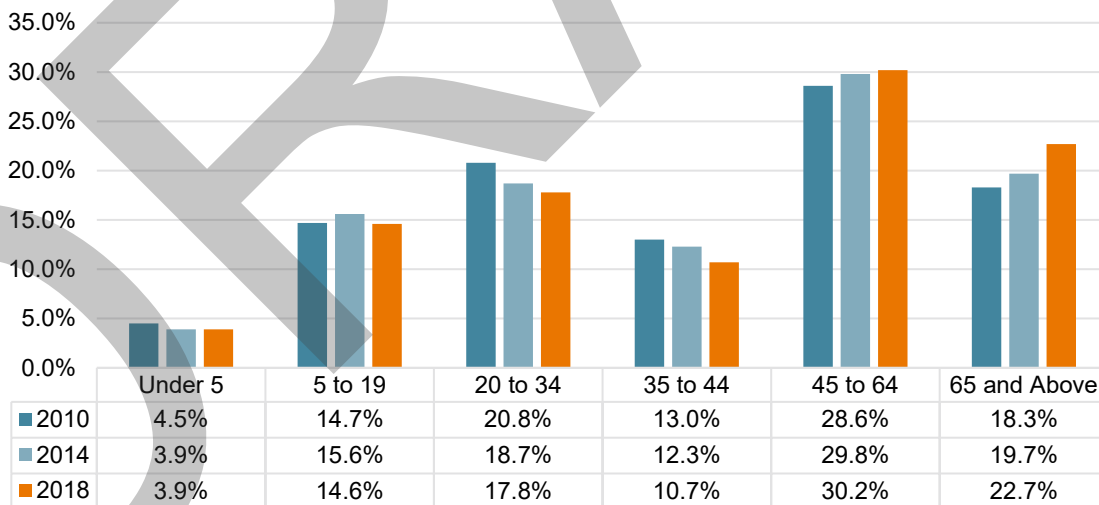

| Table 2-1: Population Growth Forecast, 2016-2045 | | | |
|--|---------------|----------------|----------------|
| Jurisdictions | Population | | Percent Change |
| | 2016 Actual | 2045 Projected | 2016-2045 |
| Costa Mesa | 113,900 | 123,700 | 8.6% |
| Newport Beach | 84,900 | 92,000 | 8.4% |
| Huntington Beach | 196,900 | 205,300 | 4.3% |
| Laguna Beach | 23,400 | 23,500 | 0.4% |
| Irvine | 261,600 | 327,700 | 25.3% |
| Orange County | 3,180,000 | 3,535,000 | 11.2% |
| Represents an estimate from the SCAG Connect SoCal 2016-2045 Demographics and Growth Forecast. Sources: SCAG 2020 Connect SoCal Demographics and Growth Forecast. | | | |

2. Age Characteristics

The age composition of a community affects housing needs because housing demand within the market is often determined by the preferences of certain age groups. For example, young adults generally favor apartments, low to moderate-cost condominiums, and smaller or more affordable single-unit homes because they tend to live on smaller incomes and have smaller households. As population moves through different stages of life, housing is required to accommodate new or adjusted needs. To produce a well-balanced and healthy community, a community must provide appropriate housing to accommodate needs of all ages.

Figure 2-1: Age Distribution in Newport Beach, 2010-2018

Source: American Community Survey, 5-Year Estimates, 2010, 2014, and 2018.

Newport Beach population that falls within the ages of 45 to 64 represents the largest age group, as shown in **Figure 2-1**. In 2018, 30.2 percent of the population was between the ages of 45 and 64. Children under 5 years of age make up about 4 percent of the population, and 18.5 percent are 19 years or younger. Adults in the 35 to 44 age group have the second lowest population representation at 10.7 percent.

From 2010 to 2018, Newport Beach shows an aging population trend. All age groups under 45 years have consistently been decreasing. The 20 to 34 age group has experienced the greatest population loss at 3 percent between 2010 to 2018. In comparison, seniors over 65 years have increased by 4.4 percent during the same time. The middle-age and senior populations both make up the largest age groups and can be expected to continue increasing given the decreasing distribution of young adults and children.

Table 2-2 compares the age distribution of Newport Beach to the rest of the county and surrounding cities. The City has a below average age distribution for those ages 44 and under as compared to Orange County. The City of Laguna Beach and Newport Beach both exceed 22 percent of senior populations, while the surrounding cities and county range from 9 to 16 percent. All municipalities in Table 2-2 have lower distributions of individuals ages 15 to 17 and higher distributions of individuals 45 to 64 years of age.

| Jurisdiction | Under 5 | 5 to 14 | 15 to 17 | 18 to 24 | 25 to 44 | 45 to 64 | 65+ years |
|----------------------|----------------|----------------|-----------------|-----------------|-----------------|-----------------|------------------|
| Costa Mesa | 5.7% | 11.4% | 3.2% | 9.6% | 35.2% | 24.3% | 10.7% |
| Newport Beach | 3.9% | 10.0% | 3.5% | 6.3% | 23.4% | 30.2% | 22.7% |
| Huntington Beach | 5.2% | 10.9% | 3.5% | 7.6% | 27.0% | 29.0% | 16.9% |
| Laguna Beach | 3.4% | 8.5% | 4.1% | 5.9% | 16.3% | 38.4% | 23.3% |
| Irvine | 6.4% | 12.4% | 3.6% | 13.0% | 30.8% | 23.9% | 9.9% |
| Orange County | 6.0% | 12.5% | 4.0% | 9.5% | 27.4% | 26.6% | 13.9% |

Source: American Community Survey, 5-Year Estimates, 2018

3. Race/Ethnicity Characteristics

Racial and ethnic composition contribute to housing needs due to varying household characteristics, income levels, and cultural backgrounds which may affect their housing needs, housing choice and housing types. Cultural influences may reflect preference for a specific type of housing.

As summarized in **Figure 2-2**, Newport Beach is comprised mainly of White individuals at 85.3 percent of the population in 2018. American Indian/Alaska Natives and Native Hawaiian/other Pacific Islanders comprise the lowest percentage; both populations in Newport Beach and Orange County add up to less than 1 percent of the population. The White population in Newport Beach is 23.6 percent greater than the county and the Hispanic or Latino population is 25.1 percent less than that of the county. The Black population represents 0.8 percent of the Newport Beach population, which is half that of Orange County. The Asian population of Newport Beach is 11.8 percent smaller than that of Orange County and there are 9.6 percent less individuals in the City who identify as some other race than in the County.

Figure 2-2: Racial and Ethnic Composition, 2018

Source: American Community Survey, 5-Year Estimates, 2018.

Table 2-3 shows that all cities around Newport Beach and Orange County have a majority White population. The second largest population group in this area are those who identify as Hispanic or Latino. The Black population in Newport Beach and Laguna Beach are both the smallest of the area at 0.8 percent and both cities are below the county percentage by just under 1 percent. Both American Indian/Alaska Native and Native Hawaiian/other Pacific Islanders represent the smallest population groups with neither exceeding 1 percent in any of the listed cities.

Table 2-3: Racial and Ethnic Composition, 2018

| Jurisdiction | White | Black | American Indian/ Alaska Native | Asian | Native Hawaiian /Other Pacific Islander | Some Other Race | Two or More Races | Hispanic or Latino Origin ⁽¹⁾ |
|----------------------|--------------|-------------|-----------------------------------|-------------|---|-----------------|-------------------|--|
| Costa Mesa | 71.6% | 1.9% | 0.4% | 8.4% | 0.7% | 13.0% | 4.0% | 36.1% |
| Newport Beach | 85.3% | 0.8% | 0.3% | 8.3% | 0.2% | 2.1% | 3.1% | 9.0% |
| Huntington Beach | 72.4% | 1.4% | 0.6% | 12.1% | 0.4% | 7.3% | 5.4% | 20.0% |
| Laguna Beach | 90.8% | 0.8% | 0.1% | 3.7% | 0.3% | 1.5% | 2.8% | 7.4% |
| Irvine | 47.6% | 1.9% | 0.2% | 42.3% | 0.2% | 2.8% | 5.2% | 10.3% |
| Orange County | 61.7% | 1.7% | 0.5% | 20.1% | 0.3% | 11.7% | 4.1% | 34.1% |

Note: (1) Persons of Hispanic or Latino Origin is an ethnicity that may be included in other racial groups.

Source: American Community Survey, 5-Year Estimates, 2018.

Table 2-4 identifies the change in composition of Newport Beach between 2010 to 2018. The population who reported White experienced the greatest population loss between 2010 and 2015 (4 percent), but then increased by just under a percent point between 2015 and 2018. The City's population who identifies as Hispanic or Latino increased by a total of 1.6 percent; this was the greatest population increase between these three survey years. Overall, majority of the different racial and ethnic populations within Newport Beach remained stable in population from 2010 to 2018.

| Table 2-4: Changes in Racial and Ethnic Composition, 2010-2018 | | | | | |
|---|-------------|-------------|-------------|------------------------------------|------------------------------------|
| Race/Ethnicity | 2010 | 2015 | 2018 | Percent Change 2010 to 2015 | Percent Change 2015 to 2018 |
| White | 88.4% | 84.4% | 85.3% | -4.0% | 0.9% |

B. Economic Characteristics

Reporting and analyzing economic characteristics of a community provides valuable information on the community's ability to access the housing market. Incomes associated with different types of employment and the number of workers in a household affect housing affordability and choice. Therefore, to consider a healthy balance between jobs and housing, the employment characteristics of a community must be considered. Local employment growth is linked to local housing demand, and the reverse is true with employment contracts.

1. Employment and Wage Scale

Employment directly affects housing needs, as employment and income informs a population's ability to purchase housing and the types of housing they would be inclined to purchase. **Table 2-5** summarizes projected employment growth for Newport Beach and its surrounding cities and Orange County between 2012 to 2040. These projections are provided by the Southern California Association of Government's (SCAG) Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). The report is a long-range plan that considers future mobility and housing needs with economic, environmental, and public health goals and was adopted on April 7, 2016.

Table 2-5 shows that Newport Beach is estimated to experience an employment growth of 1.8 percent between 2016 to 2045. The total employment growth in the City is significantly less in percentage than the forecast for the surrounding cities. City of Irvine is estimated to experience a 24.5 percent increase through 2045, which is about 10 percent more than the percentage projected for the whole county. While Newport Beach is projected to experience the least employment growth as a percent, the growth represents an increase in 1,500 new employees; this is a greater numeric change than Laguna Beach. The number of new employees projected for Newport Beach represent 0.5 percent of employment growth for the county.

| Table 2-5: Employment Growth Trends, 2016-2045 | | | | |
|---|---------------|---------------|-------------------------------|-------------------------------------|
| Jurisdiction | 2016 | 2045 | % Change 2016-2045 | Numeric Change 2016-2045 |
| Costa Mesa | 95,700 | 104,000 | 8.7% | 8,300 |
| Newport Beach | 83,400 | 84,900 | 1.8% | 1,500 |
| Huntington Beach | 83,400 | 90,800 | 8.9% | 7,400 |
| Laguna Beach | 5,800 | 6,100 | 5.2% | 300 |
| Irvine | 265,300 | 330,200 | 24.5% | 64,900 |
| Orange County | 1,710,000 | 1,980,000 | 15.8% | 270,000 |

Source: SCAG 2020 Connect SoCal Demographics and Growth Forecast.

Based on data from the United States Census Bureau American Community Survey (ACS) 5-Year Estimates, the number of employed people in Newport Beach reached 43,892 in 2018. This value is less than the amount projected by the SCAG RTP/SCS. A contributing factor for this may be the increasing amount of the population over the retirement age, as shown in Figure 2-1.

Table 2-6 identifies employment sectors in Newport Beach and the changes in employment for each sector between 2010 and 2018. Most employed people in the City work in professional, scientific, management, and administrative services (19.4 percent). The sector with the least amount of residents employed was agriculture, forestry, fishing and hunting, and mining, with only 0.2 percent in 2018. Two other popular sectors in the City in 2018 were finance and insurance, and real estate and rental leasing at 18.7 percent as well as education services, health care, and social assistance at 17.1 percent. None of the employment sectors in Newport Beach have experienced changes in employment greater than 1 percent between the two survey years. This has resulted in a decrease of 0.5 percent in total employment, rather than in an increase as forecasted in Table 2-5.

| Industry Sector | 2010 | | 2018 | | Percent Change 2010-2018 |
|---|----------------------|----------------------|----------------------|----------------------|--------------------------|
| | # of people employed | % of City Employment | # of people employed | % of City Employment | |
| Agriculture, forestry, fishing and hunting, and mining | 1,324 | 0.3% | 92 | 0.2% | 0.1% |
| Construction | 2,118 | 4.8% | 1741 | 4.0% | 0.8% |
| Manufacturing | 3,529 | 8.0% | 3929 | 9.0% | -1.0% |
| Wholesale trade | 2,074 | 4.7% | 2165 | 4.9% | -0.3% |

| Transportation and warehousing, and utilities | 839 | 1.9% | 1020 | 2.3% | -0.4% |
| Information | 1,059 | 2.4% | 991 | 2.3% | 0.2% |
| Finance and insurance, and real estate and rental leasing | 8,072 | 18.3% | 8196 | 18.7% | -0.4% |
| Professional, scientific, management, and administrative services | 8,999 | 20.4% | 8517 | 19.4% | 1.0% |
| Education services, health care, and social assistance | 7,234 | 16.4% | 7507 | 17.1% | -0.7% |
| Arts, entertainment, recreation, accommodation, and food services | 3,353 | 7.6% | 3425 | 7.8% | -0.2% |
| Other services (except public administration) | 1,324 | 3.0% | 1472 | 3.4% | -0.4% |
| Public Administration | 971 | 2.2% | 688 | 1.6% | 0.7% |
| Total | 44,109 | 100% | 43,892 | 100% | -0.5% |

Source: American Community Survey, 5-Year Estimates, 2010 and 2018.

Table 2-6 shows that employment decreased slightly from 2010 to 2018 despite a projected growth and estimated employment amount much larger than that reached. Nonetheless, unemployment rates displayed in **Table 2-7** show a drop by 1 percent during the same period. Unemployment factors into housing needs as the lack of income necessitates the availability of affordable housing. Newport Beach has maintained an unemployment rate of 3.4 percent in 2018 – the lowest unemployment rate for this area, and 1.7 percent below Orange County.

| Table 2-7: Unemployment Rate, 2018 | | | |
|---|--------------------|-------------|-----------------------------|
| Jurisdiction | Unemployment Rate* | | Percent Change 2010-2018 |
| | 2010 | 2018 | |
| Costa Mesa | 7.3% | 4.8% | -2.5% |
| Newport Beach | 4.4% | 3.4% | -1% |
| Huntington Beach | 7% | 4.3% | -2.7% |
| Laguna Beach | 4.4% | 6.8% | 2.4% |
| Irvine | 5.5% | 4.9% | -0.6% |
| Orange County | 7.4% | 5.1% | -2.3% |
| *Population 16 years and over | | | |
| Source: American Community Survey, 5-Year Estimates, 2010 and 2018. | | | |

Based on the data in Table 2-7, approximately 2,492 Newport Beach residents were without work in 2018 and would therefore be more likely to require more affordable housing options. For those that are employed, income level further identifies housing types that may need to be provided within the City. According to the SCAG Draft Regional Housing Needs Assessment (RHNA) Methodology, housing needs by income are broken down into four income levels:

- + **Very Low-Income** (50 percent or less of the county's median family income)
- + **Low-Income** (50-80 percent of the county median family income)
- + **Moderate-Income** (80-120 percent of the county median family income)
- + **Above Moderate-Income** (120 and above of the county median family income)

Orange County's median family income is \$85,398 according to the 2018 ACS estimates. The occupations that fall below 50 percent of this amount are Protective Services; Sales; Office and Administration Support; Production; Transportation and Material Moving; Healthcare Support; Building, Grounds Cleaning, and Maintenance; Personal Care and Service; Farming, Fishing and Forestry; and Food Preparation and Serving Related. Most occupations in Orange County have an average income that is either low or very low.

| Table 2-8: Mean Salary by Occupation in Orange County, 2020 | |
|---|-----------|
| Occupation | Salary |
| Management | \$120,871 |
| Legal | \$105,406 |
| Healthcare Practitioners and Technical | \$79,755 |
| Architecture and Engineering | \$87,635 |
| Computer and Mathematical | \$92,631 |
| Life, Physical and Social Sciences | \$67,488 |
| Business and Financial Operations | \$73,913 |
| Education, Training and Library | \$52,043 |
| Arts, Design, Entertainment, Sports and Media | \$47,351 |

C. Household Characteristics

A household includes all persons who occupy a housing unit, as defined by the Census. This may include single persons living alone, families related through marriage, blood or adoption, domestic partnerships and unrelated individuals living together. Nursing facilities, residential care facilities, dormitories, and other group living, as well as, the persons living with them are not considered a housing unit.

Income and affordability are best measured at the household level, as well as the special needs of certain groups, such as large families, single parent households, or low and extremely low-income households. For example, if a city has a prominent aging population who are homeowners but live on fixed incomes, it may consider implementing a home beautification assistance program.

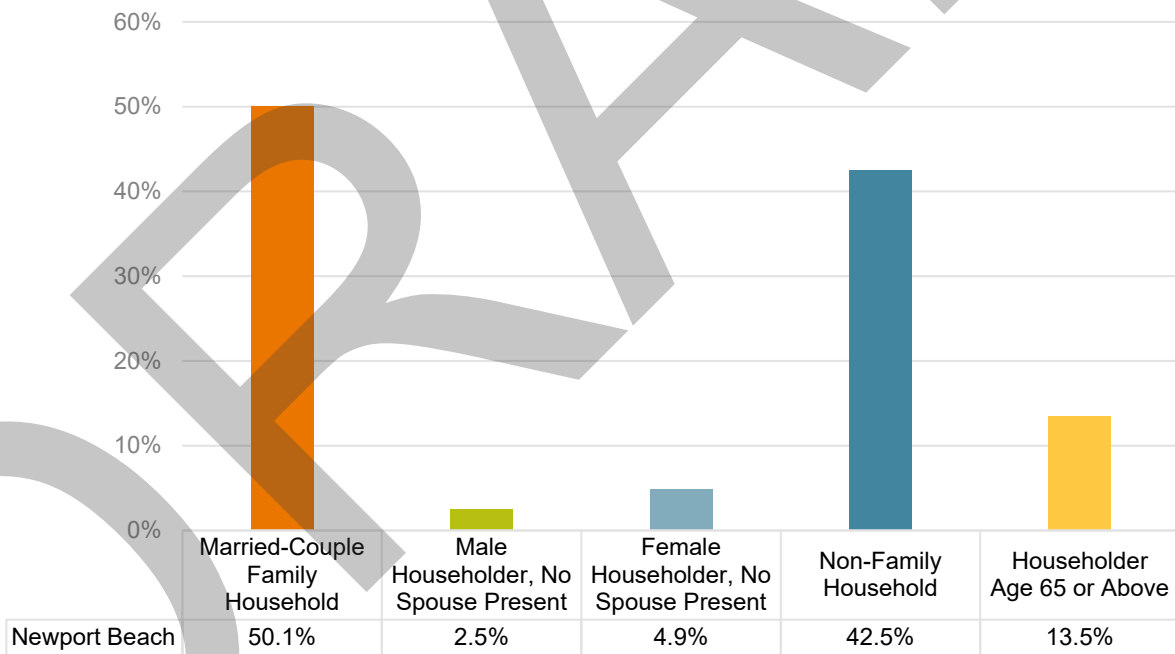

1. Household Type and Size

Newport Beach contains 37,870 total households, which is the second smallest household amount behind Laguna Beach with 10,542 total households. Female households with no spouse present represent the lowest amount at 4.9 percent and is 6.9 percent below the regional percentage. Orange County has 28.2 percent non-family households, but all cities in this area, including Newport Beach, have percentages that exceed 33 percent. Newport Beach non-family households account for the second largest percentage at 42.5 percent. When combined with senior households over the age of 65 and living alone, as shown in **Figure 2-3**, it amounts to 56 percent of households in the City. These two groups of people tend to occupy apartments or smaller age centric living areas and would also be considered in determining housing needs.

| Jurisdiction | Married-couple Family Households | % of Total Households | Female Householder, No Spouse Present | % of Total Households | Non-Family Household | % of Total Households | Total Households |
|----------------------|----------------------------------|-----------------------|---------------------------------------|-----------------------|----------------------|-----------------------|------------------|
| Costa Mesa | 17,568 | 42.8% | 4,191 | 10.2% | 16,509 | 40.2% | 41,019 |
| Newport Beach | 18,965 | 50.1% | 1,870 | 4.9% | 16,088 | 42.5% | 37,870 |
| Huntington Beach | 37,588 | 48.9% | 8,263 | 10.8% | 26,961 | 35.1% | 76,821 |
| Laguna Beach | 5,116 | 48.5% | 539 | 5.1% | 4,537 | 43% | 10,542 |
| Irvine | 51,682 | 54.2% | 8,418 | 8.8% | 31,636 | 33.2% | 95,371 |
| Orange County | 564,685 | 54.7% | 121,753 | 11.8% | 290,652 | 28.2% | 1,032,373 |

Source: American Community Survey, 5-Year Estimates, 2018

Figure 2-3: Newport Beach Household Characteristics in Percent, 2018

Source: American Community Survey, 5-Year Estimates, 2018.

Table 2-10 below illustrates the changes in household types between 2010 and 2018. During these years, Newport Beach experienced a growth in population of married-couple family households (5.3 percent) and of householders 65 years and over who live alone (5.5 percent). Non-family households dropped by 4.2 percent in the same time period, with 3.8 percent occurring between 2010 and 2015. In 2010, non-family households were the largest household type in Newport Beach at 46.7 percent, but in 2018 the married-couple family households became the largest with 47.6 percent of the population.

| Table 2-10: Changes in Household Types, 2010-2018 | | | | | | |
|---|--------|---------|--------|---------|--------|---------|
| | 2010 | Percent | 2015 | Percent | 2018 | Percent |
| Married-couple Family Households | 16,936 | 44.8% | 18,122 | 47.6% | 18,965 | 50.1% |
| Female Household, No Spouse Present | 2,155 | 5.7% | 2,665 | 7.0% | 1,870 | 4.9% |
| Male Household, No Spouse Present | 1,058 | 2.8% | 990 | 2.6% | 947 | 2.5% |
| Non-Family Household | 17,654 | 46.7% | 16,332 | 42.9% | 16,088 | 42.5% |
| Householder 65 Years and Over | 3,024 | 8.0% | 4,797 | 12.6% | 5,112 | 13.5% |
| Total Households | 37,803 | 100% | 38,071 | 100% | 37,870 | 100% |
| Source: American Community Survey, 5-Year Estimates, 2010, 2015 and 2018. | | | | | | |

Newport Beach represents 1 of the smallest average household sizes in the area, as shown in **Table 2-11**. The average household size for the region is 3 persons and the average household size for the City is 2.2 persons per home. All the neighboring cities have comparable household sizes under the regional amount.

| Table 2-11: Average Household Size | |
|--|-------------------------------|
| Jurisdiction | Average Persons per Household |
| Costa Mesa | 2.7 |
| Newport Beach | 2.2 |
| Huntington Beach | 2.6 |
| Laguna Beach | 2.1 |
| Irvine | 2.6 |
| Orange County | 3 |
| Source: California Department of Finance – Population and Housing Estimates, 2018. | |

2. Household Income

Household income is an indicator of housing needs in a community because household income is directly connected to affordability. As household income increases, it is more likely that the household can afford market rate housing units, larger units and/or pursue ownership opportunities. However, as household income decreases, households tend to pay a disproportionate amount of their income for housing. This may influence increased incidences of overcrowding and substandard living conditions.

The California State Department of Housing and Community Development (HCD) has identified the following income categories based on the Area Median Family Income (AMFI) of Orange County:

- + **Extremely Low-income:** households earning up to 30 percent of the AMFI
- + **Very Low-income:** households earning between 31 and 50 percent of the AMFI

- + **Low-income:** households earning between 51 percent and 80 percent of the AMFI
- + **Moderate Income:** households earning between 81 percent and 120 percent of the AMFI
- + **Above Moderate Income:** households earning over 120 percent of the AMFI

Combined, the extremely low, very low, and low-income groups are referred to as lower income.¹

Comprehensive Housing Affordability Strategy (CHAS) estimates based on 2006-2017 American Community Survey (ACS) data is used below. **Table 2-12** shows a greater percentage of homeowners (57 percent) than renters (43 percent) in Newport Beach. Just under 70 percent of households are estimated to have a moderate or above income and 21.6 percent earn a lower income. A greater number of renters are estimated to earn a lower income than of homeowners. About 60 percent of households in the extremely low-income category identified as renters, as for very low- and low-income households. Homeownership was more likely for households in the moderate or above moderate-income groups.

| Table 2-12: Households by Income Category, 2013-2017 | | | | | | |
|--|---------------|----------------|---------------|----------------|-------------------|----------------|
| Income Category (% of County AMI) | Owner | | Renter | | Households | |
| | Total | Percent | Total | Percent | Total | Percent |
| Extremely Low (30% AMFI or less) | 1,575 | 40.8% | 2,280 | 59.2% | 3,855 | 10.15% |
| Very Low (31 to 50% AMFI) | 1,310 | 40.1% | 1,960 | 59.9% | 3,270 | 8.61% |
| Low (51 to 80% AMFI) | 1,920 | 42.9% | 2,550 | 57.1% | 4,470 | 11.77% |
| Moderate or Above (over 80% AMFI) | 16,840 | 63.8% | 9,540 | 36.2% | 26,380 | 69.5% |
| Total | 21,645 | 57.0% | 16,325 | 43.0% | 37,970 | 100% |
| <i>Source: Department of Housing and Urban Development (HUD) Comprehensive Housing Affordability Strategy (CHAS), 2013-2017.</i> | | | | | | |

The ACS 2018 data shown in **Figure 2-4** below depicts median household income for Newport Beach, surrounding jurisdictions, and the County of Orange. The figure shows a much higher median household income in the City that exceeds the regional median by \$37,311 annually. At \$122,709, Newport Beach has the highest median household income than any of the neighboring cities. Laguna Beach is in close second with an annual median household income of \$121,474. Costa Mesa is the only nearby city with a median household income below the regional median and \$43,502 below Newport Beach. **Table 2-13** also compares median household incomes by percent points above or below the regional amount. All cities around Newport Beach, except for Costa Mesa, exceed the Orange County median household income of \$85,398.

¹ Federal housing and community development programs typically assist households with incomes up to 80 percent of the AMFI and use different terminology. For example, the Federal Community Development Block Grant (CDBG) program refers households with incomes between 51 and 80 percent AMFI as moderate income (compared to low-income based on State definition).

Figure 2-4: Median Household Income by City, 2018

Source: American Community Survey, 5-Year Estimates, 2018.

| Table 2-13: Median Household Income | | |
|-------------------------------------|------------------|-------------------------------------|
| Jurisdiction | Median Income | Percent Above/Below Regional Median |
| Costa Mesa | \$79,207 | -7.2% |
| Newport Beach | \$122,709 | 43.7% |
| Huntington Beach | \$91,318 | 6.9% |
| Laguna Beach | \$121,474 | 42.2% |
| Irvine | \$95,371 | 11.7% |
| Orange County | \$85,398 | 100% |

Source: American Community Survey, 5-Year Estimates, 2018.

Further explaining the income gap between Orange County and Newport Beach is an income breakdown for the City in **Figure 2-5**. Most employed City residents fall in the high-income category as about 31 percent of residents earn \$200,000 per year and 60 percent earn over \$100,000. About 15 percent of the Newport Beach population earns under \$35,000 annually.

Figure 2-5: Newport Beach Income Breakdown by Income Category

Source: American Community Survey, 5-Year Estimates, 2018.

D. Housing Problems

The Comprehensive Housing Affordability Strategy (CHAS) developed by the Census Bureau for the Department of Housing and Urban Development (HUD) provides detailed information on housing needs by income level for different types of households in Newport Beach. The most recent available CHAS data for the City was published in August 2020 and was based on 2006-2017 ACS data. Housing problems considered by CHAS included:

- + Units with physical defects (lacking complete kitchen or bathroom);
- + Overcrowded conditions (housing units with more than one person per room);
- + Housing cost burdens, including utilities, exceeding 30 percent of gross income; or
- + Severe housing cost burdens, including utilities, exceeding 50 percent of gross income.

As is the case with many cities, there is strong variation between homeowners and renters who experience housing problems in the City, as shown in **Table 2-14**. Of all homeowners in the City, 35.3 percent experience at least one housing problem, while 45.1 percent of renters experience one these problems. Over half of all households in the City have at least one housing problem (58.5 percent).

Severe housing problems are comprised of incomplete kitchen facilities, incomplete plumbing facilities, more than 1.5 persons per room, and a cost burden greater than 50 percent. The CHAS reports that just under a quarter of Newport Beach households experience at least one of these problems (23 percent). Similarly to general housing problems, renters here are also more likely to be affected; in the City, 27.2 percent of renter-occupied units are subject to at least one severe housing problem. A lower – yet substantial – percentage of homeowners live with at least one severe housing problem (19.8 percent).

Table 2-14: Housing Problems Overview, 2013-2017

| Housing Problem Overview* | Owner | | Renter | | Total | |
|---|--------|-----------------------------|--------|------------------------------|--------|-----------------------------|
| | Count | Percent of owner households | Count | Percent of renter households | Count | Percent of total households |
| Household has at least 1 of 4 Housing Problems | 7,635 | 35.3% | 7,355 | 45.1% | 14,990 | 39.5% |
| Household has none of 4 Housing Problems | 13,835 | 63.9% | 8,365 | 51.2% | 22,200 | 58.5% |
| Cost Burden not available, no other problems | 175 | 0.8% | 610 | 3.7% | 785 | 2.1% |
| Total | 21,645 | 57.0% | 16,325 | 43.0% | 37,970 | 100.0% |
| Severe Housing Problem Overview** | Owner | | Renter | | Total | |
| | Count | Percent owner households | Count | Percent of renter households | Count | Percent of total households |
| Household has at least 1 of 4 Severe Housing Problems | 4,285 | 19.8% | 4,435 | 27.2% | 8,720 | 23.0% |
| Household has none of 4 Severe Housing Problems | 17,180 | 79.4% | 11,285 | 69.1% | 28,465 | 75.0% |
| Cost Burden not available, no other problems | 175 | 0.8% | 610 | 3.7% | 785 | 2.1% |
| Total | 21,645 | 57.0% | 16,325 | 43.0% | 37,970 | 100% |
| * The four housing problems are: incomplete kitchen facilities, incomplete plumbing facilities, more than 1 person per room, and cost burden greater than 30%. | | | | | | |
| ** The four severe housing problems are: incomplete kitchen facilities, incomplete plumbing facilities, more than 1.5 persons per room, and cost burden greater than 50%. | | | | | | |
| Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) 2013-2017. | | | | | | |

1. Overcrowding

“Overcrowding” is generally defined as a housing unit occupied by more than one person per room in house (including living room and dining rooms, but excluding hallways, kitchen, and bathrooms). An overcrowded household results from either a lack of affordable housing, which forces more than one household to live together, and/or a lack of available housing units of adequate size. Overcrowding can indicate that a community does not have an adequate supply of affordable housing, especially for large families. However, overcrowding can also be a result of different cultural or demographic housing preferences. For example, the option to live with an existing family member in a new country may be an opportunity for an immigrant family or person to transition from an old home to a new one securely and help maintain cultural values.

Overcrowded and severely overcrowded households can lead to neighborhood deterioration due to the intensive use of individual housing units leading to excessive wear and tear, and the potential cumulative overburdening of community infrastructure and service capacity. Overcrowding in neighborhoods can lead to an overall decline in social cohesion and environmental quality. Such decline can often spread geographically and impact the quality of life and the economic value of property and the vitality of commerce within a city. The combination of lower incomes and high housing costs result in many households living in overcrowded housing conditions.

Table 2-15: Overcrowding by Tenure, 2018

| Tenure | Overcrowded Housing Units (1.0 to 1.50 persons/room) | | Severely Overcrowded Housing Units (>1.51 persons/room) | | Total Overcrowded Occupied Housing Units | |
|--------------------|---|---|---|---|---|---|
| | Number of Units | Percent of Total Occupied Housing Units | Number of Units | Percent of Total Occupied Housing Units | Number of Units | Percent of Total Occupied Housing Units |
| Owner Occupied | 65 units | 0.2% | 0 units | 0% | 65 units | 0.2% |
| Renter Occupied | 252 units | 0.7% | 253 units | 0.7% | 505 units | 1.3% |
| Total | 317 units | 0.8% | 253 units | 0.7% | 570 units | 1.5% |

Source: American Community Survey, 5-Year Estimates, 2018.

Table 2-15 breaks down the severity of overcrowding in Newport Beach by household tenure. As the table shows, there is a very low percentage of units that are overcrowded (1.5 percent). About 80 percent of those overcrowded units are renter-occupied, with 1.3 percent of households being overcrowded and severely overcrowded. Only 0.2 percent of owner-occupied units exceed 1 person per bedroom. In comparison to the surrounding cities, as outlined in **Table 2-16**, Newport Beach has kept the lowest percentages of overcrowding for both renters and homeowners. Costa Mesa reported the largest total percentage of overcrowded cities (9 percent), which is 7.5 percent over that of Newport Beach. Orange County reported 21,800 overcrowded units and 8.9 percent of total households.

Table 2-16: Overcrowded Housing Units by Tenure, 2018

| Jurisdiction | Owner Occupied Overcrowded Units (>1.0 persons/room) | | Renter Occupied Overcrowded Units (>1.0 persons/room) | |
|----------------------|---|------------------------------------|--|------------------------------------|
| | Number of Units | Percent of Total Occupied Units | Number of Units | Percent of Total Occupied Units |
| Costa Mesa | 435 units | 1.1% | 3,251 units | 7.9% |
| Newport Beach | 65 units | 0.2% | 505 units | 1.3% |
| Huntington Beach | 557 units | 0.7% | 2,291 units | 3.0% |
| Laguna Beach | 62 units | 0.6% | 127 units | 1.2% |
| Irvine | 958 units | 1.0% | 4,921 units | 5.2% |
| Orange County | 21,800 units | 2.1% | 69,713 units | 6.8% |

2. Overpayment (Cost Burden) In Relationship to Income

State and federal standards indicate that a household paying more than 30 percent of its income for housing is overpaying. Overpayment for housing can cause an imbalance on the remainder of a household's budget.

As reported by the CHAS and presented in **Table 2-18**, a large portion of households are subject to some form of overpayment in Newport Beach. Renters in the City represent a greater portion of the community that is overpaying for housing, but homeowners are 12 percent behind and exceed renters in total count – there are 11,810 homeowners overpaying and 10,880 renters overpaying for housing. Homeowners who earn over 100 percent of the HUD area median family income (AMFI), and are considered high income, make up the largest group experiencing cost burdens greater than 30 percent and 50 percent. For renters, those who experience housing burdens are those who earn a moderate to low income.

Table 2-17: Summary of Housing Overpayment, 2013-2017

| Income by Cost Burden* | Owner | | | | Renter | | | |
|---|-------------------|---------------|-------------------|---------------|-------------------|----------------|-------------------|----------------|
| | Cost Burden > 30% | % of Owner HH | Cost Burden > 50% | % of Owner HH | Cost Burden > 30% | % of Renter HH | Cost Burden > 50% | % of Renter HH |
| Household Income is less-than or = 30% | 1,335 | 6.2% | 1,225 | 5.7% | 1,485 | 9.1% | 1,455 | 8.9% |
| Household Income >30% to less-than or = 50% AMFI | 1,010 | 4.7% | 820 | 3.8% | 1,696 | 10.4% | 1,350 | 8.3% |
| Household Income >50% to less-than or = 80% AMFI | 1,210 | 5.6% | 815 | 3.8% | 1,980 | 12.1% | 910 | 5.6% |
| Household Income >80% to less-than or = 100% AMFI | 615 | 2.8% | 450 | 2.1% | 815 | 5.0% | 170 | 1.0% |
| Household Income >100% AMFI | 3,420 | 15.8% | 910 | 4.2% | 965 | 5.9% | 55 | 0.3% |
| Total | 7,590 | 35.1% | 4,220 | 19.5% | 6,940 | 42.5% | 3,940 | 24.1% |

* Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is "select monthly owner costs", which includes mortgage payment, utilities, association fees, insurance, and real estate taxes.

Note: AMFI = Area Median Family Income, this is the median family income calculated by HUD for each jurisdiction, to determine Fair Market Rents (FMRs) and income limits for HUD programs. AMFI will not necessarily be the same as other calculations of median incomes (such as a simple Census number), due to a series of adjustments that are made.

Source: Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) 2013-2017.

E. Special Needs Groups

State law recognizes that certain households may have more difficulty in finding adequate and affordable housing due to special circumstances. Special needs populations include seniors, persons with disabilities, female-headed households, large households, and farm workers.

Special circumstances may be related to one's employment and income, family characteristics, disability and household characteristics, or other factors. Consequently, certain residents in Newport Beach may experience higher incidences of housing overpayment (cost burden), overcrowding, or other housing problems. The special needs groups analyzed in the Housing Element include the elderly, persons with disabilities (including persons with developmental disabilities), people experiencing homelessness, single parents, large households, and farmworkers (**Table 2-18**). These groups may overlap, for example elderly people may also have a disability of some type. The majority of these special needs groups could be assisted by an increase in affordable housing.

| Table 2-18: Special Needs Groups in Newport Beach | | | |
|---|----------------------------------|------------------------------------|------------------------------------|
| Special Needs Groups | # of People or Households | Percent of Total Population | Percent of Total Households |
| Senior Headed Households (65 years and over) | 12,187 households | -- | 32.2% |
| Seniors | 19,574 persons | 22.7% | -- |
| Seniors Living Alone | 5,119 households | -- | 13.5% |
| Persons with Disabilities | 6,943 persons | 8.1% | -- |
| Large Households (5 or more persons per household) | 1,945 households | -- | 5.1% |
| Single-Parent Households | 1,358 households | -- | 3.6% |
| Single-Parent, Female Headed Households with Children (under 18 years) | 936 households | -- | 2.5% |
| People Living in Poverty | 5,670 persons | 6.6% | -- |
| Farmworkers* | 92 persons | 0.2% | -- |
| Persons Experiencing Homelessness** | 64 persons | 0.09% | -- |
| Student | 5,273 persons | 6.1% | -- |
| <p>*Farmworker data is taken of the population 16 years and over, not total population. ** The Everyone Counts report is updated annually, therefore the most recent data is from 2019, and there is no percentage of total population available. Source: American Community Survey, 5-Year Estimates, 2018 and Orange County Point in Time Count, Everyone Counts Report 2019.</p> | | | |

1. Seniors

The senior population, which is generally defined as those over 65 years of age, has several concerns: limited and fixed incomes, high healthcare costs, higher incidence of mobility and self-care limitations, transit dependency, and living alone. Specific housing needs of the senior population include affordable housing, supportive housing (such as intermediate care facilities), group homes, and other housing that includes a planned service component.

Newport Beach has the second largest population of seniors over the age of 65 at 22.7 percent, as shown in **Table 2-19**. This is 8.8 percent above the percentage for the County. Laguna Beach is reported to have the largest senior population of the area (23.3 percent) and Irvine has the lowest at 9.9 percent of its population.

| Table 2-19: Persons Age 65 and Over, 2018 | | |
|---|-------------------------|----------------|
| Jurisdiction | Population Count | Percent |
| Costa Mesa | 12,138 | 10.7% |
| Newport Beach | 19,574 | 22.7% |
| Huntington Beach | 34,002 | 16.9% |
| Laguna Beach | 5,398 | 23.3% |
| Irvine | 26,228 | 9.9% |
| Orange County | 440,488 | 13.9% |
| <i>Source: American Community Survey, 5-Year Estimates, 2018.</i> | | |

In addition to overpayment problems faced by seniors due to their relatively fixed incomes, many seniors are faced with various disabilities. In 2018, the American Community Survey (ACS) reported 4,134 seniors with disabilities. Among these disabilities, the most common were ambulatory disabilities, independent living disabilities and hearing disabilities.

2. Persons with Physical and Developmental Disabilities

Physical and developmental disabilities can hinder access to traditionally designed housing units, as well as potentially limit the ability to earn adequate income. Physical, mental, and/or developmental disabilities may deprive a person from earning income, restrict one's mobility, or make self-care difficult. Thus, persons with disabilities often have special housing needs related to limited earning capacity, a lack of accessible and affordable housing, and higher healthcare costs associated with a disability. Some residents suffer from disabilities that require living in a supportive or institutional setting.

Although no current comparisons of disability with income, household size, or race/ethnicity are available, it is reasonable to assume that a substantial portion of persons with disabilities would have annual incomes within Federal and State income limits. Furthermore, many lower income persons with disabilities are likely to require housing assistance and services. Housing needs for disabled persons are further compounded by design issues and location factors, which can often be costly. For example, special needs of households with wheelchair-bound or semi-ambulatory individuals may require ramps, holding bars, special bathroom designs, wider doorways, lower cabinets, elevators, and other interior and exterior design features.

Housing opportunities for persons with disabilities can be addressed through the provision of affordable, barrier-free housing. Rehabilitation assistance can be targeted toward renters and homeowners with disabilities for unit modification to improve accessibility.

The 2018 ACS identifies six disability types: hearing disability, vision disability, cognitive disability, ambulatory disability, self-care disability and independent living disability. The Census and the ACS provide clarifying questions to determine persons with disabilities and differentiate disabilities within the population. The ACS defines a disability as a report of one of the six disabilities identified by the following questions:

- + **Hearing Disability:** Is this person deaf or does he/she have serious difficulty hearing?
- + **Visual Disability:** Is this person blind or do they have serious difficulty seeing even when wearing glasses?
- + **Cognitive Difficulty:** Because of a physical, mental, or emotional condition, does this person have serious difficulty concentrating, remembering, or making decisions?
- + **Ambulatory Difficulty:** Does this person have serious difficulty walking or climbing stairs?
- + **Independent Living Difficulty:** Because of a physical, mental, or emotional condition, does this person have difficulty doing errands alone such as visiting a doctor's office or shopping?

| Table 2-20: Disability Status, 2018 | | | | | | |
|---|----------------------------|----------------------------|-------------------------------------|--------------|---------------------------------------|-----------------------------|
| Disability Type | Under 18 with a Disability | 18 to 64 with a Disability | 65 years and Over with a Disability | Total | Percent of Population with Disability | Percent of Total Population |
| Population with a Hearing Difficulty | 96 | 402 | 1,832 | 2,330 | 33.6% | 2.7% |
| Population with a Vision Difficulty | 60 | 561 | 909 | 1,530 | 22% | 1.8% |
| Population with a Cognitive Difficulty | 398 | 962 | 1,155 | 2,515 | 36.2% | 2.9% |
| Population with an Ambulatory Difficulty | 72 | 705 | 2,411 | 3,188 | 45.9% | 3.7% |
| Population with a Self-care Difficulty | 112 | 406 | 894 | 1,412 | 20.3% | 1.6% |
| Population with an independent Living Difficulty | -- | 714 | 1,885 | 2,599 | 37.4% | 3% |
| Total | 480 | 2,329 | 4,134 | 6,943 | 100% | 86,015 |
| *This number may double count as some persons report having one or more disabilities, therefore this total number differs from the total number of persons with a disability in Table 2-18. Source: American Community Survey, 5-Year Estimates, 2018. | | | | | | |

State law requires that the Housing Element discuss the housing needs of persons with developmental disabilities. As defined by federal law, “developmental disability” means a severe, chronic disability of an individual that:

- + Is attributable to a mental or physical impairment or combination of mental and physical impairments;
- + Is manifested before the individual attains age 22;
- + Is likely to continue indefinitely;
- + Results in substantial functional limitations in three or more of the following areas of major life activity: a) self-care; b) receptive and expressive language; c) learning; d) mobility; e) self-direction; f) capacity for independent living; or g) economic self-sufficiency; and
- + Reflects the individual’s need for a combination and sequence of special, interdisciplinary, or generic services, individualized supports, or other forms of assistance that are of lifelong or extended duration and are individually planned and coordinated.

Per Section 4512 of the Welfare and Institutions Code a "developmental disability" means a disability that originates before an individual attains age 18 years, continues, or can be expected to continue, indefinitely, and constitutes a substantial disability for that individual which includes intellectual disability, cerebral palsy, epilepsy, and autism. This term also includes disabling conditions found to be closely related to intellectual disability or to require treatment like that required for individuals with intellectual disability but shall not include other handicapping conditions that are solely physical in nature.

According to the Regional Center of Orange County’s (RCOC) *Total Annual Expenditures and Authorized Services for Fiscal Year 2019-2020*, a total of 25,163 individuals received services. RCOC represents the fifth largest regional center in California and has over 300 service coordinators. Of those who received services, 31.6 percent reported their race as White, 16 percent reported Asian, 16.1 percent reported Other Ethnicity or Race/Multi-Cultural, and 2 percent reported Black/African American. Approximately 34 percent of those who received services also reported their ethnicity as Hispanic or Latino. Ages of the 25,163 individuals includes 21.1 percent 2 years or younger, 39.9 percent 3 to 21 years, and 39 percent over the age of 22. The majority of those who received services lived at the home of a parent or guardian (82.3 percent), but 6.8 percent live in a Community Care Facility and 5.6 percent live in Independent Living or Supported Living. Diagnosis reported by the individuals who received services include the following:

- + Intellectual Disability: 37.6%
- + Autism: 31%
- + Cerebral Palsy: 2.5.%
- + Epilepsy: 1%
- + Category 5: 3.9%
- + Other: 24.1%

Many people with developmental disabilities can live and work independently within a conventional housing environment. Individuals with more severe developmental disabilities may require a group living environment where supervision is provided. The most severely affected individuals may require an institutional environment where medical attention and physical therapy are provided. Because developmental disabilities exist before adulthood, the first issue in supportive housing for persons with

developmental disabilities is the transition from the person's living situation as a child to an appropriate level of independence as an adult.

There are several housing types appropriate for people living with a development disability: rent-subsidized homes, licensed and unlicensed single-unit homes, inclusionary housing, Section 8 vouchers, special programs for home purchase, Department of Housing and Urban Development (HUD) housing, and SB 962 (veterans) homes. The design of housing-accessibility modifications, the proximity to services and transit, and the availability of group living opportunities represent some of the types of considerations that are important in serving the needs of this group. Incorporating 'barrier-free' design in all, new multi-unit housing (as required by California and Federal Fair Housing laws) is especially important to provide the widest range of choices for residents with disabilities. Special consideration should also be given to the affordability of housing, as people with disabilities may be living on a fixed income.

3. Large Households

Large households are defined as those consisting of five or more members. These households comprise a special need group because many communities have a limited supply of adequately sized and affordable housing units. To save for other necessities such as food, clothing, and medical care, it is common for lower income large households to reside in smaller units with inadequate number of bedrooms, which frequently results in overcrowding and can contribute to fast rates of deterioration.

Securing housing large enough to accommodate all members of a household is more challenging for renters because multi-unit rental units are typically physically smaller than single-unit ownership homes. While apartment complexes offering two and three bedrooms are common, apartments with four or more bedrooms are rare. It is more likely that large households will experience overcrowding in comparison to smaller households. Additionally, throughout the region, single-unit homes with higher bedroom counts, whether rental or ownership units, are rarely affordable to lower income households.

Table 2-21 outlines the number of large households in the City by tenure and household size. As is shown, the vast majority of large households are owner-occupied rather than rented (71.3 percent and 28.7 percent respectively). There are very few households with 7 or more persons in owner-occupied homes and none in rentals. Amongst all rental homes, 2.5 percent are 5-person households and amongst owned homes 4.4 percent are 5-person households.

| Household Size | Owner | | Renter | | Total | |
|---|--------------|----------------------------|------------|-----------------------------|--------------|----------------------|
| | Count | Percent of Total Owner HHs | Count | Percent of Total Renter HHs | Count | Percent of Total HHs |
| 5-Person Household | 933 | 4.4% | 417 | 2.5% | 1,350 | 3.6% |
| 6-person Household | 398 | 1.9% | 93 | 0.6% | 491 | 1.3% |
| 7+ person Households | 56 | 0.3% | 48 | 0.3% | 104 | 0.3% |
| Total | 1,387 | 71.3% | 558 | 28.7% | 1,945 | 100% |
| <i>Source: American Community Survey, 5-Year Estimates, 2018.</i> | | | | | | |

4. Single-Parent Households

Single-parent households often require special consideration and assistance due to their greater need for affordable and accessible day care, health care, and other supportive services. Many female-headed households with children are susceptible to having lower incomes than similar two-parent households. Single, female mothers often face social marginalization pressures that often limit their occupational choices and income earning potential, housing options and access to supportive services.

Table 2-22 shows there are few single parent households in Newport Beach (3.6 percent) as compared to 7.4 percent in Orange County. Most single-parent households in both the City and Orange County are headed by females without a spouse present – 68.9 percent in Newport Beach and 70.5 percent in Orange County. The percentage of single parents living in poverty in the City is half that of the regional percentage.

| Jurisdiction | Single Parent-Male, No Spouse Present | | Single Parent-Female, No Spouse Present | | Single Parent Households Living in Poverty | | Single Parent Households | |
|---------------|---------------------------------------|-----------------------|---|-----------------------|--|-----------------------|--------------------------|-----------------------|
| | Count | % of Single Parent HH | Count | % of Single Parent HH | Count | % of Single Parent HH | Count | % of Total Households |
| Newport Beach | 422 | 31.1% | 936 | 68.9% | 183 | 13.5% | 1,358 | 3.6% |
| Orange County | 22,456 | 29.5% | 53,659 | 70.5% | 22,999 | 30.2% | 76,115 | 7.4% |

Source: American Community Survey, 5-Year Estimates, 2018.

5. Farmworkers

Farmworkers are traditionally defined as persons whose primary incomes are earned through permanent or seasonal agricultural labor. Permanent farm laborers work in the fields, processing plants, or support activities on a generally year-round basis. When workload increases during harvest periods, the labor force is supplemented by seasonal workers, often supplied by a labor contractor. For some crops, farms may hire migrant workers, defined as those whose travel prevents them from returning to their primary residence every evening. Farm workers have special housing needs because they earn lower incomes than many other workers and move throughout the year from one harvest location to the next.

The United States Department of Agriculture, National Agriculture Statistics provides data on hired farm labor across the United States. The data is compiled at both a State and County level. Within Orange County, a total of 99 farms reportedly hired 1,772 workers in 2017. Permanent workers, those who work 150 days or more, represent the largest category of workers with 1,106 workers (62 percent). A total of 666 workers (38 percent) are considered seasonal and work less than 150 days. Orange County reported 340 migrant workers (19 percent) with full time hired labor in 2017. In addition, the County reported 176 unpaid workers.

2018 ACS 5-Year Estimates data reports a total of 92 Newport Beach residents employed in the agriculture, forestry, fishing, hunting, and mining industry. The median annual wage for these industries is \$27,472 and falls below 50 percent of the median income for Orange County (32 percent).

6. Extremely Low-income Households and Poverty Status

The 2013-2017 Comprehensive Housing Affordability Strategy (CHAS) indicates that there are 3,270 low-income households living in Newport Beach. Very low-income households earn 50 percent of less of the area median family income (AMFI) for Orange County. Extremely low-income households earn less than 30 percent of the AMFI. There are approximately 3,855 extremely low-income households in the City, including both renters and homeowners. **Table 2-23** below shows a breakdown of housing problems for Newport Beach households by income category.

Table 2-23 shows that about 10 percent more renters live with at least one housing problem. More lower income renters report a housing problem – 9.2 percent with extremely low income, 10.6 percent with very low income, and 12.5 percent with low income. About 45 percent of renters experience one or more housing problems. Homeowners typically report less of a cost burden than renters. In Newport Beach, 35.3 percent of homeowners have at least one housing problem. The majority of those are in above-moderate income households (15.9 percent). In total, for both renters and homeowners, 39.5 percent of households have at least one housing problem.

While representing only 0.8 percent of the Newport Beach population, people who identify as Black have the highest rates of poverty in the City, as illustrated in **Figure 2-6**. Similarly, American Indian/Alaska Natives and Native Hawaiian/other Pacific Islanders make up the smallest population percentages (0.3 percent and 0.2 percent, respectively) and together account for over 20 percent of those living below the poverty line. Values in the bar graph below contrasted to racial and ethnic composition of the City illustrate critical differences in housing needs.

Figure 2-6: Percent below Poverty Level, by Race and Hispanic or Latino Origin

Source: American Community Survey, 5-Year Estimates, 2018.

Note: The chart reports percentage of own population who are reported to have incomes below poverty level.

Table 2-23: Housing Problems for All Households by Income Category, 2013-2017

| Income Category | Owner | | | | | |
|---|--|----------------|--|----------------|---|----------------|
| | Household has at least 1 of 4 Housing Problems | % of Owner HH | Household has none of 4 Housing Problems | % of Owner HH | Cost Burden not available, no other Housing Problem | % of Owner HH |
| Household Income is less-than or = 30% | 1,335 | 6.2% | 65 | 0.3% | 175 | 0.8% |
| Household Income >30% to less-than or = 50% AMFI | 1,020 | 4.7% | 290 | 1.3% | 0 | 0.0% |
| Household Income >50% to less-than or = 80% AMFI | 1,215 | 5.6% | 705 | 3.3% | 0 | 0.0% |

7. Persons Experiencing Homelessness

Throughout the country and Orange County region, homelessness has become an increasingly important issue. Factors contributing to the rise in homelessness include, increased unemployment and underemployment, a lack of housing affordable to lower and moderate-income persons (especially extremely low-income households), reductions in public subsidies to the poor, and the de-institutionalization of the mentally ill.

State law mandates that cities address the special needs of persons experiencing homelessness within their jurisdictional boundaries. "Homelessness" as defined by the U.S. Department of Housing and Urban Development (HUD) has recently been updated, the following lists the updated descriptions and the changes in the definition from HUD:

- + People who are living in a place not meant for human habitation, in emergency shelter, in transitional housing, or are exiting an institution where they temporarily resided. The only significant change from existing practice is that people will be considered homeless if they are exiting an institution where they resided for up to 90 days (it was previously 30 days) and were in shelter or a place not meant for human habitation immediately prior to entering that institution.
- + People who are losing their primary nighttime residence, which may include a motel or hotel or a doubled-up situation, within 14 days and lack resources or support networks to remain in housing. HUD had previously allowed people who were being displaced within 7 days to be considered homeless. The proposed regulation also describes specific documentation requirements for this category.
- + Families with children or unaccompanied youth who are unstably housed and likely to continue in that state. This is a new category of homelessness, and it applies to families with children or unaccompanied youth who have not had a lease or ownership interest in a housing unit in the last 60 or more days, have had 2 or more moves in the last 60 days, and who are likely to continue to be unstably housed because of disability or multiple barriers to employment.
- + People who are fleeing or attempting to flee domestic violence, have no other residence, and lack the resources or support networks to obtain other permanent housing. This category is similar to the current practice regarding people who are fleeing domestic violence.

This definition does not include persons living in substandard housing (unless it has been officially condemned); persons living in overcrowded housing (for example, doubled up with others); persons being discharged from mental health facilities (unless the person was homeless when entering and is considered to be homeless at discharge); or persons who may be at risk of homelessness (for example, living temporarily with family or friends.)

The Point in Time Count is conducted by the County of Orange in accordance with the U.S. Department of Housing and Urban Development (HUD) guidelines to provide information on where individuals

experiencing homelessness are in the County. About 1,167 volunteers across the County counted 6,860 individuals experiencing homelessness. Of those, 2,899 were sheltered and 3,961 were unsheltered. The 2020 Count is not yet available online, therefore this data is based on the Count conducted in January 2019 – the individual city results are shown in **Table 2-24**. Of the nearby cities, Newport Beach had the lowest count and percentage of people experiencing homelessness (64 individuals and 0.9 percent of the County). Huntington Beach recorded the greatest percentage at 5.1 percent. Of all those reported in Orange County, 5 percent were veterans, 4 percent were transitional youth ages 18 to 24, and 9 percent were seniors over the age of 65.

| Table 2-24: Homeless Count by Jurisdiction, 2019 | | | | |
|--|--------------------|------------------|--------------|--------------------|
| Jurisdiction | Unsheltered | Sheltered | Total | % of County |
| Costa Mesa | 187 | 6 | 193 | 2.8% |

8. Students

Student housing often only produces a temporary housing need based on the duration of the educational institution enrolled in. The impact upon housing demand is critical in areas that surround universities and colleges. Located in Newport Beach is Coastline College, and colleges near the City include University of California, Irvine; Concordia University; Orange Coast College; Vanguard University; Laguna College of Art and Design; SOKA University; and Irvine Valley College. Students enrolled in undergraduate and graduate programs, make up about 6 percent of the total population of Newport Beach. Typically, students are low-income and are, therefore, affected by a lack of affordable housing, especially within easy commuting distance from campus, therefore it is important for the City to consider and accommodate the student population within the community. They often seek shared housing situations to decrease expenses and can be assisted through roommate referral services offered on and off campus. A lack of affordable housing also influences choices students make after graduating.

F. Housing Stock Characteristics

The characteristics of the housing stock, including growth, type, availability and tenure, age and condition, housing costs, and affordability contribute to the housing needs for the community. This section details the housing characteristics of Newport Beach to identify how well the current housing stock meets the needs of its current and future residents.

1. Housing Growth

According to the American Community Survey (ACS), the City's housing stock grew by 1,298 units between 2010 and 2018 (**Table 2-25**). This 2.9 percent increase was the second largest in this area, behind the City of Irvine which had a dramatically larger gain of 31 percent. Orange County as a whole experienced a 4.6 percent housing stock increase during this same time period, which is 1.7 percent more than Newport Beach. The City of Costa Mesa had smaller percent change than Newport Beach by 2.3 percent.

| Jurisdiction | 2010 | 2015 | 2018 | Percent Change 2010 to 2015 | Percent Change 2015 to 2018 |
|----------------------|---------------|---------------|---------------|-----------------------------|-----------------------------|
| Costa Mesa | 42,867 | 43,030 | 43,100 | 0.4% | 0.2% |
| Newport Beach | 43,503 | 43,690 | 44,801 | 0.4% | 2.5% |
| Huntington Beach | 79,166 | 78,252 | 81,396 | -1.2% | 4.0% |
| Laguna Beach | 13,243 | 13,433 | 13,487 | 1.4% | 0.4% |
| Irvine | 76,184 | 91,938 | 101,434 | 20.7% | 10.3% |
| Orange County | 1,042,254 | 1,064,642 | 1,091,376 | 2.1% | 2.5% |

Source: American Community Survey, 5-Year Estimates, 2010, 2015, and 2018.

2. Housing Type

Table 2-26 is a breakdown of housing units by type in Newport Beach in contrast to Orange County. The table reflects data from the American Community Survey which is estimates based on the U.S. Census and surveys. A large percentage of housing units in the City come from single unit detached homes (47.8 percent). Single unit attached homes typically do not take up a large portion of the housing stock, but in Newport Beach they account for 16.1 percent of all units. Another 34.5 percent is multi-unit housing, which is the same for the County as well. Mobile homes are the smallest category of housing types with 1.5 percent of all units. It is important to provide a wide variety of housing types throughout the City in order to ensure all housing needs for the population are met.

| Jurisdiction | Single-Unit Detached | | Single-Unit Attached | | Multi-Unit | | Mobile Homes | |
|----------------------|----------------------|--------------|----------------------|--------------|---------------|--------------|--------------|-------------|
| | Count | Percent | Count | Percent | Count | Percent | Count | Percent |
| Newport Beach | 21,399 | 47.8% | 7,234 | 16.1% | 15,437 | 34.5% | 390 | 1.5% |
| Orange County | 553,164 | 50.7% | 133,326 | 12.2% | 374,176 | 34.3% | 30,227 | 2.8% |

Source: American Community Survey, 5-Year Estimates, 2018.

3. Housing Availability and Tenure

Housing tenure and vacancy rates generally influence the supply and cost of housing. Housing tenure defines if a unit is owner-occupied or renter occupied. Tenure is an important market characteristic as it relates to the availability of housing product types and length of tenure. The tenure characteristics in a community can indicate several aspects of the housing market, such as affordability, household stability, and availability of unit types, among others. In many communities, tenure distribution generally correlates with household income, composition, and age of the householder.

In 2018, owner-occupied units accounted for 56.5 percent of the Newport Beach housing stock and 43.5 percent were rentals (**Table 2-27**). Of the owner-occupied units, the large majority were single unit detached homes (71.6 percent) and the smallest percentage was of mobile homes (1.1 percent). As is often the case, multi-unit homes accounted for over half of all rentals (67.9 percent) and only 17 percent of rental units were single unit detached homes. Mobile homes are more likely to be occupied by renters, as the Table 2-8 shows.

| Table 2-27: Occupied Housing Units by Type and Tenure | | | | | |
|--|-----------------------------|-----------------------------|-------------------|---------------------|---|
| Tenure | Single-Unit Detached | Single-Unit Attached | Multi-Unit | Mobile Homes | Total Occupied Units¹ |
| Owner Occupied | 71.6% | 19.5% | 7.8% | 1.1% | 56.5% |
| Renter Occupied | 17.1% | 12.7% | 67.9% | 2.2% | 43.5% |
| Total | 47.9% | 16.5% | 34.1% | 1.6% | 100% |
| ¹ Note: The data shows the percent of total occupied units. Source: American Community Survey, 5-Year Estimates, 2018. | | | | | |

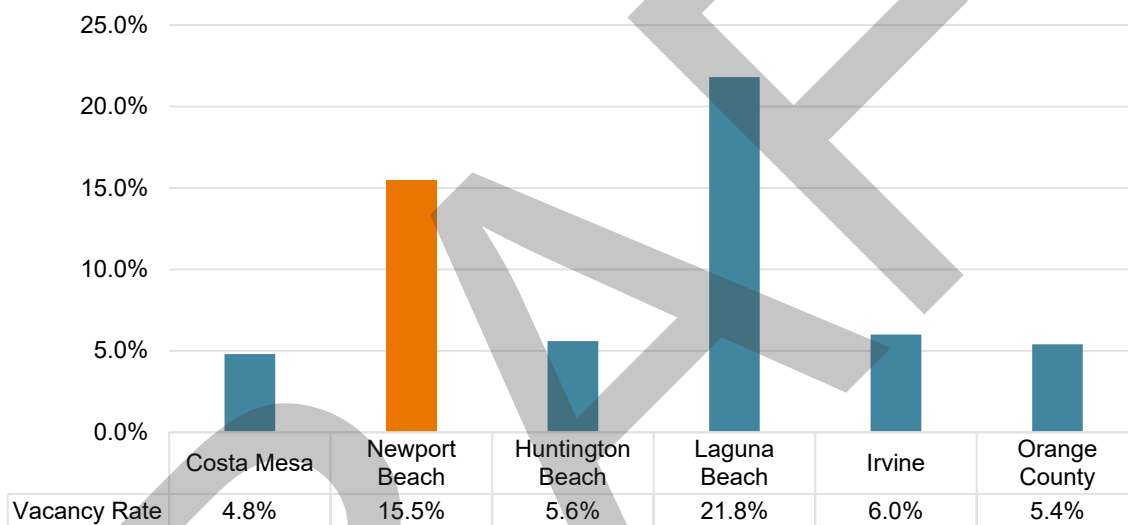

| Table 2-28: Average Household Size by Tenure, 2018 | | | | |
|--|--|-------------------------------------|---|--------------------------------------|
| Jurisdiction | Owner Occupied Households (% of Total Households) | Average Owner Household Size | Renter Occupied Households (% of Total Households) | Average Renter Household Size |
| Costa Mesa | 39.1% | 2.8 | 60.9% | 2.7 |
| Newport Beach | 56.5% | 2.5 | 43.5% | 2 |
| Huntington Beach | 57.8% | 2.6 | 42.2% | 2.6 |
| Laguna Beach | 60.7% | 2.3 | 39.3% | 2 |
| Irvine | 47.3% | 2.8 | 52.7% | 2.6 |
| Orange County | 57.4% | 3 | 42.6% | 3.1 |
| Source: American Community Survey, 5-Year Estimates, 2018. | | | | |

To identify housing trends and potential population needs, **Table 2-28** compares average household sizes and tenure amongst the cities surrounding Newport Beach. Renters in the City have one of the lowest average household sizes at just 2 people per home. Homeowners in Newport Beach also have the second smallest number of people per household after Laguna Beach with 2.3 people per home. The County

average is 3.1 persons for rentals and 3 persons for owner-occupied homes. **Figure 2-7** illustrates vacancy rates by jurisdiction and shows that Newport Beach has the second largest percentage of vacant homes at 15.5 percent. The City's vacancy rate is 3 times that of Orange County.

Vacancy rates indicate the degree of choice available. High vacancy rates usually indicate low demand and/or high supply conditions in the housing market. Too high of a vacancy rate can be difficult for owners trying to sell or rent. Low vacancy rates usually indicate high demand and/or low supply conditions in the housing market. Too low of a vacancy rate can force prices up making it more difficult for lower and moderate-income households to find housing. Vacancy rates of between 2 to 3 percent are usually considered healthy for single-unit or ownership housing, and rates of 5 to 6 percent are usually considered healthy for multi-unit or rental housing.

Figure 2-7: Vacancy Rate by Jurisdiction, 2018

Source: American Community Survey, 5-Year Estimates, 2018.

The most common reason for vacancies in Newport Beach is due to homes being used seasonally, or for recreation or occasional use (48.3 percent), as shown in **Table 2-29**. These 3,350 homes are not permanent residences and remain empty for most of the year. Homes for rent are the second most common reason for vacancies in the City at 22.4 percent.

| Table 2-29: Type of Vacant Housing Units in Newport Beach | | |
|---|----------|---------|
| Type of Housing | Estimate | Percent |
| For rent | 1,551 | 22.4% |
| Rented, not occupied | 292 | 4.2% |
| For sale only | 370 | 5.3% |
| Sold, not occupied | 499 | 7.2% |
| For seasonal, recreational, or occasional use | 3,350 | 48.3% |
| Other vacant | 869 | 12.5% |
| Total | 6,931 | 100% |

Source: American Community Survey, 5-Year Estimates, 2018.

4. Housing Age and Condition

Housing age can be an indicator of housing condition within a community. For example, housing that is over 30 years old is typically in need of some major rehabilitation, such as a new roof, foundation, plumbing, etc. Many federal and state programs also use the age of housing as one factor in determining housing rehabilitation needs.

In Newport Beach, most homes were built over 30 years ago (**Figure 2-8**). About 22.3 percent of the housing stock was built between 1970 and 1979, while only 2.7 percent was built after 2010. Another 8 percent of homes were also built prior to 1950. This reflects an aging housing stock that may need certain updates.

Figure 2-8: Age Distribution of Housing Stock

Source: American Community Survey, 5-Year Estimates, 2018.

Figure 2-9 below displays the 2018 ACS data for housing units by the year they were built sorted by tenure. According to the data, Newport Beach has mostly had a majority of owner-occupied units. The majority of the City’s housing stock was built before 1980 and is home to 32 percent of the City’s current homeowners. The greatest number of renters reside in housing units built between 1970 and 1979.

Figure 2-9: Housing Stock by Age of Structure and Tenure

Source: American Community Survey, 5-Year Estimates, 2018.

Figure 2-10 displays the 2018 ACS data for housing units by the year they were built for owners (left) and renters (right). That data shows that a greater concentration of renters reside in units built between 1970 and 1979 compared to other years and to homeowners. Less than 2 percent of renters and homeowners reside in units built after 2010. A greater number of homeowners live in units built between 1990 and 2009 than renters (9.1 percent more).

Figure 2-10: Housing Units by Year Built Owner (Left) and Renter (Right)

Source: American Community Survey, 5-Year Estimates, 2018.

5. Housing Costs and Affordability

Housing costs reflect the supply and demand of housing in a community. This section summarizes the cost and affordability of the housing stock to the City's residents.

Home values in Newport Beach are on median \$1,787,300, as shown in **Table 2-30**. This total is 2.7 times the median home value of Orange County and significantly larger than the nearby cities. Laguna Beach is second behind Newport Beach in home value with a median amount of \$1,700,400. Costa Mesa has the lowest median home value of \$707,600.

| Table 2-30: Median Home Value by Jurisdiction | |
|---|--------------------------|
| Jurisdiction | Median Home Value |
| Costa Mesa | \$707,600 |
| Newport Beach | \$1,787,300 |
| Huntington Beach | \$728,200 |
| Laguna Beach | \$1,700,400 |
| Irvine | \$797,100 |
| Orange County | \$652,900 |
| <i>Source: American Community Survey, 5-Year Estimates, 2018.</i> | |

Table 2-31 outlines the average monthly price of rent in Newport Beach and how it has changed between 2017 and 2020 depending on the number of bedrooms. This data is provided by the Zillow Rent Index Report for Newport Beach, and shows that all units experienced increases in rates in the last three years. One-bedroom rentals rose by 5.1 percent and the most out of 1-3-bedroom units. Two-bedroom units remained the most consistent with a slight increase of 1.4 percent. The price per square foot, however, saw a much greater increase for units with three or more bedrooms (9.8 percent). Zillow reports that one-bedroom units decreased from \$3.01 per square foot in 2017 to \$3 per square foot in 2020.

| Table 2-31: Change in Average Monthly Rental Rates, 2017-2020 | | | | | |
|---|---------------------|---------------------|---------------------|---------------------|---------------------------|
| Unit Type | January 2017 | January 2018 | January 2019 | January 2020 | % Change 2017-2020 |

Housing affordability can be inferred by comparing the cost of renting or owning a home in the City with the maximum affordable housing costs for households at different income levels. Taken together, this information can generally show who can afford what size and type of housing and indicate the type of households most likely to experience overcrowding and overpayment.

The Federal Department of Housing and Urban Development (HUD) conducts annual household income surveys nationwide to determine a household's eligibility for federal housing assistance. Based on this survey, the California Department of Housing and Community Development (HCD) developed income limits, based on the Area Median Family Income (AMFI), which can be used to determine the maximum price that could be affordable to households in the upper range of their respective income category. Households in the lower end of each category can afford less by comparison than those at the upper end. The maximum affordable home and rental prices for residents in Orange County are shown in **Table 2-32** and **Table 2-33**.

The data shows the maximum amount that a household can pay for housing each month without incurring a cost burden (overpayment). This amount can be compared to current housing asking prices (**Table 2-30**) and market rental rates (**Table 2-31**) to determine what types of housing opportunities a household can afford.

Extremely Low-income Households

Extremely low-income households earn less than 30 percent of the County AMFI – up to \$26,950 for a one-person household and up to \$41,550 for a five-person household in 2020. Extremely low-income households cannot afford market-rate rental or ownership housing in Newport Beach without assuming a substantial cost burden.

Very Low-income Households

Very low-income households earn between 31 percent and 50 percent of the County AMFI – up to \$44,850 for a one-person household and up to \$69,200 for a five-person household in 2020. A very low-income household cannot afford market-rate rental or ownership housing in Newport Beach without assuming a substantial cost burden. A very low-income household at the maximum income limit can afford to pay approximately \$1,121 to \$1,730 in monthly rent, depending on household size. Given the high cost of housing in the City, persons, or households of very low-income could not afford to rent or purchase a home in the City.

Low-income Households

Low-income households earn between 51 percent and 80 percent of the County's AMFI - up to \$71,750 for a one-person household and up to \$110,650 for a five-person household in 2020. The affordable home price for a low-income household at the maximum income limit ranges from \$308,500 to \$454,000. Based on the asking prices of homes for sale in 2020 (Table 2-30), ownership housing would not be affordable to low-income households. A one-person low-income household could afford to pay up to \$1,794 in rent per month and a five-person low-income household could afford to pay as much as \$2,766. Low-income households in Newport Beach would not be able to find adequately sized affordable apartment units (Table 2-31).

Moderate income Households

Persons and households of moderate income earn between 81 percent and 120 percent of the County's AMFI – up to \$133,500, depending on household size in 2020. The maximum affordable home price for a

moderate-income household is \$377,000 for a one-person household and \$558,600 for a five-person family. Moderate income households in Newport Beach would not be able to purchase a home in the City. The maximum affordable rent payment for moderate income households is between \$2,163 and \$3,338 per month. A one-person moderate-income household may be able to find some adequately sized affordable apartment units; larger households would not be able to afford to rent a unit in the City.

Table 2-32: Affordable Housing Costs for Owners in Orange County, 2020

| Annual Income | | Mortgage | Utilities ¹ | Tax and Insurance | Total Affordable Monthly Housing Cost | Affordable Purchase Price |
|--|-----------|----------|------------------------|-------------------|---------------------------------------|---------------------------|

Section 3:

HOUSING CONSTRAINTS, RESOURCES,
AND AFFIRMATIVELY FURTHERING FAIR
HOUSING

As common in many communities, a variety of constraints affect the provisions and opportunities for adequate housing in the City of Newport Beach. Housing constraints consist of both governmental constraints, including but not limited to land use controls, development fees and permitting fees, development standards, building codes and permitting processes; as well as, nongovernmental or market constraints, including but not limited to land costs, construction costs, and availability of finances. Combined, these factors create barriers to availability and affordability of new housing, especially for lower and moderate-income households.

A. Nongovernmental Constraints

Nongovernmental constraints largely affect the cost of housing in the City of Newport Beach and can produce barriers to housing production and affordability. These constraints include the availability and cost of land for residential development, the demand for housing, financing, and lending, construction costs, and the availability of labor, which can make it expensive for developers to build any housing, and especially affordable housing. The following highlights the primary market factors that affect the production of housing in Newport Beach.

1. Land Costs and Construction Costs

Construction costs vary widely according to the type of development, with multi-unit housing generally less expensive to construct than single-unit homes. However, there is variation within each construction type, depending on the size of the unit and the number and quality of amenities provided. An indicator of construction costs is Building Valuation Data compiled by the International Code Council (ICC). The International Code Council was established in 1994 with the goal of developing a single set of national model construction codes, known as the International Codes, or I-Codes. The ICC updates the estimated cost of construction at six-month intervals and provides estimates for the average cost of labor and materials for typical Type VA wood-frame housing. Estimates are based on “good-quality” construction, providing for materials and fixtures well above the minimum required by state and local building codes. In August 2020, the ICC estimated that the average per square-foot cost for good-quality housing was approximately \$118.57 for multi-unit housing, \$131.24 for single-unit homes, and \$148.44 for residential care/assisted living facilities. Construction costs for custom homes and units with extra amenities, run even higher. Construction costs are also dependent upon materials used and building height, as well as regulations set by the City’s adopted Building Code. For example, according to the ICC, an accessory dwelling unit (ADU) or converting a garage using a Type VB wood framed unit would cost about \$123.68 per square foot. Although construction costs are a significant portion of the overall development cost, they are consistent throughout the region and, especially when considering land costs, are not considered a major constraint to housing production in Newport Beach.

Land costs can also pose a significant constraint to the development of affordable and middle-income housing and represents a significant cost component in residential development. Land costs may vary depending on whether the site is vacant or has an existing use that must be removed. Similarly, site constraints such as environmental issues (e.g., steep slopes, soil stability, seismic hazards, flooding) can also be factored into the cost of land. There are approximately 6,000 acres of vacant and non-vacant

residential land (39.3 percent), out of approximately 15,238 acres of land in Newport Beach, which are not currently subject to land use constraints (airport restrictions, flood zone, fire high severity zone, NCCP conservation area, seismic hazard, and sea level rise). However, majority of the acres are developed and may require rezoning, reuse, and redevelopment due to a lack of vacant sites in the City. Additional costs may be associated with redeveloping and/or converting sites which may influence the cost of the rental units or home value.

A September 2020 web search, using the Orange County Market report, for lots for sale in the City of Newport Beach returned less than five vacant lots listed for sale. Of the lots listed, the costs ranged from \$600,000 for 0.075 acres near Santa Ana Heights (about \$183 per square foot), to \$4,995,000 0.27 acres with an ocean view (about \$430 per square foot). Larger vacant lots reached as high as \$9,995,000 for 0.77 acres inland (about \$295 per square foot) to \$10,500,000 for 0.51 acres of land (about \$474 per square foot) closer to the coast, but not coastal. According to the same report, in September coastal lots listed for sale in the City averaged \$8,000,000 for 0.6 acres. The cost of land in Newport Beach is higher than neighboring cities, such as Laguna Beach, where the median cost of land is about \$115 per square foot. Therefore, land and redevelopment costs in Newport Beach create a significant constraint to the development of housing, specifically affordable housing.

2. Availability Financing

The availability of financing in a community depends on several factors, including the type of lending institutions active in a community, lending practices, rates and fees charged, laws and regulations governing financial institutions, and equal access to such loans. Additionally, availability of financing affects a person's ability to purchase or improve a home. Under the Home Mortgage Disclosure Act (HMDA), lending institutions are required to disclose information on the disposition of loan applications and the income, gender, and race of loan applicants. The primary concern in a review of lending activity is to determine whether home financing is available to residents of a community. The data presented in this section include the disposition of loan applications submitted to financial institutions for home purchase, home improvement, and refinancing in Newport Beach.

Table 3-1 below displays the disposition of loan applications for the Anaheim-Santa Ana-Irvine Metropolitan Statistical Area/Metropolitan Division (MSA/MD), per the 2016 Home Mortgage Disclosure Act report. According to the data, applicants in the 120 percent median income or more had the highest rates of loans approved. Of that income category, applicants who reported White had the highest percentage of approval and the number of applications. Applicants in the less than 50 percent of the MSA/MD median income categories were showed higher percentages of denied loans than loans originated. According to the data, applicants who reported white were, on average, more likely to be approved for a loan than another race or ethnicity.

Given the relatively high rates of approval for home purchase, improvement, and refinance loans, home financing is generally available and not considered to be a significant constraint to the provision and maintenance of housing in Newport Beach.

Table 3-1: Disposition of Loan Applications by Race/Ethnicity– Anaheim-Santa Ana-Irvine MSA/MD

| Applications by Race/Ethnicity | Percent Approved | Percent Denied | Percent Other | Total (Count) |
|--|------------------|----------------|---------------|---------------|
| LESS THAN 50% OF MSA/MD MEDIAN | | | | |

3. Economic Constraints

Market forces on the economy and the trickle-down effects on the construction industry can act as a barrier to housing construction and especially to affordable housing construction. It is estimated that housing price growth will continue in the City and the region for the foreseeable future. Moving into 2020, the economy was growing, California was seeing a 1.6-percent growth in jobs from 2019 and experiencing all-time lows for unemployment rates. COVID-19 had stalled much of the economy in early 2020, however, as the California economy regains momentum housing stock and prices in the Newport Beach community remain stable.

A 2020 California Association of Realtors (CAR) report found that homes on the market in Orange County experienced a nine percent year to year increase and cost an average of \$880,000 in February 2020; almost \$300,000 higher than the State median home price in the same month (\$579,770). According to the CAR First Time Buyer Housing Affordability Index, from 2018 to 2019 the median value of a home in Orange County was \$703,800 with monthly payments (including taxes and insurance) of \$3,630, requiring an average qualifying income of \$108,900.

Homes and cost of living in Newport Beach was reported higher than the State median housing and living costs. According to September 2020 data from Zillow, the median home value of single-unit homes and condos in Newport Beach is \$2,407,454. According to Zillow's methodology, this value is seasonally adjusted to remove outliers and only includes the middle price-tier of homes. Newport Beach home values have gone up 0.7 percent over the past year and Zillow predicts they will rise 3.4 percent within the next year. Newport's home value index (\$2,407,454) has been on a steep and steady rise since early 2012, and according to a September 2020 forecasts, they are expected to increase slightly (estimated \$2,490,000) in 2021. Orange County by comparison has a median home value index of \$777,000, according to the same September 2020 report, which is significantly lower than the City of Newport. Forecasted home prices in the County, through 2021 are set to see minor increases (\$810,000). The cost of land and home prices in Newport are considered a major constraint to the development of and access to housing, particularly the development of and access to affordable housing.

B. Governmental Constraints

In addition to market constraints, local policies and regulations also affect the price and availability of housing and the provision of affordable housing. For example, State and Federal regulations affect the availability of land for housing and the cost of housing production, making it difficult to meet the demand for affordable housing and limiting supply in a region. Regulations related to environmental protection, building codes, and other topics have significant, often adverse, impacts on housing cost and availability.

While the City of Newport Beach has no control over State and Federal Laws that affect housing, local laws including land use controls, site improvement requirements, fees and exactions, permit processing procedures, and other factors can constrain the maintenance, development, and improvement of housing create barriers to housing.

1. Land Use Controls

In the State of California, cities are required to prepare a comprehensive, long term General Plan to guide future development. The Land Use Element of the General Plan establishes land uses of developments within the City of Newport Beach. The Land Use Element sets for policies and regulations for guiding local development. These policies, together with existing zoning regulations, establish the amount and distribution of land to be allocated for different uses within the City. The Land Use Element of the General Plan identifies the following residential and mixed-use categories:

- + **Single Unit Residential Detached (RS-D)**: The RS-D category applies to a range of detached single-unit residential dwelling units on a single legal lot and does not include condominiums or cooperative housing. The RS-D category permits a density range from 0.0 to 29.9 DU/AC.
- + **Single Unit Residential Attached (RS-A)**: The RS-A category applies to a range of attached single-unit residential dwelling units on a single legal lot and does not include condominiums or cooperative housing. The RS-A category permits a density range from 0.0 to 29.9 DU/AC.
- + **Two Unit Residential (RT)**: The RT category applies to a range of two-unit residential dwelling units such as duplexes and townhomes. The RT permits a density range from 0.0 to 39.9 DU/AC.
- + **Multiple Residential (RM)**: The RM designation is intended to provide for multi-unit residential development containing attached dwelling units. The RM permits a density range from 0.0 to 52.0 DU/AC.
- + **Multiple Residential Detached (RM-D)**: The RM-D designation is intended to provide primarily for multi-unit residential development exclusively containing detached dwelling units. The RM-D allows a 1.5 FAR where a minimum FAR 0.35 and maximum FAR of .5 may be used for nonresidential.
- + **Mixed-Use Vertical (MU-V)**: The MU-V designation is intended to provide for the development of properties for mixed use structures that vertically integrate housing with retail uses including retail, office, restaurant, and similar nonresidential uses. For mixed-use structures, commercial uses characterized by noise, vibration, odors, or other activities that would adversely impact on-site residential units are prohibited. The MU-V allows a 1.5 FAR where a minimum FAR 0.35 and maximum FAR of .5 may be used for nonresidential.
- + **Mixed-Use Horizontal (MU-H)**: The MU-H designation is intended to provide for the development of areas for a horizontally distributed mix of uses, which may include general or neighborhood commercial, commercial office, multi-unit residential, visitor-serving and marine-related uses, and/or buildings that vertically integrate residential with commercial uses. The MU-H allows a maximum FAR of 1.0 for residential.
- + **Mixed-Use Water Related (MU-W)**: The MU-W designation is intended to provide for commercial development on or near the bay in a manner that will encourage the continuation of coastal-dependent and coastal-related uses in accordance with the Recreational and Marine Commercial (CM) designation, as well as allow for the integrated development of residential. The MU-W permits a density range from 0.0 to 29.9 DU/AC.

These categories accommodate development of a wide range of housing types in Newport Beach. Furthermore, maintaining the existing residential categories is important for ensuring compatibility between the new and existing housing.

Local Coastal Program and Land Use Plan

The Local Coastal Program (LCP) is a coastal management plan that contains land use, development, public access, and resource protection policies and regulation to implement the California Coastal Act (Coastal Act). The LCP is comprised of a Land Use Plan (LUP) and an Implementation Plan (IP). The LUP serves in conjunction with, and is considered a legislative equivalent to, the City's General Plan Land Use Element to identify land uses in the Coastal Zone. The intent of this plan is to provide for land uses and residential density limits that protect coastal resources and public access. The LUP identifies the residential categories and densities provided in **Table 3-2**.

| Table 3-2: Coastal Land Use Plan Densities | |
|---|--------------------------------------|
| Land Use | Maximum Density Range per Lot |
| Single-Unit Residential Detached – RSD | |
| RSD-A | 0 – 5.9 units per acre |
| RSD-B | 6 – 9.9 units per acre |
| RSD-C | 10 – 19.9 units per acre |
| RSD-D | 20 – 29.9 units per acre |
| Single-Unit Residential Attached – RSA | |
| RSA-A | 0 – 5.9 units per acre |
| RSA-B | 6 – 9.9 units per acre |
| RSA-C | 10 – 19.9 units per acre |
| RSA-D | 20 – 29.9 units per acre |
| Two Unit Residential - RT | |
| RT-A | 0 – 5.9 units per acre |
| RT-B | 6 – 9.9 units per acre |
| RT-C | 10 – 19.9 units per acre |
| RT-D | 20 – 29.9 units per acre |
| RT-E | 30 – 39.9 units per acre |
| Multiple Unit Residential – RM | |
| RM-A | 0 – 5.9 units per acre |
| RM-B | 6 – 9.9 units per acre |
| RM-C | 10 – 19.9 units per acre |
| RM-D | 20 – 29.9 units per acre |
| RM-E | 30 – 39.9 units per acre |
| RM-F | 40 – 52 units per acre |
| <i>Source: City of Newport Beach Municipal Code</i> | |

The Coastal Act is administered by the California Coastal Commission. Over 63 percent of the City of Newport Beach is within the Coastal Zone and subject to oversight by the Coastal. Although the City retains permit authority in most of the Coastal Zone, development projects located near sensitive coastal

resources, such as the bay, ocean, wetlands, and environmentally sensitive habitat areas, require the processing of coastal development permits and are subject to appeal by the California Coastal Commission. This additional level of review and approval process may extend the review period of development projects and increase the application and discretionary review costs. In addition, any request to increase residential densities or allow new residential housing opportunities requires the processing of a Local Coastal Program amendment through the California Coastal Commission. An illustrative example is the Master Development Plan for Banning Ranch, a housing development project that included 1,375 dwelling units, including an affordable housing component, that was adopted by the City in 2012, but denied by the California Coastal Commission in 2016 components but due to potential impacts to environmentally sensitive habitats and coastal resources. The Coastal Land Use Plan and Coastal Commission's additional review may inhibit development due to the added review time and costs, and uncertainty of approvals.

John Wayne Airport Environs Land Use Plan (AELUP)

The City's Airport Area may be considered as an opportunity zone to add residential neighborhoods. However, land located within the Airport Planning Area for John Wayne Airport are subject to the development restrictions of the John Wayne Airport Environs Land Use Plan (AELUP), which limits the ability to develop residential units. Approximately 391 acres are subject to these residential restrictions. An amendment to the City's General Plan or rezoning for residential use requires review and approval by the Airport Land Use Commission (ALUC) and extends the total review period of a proposed housing development and subsequently increases the cost of development. The added review time and additional costs may dissuade housing developers, and particularly affordable housing developers, from developing housing in this area.

Overlay Districts

An overlay district is a regulatory tool that adds special provisions and regulations to an area in the City. An overlay district may be added to a neighborhood or corridor on a map or it may apply to the City as whole and be applied under certain circumstances. An overlay district may be initiated as a Zoning Map amendment. All proposed developments within the overlay district must comply with the district's applicable development standards in addition to the Zoning Code standards. Overlay Districts which affect housing in Newport Beach include the Mobile Home Park (MHP) Overlay Zoning District, Bluff Overlay Zoning District, and the Height Overlay District. Overlay Districts may be a constraint to the development of housing when it sets standards which are more restrictive than the Zoning Code.

Overlay Coastal Districts

The purposes of the individual overlay coastal zoning districts and the way they are applied are detailed below. An overlay district may be initiated as a Coastal Zoning Map amendment in compliance with Chapter 21.14 of the City's Municipal Code. All development within these zones must comply with the applicable development standards (e.g., setbacks, height) of the underlying coastal zoning district in addition to the standards provided by the respective zone as outline in the Municipal Code, where applicable.

Mobile Home Park Overlay Coastal Zoning District

The MHP Overlay Coastal Zoning District is intended to establish a mobile home district on parcels of land developed with mobile home parks. The regulations of this district are designed to maintain and protect mobile home parks in a stable environment with a desirable residential character. However, such regulations may pose a constraint to the redevelopment of existing mobile home parks and increasing density. Uses allowed in the MHP Overlay include the following:

- + Mobile Home Parks
- + Accessory Structures incidental to the operation of Mobile Home Parks

Bluff Overlay District

The Bluff (B) Overlay District is intended to establish special development standards for areas of the City where projects are proposed on identified bluff areas. The Bluff Overlay District intends to provide additional regulations and requirements in order to establish safety standards for developments in the overlay District. Specific permitted uses, development standards, and requirements are outlined in the City's Municipal Code, Chapter 21.28.040. Additional regulations and development standards may prevent increased density or intensity in areas within the Bluff Overlay District.

Canyon Overlay District

The Canyon (C) Overlay District is intended to establish development setbacks based on the predominant line of existing development for areas that contain a segment of the canyon edge of Buck Gully or Morning Canyon. In order to ensure safe development of housing within the Canyon Overlay Districts, development standards and requirements include the following:

- + Development Stringline Setback: Development may not extend beyond the predominant line of existing development on canyon faces by establishing a development stringline where a line is drawn between nearest adjacent corners of existing structures on either side of the subject property.
- + Swimming Pools require a double wall construction
- + Coastal Hazards and Geologic Stability Report
- + Erosion Control Plan

Additional specific development standards and requirements are outlined in the City's Municipal Code, Chapter 21.28.050. The Canyon Overlay District may inhibit added density or intensity of uses to residential properties within the overlay.

Height Overlay

The Height (H) Overlay District is intended to establish standards for review of increased building height in conjunction with the provision of enhanced project design features and amenities. The Height Overlay District includes properties located in the Multiple Residential (RM) Zoning District within Statistical Area A2. The maximum height limit is 40 feet for a flat roof and 45 feet for a sloped roof with a three-story maximum. Additional standards, regulations, and eligibility requirements are outline the in

the City's Municipal Code, Chapter 21.28.060. The Height Overlay District is not considered a constraint to development as it provides for higher height limits.

State Density Bonus Law

Density bonuses are an additional way to increase the number of dwelling units otherwise allowed in a residentially zoned area. The City's Zoning Ordinance identifies the purpose of the Density Bonus Ordinance is to grant density bonuses and incentives for the development of housing that is affordable to very low-, low-, and moderate-income households and senior citizens. Under the Density Bonus Law, developers are entitled to a density bonus corresponding to specified percentages of units set aside for very low income, low-income, or moderate-income households.

Effective January 1, 2021, California State Assembly Bill 2345 amends the Density Bonus Law to expand and enhance development incentives for projects with affordable and senior housing components. AB 2345 amends the Density Bonus Law to increase the maximum density bonus from 35 percent to 50 percent. To be eligible for the maximum bonus, a project must set aside at least (i) 15 percent of total units for very low income households, (ii) 24 percent of total units for low income households, or (iii) 44 percent of for-sale units for moderate income households. Levels of bonus density between 35 percent and 50 percent are granted on a sliding scale. The City's currently adopted Density Bonus Ordinance is no longer consistent with State law and must be amended to comply with new statutory requirement. Implementing Action 3.1.2 of the Section 4: Housing Plan outlines the City's plan to maintain compliance with State legislation.

Density Bonus Programs

The currently adopted density bonuses are eligible for developments which contain five or more dwelling units and meet the requirements outlined in Chapter 20.32 of the Newport Beach Municipal Code. Units which are not eligible for density bonus include developments where affordable housing is required under the provisions of Title 19.

When a development which meets the requirements, density bonuses are applicable as shown in **Table 3-3** and **Table 3-4** below for different income categories. Developments which meet the requirements for Senior housing will be entitled to a density bonus of twenty percent of the number of senior housing units.

Additionally, when an applicant for a residential development agrees to donate land to the City for very low-income households, the applicant is then entitled to a density bonus for the entire market rate development, if the conditions specified in the City's Municipal Code Section 20.32.030 are met.

An applicant is entitled to an increase above the maximum allowed residential density as outline in **Table 3-5**.

| Table 3-5: Density Bonus Calculations | |

Additional regulations for density Bonuses include the following:

- + **Fractional Units:** The calculation of a density bonus, in compliance with any of the above requirements, that results in fractional units shall be rounded up to the next whole number.
- + **Mixed Income Development:** If the applicant desires to develop a density bonus project available to a mix of income levels, the Director determines the amount of density bonus to be granted up to a maximum of 35 percent.

Concessions and Incentives

When qualified for a density bonus, an applicant may request additional parking incentives beyond those provided above. When requested, the City may grant the following (inclusive of handicap and guest parking):

- + **Zero to one bedroom:** one on-site parking space per unit; or
- + **Two or more bedrooms:** two on-site parking spaces per unit.

In addition to a request for parking incentives, an applicant who meets the density bonus requirements may also submit a proposal for a reduction in the site development standards or architectural design requirements; approval of mixed-use zoning in conjunction with the housing development; other regulatory incentive proposed by the client or the City that will result in identifiable, financially sufficient, and actual cost reductions; and/or a direct financial contribution granted by the Council at its sole discretion.

Additional Incentives may also apply for developments with a childcare component, requirements and applicable incentives are outlined in detailed in the City's Municipal Code Section 20.32.060. Incentives and density bonuses allow for increased opportunity and feasibility for the production of affordable housing in a community, the City of Newport Beach's Incentives and Density Bonus programs are comparable to similar Southern California communities and are a constraint to the development of housing for all income levels.

Residential Development Standards

Citywide, outside the specific plan areas, the City regulates the type, location, density, and scale of residential development primarily through the Zoning Code. The following summarizes the City's existing residential zoning districts:

- + **Residential-Agricultural (R-A)** – Residential-Agricultural is intended to provide for single lots appropriate for detached single-unit residential dwelling units and light farming.
- + **Single-Unit Residential (R-1)** – Single-Unit Residential is intended to provide for a range of detached single-unit residential dwelling units on single lots. This land use designation does not include condominiums or cooperative housing.
- + **Two-Unit Residential, Balboa Island (R-BI)** – Two-Unit Residential Balboa Island is intended to provide for a maximum of two residential dwelling units, or duplexes. This designation is reserved to single lots on Balboa Island.

- + **Two-Unit Residential (R-2)** – Two-Unit Residential is intended to provide for single lots appropriate for a maximum of two residential dwelling units, or duplexes.
- + **Multiple Residential (RM)** – Multiple Residential is intended to provide for area appropriate for multi-unit residential developments containing attached or detached dwelling units.
- + **Medium Density Residential (RMD)** – Medium Density Residential is intended to provide for areas appropriate for medium density residential developments containing attached or detached units.
- + **Mixed-Use Vertical (MU-V)** – Mixed-Use Vertical is intended to provide for area appropriate for the development of mixed-use structures that vertically include residential dwelling units. Residential dwelling units are located above the ground floor, which includes office, restaurant, retail, and similar nonresidential uses.
- + **Mixed-Use Mariners' Mile (MU-MM)** – Mixed-Use Mariners' Mile is intended to provide for areas appropriate for commercial and residential uses. Mariners' Mile is located on the inland side of Coast Highway in the Mariners' Mile Corridor. Properties that front Coast Highway may only be developed for nonresidential purposes. Properties to the rear of the commercial frontage may be developed for freestanding nonresidential uses, multi-unit residential dwelling units, or mixed-use structures that integrate residential above the ground floor with nonresidential uses on the ground floor.
- + **Mixed-Use Cannery Village and 15th Street (MU-CV/15th St.)** – Mixed-Use Cannery Village and 15th Street is intended to establish a cohesive district or neighborhood containing multi-unit residential dwelling units with clusters of mixed-use and/or commercial structures on interior lots of Cannery Village and 15th Street on Balboa Peninsula. Allowed uses include multi-unity dwelling units; nonresidential uses; and/or mixed-use structures, where the ground floor is restricted to nonresidential uses along the street frontage. Residential uses and overnight accommodations are allowed above the ground floor and to the rear of uses along the street frontage. Mixed-Use or nonresidential structures are required on lots at street intersections and are allowed, but not required, on other lots.
- + **Mixed-Use Water (MU-W1)** – Mixed-Use Water is intended to be applied to waterfront properties along the Mariners' Mile Corridor in which nonresidential uses and residential dwelling units may be intermixed. A minimum of 50 percent of the allowed square footage in a mixed-use development shall be used for nonresidential uses in which marine-related and visitor-serving land uses are mixed. An approved site development review is required prior to any development to ensure uses are fully integrated and that potential impacts from their differing activities are fully mitigated. Design of nonresidential space to facilitate marine-related uses is encouraged.
- + **Mixed-Use Water (MU-W2)** – This second Mixed-Use Water designation is intended to apply to waterfront properties in which marine-related uses may be intermixed with general commercial, visitor-related commercial and residential dwelling units on the upper floors.

The City's Zoning Code also regulates the development on land through minimum and maximum standards on lot size, lot width and depth, setbacks, and on lot coverage and floor-area ratio (FAR). **Table 3-6** below provides the development standards for each residential zoning district in Newport Beach:

Table 3-6: Development Standards in Newport Beach - Dimensions

| Zone | Dimensions | | | Min. Yard Setbacks | | | Construction Standards | | |
|------------------------------|-----------------------------|-----------------------|-----------------------|--------------------|-------------------|-------------|------------------------|--|--------------------|

Yard Requirements

Yards allow for open space, landscaping and greenery, emergency access, and pedestrian and vehicular circulation on a site. Requirements are set in order to ensure there is adequate available space designated to these elements on a property when considering new development or improvements. Included in these requirements are setbacks areas that are located between a setback line and the property line and must remain unobstructed. Setbacks provide the following:

- + Visibility and traffic safety
- + Access to and around structures
- + Access to natural light and ventilation
- + Separation of incompatible land uses
- + Space for privacy, landscaping, and recreation
- + Protection of natural resources
- + Safety from fire and geologic hazard

The City's yard requirements do not prohibit residential developments from reaching the maximum density on varying lands/sites, it therefore is not a constraint to the development of housing, specifically housing affordable to low and very low-income households. Additionally, the City's Density Bonus programs provides incentives for the development of affordable housing, including a reduction in the site development standards (e.g., site coverage, setbacks, increased height up to the maximum allowed, reduced lot sizes, and/or parking requirements).

Site Coverage and Floor Area Limit

Site coverage and Floor Area Limit (FAL) requirements maintain mass and intensity of a use for residential uses.

The Newport Beach Zoning Code defines site coverage as the percentage of a site covered by structures and accessory structures, as well as decks that exceed 30 inches in height. Maximum site coverage standards limit the footprint of a building and calculates it as a percentage between the ground floor area of a building and the net area of a lot.

The FAL refers to the gross floor area allowed on a residential lot and is determined by multiplying the allowed buildable area of the lot times the applicable multiplier for the lot. FAL requirements limit the total usable floor area to limit the bulk of a building to the land, other buildings, and public facilities.

Maximum Building Height

Maximum building heights are set and defined in the City's Zoning Code to maintain symmetry and compatibility between existing and proposed developments. The height is measured as the vertical distance from the grade of the pad to the highest part of the structure, including protective guardrails and parapet walls. The height limit may be increased within specific areas through the adoption of a Planned Community Development, a specific plan, a planned development permit, a coastal development permit

in the coastal zone, or a site development review. The deviation in maximum height limit requires approval of a discretionary action.

- R-A, R-1, R-BI, and R-2 Zoning Districts have height limits of 24 feet for structures with flat roofs (including guard rails and parapet walls) and 29 feet for sloped roofs. A discretionary approval may permit height up to 28 feet for flat roofs and 33 feet for sloped roofs.
- RM and RMD Zoning Districts have height limits of 28 feet for structures with flat roofs and 33 feet for sloped roofs. The height of the structure may be increased to 32 feet for foot roof and 37 feet for sloped roofs through discretionary approval. Properties located in the Height (H) Overlay District may increase height limits to 40 feet for flat roofs and 45 feet for sloped roofs.
- Planned Community Districts may also propose and regulate their own height limits.

The City's building height requirements do not prohibit residential developments from reaching the maximum density on varying lands/sites, it therefore is not a constraint to the development of housing, specifically housing affordable to low and very low-income households. Additionally, the City's Density Bonus programs provides incentives for the development of affordable housing, including a reduction in the site development standards (e.g., site coverage, setbacks, increased height up to the maximum allowed, reduced lot sizes, and/or parking requirements).

Usable Open Space

The City's Zoning Code defines Usable Open Space as an outdoor or enclosed area on the ground, roof, balcony, deck, porch, or terrace, used for outdoor living, active or passive recreation, pedestrian access, or landscaping. This does not include parking facilities, driveways, utility, or service areas, required setbacks, and sloped or submerged land. All residential districts in Newport Beach have a maximum site coverage to allow for open space. Mixed-Use districts require 75 square feet per dwelling unit of common open space and 5 percent of the gross floor area of private open space for each unit.

The City's usable open spaces requirements do not prohibit residential developments from reaching the maximum density on varying lands/sites, it therefore is not a constraint to the development of housing, specifically housing affordable to low and very low-income households. Additionally, the City's Density Bonus programs provides incentives for the development of affordable housing, including a reduction in the site development standards (e.g., site coverage, setbacks, increased height up to the maximum allowed, reduced lot sizes, and/or parking requirements).

Parking Standards

Adequate off-street parking shall be provided to avoid street overcrowding and maintain parking opportunities for the public to visit the coast. This is maintained through the City's parking requirements for each housing unit type, as shown in **Table 3-7**. Parking requirements may add to the development cost of a property and project as spaces and garage parking create additional costs and remove potentially livable space.

| Table 3-7: Parking Requirements for Residential Uses | |
|---|--|
| Unit Type | Number of Spaces Required |
| Accessory Dwelling Unit | 1 parking space, with exceptions ⁽¹⁾ |
| Junior Accessory Dwelling Unit | No additional parking required |
| Single-Unit Dwellings – Attached | 2 per unit in a garage |
| Single-Unit Dwellings – Detached and less than 4,000 sq. ft. of floor area | 2 per unit in a garage |
| Single-Unit Dwellings – Detached and 4,000 sq. ft. of floor area | 3 per unit in a garage |
| Single-Unit Dwellings – Balboa Island | 2 per unit in a garage |
| Multi-Unit Dwellings – 3 units | 2 per unit covered, plus guest parking 1-2 units, no guest parking required 3 units, 1 guest parking space |
| Multi-Unit Dwellings – 4 units or more | 2 per unit covered, plus 0.5 space per unit for guest parking |
| Two-Unit Dwellings | 2 per unit; 1 in a garage and 1 covered or in a garage |
| Live/Work Units | 2 per unit in a garage, plus 2 for guest/customer parking |
| Senior Housing – Market Rate | 1.2 per unit |
| Senior Housing – Affordable | 1 per unit |
| Note: 1. Parking is waived for ADUs if the property is within ½ mile walking distance to transit (including ferry); within an architecturally or historically significant district; on-street parking permits are required and not provided to the occupant of the ADU; or within one block of a car-share vehicle pick-up/drop-off location Source: City of Newport Beach Municipal Code | |

The City's parking requirements do not prohibit residential developments from reaching the maximum density on varying lands/sites, it therefore is not a constraint to the development of housing, specifically housing affordable to low and very low-income households. Additionally, the City's Density Bonus programs provides incentives for the development of affordable housing, including a reduction in the site development standards (e.g., site coverage, setbacks, increased height up to the maximum allowed, reduced lot sizes, and/or parking requirements).

Variety of Housing Types Permitted

Housing Element Law requires jurisdictions to identify sites to be made available through zoning and development standards in order to facilitate development of a variety of housing types for all socioeconomic levels of the population. Housing types include single-unit dwellings, multi-unit housing, accessory dwelling units, factory-built housing, mobile homes, employee and agricultural work housing, transitional and supportive housing, single-room occupancy units (SROs), and housing for persons with disabilities. **Table 3-8** below identifies the various housing types permitted within each residential and **Table 3-9** identified housing types permitted in mixed-use zoning district in Newport Beach.

Table 3-8: Various Housing Types Permitted in Residential Zones

| Housing Type | Residential Zones | | | | | | Nonresidential Zones | |

Single-Unit Dwelling

A Single-Unit Dwelling is defined in the Newport Beach Zoning Code as a structure on a single lot containing one dwelling unit and one housekeeping unit. The structure shall be constructed in compliance with the California Building Code (CBC) and placed on a permanent foundation. Single-Unit Dwellings may be attached or detached. An attached dwelling is owned in fee, located on an individual lot, and shares a wall or roof with another structure. A detached dwelling is also owned in fee and located on an individual lot but is not connected to another structure in any way.

Multi-Unit Dwelling

A Multi-Unit Dwelling contains three or more dwellings units within the same structure occupied on a single lot. Each dwelling unit is occupied by separate housekeeping units. This housing type includes triplexes (3 dwelling units in one structure), fourplexes (four dwelling units in one structure), and apartments (5 or more dwelling units in one structure), where each structure is owned by one entity and each dwelling unit is rented out. Condominiums are also multi-unit dwellings, but each individual dwelling unit is owned by separate entities. The structure must be placed on a permanent foundation and constructed in compliance with the California Building Code (CBC).

Two-Unit Dwelling

A Two-Unit Dwelling contains two dwelling units, each occupied by their own housekeeping unit, and located within the same structure. This may be referred to as a duplex. The structure must be placed on a permanent foundation and constructed in compliance with the California Building Code (CBC).

Accessory Dwelling Unit (ADU)

An Accessory Dwelling Unit is a secondary dwelling unit, attached or detached, to the primary residence(s) on a single lot. This may be referred to as a “granny flat”, “in-law unit”, or “carriage house”. An ADU must include a kitchen, a full bathroom, a living area, and a separate entrance. The Newport Beach Zoning Code includes efficiency units and manufactured homes as ADUs. Junior ADUs (JADUs) are defined by the City’s Municipal Code as a dwelling unit accessory to and entirely contained within an existing or proposed single-unit dwelling. A JADU may not be greater than 500 square feet, and it must either include its own sanitation facilities or share facilities with the single-unit dwelling. A JADU must also include its own efficiency kitchen.

Live-Work Unit

Live-Work Units refer to structures that include both a commercial and a single dwelling unit. Commercial uses are generally located on the ground floor, with the dwelling unit located one to two stories above.

Short-Term Lodging

Short-Term Lodging refers to a dwelling unit that is rented or leased as a single housekeeping unit for 30 days or less.

Residential Care Facilities – General Licensed (7 or More Persons)

General Licensed Residential Care Facilities provide a single housekeeping unit for individuals with a disability who reside at the facility. There may be 7 or more individuals residing at the facility, but they each reside in separate dwelling units. The facility may include a place, site or building, or groups of places, sites, or buildings, licensed by the State.

Residential Care Facilities – General Unlicensed (Seven or More Persons)

General Unlicensed Residential Care Facilities include a place, site or building, or groups of places, sites, or buildings, which are not licensed by the State and provide housing to 7 or more individuals with disabilities in separate dwelling units. The facility is not required by law to be licensed by the State.

Residential Care Facilities – Limited Licensed (6 or Fewer Persons)

Limited Licensed Residential Care Facilities provide care, services, and/or treatment in a community residential setting for six or fewer individuals. Individuals may include adults, children, or adults and children. The facility shall be considered a single housekeeping unit and must therefore be in compliance with all land use and property development regulations applicable to single housekeeping units.

Residential Care Facilities – Small Unlicensed (6 or Fewer Persons)

Small Unlicensed Residential Care Facilities include a place, site or building, or groups or places, sites, or buildings in which 6 or fewer individuals with disabilities reside in separate dwelling units. The facility is not required by law to be licensed by the State.

Parolee-Probationer Home

Parolee-Probationer Home refers to a structure or dwelling unit which houses 2 or more parolees-probationers who are unrelated by blood, marriage, or legal adoption. The parolees-probationers reside here in exchange for monetary or nonmonetary consideration given and/or paid by the parolee-probationer and/or any public or private entity or person on behalf of the parolee-probationer. The residential structure may be operated by an individual, a for-profit entity, or a nonprofit entity.

Mobile Home Park

A Mobile Home refers to a transportable trailer that is certified under the National Manufactured Housing Construction and Safety Standards Act of 1974. The mobile home is over 8 feet in width and 40 feet in length and may or may not include a permanent foundation. A mobile home on a permanent foundation is considered a single-unit dwelling.

Convalescent Home

Convalescent Home refers to an establishment that provides 24-hour care for persons requiring regular medical attention. A convalescent home may be referred to as a “nursing home” or “hospice”. This facility does not provide emergency medical services or surgical services.

Common Interest Development

Common Interest Developments include community apartment projects, condominium projects, planned developments, and stock cooperative.

Farmworker Housing

Farmworkers are considered a special needs interest group by HCD. Farmworkers are traditionally defined as people whose primary incomes are earned through permanent or seasonal agricultural labor. Farmworkers are generally considered to have special housing needs due to their limited income and the often-unstable nature of their employment. In addition, farmworker households tend to have high rates of poverty, live disproportionately in housing that is in the poorest condition, have extremely high rates of overcrowding, and have low homeownership rates. There is a total of 1,772 farmworkers in the County of Orange, though few may reside in Newport Beach the City must consider the housing needs of this community. The Newport Beach Municipal Code does not explicitly define Farmworker Housing or outline it as a permitted use in residential or nonresidential zones. Policy **Action 30** of the **Section 4: Housing Plan** outlines the City’s strategy to update the Municipal Code in accordance with state legislation.

Supportive Housing

California State Assembly Bill 2162 amended Section 65583, Planning and zoning law to specify that supportive housing is a residential use of property, subject only to those restrictions that apply to other residential dwellings of the same type in the same zone. The City of Newport Beach’s Municipal Code does

not explicitly define Supportive Housing or identify zones where it is a permitted use. **Policy Action 7B** of the **Section 4: Housing Plan** outlines the City's strategy to update the Municipal Code in accordance with state legislation.

Transitional Housing

The City of Newport Beach defines Transitional Housing as rental housing operating under program requirements that call for the termination of assistance and recirculation of the assisted unit to another eligible program recipient program at some predetermined future point in time, which shall be no less than six months. Transitional housing that is provided in single-, two- or multi-unit dwelling units, group residential, parolee-probationer home, residential care facilities, or boarding house uses shall be permitted, conditionally permitted or prohibited in the same manner as the other single-, two-, or multi-unit dwelling units, group residential, parolee-probationer home, residential care facilities, or boarding house uses under this code.

The City of Newport Beach's Municipal Code does not explicitly identify Transitional Housing as a permitted use within the appropriate zones as required by state law. **Policy Action 7B** of the **Section 4: Housing Plan** outlines the City's strategy to update the Municipal Code in accordance with state legislation.

Emergency Shelters

State Law existing law authorizes a political subdivision to allow persons unable to obtain housing to occupy designated public facilities, as defined, during the period of a shelter crisis. Existing law provides that certain state and local laws, regulations, and ordinances are suspended during a shelter crisis, to the extent that strict compliance would in any way prevent, hinder, or delay the mitigation of the effects of the shelter crisis. The City of Newport beach permits Emergency shelters in the OA – Office Airport zoning district and the PI – Private Institutions Coastal zoning district.

Properties designated for PI are distributed throughout the City, but primarily located along major transportation corridors and offer easy access to public transportation. The PI zoning district is intended to provide for areas appropriate for privately owned facilities that serve the public, including places for assembly/meeting facilities (e.g., religious assembly), congregate care homes, cultural institutions, health care facilities, marinas, museums, private schools, yacht clubs, and comparable facilities. There are over 44 parcels totaling approximately 135 acres in the proposed PI zoning district. Several of the existing uses on these properties are religious assembly uses, many of which consist of large campuses. Given the high land costs in the City, these religious assembly facilities could provide the best means to facilitate the development and management of emergency shelters in the City.

Additionally, properties designated for OA are located within three large blocks east of John Wayne Airport, west of Birch Street, north of Bristol Street/73 Freeway, and south of MacArthur Boulevard. These properties are also located along major transportation corridors and offer easy access to public transportation. The AO zoning district is intended to provide for areas appropriate for the development of properties adjoining the John Wayne Airport for uses that support or benefit from airport operations.

These may include corporate and professional offices; automobile sales, rental and service; aviation sales and service; hotels; and accessory retail, restaurant, and service uses. There are over 56 parcels totaling approximately 54 acres in the AO zoning district. Several of the existing uses on these properties are low and medium density professional office buildings, many of which are aging and offer affordable rents compared to most other parts of the City. These properties should provide realistic opportunities for reuse of these structures for the development and management of emergency shelters in the City. Combined, the PI and AO zoning districts consist of over 98 parcels and 189 acres. By allowing emergency shelters as permitted uses within these districts, adequate sites are available for the potential development of emergency shelters in the City.

Low Barrier Navigation Centers

AB 101 states that “The Legislature finds and declares that Low Barrier Navigation Center developments are essential tools for alleviating the homelessness crisis -.” Low Barrier Navigation Centers are defined as a Housing First, low-barrier, service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities while case managers connect individuals experiencing homelessness to income, public benefits, health services, shelter, and housing. Low Barrier Navigation Centers are required as a use by right in areas zoned for mixed uses and nonresidential zones permitting multi-unit uses if it meets specified requirements. The City of Newport Beach’s Municipal Code does not address Low Barrier Navigations Centers by definition. A program will be adopted to ensure the City’s development standards allow Low Barrier Navigation Centers By-Right in all zones that permit mixed-uses and non-residential uses. **Policy Action 7A** of the **Section 4: Housing Plan** outlines the City’s strategy to update the Municipal Code in accordance with state legislation.

Planned Community District

The Planned Community (PC) District is intended allow for a coordinated variety of uses and allows projects to benefit from large-scale community building. PC Districts allow for greater flexibility and less restrictive development regulations, while also maintaining compliance with the intent and provisions of the Zoning Code. The Newport Beach Municipal Code states that a PC District may include various types of uses given they are consistent with the General Plan through the adoption of a development plan and text materials that identify land use relationships and associated development standards.

PC Districts allow for large scale housing projects on land areas no less than 25 acres of unimproved land area or 10 acres of improved land area; however, the City Council may waive the minimum acreage requirements. Improved land area refers to parcels of land with existing permanent structures occupying at least 10 percent of the total PC District. The subject property must be reclassified as a PC District and a Development Plan must be filed with the City to initiate the development process. The Development Plans are reviewed by the Director, scheduled for a public hearing before the Planning Commission for a recommendation, and approved by the City Council. A Planned Community District must also go through an environmental review.

The Development Plan must contain:

- + A land use map containing the distribution, location, and extent of uses proposed
- + Land use tables designating permitted uses
- + Development standards
- + Protection measures for landforms and public views
- + Sustainable improvement standards
- + Location and extent of essential facilities including circulation and transportation, drainage, energy, sewage and waste disposal, and water
- + Development standards for conservation, development, and utilization of natural resources
- + A program of implementation measures, programs, regulations, and public works projects
- + A topographical map to illustrate the character of the terrain and condition of existing vegetation
- + A summary of the relationship between the proposed development plan and the goals, policies, and actions of the General Plan

Growth Management Measures

Growth management measures are techniques used by a government to regulate the rate, amount, and type of development. Growth management measures allow cities to grow responsibly and orderly, however, if overly restricted can produce constraints to the development of housing, including accessible and affordable housing.

On November 7, 2000, the Newport Beach electorate approved Measure S. Measure S amended the Newport Beach City Charter by adding Section 423, which requires voter approval of certain amendments of the Newport Beach General Plan. Meaning, an amendment shall not take effect unless it has been submitted to the voters and approved by a majority of those voting on it. Charter Section 423 encourages the City Council to adopt implementing guidelines that are consistent with its purpose and intent. In the case of Charter Section 423, an amendment to the General Plan is defined as any proposed amendment of the General Plan that is first considered and/ or approved by the City Council subsequent to December 15, 2000 and that increases the number of peak hour trips (traffic), floor area (intensity), or dwelling units (density) when compared to the General Plan prior to approval.

Procedure

The City Council determines if an amendment requires voter approval pursuant to Section 423, based on the following conditions:

- + The Amendment modifies the allowed use(s) of the property or area that is the subject of the Amendment such that the proposed use(s) generate(s) more than one hundred morning or evening peak hour trips than are generated by the allowed use(s) before the Amendment; or

- + The Amendment authorizes an increase in floor area for the property or area that is the subject of the Amendment that exceeds forty thousand (40,000) square feet when compared to the General Plan before approval of the Amendment; or
- + The Amendment authorizes an increase in the number of dwelling units for the property or area that is the subject of the Amendment that exceeds one hundred (100) dwelling units when compared to the General Plan before approval of the Amendment; or
- + The increase in morning or evening peak hour trips, floor area or dwelling units resulting from the Amendment when added to eighty percent (80%) of the increases in morning or evening peak hour trips, floor area or dwelling units resulting from Prior Amendments (see definition in Section (2)) exceeds one or more of the voter approval thresholds in Section 423 as specified in Subsection 1, 2 or 3.

If the City Council determines that the Amendment requires voter approval, the City Council then adopts a resolution calling an election on the Amendment. The City Council schedules the election on the Amendment at the next regular municipal election (as specified by the City Charter) or at a special election if the City and the proponent of the Amendment have entered into a written agreement to share the costs of the special election. The City Attorney then prepares an impartial analysis of the Amendment which contains information about the Amendment, any related project or land use approval, and the environmental analysis conducted of the Amendment that will help the electorate make an informed decision on the Amendment. In the absence of an ordinance or Charter provision that establishes a procedure for submittal of arguments or rebuttals relative to City measures, the City Council will adopt a resolution that authorizes the filing of arguments and rebuttals in accordance with the general procedures specified in the Elections Code.

Charter Section 423 restricts growth throughout the community as it may discourage housing development projects, and particularly affordable housing projects. Projects subject to Charter Section 423 may require significant capital investment which may yield uncertain election results.

Specific Plans

The purpose of a Specific Plan is to implement the goals and objectives of a city's General Plan in a more focused and detailed manner that is area and project specific. The Specific Plan promotes consistence and an enhanced aesthetic level throughout the project community. Specific Plans contain their own development standards and requirements that may be more restrictive than those defined for the city as a whole.

Santa Ana Heights

The Santa Ana Heights Community is located to the north of Newport Beach between East Side Costa Mesa and the Upper Newport Bay. The area was previously within County of Orange's permitting jurisdiction and the redevelopment project area was designated to eliminate blight. The land has since been annexed into Newport Beach.

The principal objectives of the Santa Ana Heights Specific Plan include:

- + Encourage the upgrading of existing residential neighborhoods and business development areas
- + Ensure well-planned business park and commercial developments which are adequately buffered from adjacent residential neighborhoods
- + Encourage the consolidation of smaller contiguous lots in the business park area
- + Ensure that business park and residential traffic are separated to the maximum extent possible, while minimizing impact upon existing parcels
- + Ensure adequate provision of public works facilities as development occurs
- + Enhance equestrian opportunities with the residential equestrian neighborhood
- + Enhance the overall aesthetic character of the community

The Santa Ana Heights Specific Plan identifies design and landscaping guidelines in Section 20.90.030 of the Newport Beach Zoning Code; the development standards are provided in Table 3-4. Table 3-6 also identifies the housing types permitted in each zoning district. Zoning district designations within the project area include the following:

- + **Open Space and Recreational District: SP-7 (OS/R)** - Open Space and Recreational District is intended to establish the long-term use and viability of the Newport Beach Golf Course.
- + **Residential Equestrian District: SP-7 (REQ)** Residential Equestrian District is intended to provide for the development and maintenance of a single-unit residential neighborhood in conjunction with limited equestrian uses. The zoning district is intended to maintain a rural character with an equestrian theme.
- + **Residential Kennel District: SP-7 (RK)** - Residential Kennel District is intended to provide for the development of a single-unit residential neighborhood in conjunction with commercial kennel businesses.
- + **Residential Single-Family District: SP-7 (RSF)** - Residential Single-Family District is intended to provide for the development of medium density single-unit detached residential neighborhoods. Permitted uses should complement and be compatible with residential neighborhoods.
- + **Residential Multiple-Family District: SP-7 (RMF)** - Residential Multiple-Family District is intended to provide for the development of high-density multi-unit residential neighborhoods with a moderate amount of open space. Permitted uses should complement and be compatible with residential neighborhoods.
- + **Horticultural Nursery District: SP-7 (HN)** - Horticultural Nursery District is intended to ensure the long-term use and viability of the horticultural nursery uses located along Orchard Drive in the western section of Santa Ana Heights.
- + **General Commercial District: SP-7 (GC)** - General Commercial District is intended to provide regulations for the commercial areas along South Bristol Street and ensure the continuation of commercial uses

which offer a wide range of goods and services to both the surrounding residential and business communities. This district is intended to promote the upgraded aesthetic image of the community and reduce conflicts between commercial and residential uses.

- + **Business Park District: SP-7 (BP)** - Business Park District is intended to provide for the development and maintenance of professional and administrative offices, commercial uses, specific uses related to product development, and limited light industrial uses. The district shall protect the adjacent residential uses through regulation of building mass and height, landscape buffers, and architectural design features.
- + **Professional and Administrative Office District: SP-7 (PA)** - Professional and Administrative Office District is intended to provide for the development of moderate intensity professional and administrative office uses and related uses on sites with large landscaped open spaces and off-street parking facilities. This district is intended to be located along heavily trafficked streets or adjacent to commercial or industrial districts. This district may also be used to buffer residential areas.
- + **Professional, Administrative, and Commercial Consolidation District: SP-7 (PACC)** - Professional, Administrative, and Commercial Consolidation District is intended to provide for the development of professional and administrative office uses and commercial uses on lots located between South Bristol Street and Zenith Avenue in a manner which ensures lot consolidation and vehicular access to and from South Bristol Street.
- + **Planned Development Combining District (PD)** - Planned Development Combining District is intended to provide a method for land to be developed using design features which take advantage of modern site planning techniques to produce an integrated development project amongst existing and potential development of the surrounding neighborhoods.

Housing for Persons with Disabilities

Both the Federal Fair Housing Act and the California Fair Employment and Housing Act direct local governments to make reasonable accommodations (that is, modifications or exceptions) to their zoning laws and other land use regulations when such accommodations may be necessary to afford disabled persons an equal opportunity to use and enjoy a dwelling.

The Housing Element Update must also include programs that remove constraints or provide reasonable accommodations for housing designed for persons with disabilities. The analysis of constraints must touch upon each of three general categories: 1) zoning/land use; 2) permit and processing procedures; and 3) building codes and other factors, including design, location and discrimination, which could limit the availability of housing for disabled persons.

Reasonable Accommodation

Reasonable accommodation in the land use and zoning context means providing individuals with disabilities or developers of housing for people with disabilities, flexibility in the application of land use and zoning and building regulations, policies, practices and procedures, or even waiving certain requirements, when it is necessary to eliminate barriers to housing opportunities. For example, it may be reasonable to accommodate requests from persons with disabilities to waive a setback requirement or

other standard of the Zoning Code to ensure that homes are accessible for the mobility impaired. Whether a particular modification is reasonable depends on the circumstances.

The Reasonable Accommodation Chapter of the City's Municipal Code provides a procedure and sets standards for disabled persons seeking a reasonable accommodation in the provision of housing and is intended to comply with federal and state fair housing laws. According to the Reasonable Accommodation Chapter of the City's Municipal Code, a request for reasonable accommodation may be made by any person with a disability, their representative, or a developer or provider of housing for individuals with a disability, and a reasonable accommodation may be approved only for the benefit of one or more individuals with a disability. Once an applicant requests reasonable accommodation via all appropriate forms and submittals (as outline in Chapter 20.25.070 of the Newport Beach Municipal Code), the following actions may be taken by the Hearing Office:

- + The Hearing Officer shall issue a written determination to approve, conditionally approve, or deny a request for reasonable accommodation, and the associated modification or revocation.
- + The reasonable accommodation request shall be heard with, and subject to, the notice, review, approval, call for review, and appeal procedures identified for any other discretionary permit.
- + On review the Council may sustain, reverse, or modify the decision of the Hearing Officer or remand the matter for further consideration, which remand shall include specific issues to be considered or a direction for a de novo hearing.

The written decision to approve or deny a request for reasonable accommodation must be consistent with all the applicable Federal and State laws and is be based on consideration of the following findings, all of which are required for approval, the requested accommodation:

- + Is requested by or on the behalf of one or more individuals with a disability protected under the Fair Housing Laws.
- + Is necessary to provide one or more individuals with a disability an equal opportunity to use and enjoy a dwelling.
- + Will not impose an undue financial or administrative burden on the City as "undue financial or administrative burden" is defined in Fair Housing Laws and interpretive case law.
- + Will not result in a fundamental alteration in the nature of a City program, as "fundamental alteration" is defined in Fair Housing Laws and interpretive case law; and
- + Will not, under the specific facts of the case, result in a direct threat to the health or safety of other individuals or substantial physical damage to the property of others.

In making determinization for a request for reasonable accommodation, the hearing officer may consider a variety of factors; factors for consideration by the hearing officer are listed (but limited to) in Chapter 20.52.070 of the Newport Beach Municipal Code. Reasonable accommodation generates practical opportunity and increased feasibility for the creation of accessible housing and the Newport Beach's City process is not considered a constraint to the development of housing for all persons.

Definition of Family

A restrictive definition of “family” that limits the number of unrelated persons and differentiates between related and unrelated individuals living together is inconsistent with the right of privacy established by the California Constitution. The City’s Municipal Code defines “family” as one or more persons living together as a single housekeeping unit in a dwelling unit. The Code also defines a single housekeeping unit as the functional equivalent of a traditional family, whose members are an interactive group of persons jointly occupying a single dwelling unit, including the joint use of and responsibility for common areas, and sharing household activities and responsibilities (e.g., meals, chores, household maintenance, expenses, etc.) and where, if the unit is rented, all adult residents have chosen to jointly occupy the entire premises of the dwelling unit, under a single written lease with joint use and responsibility for the premises, and the makeup of the household occupying the unit is determined by the residents of the unit rather than the landlord or property manager. The City’s definition of family does not limit the number of unrelated persons living together, however the definition for single housekeeping unit, as it relates to family, may require an update by the City as it considers a unit the equivalent to a traditional family.

Development Fees

Residential developers are subject to a variety of permitting, development, and impact fees in order to access services and facilities as allowed by State law. The additional cost to develop, maintain, and improve housing due to development fees result in increased housing unit cost, and therefore is generally considered a constraint to housing development. However, fees are necessary to provide planning and public services in Newport Beach.

The location of projects and housing type result in varying degrees of development fees. The presumed total cost of development is also contingent on the project meeting city policies and regulations and the circumstances involved in a particular development project application. **Table 3-10** provides the planning and land use fees assessed by City of Newport Beach and **Table 3-11** provides the engineering and development services fees required for development projects.

Estimated total development and impact fees for a typical single-unit residential project, assuming it is not part of a subdivision and is consistent with existing city policies and regulations can range from \$41,613 to \$45,593. Estimated total development and Impact fees for a typical multi-unit residential project with ten units, assuming it is consistent with existing City policies and regulations range from \$311,256 to \$316,236.

These estimates are illustrative in nature and that actual costs are contingent upon unique circumstance inherent in individual development project applications. Considering the high cost of land in Newport, and the International Code Council (ICC) estimates for cost of labor and materials, the combined costs of permits and fees range from approximately 1.04 percent to 1.14 percent of the direct cost of development for a single-unit residential project and 1.44 percent to 1.5 percent for a multi-unit residential project. Direct costs do not include, landscaping, connection fees, on/off-site improvements, shell construction or amenities, therefore the percentage of development and impact fees charged by the City may be smaller if all direct and indirect costs are included.

Table 3-10: Planning and Land Use Fees

| Type | Fee | Deposit | Hourly Rate |
|---|---------|----------|-------------|
| Amateur Radio and Satellite Dish Antenna Permit | \$1,379 | | |
| Amendment – General Plan | -- | \$7,500 | \$239 |
| Amendment – Local Coast Program | -- | \$3,300 | \$239 |
| Amendment – Planned Community | -- | \$7,500 | \$239 |
| Amendment – Zoning Code | -- | \$7,500 | \$239 |
| Appeals to City Council | \$1,715 | -- | -- |
| Appeals to Planning Commission | \$1,715 | -- | -- |
| Approval in Concept Permit | \$839 | -- | -- |
| Certificate of compliance \$358 + \$12 County | \$370 | -- | -- |
| Coastal Development Permit / Parcel Map Bundle | \$2,974 | -- | -- |
| Coastal Development Permit Waiver / Initial Review | \$1,085 | -- | -- |
| Compliance Letters / Minor Records Research | \$382 | -- | -- |
| Comprehensive / Heritage / Innovative Sign Program | \$1,841 | -- | -- |
| Condominium Conversion Permit | \$1,325 | -- | -- |
| Development Agreement | -- | \$10,000 | \$239 |
| Development Agreement Annual Review | \$1,367 | -- | -- |
| Director / Staff Approval | \$961 | -- | -- |
| Extensions of Time (except Abatement Period) | \$168 | -- | -- |
| Environmental Documents | -- | -- | \$166 |
| Heritage Sign Review | -- | -- | \$166 |
| In-Lieu Parking | -- | -- | \$150 |
| Limited Term Permit – Less than 90 Days | \$592 | -- | -- |
| Limited Term Permit – More than 90 Days | \$1,994 | -- | -- |
| Limited Term Permit – Seasonal | \$274 | -- | -- |
| Lot Line Adjustment | \$2,065 | -- | -- |
| Lot Merger | \$2,065 | -- | -- |
| Modification Permit | \$2,934 | -- | -- |
| Nonconforming Abatement Period Extension | \$611 | -- | -- |
| Operators License – Application | \$897 | -- | -- |
| Operators License – Appeal | \$853 | -- | -- |
| Planned Community Development Plan | -- | \$10,000 | \$239 |
| Planned Development Permit | \$5,518 | -- | -- |
| Preliminary Application for Residential Development | \$760 | -- | -- |
| Public Noticing Costs | \$497 | -- | -- |
| Site Development Review – Major | \$5,219 | -- | -- |
| Site Development Review – Minor | \$2,970 | -- | -- |

Table 3-10: Planning and Land Use Fees

| Type | Fee | Deposit | Hourly Rate |
|--|---------|---------|-------------|
| Subdivision Parcel Map | \$2,069 | -- | -- |
| Subdivision Tentative/Vesting Tract Map | \$5,139 | -- | -- |
| Temporary Banner Permit (\$50 + \$1 Recorded Management Fee) | \$51 | -- | -- |
| Transfer of Development Rights | \$3,857 | -- | -- |
| Use Permit – Conditional | \$5,271 | -- | -- |
| Use Permit – Minor | \$2,970 | -- | -- |
| Variance | \$4,637 | -- | -- |
| Zoning Plan Check | -- | -- | \$185 |

Table 3-11: Engineering and Development Services Fees

| Plan Review | |
|--|------------------------------|
| Type | Fee |
| Preliminary Plan Review | \$179 |
| Plan Check Hourly Rate | \$146 |
| Additional Plan Review and Rechecks in Excess of 2 | \$146 |
| Plan Review | \$72% of Building Permit Fee |
| Repetitive Plan Review | \$25 of Plan Check Fee |
| Energy Compliance Review | 0.06% of Construction Cost |
| Disabled Access Compliance Review | 0.1% of Construction Cost |
| Grading Plan Review by City Staff | 72% of Grading Permit Fee |
| Grading Plan Review of Complex Projects by Consultant | 120% of Consultant Fee |
| Solar Systems Up to and Including 3KW | \$135 |
| Determination of Unreasonable Hardship | \$248 |
| Electrical Plan Review | 72% of Total Permit Fee |
| Mechanical Plan Review | 72% of Total Permit Fee |
| Plumbing Plan Review | 72% of Total Permit Fee |
| Drainage Plan Review for Alteration to Drainage | \$247 |
| Water Quality Management Plan Review (Commercial Projects) | \$873 |
| Water Quality Management Inspections (Commercial Projects) | \$1,206 |
| Water Quality Management Plan Review/Inspections Building Fee (Residential Projects) | \$625 |
| Water Quality Management Plan Review/Inspection Check Fee (Residential Projects) | \$448 |

| Table 3-11: Engineering and Development Services Fees | |
|---|--|
| Plan Review | |
| Type | Fee |
| Overtime Plan Review | 1.75 X regular plan check fees (\$271 minimum) |
| Plan Check Extension | \$53 |
| Harbor Construction | 72% of Permit Fee |
| Waste Management Administration Fee | \$16 |
| Sources: City of Newport Beach Master Fee Schedule (2011) | |

Impact Fees

Impact fees are assessed on a case-by-case bases depending on the proposed use, location, and density. Impact fees ensure adequate maintenance and provision of public facilities and services to the project and include transportation, school, park and open space, waste management, sewage, and water. **Table 3-12** provides the fees calculated based on land use in Newport Beach.

| Table 3-12: Development Impact fees | |
|---|------------------------------|
| Use | Fee |
| Transportation (Fair Share) | |
| Single-Unit Development | \$2,482/unit |
| Residential-Medium Density | \$1,9412/unit |
| Apartment | \$1,4672/unit |
| Elderly Residential | \$9032/unit |
| Mobile Home | \$1,3542/unit |
| Nursing/ Convalescent Home | \$6092/unit |
| School Impact Fee | |
| N-MUSD Residential Developer Fee | \$1.84/sq.ft. ⁽¹⁾ |
| Park Dedication | |
| Park Dedication | \$30,217/unit |

On-/Off-Site Improvements

Site improvements in the City consist of those typically associated with development for on-site improvements (street frontage improvements, curbs, gutters, sewer/water, and sidewalks), and off-site improvements caused by project impacts (drainage, parks, traffic, schools, and sewer/water). Thus, these are costs that may influence the sale or rental price of housing. Because residential development cannot take place without the addition of adequate infrastructure, site improvement requirements are considered a regular component of development of housing within the City. Majority of cost associated with on and off-site improvements is undertaken by the City and recovered in the City's development and impact fees.

Building Codes and Enforcement

The City's construction codes are based upon the California Code of Regulations, Title 24 that includes the California Administrative Code, Building Code, Residential Code, Electrical Code, Mechanical Code, Plumbing Code, Energy Code, Historical Building Code, Fire Code, Existing Building Code, Green Building Standards Code, and California Referenced Standards Code. They are the minimum necessary to protect the public health, safety and welfare of the City's residents. In compliance with State law, the California Building Standards Code is revised and updated every three (3) years. The newest edition of the California Building Standards Code is the 2019 edition with an effective date of January 1, 2020. The City strives to provide reasonable accommodation for persons with disabilities in the enforcement of building codes and the issuance of building permits.

Code enforcement is conducted by the City and is based on systematic enforcement in areas of concern and on a complaint basis throughout the city. The Code Enforcement Division works with property owners and renters to assist in meeting state health and safety codes. The Code Compliance Department investigates complaints regarding violations of the Newport Beach Municipal Codes. The following are frequent enforcement items:

- + Hazardous property conditions
- + Overgrown vegetation
- + Housing Code violations (broken windows, peeling paint)
- + Inoperable and abandoned vehicles on private property
- + Signs, including signs in public right-of-way and signs without permits
- + Solid Waste (early set-out of containers, inadequate containers, illegal dumping)
- + Water quality and conservation
- + Zoning requirements, (i.e. illegal dwelling units and use requirements)

Local Processing and Permit Procedures

The processing time needed to obtain development permits and required approvals is commonly cited by the development community as a prime contributor to the high cost of housing. Depending on the

magnitude and complexity of the development proposal, the time that elapses from application submittal to project approval may vary considerably. Factors that can affect the length of development review on a proposed project include the completeness of the development application and the responsiveness of developers to staff comments and requests for information. Approval times are substantially lengthened for projects that are not exempt from the California Environmental Quality Act (CEQA), require rezoning or general plan amendments, encounter community opposition, or are appealed to or require approval from the Coastal Commission. Applicants for all permits or reviews are recommended to request a preapplication conference with the respective department to achieve the following:

- + Inform the applicant of City requirements as they apply to the proposed project.
- + Review the City's review process, possible project alternatives or revisions; and
- + Identify information and materials the City will require with the application, and any necessary technical studies and information relating to the environmental review of the project

All applicable fees related to permits and reviews are established by the City Council and can be found in the City's Master fee schedule (Tables 3-10 and 3-11). All applications are first reviewed for completeness, discretionary applications require the respective department to provide a written report and recommendation, applications are then subject to review by the appropriate authority. **Table 3-13** below identifies the review authority responsible for reviewing and making decisions on each type of application required by the Newport Beach Zoning Code. Permit review procedures for residential developments in the City of Newport Beach are outlined below.

| Table 3-13: Review Authority for Permit Application | | | | | | |
|---|-----------------------------------|---------------------------------------|----------------------|-----------------|------------|----------------------|
| Type of Action | Applicable Code Chapter/Section | Role of Review Authority ¹ | | | | |
| | | Director | Zoning Administrator | Hearing Officer | Commission | Council ² |
| Administrative and Legislative | | | | | | |
| Interpretations | Section 20.12.020 | Determination ³ | -- | -- | Appeal | Appeal |
| Planned Communities | Chapter 20.56 | -- | -- | -- | Recommend | Decision |
| Specific Plans | Chapter 20.58 | -- | -- | -- | Recommend | Decision |
| Zoning Code Amendments | Chapter 20.66 | -- | -- | -- | Recommend | Decision |

Conditional Use Permits in Residential Zoning

The purpose and intent of Conditional Use Permits in residential zoning districts, as identified by the Newport Beach Municipal Code Chapter 20.52.030, is to promote the public health, safety, and welfare and to implement the goals and policies of the General Plan by ensuring that conditional uses in residential neighborhoods do not change the character of the neighborhoods as primarily residential communities. As well as, to protect and implement the recovery and residential integration of the disabled, including those receiving treatment and counseling in connection with dependency recovery. In doing so, the City seeks to avoid the over-concentration of residential care facilities so that these facilities are reasonably dispersed throughout the community and are not congregated or over-concentrated in any particular area so as to institutionalize that area.

A conditional use permit is required to authorize uses not previously permitted as allowable in the applicable residential zoning district or in an area where residential uses are provided for in Planned

Community Districts or specific plan districts. An application for a conditional use permit, meeting all the requirements outline in Chapter 20.52.030 D, is then reviewed by the Director to ensure that the proposal complies with all applicable requirements. Additionally, all conditional use permit applications require a public hearing and a public notice of the hearing. The review authority identified in Table 3-9 above is designated to approve, conditionally approve, or deny applications for conditional use permits in residential zoning districts.

Site Development Reviews

The City of Newport Beach identifies the purpose of site development reviews as providing a process for the review of specific development projects in order to:

- + Ensure consistency with General Plan policies related to the preservation of established community character, and expectations for high quality development.
- + Respect the physical and environmental characteristics of the site.
- + Ensure safe and convenient access and circulation for pedestrians and vehicles.
- + Allow for and encourage individual identity for specific uses and structures.
- + Encourage the maintenance of a distinct neighborhood and/or community identity.
- + Minimize or eliminate negative or undesirable visual impacts.
- + Ensure protection of significant views from public right(s)-of-way in compliance with Section 20.30.100 (Public View Protection); and
- + Allow for different levels of review depending on the significance of the development project.

Site development review is required before the issuance of a building or grading permit for any new structure. Structures that do not require a site development review (but instead require a zoning clearance) include, accessory structures, fences and/or walls, reconstruction or exterior remodeling of existing structures, one to four dwelling units, without a tentative or parcel map, and non-residential up to a maximum of 9,999 square feet of gross floor area. Site development review and approval is determined by either the Zoning Administrator or the Planning Commission. **Table 3-14** below identifies the applicable review authority for different development types.

| Table 3-14: Review Authority and Action for Residential Construction | | |
|---|--|--|
| Type of Construction Activity | Role of Review Authority (1) (2) | |
| | Zoning Administrator (Minor Review) | Planning Commission (Major Review) |
| Residential construction: 5 to 20 dwelling units, without a tentative or parcel map. | Decision | Appeal |
| Residential construction: 5 or more dwelling units with a tentative or parcel map and 21 or more dwelling units, without a tentative or parcel map. | -- | Decision |
| Residential construction: On a bluff, an increase in the boundaries of a development area in compliance with the findings in Section 20.28.040 (Bluff (B) Overlay District). | -- | Decision |
| Mixed-use projects: 1 to 4 dwelling units and nonresidential construction of up to a maximum of 9,999 square feet of gross floor area. | Decision | Appeal |
| Mixed-use projects: 5 or more dwelling units and/or nonresidential construction of 10,000 square feet or more of gross floor area. | -- | Decision |
| Source: City of Newport Beach Municipal Code | | |

A site development review is initiated when the Department receives a complete application package including the required information and materials specified by the Director and any additional information required by the applicable review authority in order to conduct a thorough review of the project. Upon receipt of a complete application the applicable review authority shall conduct a review of the location, design, site plan configuration, and effect of the proposed project on adjacent properties by comparing the project plans to established development standards and adopted criteria and policies applicable to the use or structure. The following criteria shall be considered during the review of a site development review application:

- + Compliance with this section, the General Plan, this Zoning Code, any applicable specific plan, and other applicable criteria and policies related to the use or structure.
- + The efficient arrangement of structures on the site and the harmonious relationship of the structures to one another and to other adjacent developments; and whether the relationship is based on standards of good design.
- + The compatibility in terms of bulk, scale, and aesthetic treatment of structures on the site and adjacent developments and public areas.
- + The adequacy, efficiency, and safety of pedestrian and vehicular access, including drive aisles, driveways, and parking and loading spaces.

- + The adequacy and efficiency of landscaping and open space areas and the use of water efficient plant and irrigation materials; and
- + The protection of significant views from public right(s)-of-way and compliance with Section 20.30.100 (Public View Protection).

All site development reviews require a public hearing and a notice of the hearing. The review authority may approve or conditionally approve a site development review application.

Zoning Clearances

A Zoning clearance is the procedure used by the City to verify that a proposed use or structure complies with the activities allowed in the applicable zoning district and the development standards and other provisions of the City's Zoning Code. A zoning clearance is required as a prerequisite to establishing a structure for the following:

- Before the initiation or commencement of any use of land not requiring the construction of a structure.
- Whenever a use is proposed to be changed, whether or not the new use involves a new lessee, operator, or owner, a zoning clearance shall be obtained.
- Before the City issues a new or modified building permit, grading permit, or other construction-related permit required for the alteration, construction, modification, moving, or reconstruction of any structure.

The Department may issue the zoning clearance after first determining that the request complies with all Zoning Code provisions and other adopted criteria and policies applicable to the proposed use or structure. An approval may be in the form of a stamp, signature, or other official notation on approved plans, a letter to the applicant, or other certification, at the discretion of the Director. Review authority for Zoning Clearances is stated in Table 3-11 above.

2. Infrastructure Constraints

Another factor that could constrain new residential construction is the requirement and cost to provide adequate infrastructure (major and local streets; water and sewer lines; and street lighting) needed to serve new residential development. In most cases, where new infrastructure is required, it is funded by the developer and then dedicated to the City, which is then responsible for its maintenance. Because the cost of these facilities is generally borne by developers, it increases the cost of new construction, with much of that increased cost often "passed on" in as part of home rental or sales rates.

The Utilities Department oversees, manages, and maintains the water, wastewater (sewer), storm drain and tidal valve system, street sweeping, streetlights and oil and gas operations for the City of Newport Beach. The City has water, sewer and dry utilities that exist or are planned to accommodate residential development in the community. As the City is essentially built out, the infrastructure in place is designed and located to accommodate potential for additional housing identified for the 6th Cycle Housing Element.

Dry Utilities

Dry utilities are the installation of the electric, telephone, TV, internet, and gas in a community. Of the utilities, the City must plan to provide the necessary resources, such as electric and gas, to increased households from 2021-2029, as projected by the RHNA allocation.

Electricity

Southern California Edison (SCE) is the electrical service provider for the City of Newport Beach. SCE is regulated by the California Public Utilities Commission (CPUC) and the Federal Energy Regulatory Commission (FERC) and includes 50,000 square miles of SCE service area across Central, Coastal, and Southern California. The SCE reliability report identifies the reliability of electricity services to the City and identifies any dependability issues that exist in the City. There are 52 circuits that serve the City of Newport Beach, in total the 52 circuits serve 77,199 customers. SCE measure reliability by three categories:

- + **System Average Interruption Duration Index (SAIDI)** – total minutes every SCE customer was without power due to sustained power outage (outage > 5 minutes) divided by total number of customers
- + **System Average Interruption Frequency Duration Index (SAIFI)** – Number of sustained customer outages experienced by all SCE customers divided by total number of customers
- + **Customer Average Interruption Duration Index (MAIFI)** – System average interruption duration index divided by system average interruption frequency index

Overall, the City of Newport Beach experience relatively low interruptions compared to the overall service provided to all SCE customers, displayed in **Figure 3-1**.

Figure 3-1: Reliability History of Circuits Serving Newport Beach (No Exclusions)

Source: Southern California Edison, Reliability Reports, Newport Beach 2020

SCE will continue to provide adequate services to the City of Newport Beach including increased household growth as projected by the City's RHNA allocation.

Natural Gas

Southern California Gas Company provides natural gas services to the City of Newport Beach. SoCal Gas is a gas-only utility and, in addition to serving the residential, commercial, and industrial markets, provides gas for enhanced oil recovery (EOR) and EG customers in Southern California. The SoCal Gas 2020 utility report projects total gas demand to decline at an annual rate of 1 percent from 2020-2035. From 2020-2035, residential demand is expected to decline from 230 Bcf to 198 Bcf. The decline is approximately 1 percent per year, on average. The decline is due to declining use per meter—primarily driven by very aggressive energy efficiency goals and associated programs— offsetting new meter growth.¹

SoCalGas engages in several energy efficiency and conservation programs designed to help customers identify and implement ways to benefit environmentally and financially from energy efficiency investments. Programs administered by SoCalGas include services that help customers evaluate their energy efficiency options and adopt recommended solutions, as well as simple equipment-retrofit improvements, such as rebates for new hot water heaters. Additionally, the City of Newport Beach

¹ SoCal Gas 2020 California Gas report, Prepared in Compliance with California Public Utilities Commission Decision D .95-01-039

employs programs for energy and utility conservation, outline below in **Section 3: Housing Resources, Opportunities for Energy Conservation.**

Water Supply

The City of Newport Beach Utilities Department currently serves a population of over 86,000 within a service area of approximately fifty square miles. The Department is responsible for providing a safe and reliable source of water to approximately 26,200 active connections and delivering approximately 13,500-acre feet (AF) of water per year on average.² The City's distribution system consists of approximately 300 miles of distribution pipelines and is divided into five main pressure zones: Zone 1 through Zone 5 with 16 minor zones. Zones 1 and 2 are the largest and cover most of the system demands. Zones 3, 4 and 5 are smaller pumped zones. The system infrastructure consists of four wells, three storage reservoirs, five pump stations and 43 pressure reducing stations (PRS) that manage pressure across the system.³

The City of Newport Beach water division is separated into four sections: water maintenance and repair, water production, water quality, and water system services, each department's duties are outlined below. Together the division is responsible for providing a safe and reliable source of water.

Newport Beach Water Source

The City receives its water from several sources, local groundwater from the Lower Santa Ana River Groundwater Basin, imported water purchased from the Municipal Water District of Orange County (MWD OC), and recycled water purchased from Orange County Water District (OCWD). Most of the City's water supply is groundwater, pumped from four wells within the City of Fountain Valley. Imported water is treated at the Diemer Filtration Plant operated by the Metropolitan Water District of Southern California (Metropolitan). The City is not capable of treating water to produce reclaimed water but purchases water from OCWD through the Green Acres Project.⁴

Water Maintenance and Repair

Water Maintenance & Repair is responsible for the maintenance and operation of the City's water mains and valves that are located underground.

Water Production

Water Production operates, maintains, and disinfects the City of Newport Beach's water supply. The division operates two well sites which produce groundwater from the Orange County Basin as well as three water reservoirs to receive, store and distribute the City's water. Other water facilities that assist in the distribution and treatment process include: five water pump stations, five Metropolitan Water District interconnections, and 42 water pressure regulating stations. Water Production also manages SCADA (Supervisory Control and Data Acquisition) which monitors and controls the pumps in the City's water wastewater and gas systems.

² City of Newport Beach, Water rate Study, 2019

³ City of Newport Beach, Water Master Plan, 2019

⁴ City of Newport Beach, Urban Water Management Plan (2015)

Big Canyon Reservoirs

Located at 3300 Pacific View Drive in Corona Del Mar. The Big Canyon Reservoir is the largest City owned reservoir with a capacity of 600-acre foot or 195 million gallons. Built in 1958 this reservoir was the primary water supply for Newport for many years. Although the reservoir does have the ability to supply water to the entire service area the reservoir is primarily used as a storage reservoir and supply to the City's higher-pressure zones.

Spyglass Hill Reservoir

Located under the Spyglass Reservoir park at the end of Muir Beach Circle in Spyglass is the 1.5-million-gallon concrete reservoir. Built in the 1970s to supply the surrounding community this 101-foot diameter and 27-foot-deep reservoir is under the playground park. Large concrete support columns and thick concrete roof and walls support this reservoir.

16th Street Reservoir

Located at the Utilities Yard at 949 West 16th Street in Newport Beach the newest of our reservoirs is a 3-million-gallon underground concrete reservoir. Built in 1996 as part of the City's ground water project, this reservoir receives well water from our four City owned wells in Fountain Valley. This reservoir supplies water to the 16th Street pump station that can pump up to 12,000 gallons per minute into our distribution system. Excess water not used in the system is stored in the Big Canyon Reservoir in Corona Del Mar.

Water Quality

The City of Newport Beach Utilities Department is responsible for providing residents with a reliable, safe, clean, potable, and domestic water supply. Newport Beach's drinking water is safe for drinking. It meets or exceeds all Federal and California water quality standards, which are the most stringent standards of any state in the nation. The City's staff continuously monitors the City's water supply and conducts more than 1,500 tests each year on potable water drawn from different sampling points along our distribution system.

Water System Services

Water System Services assists City of Newport Beach customers with any questions regarding water quality, water pressure, consumption usage, any concern with water meters, leak detection, utilities inspections and underground utility locating. The City's Water Systems Services webpage provides tips and information for proper water systems care for property owners as well as additional resources.

Wastewater

Wastewater is responsible for the collection of residential and commercial wastewater. This Division has three sub-sections: Pump Station Operation, Cleaning Operation and Construction Operation. These three sub-sections provide service relating to pump station repair and maintenance, sewer main, lateral and manhole cleaning, sewer blockage and odor, and sewer main and lateral breaks and repairs.

The City's Wastewater department is responsible for 203 miles of sewer pipe, 120 miles of sewer laterals, approximately 5,000 manholes, 21 pump stations, and five miles of force mains. The City's 2019 Sewer System Management Plan states the department's main goals to include the following:

- + Maintain uninterrupted sewage flow without health hazard, effluent leakage, or water infiltration and inflow.
- + Operate a sanitary sewer system that meets all regulatory requirements.
- + Avoid sanitary sewer overflows and respond to sanitary sewer overflows quickly and mitigate any impact of the overflow.
- + Maintain standards and specifications for the installation of new wastewater systems.
- + Verify the wastewater collection system has adequate capacity to convey sewage during peak flows.
- + Provide training for Wastewater Collection staff.
- + Maintain the Fats, Oil, and Grease program (FOG program) to limit fats, oils, grease, and other debris that may cause blockages in the wastewater collection system.
- + Identify and prioritize structural deficiencies and implement short-term and long-term maintenance and rehabilitation actions to address each deficiency.
- + Meet all applicable regulatory notification and reporting requirements.
- + Provide excellent customer service through efficient system operation and effective communication strategies.

Sewer

The Orange County Sanitation District (OCSD) provides sanitation services to the City of Newport Beach. In 2013, the sanitation district began a construction program to rehabilitate the OCSD's regional sewers in the City. The program ran through 2018 and consisted of five construction projects, including:

- + **Dover Drive Trunk Sewer Relief (5-63):** The Dover Drive Trunk sewer runs between Irvine Blvd. and Coast Highway and is in poor condition. The existing sewer pipeline also does not have efficient hydraulic capacity to handle the wastewater flow and must therefore be replaced with a larger pipeline. OCSD will also relocate a city waterline to reduce the level of impact for the community by eliminating the need for a secondary project in the area.
- + **Balboa Trunk Sewer Rehabilitation (5-47):** This project will rehabilitate the existing Balboa Trunk sewer along Newport Blvd. and Balboa Blvd. between A Street and Finley Ave. (See map: between A Street Pump Station and Lido Pump Station.) The project includes installation of a new protective lining in approximately 12,600 feet of sewer pipeline.
- + **Newport Force Main Rehabilitation (5-60):** The Newport Force Main is a critical component of our sewer system and needs to be rehabilitated. It carries the wastewater flow from various pump stations to our treatment plant in Huntington Beach. The pipelines are located on Coast Highway stretching past Dover Dr. to the Bitter Point Pump Station, approximately 1/4 mile north of Superior Ave., which is a heavily traveled thoroughfare. There are two sewer lines, one on the north side of Coast Highway and one on the south side which make the rehabilitation more complex.
- + **District 6 Trunk Sewer Relief (6-17):** The District 6 Trunk sewer runs from Pomona Ave. in the City of Costa Mesa to Newport Blvd. near Coast Highway in the City of Newport Beach. This project will increase

the capacity of the existing sewer pipeline to reduce the potential for sewer spills and to properly handle flows.

- + **Southwest Costa Mesa Trunk (6-19):** In an effort to improve efficiency in our service area, this project is looking into the design and construction of a new gravity trunk sewer. This project may lead to the abandonment of eight Costa Mesa and Newport Beach pump stations to provide more reliable service to the community

The infrastructure improvements initiated by OCSD from 2013 to 2018 increased overall capacity and efficiency in the Newport Beach sewer system. The City can accommodate the increase in households as projected by the City's RHNA allocation.

Water Demand

In fiscal year 2014-15, the City's total water demand was approximately 16,033 acre-feet. The City's potable demand was met through 11,200 acre-feet of groundwater and 4,338 acre-feet of imported water; the remaining non-potable demand was met through recycled water. The City is projecting over five percent increase in total potable and non-potable demand in the next 25 years accompanied by a projected 13 percent population growth.⁵

The 2015 UWMP found that Metropolitan is able to meet full service demands of its member agencies with existing supplies out to 2040 during a normal, single-dry, and multiple-dry year scenario. Additionally, the 2019 Water Master Plan found that though population continues to increase over the past ten years, total water demand has decreased. The 10-year average annual demand for 2007-2016 (15,991 AF) is 14 percent less than the 1986-1996 average annual demand (18,626 AF). The City's water infrastructure and service provider is capable of meeting the water demands of its customers under the same hydrological conditions out to 2040, this includes all household growth estimated by the City's RHNA allocation.

Fire and Emergency Services

The City of Newport Beach's Fire Department aims to Protect life, property, and the environment with innovative professionalism and organizational effectiveness using highly trained professionals committed to unparalleled service excellence. The department has 144 full-time employees and over 200 part-time / seasonal employees provide 24-hour protection and response to the community's residents, businesses, and visitors. The department's primary goals are identified as follows:

- Identify and reduce fire and environmental hazards that may threaten life and property.
- Provide a safe, effective, and expeditious response to requests for assistance.
- Develop an adequately trained work force to effectively perform their duties.
- Participate in the community development planning process to improve fire and life safety.
- Encourage department personnel to assume leadership roles in the organization.
- Plan for response to natural and man-made disasters that affect the community.
- Educate and train employees and the community to assist them in maintaining a safe environment.

⁵ City of Newport Beach, Urban Water Management Plan (2015)

The department's different divisions and respective duties are outlined below.

Fire Operations Division

The Fire Operations Division is the largest of four divisions within the Newport Beach Fire Department. The primary responsibilities of its personnel are life safety, incident stabilization, and the preservation of property and the environment. The Newport Beach Fire Department operates as an "all risk" emergency responsible organization responding to the following:

- + Fires
- + Pre-hospital Medical Emergencies
- + Technical Rescues
- + Traffic Accidents
- + Vehicle Extrications
- + Major Flooding
- + Beach Rescues
- + High Rise Incidents
- + Wildland Fires
- + Disaster Operations
- + Hazardous Materials Incidents

The Fire Department staffs eight-fire stations 24/7. The stations are strategically located throughout the city to provide the quickest and most effective response to the area served, with an average response time of five minutes. Considering the department's expansive and well-connected nature, as well as the compactness of the City of Newport, additional housing or new developments would not pose a burden on the existing Fire Department's fire operations. Therefore, fire operations are not considered a constraint to the development of housing for all income levels.

The City requires Development Agreements for certain development types within the Airport area to ensure adequate safety services and ambulance units. Development Agreements include additional fees for safety service operations in the airport area due to current lack of ambulance units. The imposition of additional fees may pose a constraint to the development of housing, and particularly affordable housing. This may result in greater development fees which may subsequently influence the final rental cost of units or home value.

Emergency Medical Services

The goal of the Emergency Medical Services (EMS) Division is to deliver the highest quality of medical care to members of the community, regardless of their ability to pay. In total, the City has eight fire stations that are strategically located to provide the best services the community. Each day there are eight fire engines, two fire trucks and the three paramedic ambulances in service. The average response time is four minutes and 22 seconds. The system's design accounts for fewer paramedic ambulances and expects a nearby fire engine or truck company to arrive on scene first to initiate basic medical care, which at times can include lifesaving cardio-pulmonary resuscitation or delivering rapid electrical shocks using automated external defibrillators (AEDs), prior to the arrival of the paramedic team.

Lifeguard Operations Division

The City of Newport Beach's Lifeguard Division protects up to 10 million beach visitors on Newport Beach's 6.2 miles of ocean and 2.5 miles of bay beaches, with preventative actions and medical assistance. Every day of the year, lifeguards ensure safety and provide customer service to the visitors on the beach, boardwalk, piers, and in the ocean.

Police Services

The City of Newport Beach's Police Department intends to:

- + Respond positively to the Community's needs, desires, and values and in so doing be recognized as an extension and reflection of those we serve.
- + Strive to provide a safe and healthy environment for all, free from violence and property loss resulting from criminal acts, and injuries caused by traffic violators.
- + Manage inevitable change and welcome the challenge of future problems with creative solutions, which are financially prudent and consistent with Community values.

The Department's is headed by Chief of Police Jon T. Lewis, who is the 10th Chief of Police in the department's history, assuming office on March 22, 2016. The City of Newport Beach's Police Department handles a wide array of services and permitting, all services are outlined in detail on the City's Police Department webpage.

3. Environmental Constraints

Newport Beach is bound by the Pacific Ocean to the West and contains many different natural landscapes within the City's boundaries. Newport Beach has a variety of coastal features ranging from replenished beach sands in West Newport, to steep bluffs comprised of sandstone and siltstone to the south of Corona del Mar. The community, as most of California is, sits along some major fault traces. The City is susceptible to several potential environmental constraints to the development of housing, including geologic hazards, flood hazards, and fire hazards, all are detailed below.

Coastal Hazards

A goal of the California Coastal Act and the City's adopted Local Coastal Program is to assure the priority for coastal-dependent and coastal-related development over other development in the Coastal Zone. The

Coastal Act is an umbrella legislation designed to encourage local governments to create Local Coastal Programs (LCPs) to govern decisions that determine the short- and long-term conservation and use of coastal resources. The City of Newport Beach's LCP is considered the legislative equivalent of the City's General Plan for areas within the Coastal Zone. Local Coastal Programs are obligated by statute to be consistent with the policies of the Coastal Act and protect public access and coastal resources. Over 63 percent of Newport Beach is within the Coastal Zone and subject to the oversight by the California Coastal Commission.

Sea Level Rise and Storm Inundation

Newport Beach is exposed to a variety of coastal hazards including beach erosion, bluff erosion, and coastal flooding due to sea level rise (SLR) and storm inundation. The City has a significant amount of land directly adjacent to surface water that is directly affected by sea level rise and storm inundation. The effects of SLR on coastal processes, such as shoreline erosion, storm-related flooding and bluff erosion, have been evaluated using a Coastal Storm Modeling System (CoSMoS), a software tool and multi-agency effort led by the United States Geological Survey (USGS), to make detailed predictions of coastal flooding and erosion based on existing and future climate scenarios for Southern California. The mapping results from CoSMoS provide predictions of shoreline erosion (storm and non-storm), coastal flooding during extreme events, and bluff erosion for the City in community-level coastal planning and decision-making. A large portion of the City's coastal adjacent land appropriate for development is at risk of tidal flooding. Land along the coast is vulnerable to shoreline retreat, which is predicted to accelerate with Sea Level Rise. Long-term shoreline retreat coupled with storm-induced beach erosion has the potential to cause permanent damage to buildings and infrastructure in these hazard zones. As a result, the City did not utilize land within the coastal

The Coastal Commission provides direct guidance on how the City of Newport Beach addresses future land use in consideration of sea level rise. According to the California Coastal Commission Sea Level Rise Policy Guidance⁶, local jurisdictions can "Minimize Coastal Hazards through Planning and Development Standards" through the following measures applicable to Newport Beach:

- + Design adaptation strategies according to local conditions and existing development patterns, in accordance with the Coastal Act.
- + Avoid significant coastal hazard risks to new development where feasible.
- + Minimize hazard risk to new development over the life of the authorized development.
- + Minimize coastal hazard risks and resource impacts when making redevelopment decisions.
- + Account for the social and economic needs of the people of the state include environmental justice, assure priority for coastal-dependent and coastal-related develop over other development

The Coastal Commission has also prepared a Draft Coastal Adaptation Planning Guidance: Residential Development (dated March 2018), which will serve as the Coastal Commission's policy guidance on sea

⁶ California Coastal Commission Sea Level Rise Policy Guidance, 2018 Science Update

level rise adaptation for residential development to help facilitate planning for resilient shorelines while protecting coastal resources in LCPs

Geologic Hazards

According to the Newport Beach Safety Element, the geologic diversity of Newport Beach is strongly related to tectonic movement along the San Andreas Fault and its broad zone of subsidiary faults. This, along with sea level fluctuations related to changes in climate, has resulted in a landscape that is also diverse in geologic hazards. Geologic hazards are generally defined as surficial earth processes that have the potential to cause loss or harm to the community or the environment. Specific geologic hazards that may affect the development of housing in the City are detailed below.

Slope Failures

Slope failures often occur as elements of interrelated natural hazards in which one event triggers a secondary event such as a storm-induced mudflow. Slope failure can occur on natural and man-made slopes. The City's remaining natural hillsides and coastal bluff areas are generally vulnerable to slope failures that include: San Joaquin Hills; and bluffs along Upper Newport Bay, Newport Harbor, and the Pacific Ocean. Despite the abundance of landslides and new development in the San Joaquin Hills, damage from slope failures in Newport Beach has been small which may be attributed to the development of strict hillside grading ordinances, sound project design that avoid severely hazardous areas, soil engineering practices, and effective agency review of hillside grading projects.

Seismic Hazards

The City of Newport Beach is located in the northern part of the Peninsular Ranges Province, an area that is exposed to risk from multiple earthquake fault zones. The City of Newport Beach Safety Element determines that the highest risks originate from the Newport-Inglewood fault zone, the Whittier fault zone, the San Joaquin Hills fault zone, and the Elysian Park fault zone. Each of the aforementioned zones have the potential to cause moderate to large earthquakes that would cause ground shaking in Newport Beach and nearby communities. Earthquake-triggered geologic effects also include surface fault rupture, landslides, liquefaction, subsidence, and seiches. Specific hazards associated with seismic hazards, which can potentially be determined as a constraint to development are detailed below.

Liquefaction

Strong ground shaking can result in liquefaction. Liquefaction, a geologic process that causes ground failure, typically occurs in loose, saturated sediments primarily of sandy composition. According to the Newport Beach Safety Element, the areas of Newport Beach susceptible to liquefaction and related ground failure (i.e. seismically induced settlement) include areas along the coastline that includes Balboa Peninsula, in and around the Newport Bay and Upper Newport Bay, in the lower reaches of major streams in Newport Beach, and in the floodplain of the Santa Ana River. It is likely that residential or commercial development will never occur in many of the other liquefiable areas, such as Upper Newport Bay, the Newport Coast beaches, and the bottoms of stream channels.

Seismically Induced Slope Failure

Strong ground motions can also worsen existing unstable slope conditions, particularly if coupled with saturated ground conditions. Seismically induced landslides can overrun structures, people or property, sever utility lines, and block roads, thereby hindering rescue operations after an earthquake. Much of the area in eastern Newport Beach has been identified as vulnerable to seismically induced slope failure. Approximately 90 percent of the land from Los Trancos Canyon to State Park boundary is mapped as susceptible to land sliding by the California Geologic Survey. Additionally, the sedimentary bedrock that crops out in the San Joaquin Hills is locally highly weathered. In steep areas, strong ground shaking can cause slides or rockfalls in this material. Rupture along the Newport Inglewood Fault Zone and other faults in Southern California could reactivate existing landslides and cause new slope failures throughout the San Joaquin Hills. Slope failures can also be expected to occur along stream banks and coastal bluffs, such as Big Canyon, around San Joaquin Reservoir, Newport and Upper Newport Bays, and Corona del Mar.

Flood Hazards

The City of Newport Beach and surrounding areas are, like most of Southern California, subject to unpredictable seasonal rainfall, and every few years the region is subjected to periods of intense and sustained precipitation that result in flooding. Flooding can be a destructive natural hazard and is a recurring event. A flood is any relatively high streamflow overtopping the natural or artificial banks in any reach of a stream. Flood hazards in Newport Beach can be classified into two general categories: flash flooding from small, natural channels; and more moderate and sustained flooding from the Santa Ana River and San Diego Creek. The City of Newport Beach's Safety Element identifies 100-year and 500-year flood zones in the City. Federal Emergency Management Agency (FEMA) flood zones are geographic areas that the FEMA has defined according to varying levels of flood risk. Each zone reflects the severity or type of flooding in the area.⁷ The 100-year flood zone are areas with a one percent annual chance of flooding, the 500-year flood zones are areas with a 0.2 percent annual chance of flooding.

The 100- and 500-year flood zones include the low-lying areas in West Newport at the base of the bluffs, the coastal areas which surround Newport Bay and all low-lying areas adjacent to Upper Newport Bay. 100- and 500- year flooding is also anticipated to occur along the lower reaches of Coyote Canyon, in the lower reaches of San Diego Creek and the Santa Ana Delhi Channel, and in a portion of Buck Gully. The City also recently worked with FEMA to revise proposed flood hazards maps, in which FEMA removed over 2,700 properties from flood zones. Most flooding along these second- and third-order streams is not expected to impact significant development. However, flooding in the coastal areas of the City will impact residential and commercial zones along West Newport, the Balboa Peninsula and Balboa Island and the seaward side of Pacific Coast Highway.⁸

With increased development, there is also an increase in impervious surfaces, such as asphalt. Water that used to be absorbed into the ground becomes runoff to downstream areas. However, various flood control measures help mitigate flood damage in the City, including reservoirs in the San Joaquin Hills and

⁷ FEMA Flood Zone Designations, Natural resources Conservation Service – Field Office Technical Guides

⁸ City of Newport Beach Safety Element

Santa Ana Mountain foothills, and channel alterations for the Santa Ana River. These structures help regulate flow in the Santa Ana River, San Diego Creek, and smaller streams and hold back some of the flow during intense rainfall period that could otherwise overwhelm the storm drain system in Newport Beach.

Fire Hazards

The Newport Beach Safety Element defines a wildland fire hazard area as any geographic area that contains the type and condition of vegetation, topography, weather, and structure density that potentially increases the possibility of wildland fires. The eastern portion of the City and portions of the Newport Beach region and surrounding areas to the north, east, and southeast include grass- and brush-covered hillsides with significant topographic relief that facilitate the rapid spread of fire, especially if fanned by coastal breezes or Santa Ana winds.

In those areas identified as susceptible to wildland fire, the Fire Department enforces locally developed regulations which reduce the amount and continuity of fuel (vegetation) available, firewood storage, debris clearing, proximity of vegetation to structures and other measures aimed at “Hazard Reduction.” New construction and development are further protected by local amendments to the Uniform Building Code. These amendments, which are designed to increase the fire resistance of a building, include: protection of exposed eaves, noncombustible construction of exterior walls, protection of openings, and the requirement for Class “A” fireproof roofing throughout the City. Additionally, a “Fuel Modification” plan aimed at reducing fire encroachment into structures from adjacent vegetation must be developed and maintained.

C. Affirmatively Furthering Fair Housing (AFFH)

1. Affirmatively Furthering Fair Housing

All Housing Elements due on or after January 1, 2021 must contain an Assessment of Fair Housing (AFH) consistent with the core elements of the analysis required by the federal Affirmatively Further Fair Housing Final Rule of July 16, 2015.

Under State law, affirmatively further fair housing means “taking meaningful actions, in addition to combatting discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. These characteristics can include, but are not limited to race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability.

The Orange County Analysis of Impediments (AI) to Fair Housing Choice for FY 2015-19 was approved by the City of Newport Beach City Council on Month 10, 2016 as one of the fifteen urban county program participants in partnership with the Fair Housing Council of Orange County. The Draft Regional Analysis of Impediments (AI) to Fair Housing Choice for FY 2020-25 was made available for public review in 2020. The Fair Housing Council of Orange County works under the direction of a volunteer board of directors and

staff to fulfill a mission of protecting the quality of life in Orange County by ensuring equal access to housing opportunities, fostering diversity and preserving dignity and human rights. The agency is a HUD Approved Housing Counseling Agency and provides one-on-one education, mediation, and counseling for individuals and families throughout the Orange County region.

The AI identifies impediments that may prevent equal housing access and develops solutions to mitigate or remove such impediments. Newport Beach's 6th Cycle Housing Element references analysis from the FY 2020-2025 AI in order to identify potential impediments to housing that are specific to Newport Beach. The City also completed its FY 2020-24 Consolidated Plan, adopted by City Council on May 12, 2020, as an entitlement city for Community Development Block Grant (CDBG) funding, which identifies housing problems within the community, specifically among low and very-low income households. Fair housing is identified as a priority within the Consolidated Plan.

2. Needs Assessment

The AI contains a Countywide analysis of demographic, housing, and specifically fair housing issues for all the cities in Orange County, including Newport Beach. The City's demographic and income profile, household and housing characteristics, housing cost and availability, and special needs populations were discussed in the previous Section 2: Community Profile.

Fair Housing Issues

The Regional AI lists fair housing issues within the County of Orange, the AI also explicitly includes the following fair housing issues in the City of Newport Beach:

- + **Availability, Type, Frequency, and Reliability of Public Transportation** - The availability, type, frequency, and reliability of public transportation may be contributing factors to fair housing issues in Newport Beach. Public transportation in Orange County primarily consists of bus service operated by the Orange County Transportation Authority (OCTA) and Metrolink light rail service. However, Metrolink does not provide service to coastal communities in the central and northern portions of Orange County, including Newport Beach which is disproportionately White in comparison to the county as a whole. The lack of public transportation may deter members of protected classes who do not have cars and are reliant on public transportation from choosing to live there, thus reinforcing patterns of segregation.
- + **Impediments to Mobility** - Impediments to mobility may be a significant contributing factor to fair housing issues in Newport Beach. Specifically, Housing Choice Voucher payment standards that make it difficult to secure housing in many, disproportionately White areas contribute to segregation and disparities in access to opportunity. The Orange County Housing Authority, which provides Section 8 resources to Newport Beach, has three tiers based on city rather than zip code, but the highest tier - \$2,280 for two-bedroom units in selected cities – falls far short of Small Area Fair Market Rents and leaves some cities targeted for that payment standard out of reach. For example, in zip code 92660, located in Newport Beach, the Small Area Fair Market Rent for two-bedroom units would be \$3,120. A Zillow search for that zip code revealed advertised two-bedroom units in only two complexes available for under \$2,280 but many more available between \$2,280 and \$3,120.
- + **Location of Accessible Housing** - The location of accessible housing may be a significant contributing factor to fair housing issues in Newport Beach. With a few exceptions the location of accessible housing

tends to track areas where there are concentrations of publicly supported housing. In Orange County, publicly supported housing tends to be concentrated in areas that are disproportionately Hispanic and/or Vietnamese and that have relatively limited access to educational opportunity and environmental health. Multi-unit housing tends to be concentrated in communities of color, but there are some predominantly White communities that have significant amounts of market-rate multi-unit housing that may be accessible and affordable to middle-income and high-income persons with disabilities, including Newport Beach. Overall, permitting more multi-unit housing and assisting more publicly supported housing in predominantly White communities with proficient schools would help ensure that persons with disabilities who need accessibility features in their homes have a full range of neighborhood choices available to them.

- + **Occupancy Codes and Restrictions** - Occupancy codes and restrictions may be a significant contributing factor to fair housing issues in Newport Beach. Specifically, there is a substantial recent history of municipal ordinances targeting group homes, in general, and community residences for people in recovery from alcohol or substance abuse disorders, in particular. In 2015, the City of Newport Beach entered into a \$5.25 million settlement of a challenge to its ordinance, but that settlement did not include injunctive relief calling for a repeal of that ordinance.⁹ Although municipalities have an interest in protecting the health and safety of group home residents, these types of restrictions may be burdensome for ethical, high-quality group home operators. Occupancy codes and restrictions are not as high priority of a barrier as the factors that hinder the development of permanent supportive housing, as group homes are generally less integrated than independent living settings.

The City recognizes the fair housing issues that exist within the community and is committed to reduces barriers to housing affordable to all persons. The City has outline programs to address fair housing issues in Newport Beach in the **Section 4: Housing Plan**.

Fair Housing Enforcement and Outreach Capacity

Currently, the Fair Housing Foundation provides fair housing services to the City of Newport Beach. This includes providing fair housing enforcement and landlord/tenant mediation services which are available for tenants, realtors, apartment owners and managers, lending institutions and other interested parties. For FY 2020-21, the City of Newport Beach has allocated \$12,000 in Community Development Block Grant (CDBG) funds for the Fair Housing Foundation to perform the following, at no cost:

- + Fair housing services such as, responding to discrimination inquiries and complaints, documenting, and investigating discrimination complaints, and resolving or mediating discrimination complaints
- + A comprehensive, extensive, and viable education and outreach program, including:
 - Fair Housing Workshop
 - Certificate Management Training
 - Walk-In Clinics
 - Rental Housing Counseling Workshop
 - Community presentations, staff training, and workshops

⁹ 41 Hannah Fry, Newport Will Pay Group Homes \$5.25 Million Settlement, L.A. TIMES (July 16, 2015), <https://www.latimes.com/socal/daily-pilot/news/tn-dpt-me-0716-newport-group-home-settlement-20150716-story.html>.

- Community events, booths, networking, etc.
- + Landlord and tenant counseling on responsibilities and rights
- + Rental counseling

The Fair Housing Foundations offers regular walk-in counseling sessions, in addition to resources fairs, informational workshops (accessible in multiple languages), landlord and tenant workshops, and other outreach efforts. Additionally, the FHF provided virtual workshops available online to Newport Beach residents.

From 2015 to 2020, the City provided 408 residents with fair housing services using CDBG funding. As part of the FY 2020-25 Consolidated Plan for the Newport Beach, the City has set a goal of assisting 625 people with fair housing issues within the five-year period using \$60,000 of CDBG funding. Newport Beach has also set a goal of retaining a Fair Housing provider to promote fair housing education and outreach within the community. The U.S. Department of Housing and Urban Development (HUD) maintains a record of all housing discrimination complaints filed in local jurisdictions. These grievances can be filed on the basis of race, color, national origin, sex, disability, religion, familial status, and retaliation. As reported by the 2020-2025 AI, one fair housing case is unresolved (as one 2020) in Newport Beach.

3. Analysis of Federal, State, and Local Data and Local Knowledge

Integration and Segregation Patterns and Trends

The dissimilarity index is the most used measure of segregation between two groups, reflecting their relative distributions across neighborhoods (as defined by census tracts). The index represents the percentage of the minority group that would have to move to new neighborhoods to achieve perfect integration of that group. An index score can range in value from 0 percent, indicating complete integration, to 100 percent, indicating complete segregation. An index number above 60 is considered to show high similarity and a segregated community.

It is important to note that segregation is a complex topic, difficult to generalize, and is influenced by many factors. Individual choices can be a cause of segregation, with some residents choosing to live among people of their own race or ethnic group. For instance, recent immigrants often depend on nearby relatives, friends, and ethnic institutions to help them adjust to a new country.¹⁰ Alternatively, when white residents leave neighborhoods that become more diverse, those neighborhoods can become segregated. Other factors, including housing market dynamics, availability of lending to different ethnic groups, availability of affordable housing, and discrimination can also cause residential segregation.

Figure 3-2 shows the dissimilarity between each of the identified race and ethnic groups and Newport Beach's White population. The higher scores indicate higher levels of segregation among those racial and ethnic group. The White (non-Hispanic or Latino) population makes up most of the City's population at

¹⁰ Allen, James P. and Turner, Eugene. "Changing Faces, Changing Places: Mapping Southern California". California State University, Northridge, (2002).

approximately 79.5 percent according to the 2018 ACS estimates. According to the figure, the highest levels of segregation within Newport Beach are Other Race (51.3), Native Hawaiian (44.5), Black (37.8 and Native Indian (37.4). The scores correlate with the percentage of people within that racial or ethnic group that would need to move into a predominately White census tract in order to achieve a more integrated community. For instance, 44.5 percent of the Native Hawaiian population would need to move into predominately white census tract areas to achieve “perfect” integration. As indicated above, a score of 60 or higher indicates a highly similar and segregated area. The City does not have any racial or ethnic groups with scores higher than 60.

Figure 3-2: Dissimilarity Index with Whites – Newport Beach

Source: Census Scope, Social Science Data Analysis Network, *Not Hispanic or Latino

Racially or Ethnically Concentrated Areas of Poverty (R/ECAP)

To assist communities in identifying racially/ethnically concentrated areas of poverty (R/ECAPs), HUD has developed a census tract-based definition of R/ECAPs. The definition involves a racial/ethnic concentration threshold and a poverty test. The racial/ethnic concentration threshold is straightforward: R/ECAPs must have a non-white population of 50 percent or more. Regarding the poverty threshold, Wilson (1980) defines neighborhoods of extreme poverty as census tracts with 40 percent or more of individuals living at or below the poverty line. Because overall poverty levels are substantially lower in many parts of the country, HUD supplements this with an alternate criterion. Thus, a neighborhood can be a R/ECAP if it has a poverty rate that exceeds 40% or is three or more times the average tract poverty rate for the metropolitan/micropolitan area, whichever threshold is lower.

Location of residence can have a substantial effect on mental and physical health, education opportunities, and economic opportunities. Urban areas that are more residentially segregated by race and income tend to have lower levels of upward economic mobility than other areas. Research has found

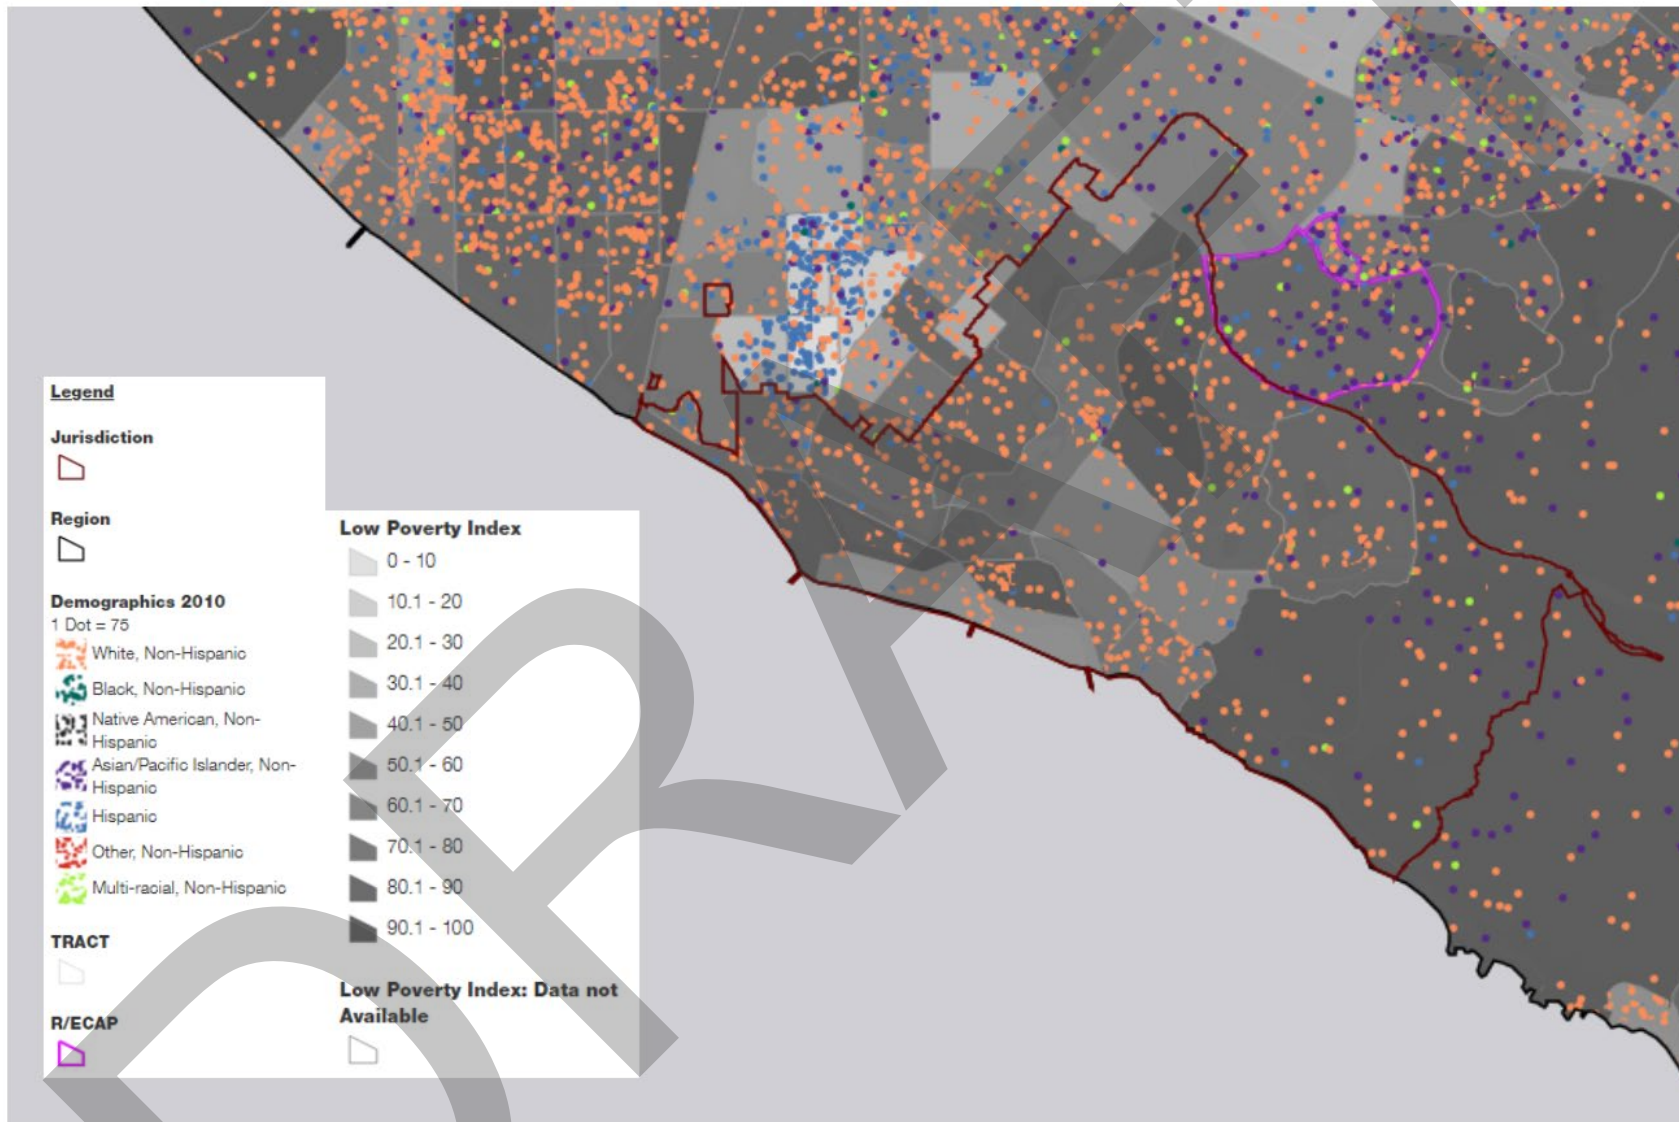

that racial inequality is thus amplified by residential segregation.¹¹ However, these areas may also provide different opportunities, such as ethnic enclaves providing proximity to centers of cultural significance, or business, social networks and communities to help immigrants preserve cultural identity and establish themselves in new places. Overall, it is important to study and identify these areas in order to understand patterns of segregation and poverty in a City.

The 2020 AI performed an analysis of R/ECAPs within Orange County and found four R/ECAPs, none of which were found in Newport Beach. However, two of the four were found in the neighboring City of Irvine, adjacent to one another and near the University of California; these both bordered the City of Newport Beach. According to the AI, it is likely that they qualify as R/ECAPs due to the high proportions of students. These R/ECAPs have a much more diverse group of residents, with some White, Asian or Pacific Islander, Hispanic and Black residents. These R/ECAPs primarily contain Asian or Pacific Islander or Hispanic residents. 23.49% of residents are White, 1.63% are Black, 48.50% are Hispanic, 23.70% are Asian or Pacific Islander, and 0.14% are Native American.

Figure 3-3 below identifies low poverty index with race/ethnicity and R/ECAPs in Newport Beach. The figure also identifies the R/ECAP areas (outlined in pink) bordering the City of Newport Beach, near the University of California, Irvine. The low poverty index captures the depth and intensity of poverty in a given neighborhood. The index uses both family poverty rates and public assistance receipt, in the form of cash-welfare, such as Temporary Assistance for Needy Families (TANF). The poverty rate and public assistance for neighborhoods are determined at the census tract level, and the higher the score, the less exposure to poverty in a neighborhood. The map identifies the R/ECAP and a few surrounding neighborhoods, to the south and south east, as having higher rates of poverty. The map confirms the AI analysis of the City of Newport Beach, showing that majority of resident's identify as White, non hispanic.

Disparities in Access to Opportunity

The UC Davis Center for Regional Change and Rabobank partnered to develop the Regional Opportunity Index (ROI) intended to help communities understand local social and economic opportunities. The goal of the ROI is to help target resources and policies toward people and places with the greatest need to foster thriving communities. The ROI incorporates both “people” and “place components, integrating economic, infrastructure, environmental, and social indicators into a comprehensive assessment of the factors driving opportunity.”

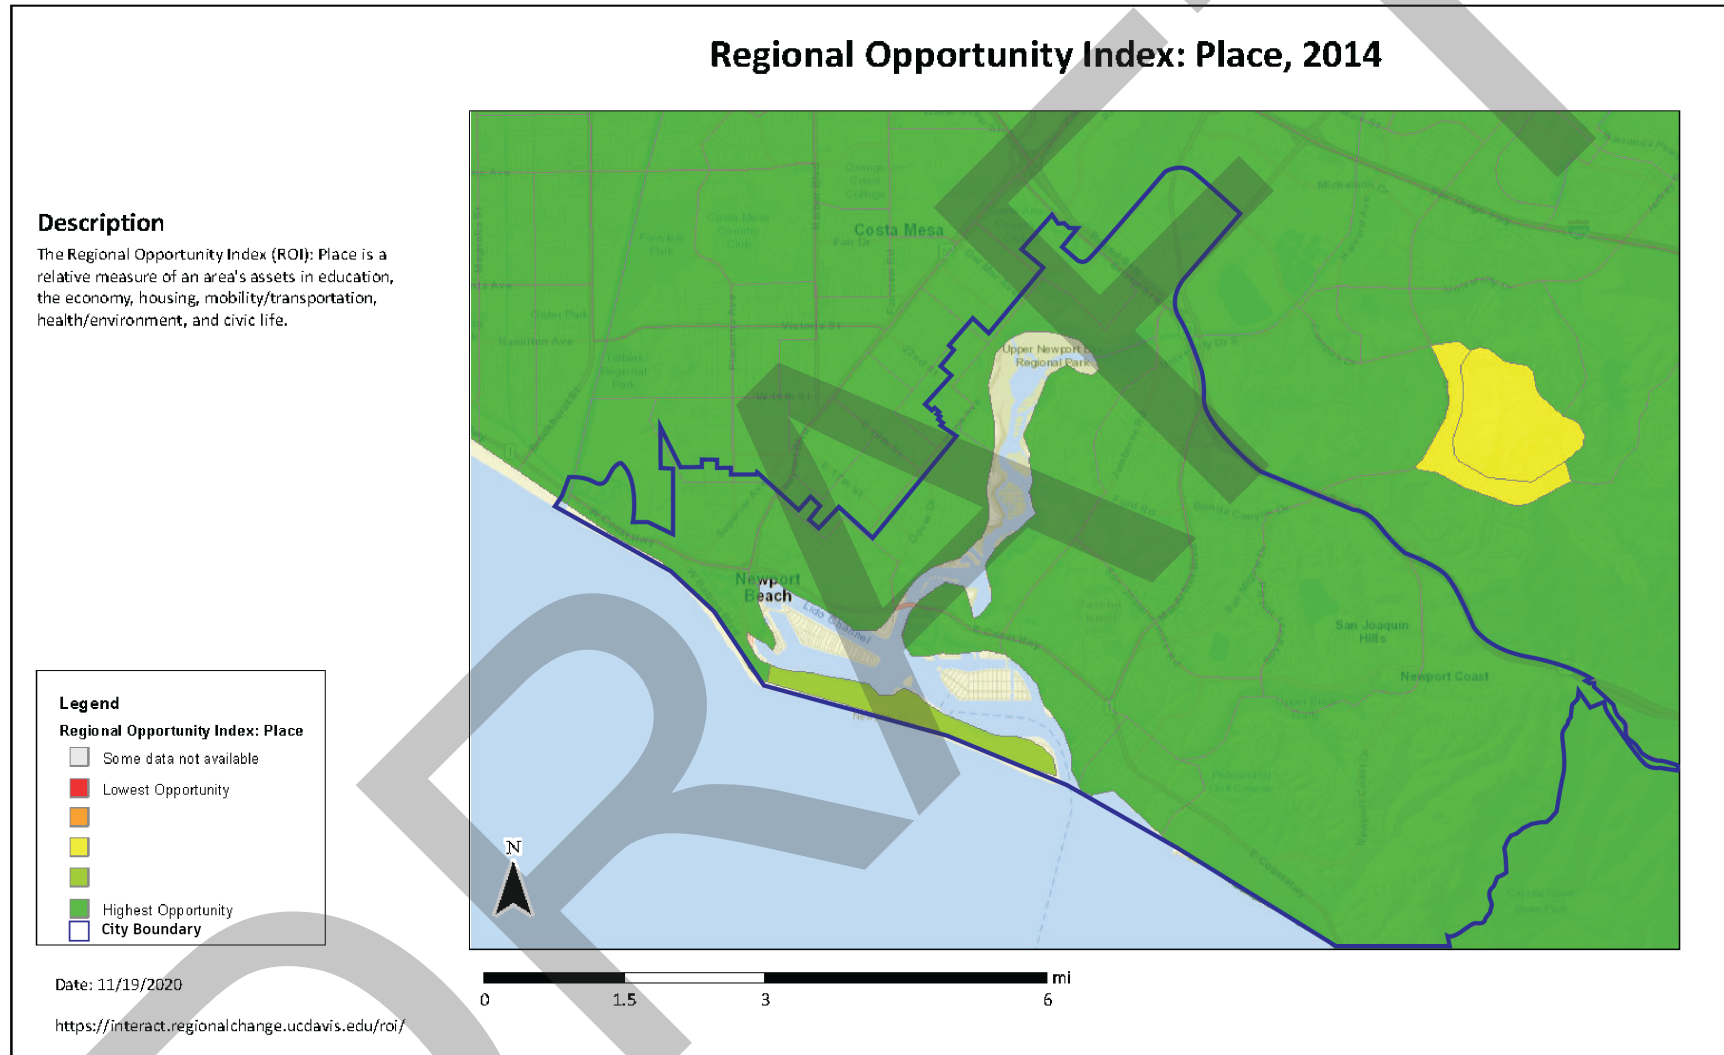

As shown in **Figures 3-4 and Figure 3-5** below, the majority of the City of Newport Beach is classified as a high opportunity zone. This indicates a high level of relative opportunities that people can achieve as well as a high level of relative opportunities that Newport Beach provides. While most of the census tracts within the City are areas of high opportunity, there are two census tracts within the ROI People Index shown as yellow, identifying a low opportunity area. Together these areas contain 86 sites which accommodate 1,941 potential units designated to meet the City’s RHNA for lower income units (shown in **Section 3: Housing Resources** and outlined in **Appendix B**). The Data for both regions with lower opportunity show high civic life, health, transportation, economic and education access, however, both show very low housing access. Therefore, the consideration and identification of these areas for housing, affordable to low and very low-income households, will provide increased housing opportunity in high opportunity and high resources areas.

Figure 3-4: Regional Opportunity Index: People, 2014

Figure 3-5: Regional Opportunity Index: Place, 2014

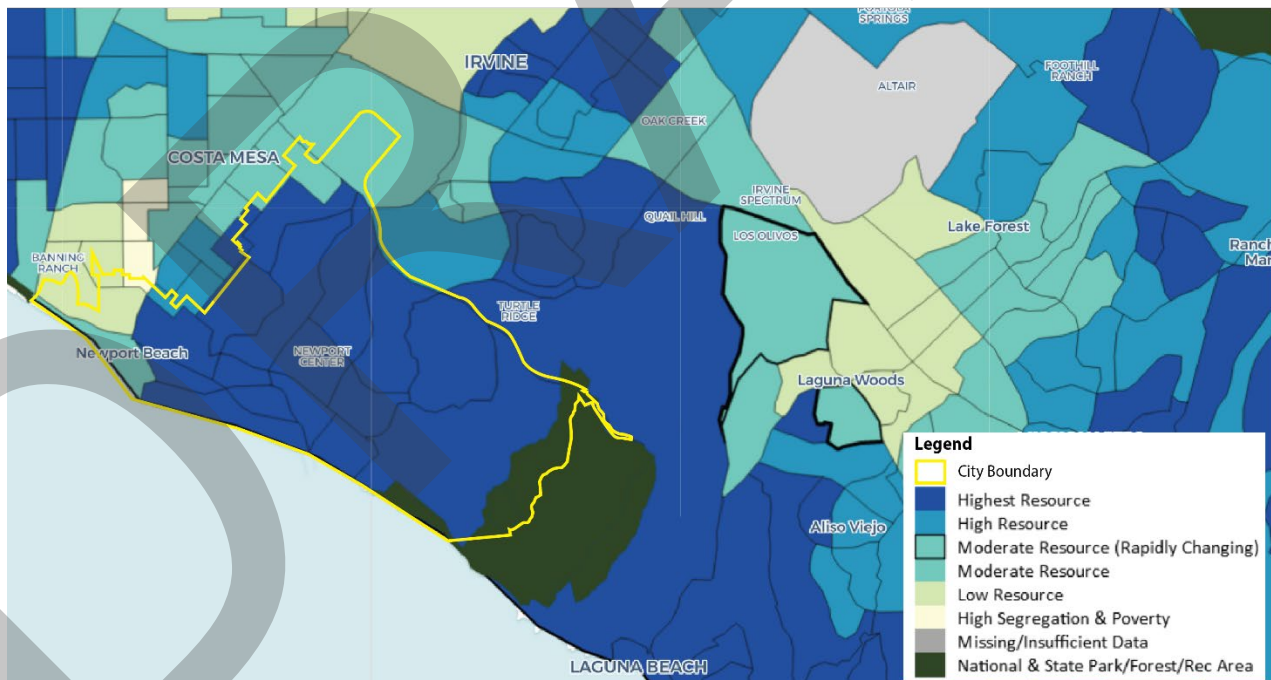

Source: UC Davis Center for Regional Change and Rabobank, 2014.

Additionally, the Department of Housing and Community Development (HCD) together with the California Tax Credit Allocation Committee (TCAC) established the California Fair Housing Task Force to provide research, evidence-based policy recommendations, and other strategic recommendations to HCD and other related state agencies/departments to further the fair housing goals (as defined by HCD). The Task force developed the TCAC/HCD opportunity Area Maps to understand how public and private resources are spatially distributed. The Task force defines opportunities as pathways to better lives, including health, education, and employment. Overall, opportunity maps are intended to display which areas, according to research, offer low-income children and adults the best chance at economic advancement, high educational attainment, and good physical and mental health.

According to the Task Force’s methodology, the tool allocates the 20 percent of the tracts in each region with the highest relative index scores to the “Highest Resource” designation and the next 20 percent to the “High Resource” designation. Each region then ends up with 40 percent of its total tracts as “Highest” or “High” resource. These two categories are intended to help State decision-makers identify tracts within each region that the research suggests low-income families are most likely to thrive, and where they typically do not have the option to live—but might, if given the choice. As shown in Figure 3-6 below, nearly all of Newport Beach is classified as moderate, high, and highest resource. There is one census tract in the Northwest Portion of Newport Beach classifies as low resource, the tracts scores identify high economic resources and low educational resources.

Figure 3-6: TCAC/HCD Opportunity Area Maps, Newport Beach (2020)

Source: California Tax Credit Allocation Committee and Department of Housing and Community Development, 2020.

Access to neighborhoods with higher levels of opportunity can be more difficult due to discrimination and when there may not be a sufficient range and supply of housing in such neighborhoods. In addition, the continuing legacy of discrimination and segregation can impact the availability of quality infrastructure, educational resources, environmental protections, and economic drivers, all of which can create disparities in access to opportunity.

The Department of Housing and Urban Development (HUD) developed the opportunity indicators to help inform communities about disparities in access to opportunity, the scores are based on nationally available data sources and assess resident's access to key opportunity assets in the City. **Table 3-16** provides the index scores (ranging from zero to 100) for the following opportunity indicator indices:

- + **Low Poverty Index:** The low poverty index captures poverty in a given neighborhood. The poverty rate is determined at the census tract level. The higher the score, the less exposure to poverty in a neighborhood.
- + **School Proficiency Index:** The school proficiency index uses school-level data on the performance of 4th grade students on state exams to describe which neighborhoods have high-performing elementary schools nearby and which are near lower performing elementary schools. The higher the score, the higher the school system quality is in a neighborhood.
- + **Labor Market Engagement Index:** The labor market engagement index provides a summary description of the relative intensity of labor market engagement and human capital in a neighborhood. This is based upon the level of employment, labor force participation, and educational attainment in a census tract. The higher the score, the higher the labor force participation and human capital in a neighborhood.
- + **Transit Trips Index:** This index is based on estimates of transit trips taken by a family that meets the following description: a three-person single-parent family with income at 50% of the median income for renters for the region (i.e. the Core-Based Statistical Area (CBSA)). The higher the transit trips index, the more likely residents in that neighborhood utilize public transit.
- + **Low Transportation Cost Index:** This index is based on estimates of transportation costs for a family that meets the following description: a three-person single-parent family with income at 50 percent of the median income for renters for the region/CBSA. The higher the index, the lower the cost of transportation in that neighborhood.
- + **Jobs Proximity Index:** The jobs proximity index quantifies the accessibility of a given residential neighborhood as a function of its distance to all job locations within a region/CBSA, with larger employment centers weighted more heavily. The higher the index value, the better the access to employment opportunities for residents in a neighborhood.
- + **Environmental Health Index:** The environmental health index summarizes potential exposure to harmful toxins at a neighborhood level. The higher the index value, the less exposure to toxins harmful to human health. Therefore, the higher the value, the better the environmental quality of a neighborhood, where a neighborhood is a census block-group.

Table 3-15 below displays the opportunity indices by race and ethnicity for persons in Newport Beach. According to the data, there is low poverty among the population of Newport, across all racial/ethnic groups. Additionally, the access to quality education system is high among all racial/ethnic groups (each group has an opportunity index score above 80). The data shows the City offers high labor and economic opportunity as well as sufficient access to transportation. However, while the data shows a high access to transportation, the transportation is less affordable, specifically to non-Hispanic Asian or Pacific Islander and Native American populations. The data also shows low environmental health index scores across all racial/ethnic groups, below 50.

| Table 3-15: Opportunity Indices by Race/Ethnicity, Newport Beach | | | | | | | |
|---|--------------------------|---------------------------------|---------------------------|----------------------|--------------------------------------|-----------------------------|-----------------------------------|
| (Newport Beach, CA CDBG) Jurisdiction | Low Poverty Index | School Proficiency Index | Labor Market Index | Transit Index | Low Transportation Cost Index | Jobs Proximity Index | Environmental Health Index |

Discussion of Disproportionate Housing Needs

The analysis of disproportionate housing needs within Newport Beach evaluated existing housing need, need of the future housing population, and units within the community at-risk of converting to market-rate.

Future Growth Need

The City's future growth need is based on the RHNA production of 1,456 very low and 930 low income units within the 2021-2029 planning period. **Appendix B** of this Housing Element shows the City's ability to meet its 2021-2029 RHNA need at all income levels. This demonstrates the City's ability to accommodate the anticipated future affordable housing needs of the community.

Existing Need

As described in Section 3.F.1 of this Housing Element, the Orange County Housing Authority administers Section 8 Housing Choice vouchers within the City of Newport Beach. As of October 30, 2020, the City has allocated 112 Section 8 vouchers to residents within the community: 30 for families, 20 for persons with disabilities, and 62 for seniors.

Additionally, a variety of affordable housing opportunities currently exist in the City. In Orange County, each category of publicly supported housing (public housing, Project Based Section 8, Other Multi-unit Housing, Housing Choice Vouchers, and Low-Income Housing Tax Credit [LIHTC] units) is represented, although that representation varies greatly depending on the individual municipality. Table 3-16 below identifies the variety of publicly supported housing, by percent, in the City of Newport Beach.

Table 3-16 below displays the demographics of all public ally supported housing in Newport Beach. The data shows that majority of persons who utilize and receive public housing support identify as White, with a small percentage Hispanic or Asian/Pacific Islander.

| Table 3-16: Publicly Supported Housing Demographics, Newport Beach | | | | | | | | |
|--|--------|--------|-------|-------|----------|---------|---------------------------|-------|
| Newport Beach | White | | Black | | Hispanic | | Asian or Pacific Islander | |
| Housing Type | # | % | # | % | # | % | # | % |

| HVC = Housing Choice Voucher | | | | | | | | |
| LIHTC = Low Income Housing Tax Credit | | | | | | | | |

Displacement Risk

The potential for economic displacement risk can result from a variety of factors, including large-scale development activity, neighborhood reinvestment, infrastructure investments, and changes in local and regional employment opportunity. Economic displacement can be an inadvertent result of public and private investment, where individuals and families may not be able to keep pace with increased property values and market rental rates.

Table 3-17 below identifies the assisted and affordable housing units within the City of Newport Beach and identifies the end date of each covenant. According to the table, 4 locations (with a total of 112 units) were up for renewal in the previous planning period (2014-2021). Additionally, 3 locations, with a total of 45 units are set to expire and be addressed for renewal over the next planning period (2021-2029).

The City of Newport Beach is committed to working with property owners and utilizing appropriate funds, as available, to review covenants set to expire for renewal.

| Project Name/ Location | Type of Assistance Received | Earliest Possible Date of Change | Number of Units/Type |
|---|--|---|---|
| Newport Harbor Apartments 1538 Placentia Avenue | Section 8 (rental assistance vouchers) Density Bonus Community Development Block Grant (CDBG) | 2020 | 26 Low-Income |

Assessment of Contributing Factors to Fair Housing Issues in Newport Beach

The AI identifies the following regional goals for mitigating impediments to fair housing within jurisdictions in Orange County:

- + **Goal 1:** Increase the supply of affordable housing in high opportunity areas.¹
- + **Goal 2:** Prevent displacement of low- and moderate-income residents with protected characteristics, including Hispanic residents, Vietnamese residents, other seniors, and people with disabilities
- + **Goal 3:** Increase community integration for persons with disabilities.
- + **Goal 4:** Ensure equal access to housing for persons with protected characteristics, who are disproportionately likely to be lower-income and to experience homelessness.
- + **Goal 5:** Expand access to opportunity for protected classes

The Housing Element programs incorporates these recommended goals as they relate to Newport Beach. The analysis above regarding other fair housing issues within Newport Beach yielded the following results:

- + The City does not have any racial or ethnic groups that score higher than 60 on the dissimilarity index, indicating that while there are racial and ethnic groups with higher levels of segregation than others within Newport Beach, none meet the standard set to identify segregated groups.
- + The City does not have any racially or ethnically concentrated census tracts (R/ECAPs) as identified by HUD. This indicates that there are no census tracts within Newport Beach with a non-white population of 50 percent or more or any census tracts that have a poverty rate that exceeds 40% or is three or more times the average tract poverty rate for the metropolitan/micropolitan area. However, one R/ECAP was identified in the neighboring city of Irvine, near the University of California Irvine. This will be considered in the housing plan as students within the R/ECAP may look for housing in Newport Beach.
- + The UC Davis Regional Opportunity Index shows that the majority of residents within Newport Beach have a high level of access to opportunity throughout the majority of the City, with only two census tracts showing a moderate level of access to opportunity. No census tracts were shown as having the lowest level of access to opportunity.
- + The analysis of the TCAC/HCD opportunity Area Maps show that most census tracts in Newport Beach are classified with the “Moderate Resource” “High Resource” or “Highest Resource” designation. This indicates that these census tracts are within the top forty percent in the region in terms of areas that lower-income residents may thrive if given the opportunity to live there. All but two census tracts within Newport Beach register within the top 20 percent in the index. One census tract registered as a “Low Resource” area, citing high economic opportunity and low educational opportunity.
- + The Opportunity Indices identify overall high access to quality resources including economic and job proximity, educational access, and transportation access. However, there is a low health index, indicating increased pollution and low environmental quality across all racial/ethnic groups in the City. Additionally, the opportunity indices identify low affordable transportation options to both the Asian or Pacific Islander (Non-Hispanic) and Native American (Non-Hispanic).

4. Analysis of Sites Pursuant to AB 686

AB 686 requires that jurisdictions identify sites throughout the community in a manner that is consistent with its duty to affirmatively further fair housing. The site identification requirement involves not only an analysis of site capacity to accommodate the RHNA (provided in Appendix B), but also whether the identified sites serve the purpose of replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity.

Figure 3-7 shows the proposed candidate sites to the RHNA for Newport Beach in relation to the location of residents of Hispanic origin, and it shows the following findings:

- + Majority of sites (274 acres) identified to accommodate the City's RHNA are identified in areas with between 5.1 and 10 percent Hispanic population, including a total of 731 units that affordable to low and very low incomes and 2,859 units affordable to moderate and above moderate incomes.
- + In the northern region, a total of 162 acres identified to accommodate the City's RHNA has a 10.1 to 25 percent Hispanic population, including a total of 1,941 units affordable to low and very low-income households.
- + A total of 14 acres is identified in areas with less than 5 percent Hispanic populations, including a total of 92 units affordable to low and very low-income households and 829 units affordable to moderate and above moderate-income households.

Figure 3-7: Candidate Sites – Ethnicity Analysis

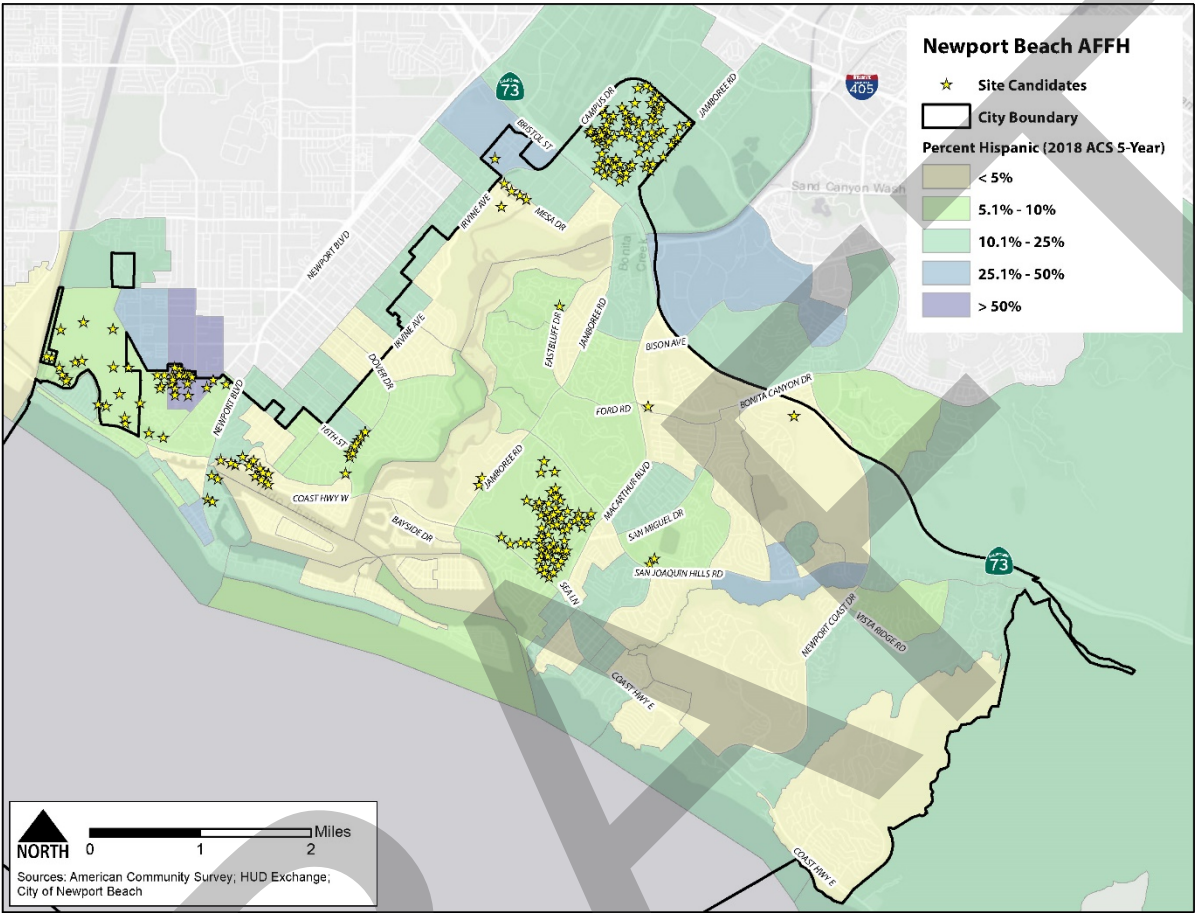

Figure 3-8 shows location of existing and proposed affordable units within Newport Beach in comparison with census data showing the percentage of the population within each block group that is non-white. **Figure 3-8** shows the following findings:

- + A total of 162 acres are identified to accommodate the City's RHNA in areas with a 25.1 to 50 percent non-White population, including a total of 1,941 units affordable to low and very low-income households.
- + A total of 288 acres are identified to accommodate the City's RHNA in areas with 10.1 to 25 percent non-White population, including a total of 735 units affordable to low and very low-income households and 4,065 units affordable to moderate and above moderate-income households.

Figure 3-8: Candidate Sites – Non-White Analysis

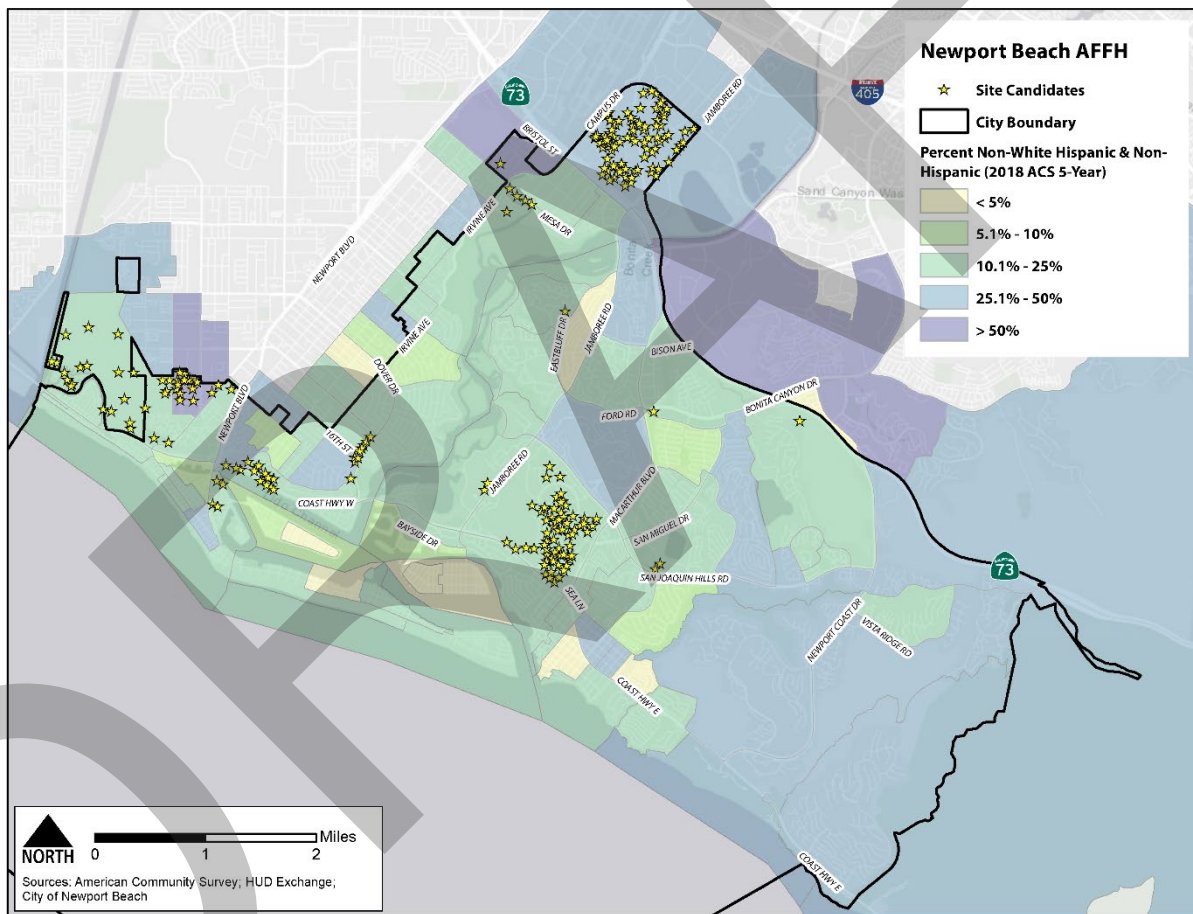

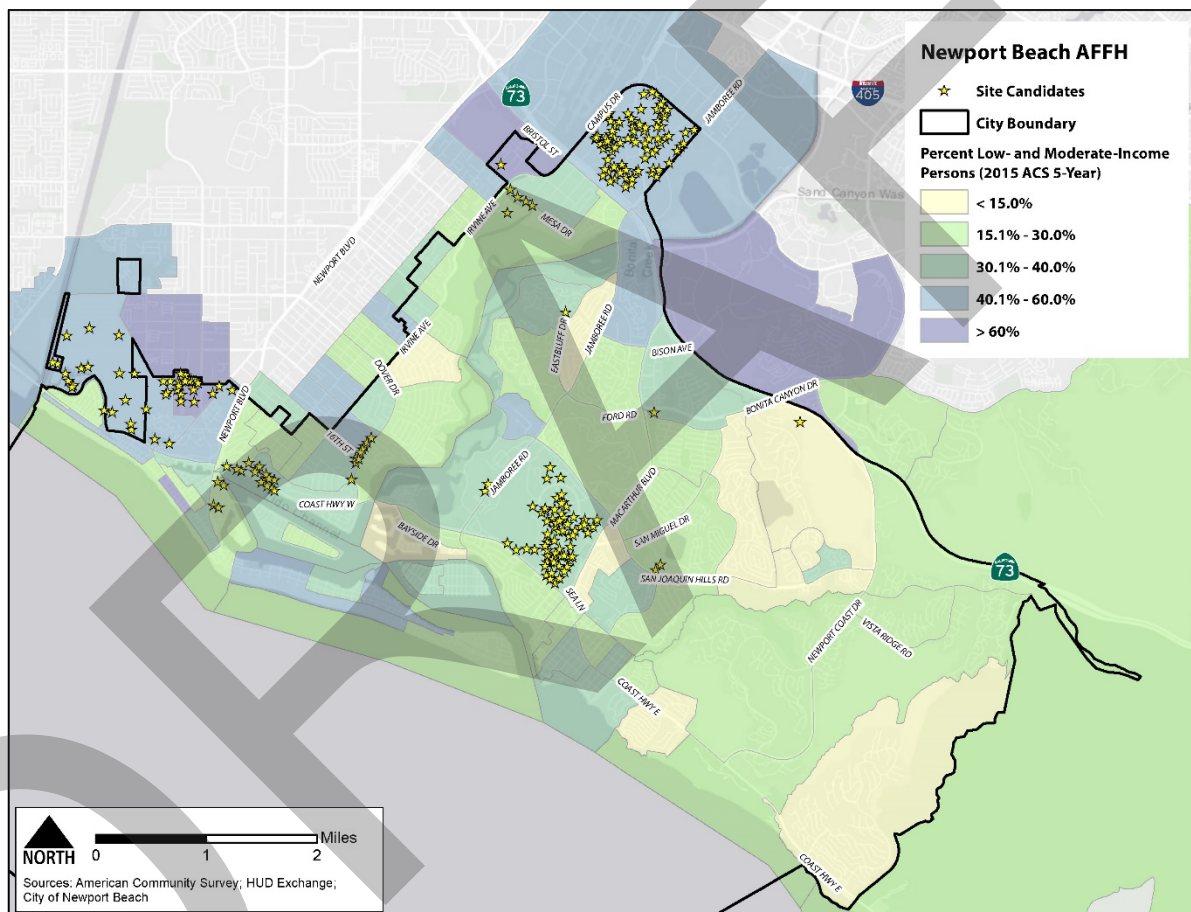

Figure 3-9 shows Low/Moderate Income (LMI) block groups within the City of Newport Beach. The figure shows the following:

- + A total of 2,494 units affordable to low and very low-income households are in areas with 40.1 to 60+ percent low- and moderate-income households.
- + A total of 182 units affordable to low and very low-income households are in areas with 30.1 to 40 percent low- and moderate-income households.
- + A total of 88 units affordable to low and very low-income households are in areas with less than 15 percent low moderate-income households.

Figure 3-9: Candidate Sites – Low/Moderate Income Block Group Analysis

5. Analysis of Fair Housing Priorities and Goals

To enhance mobility and promote inclusion for protected classes, the chief strategy included in this housing element is to provide sites suitable for affordable housing in high-resource, high opportunity areas, as demonstrated by the analysis of the housing resource sites contained in this section. Other programs that affirmatively further fair housing and implement the AI's recommendations include:

D. Housing Resources

1. Regional Housing Needs Allocation

This section of the Housing Element provides an overview of the resources available to the City to meet their Regional Housing Needs Allocation (RHNA).

Residential Sites Inventory

Appendix B of the Housing Element includes the required site analysis tables and site information for the vacant and non-vacant properties to meet the City's RHNA need through the 2021-2029 planning period. The following discussions summarize the City's site inventory and rezone plan.

Above Moderate- and Moderate-Income Sites

For the 2021-2029 planning period, the City's RHNA allocation is 1,050 for moderate income site and 1,409 for above moderate-income sites. The City anticipates growth, via projects already in the approval process, to entirely meet the above moderate income need within the planning period. The City will meet the moderate income need through a combination of existing capacity on residentially zoned land, through the redevelopment of parcels rezoned within the focus areas, and through the development of accessory dwelling units (ADUs).

A total of 348 moderate income and 40 above moderate-income units can be accommodated through existing zoning capacity on parcels. By subtracting existing units from maximum potential unit yield per parcel, the City projected additional capacity on several parcels. Each parcel included in the inventory was then vetted for likelihood of redevelopment and to ensure all HCD criteria were met. The required descriptive information for these sites can be found within **Appendix B**.

An additional 106 moderate and above moderate-income units can be accommodated through the development of ADUs throughout the community. This is based on the methodology described within this section and incorporates guidance from HCD's Housing Element Site Inventory Guidebook.

A supplemental 4,174 moderate and above moderate-income units can be accommodated through the rezone strategies proposed for six focus areas throughout the City. Originally identified by the Housing Element Update Advisory Committee (HEAUC), the focus areas guided the development of area-specific rezone policies and City actions to ensure that Newport Beach has sufficient capacity to meet the RHNA Allocation for the 6th Cycle.

ANALYSIS OF THE CITY'S EXISTING CAPACITY AND ZONING

| Table 3-18: Residential Capacity for Moderate and Above Moderate-Income Sites | | | | | |
|---|-------------|--------------------|-------------------|--------------------|------------------|
| Significant Zone | Max Density | Reasonable Density | Number of Parcels | Acreage | Potential Units |
| Moderate Income Sites | | | | | |
| RM | 14 du/ac | 13 du/ac | 2 | 9.04 acres | 14 units |
| MU-DW | 26 du/ac | 26 du/ac | 5 | 7.10 acres | 187 units |
| MU-MM | 26 du/ac | 26 du/ac | 8 | 6.25 acres | 119 units |
| MU-W2 | 26 du/ac | 26 du/ac | 2 | 1.93 acres | 20 units |
| MU-CV/15 th Street | 18 du/ac | 15 du/ac | 2 | 0.17 acres | 2 units |
| Subtotal | | | 17 | 24.49 acres | 340 units |
| Above Moderate-Income Sites | | | | | |
| MU-W1 | 5 du/ac | 5 du/ac | 7 | 9.17 acres | 40 units |
| Subtotal | | | 7 | 9.17 acres | 40 units |
| Total | | | 25 | 33.66 acres | 380 units |

REASONABLE CAPACITY ASSUMPTIONS

This section describes the methodology developed to determine the site capacity for the moderate and above moderate-income sites. The City assumes that above moderate-income units will develop at a maximum up eight dwelling units per acre, and that moderate-income units will develop at a maximum of 26 dwelling units per acre. Reasonable capacity for sites identified to meet the City's moderate and above moderate need was calculated based on a number of factors, including site size, existing zoning requirements, vacancy and total number of units entitled, and the maximum density achievable for projects within the following zones:

- + **RM – Multiple Residential Zoning District:** The RM Zone District is intended to provide for areas appropriate for multi-unit residential developments containing attached or detached dwelling units. The zone permits a density range of 0.0 to 52 dwelling units per acre.
- + **MU-MM – Mixed-Use Mariners' Mile:** The MU-MM Zoning District is intended to provide areas for the development of mixed-use structures that vertically integrate residential dwelling units above the ground floor with retail uses including office, restaurant, and retail. The zone permits a density range of 20.1 – 26.7 dwelling units per acre.
- + **MU-DW – Mixed-Use Dover/Westcliff:** This zoning district applies to properties located in the Dover Drive/Westcliff Drive area. Properties may be developed for professional office or retail uses, or as horizontal or vertical mixed-use projects that integrate multi-unit residential dwelling units with retail and/or office uses. The zone permits a density range of 20.1 – 26.7 dwelling units per acre.
- + **MU-W2 – Mixed-Use Water:** This zoning district applies to waterfront properties in which marine-related uses may be intermixed with general commercial, visitor-serving commercial and residential dwelling units on the upper floors. This zone permits a density range of up to 15 dwelling units per acre.

- + **MU-CV/15th Street – Mixed-Use Cannery Village and 15th Street:** This zoning district applies to areas where it is the intent to establish a cohesively developed district or neighborhood containing multi-unit residential dwelling units with clusters of mixed-use and/or commercial structures on interior lots of Cannery Village and 15th Street on Balboa Peninsula. Allowed uses may include multi-unit dwelling units; nonresidential uses; and/or mixed-use structures, where the ground floor is restricted to nonresidential uses along the street frontage. Residential uses and overnight accommodations are allowed above the ground floor and to the rear of uses along the street frontage. Mixed-use or nonresidential structures are required on lots at street intersections and are allowed, but not required, on other lots. This zone permits a density range of 20.1 – 26.7 dwelling units per acre.
- + **MU-W1 – Mixed-Use Water:** This zoning district applies to waterfront properties along the Mariners’ Mile Corridor in which nonresidential uses and residential dwelling units may be intermixed. A minimum of fifty (50) percent of the allowed square footage in a mixed-use development shall be used for nonresidential uses in which marine-related and visitor-serving land uses are mixed. This zone permits a density range of up to 15 dwelling units per acre.

Potential constraints, to the extent they are known, such as environmentally sensitive areas and steep slopes were considered, and deductions made where those factors decreased the net buildable area of a parcel. Additionally, existing units’ non-vacant parcels were analyzed to determine the number of existing units currently on the parcel. Replacement of existing units was included as a factor to prevent no net loss of existing housing stock.

Rezones to Accommodate the Moderate and Above Moderate RHNA

In additional to residential use on specific plans and ADUs, the City of Newport Beach has identified 133 sites to be rezoned from commercial use to residential use, as well as 90 sites to be rezoned to a higher residential density. The sites for rezone are further detailed in **Appendix B** and a rezone program is identified in **Section 4: Housing Plan**. **Figure XX** displays the focus areas for rezone, accompanied by a corresponding table of strategy information shown below as **Table 3-19**.

| Focus Area | Feasible Acreage (AC) | % Projected to Redevelop | Moderate Income Affordability | Rezone Density | Potential Moderate-Income Units | Potential Above Moderate-Income Units |
|------------------------|-----------------------|--------------------------|-------------------------------|----------------|---------------------------------|---------------------------------------|
| Airport Vicinity Area | 162 AC | 30% | 20% | 50 du/ac | 485 units | 0 units |
| West Newport Mesa Area | 48 AC | 20% | 20% | 45 du/ac | 86 units | 0 units |
| Dover-Westcliff Area | 14 AC | 10% | 5% | 30 du/ac | 2 units | 35 units |

| Focus Area | Feasible Acreage (AC) | % Projected to Redevelop | Moderate Income Affordability | Rezone Density | Potential Moderate-Income Units | Potential Above Moderate-Income Units |
|---------------------|-----------------------|--------------------------|-------------------------------|----------------|---------------------------------|---------------------------------------|
| Newport Center Area | 158 AC | 25% | 5% | 45 du/ac | 89 units | 1515 units |
| Coyote Canyon Area | 22 AC | 100% | 10% | 40 du/ac | 88 units | 704 units |
| Banning Ranch Area | 46 AC | 100% | 15% | 30 du/ac | 207 units | 962 units |
| TOTAL | 450 AC | -- | -- | -- | 957 units | 3,217 units |

Development of Non-Vacant Sites and Converting to Residential Uses

To analyze the potential for redevelopment of non-vacant sites, the City sent out more than 500 letters to property owners. Responses to the letters were recorded and are included within the inventory of sites within **Appendix B**. Although a positive response to the redevelopment interest letters does not guaranty the redevelopment of a parcel to residential as a primary use within the planning period, it is a strong indicator of likelihood of redevelopment and is used as sufficient evidence for inclusion within the Adequate Sites Inventory.

ACCESSORY DWELLING UNIT PRODUCTION

One of the proposed methods for meeting the City's moderate and above moderate RHNA is through the promotion and development of accessory dwelling units (ADUs). A number of State Assembly and Senate Bills were passed in 2019 that promote and remove barriers that may inhibit the development of ADUs within communities. The following is a summary of those bills:

- + AB 68 and 881
 - Prohibit minimum lot size requirements
 - Cap setback requirements at 4', increasing the size and location opportunities for ADUs
 - Prohibit the application of lot coverage, FAR, or open space requirements that would prevent an 800 square foot ADU from being developed on a lot
 - Remove the need for replacement parking when converting an existing garage to an ADU
 - Limit local discretion in establishing min and max unit size requirements
 - Mandate a 60-day review period for ADU applications through a non-discretionary process
- + SB 13
 - Prohibit owner-occupancy requirements for 5 years
 - Reduce impact fees applicable to ADUs

- Provide a program for homeowners to delay compliance with certain building code requirements that do not relate to health and safety
- + AB 670
 - Prohibits Homeowner's Associations (HOAs) from barring ADUs

These bills, as well as other significant legislation relating to ADUs creates a development environment that is likely to increase the number of ADUs developed within Newport Beach over the 2021-2029 planning period. Newport Beach, with a large proportion of single-unit residential properties (many on larger lots), is well-oriented for the development of ADUs.

As a result of this legislation, the City expects to approve more ADUs in the 2021-2029 planning period. The City processed three ADUs in 2018, six in 2019 and 55 in 2020. Calculating the average of the three years, assumed at a rate doubled each year during the 6th Cycle, the City assumes a total of 334 ADUs from 2021-2029. Utilizing the Southern California Association of Governments (SCAG) approved ADU affordability assumptions, 228 ADUs will be allocated to the low and very low income RHNA, 100 will be allocated to the City's moderate income RHNA and 6 will be allocated to the above moderate. The complete methodology is outline in **Appendix B**.

Through the Housing Element, Newport Beach commits to creating an ADU tracking program and performing a mid-cycle assessment of their ADU development performance. As stated in HCD guidance, the City may use other justifiable analysis to calculate anticipated ADU performance. This program is detailed in **Section 4: Housing Plan**.

Sites Suitable for Lower Income Housing

This section contains a description and listing of the candidate sites identified to meet the Newport Beach's very low and low income RHNA need. A full list of these sites is presented in **Appendix B**.

Projects in the Pipeline and Accessory Dwelling Units

The City has identified a number of projects currently in the entitlements process which are likely to be developed during the planning period and count as credit towards the 2021-2029 RHNA allocation. Projects with planned affordable components include:

- + Newport Airport Village (17 Very Low-Income Units Planned)
- + Uptown Newport (102 Very Low-Income Units Planned)
- + Residences at 4400 Von Karman (13 Very Low-Income Units Planned)
- + Newport Crossings (78 Low-Income Units Planned)

The City currently has approved an average of 21 ADUs per year for development between January 1, 2018 and December 30, 2020. HCD guidance states that ADUs may be calculated based on the City's production from January 1, 2018 through December 31, 2020. To calculate a total number of ADUs assumed to be produced from 2021-2029, the average of all ADUs developed from 2018 to 2020 was

calculated then multiplied by two for each year of the 6th cycle. Through this method, this city identified a total of 334 ADUs assumed for the 8 years.

The City of Newport Beach utilized SCAGs affordability assumptions for ADUs in Orange County. This equates to an anticipated ADU development of 334 ADUs over the next 8 years, 228 of which are anticipated to be affordable. The ADUs not designated to meet the City's lower income RHNA need are anticipated to be 100 affordable at moderate income levels and 6 affordable at the above moderate-income level. The City has identified programs within the **Section 4: Housing Plan** to encourage the production of ADUs in Newport Beach.

The total anticipated development of Projects in the Pipeline and Accessory Dwelling Units is summarized in **Table 3-20** below:

| Table 3-20: Low and Very Low-Income Remaining Need | | |
|---|------------------------|-------------------|
| | Very Low Income | Low Income |
| RHNA Allocation | 1,456 | 930 |
| Pipeline Projects | 43 | 78 |
| Accessory Dwelling Units | 84 | 144 |
| Remaining Low/Very Low-Income Need | 1,326 | 706 |

Sites Identified for Rezone to Accommodate Low and Very low

After the identification of projects in the pipeline and ADUs to accommodate the City's low and very low RHNA, a remaining 2,032 units must be accommodated to meet the City's RHNA. To account for this remaining need, the City conducted a community-driven process to identify several parcels for inclusion in the Adequate Sites Inventory. This process was led by the Housing Element Update Advisory Committee (HEUAC). To guide the identification of adequate sites, the committee created focus areas. Sites identified by the committee and the public to meet the City's very low and low income RHNA were selected based on the AB 1397 size requirements of at least 0.5 acres but not greater than 10 acres.

The 223 parcels are currently zoned as the following:

- + 133 parcels are zoned commercially
- + 90 parcels are zoned residentially at a lower density.

All parcels are non-vacant and will be rezoned to higher densities (densities are specific to each focus area) able to accommodate the development of lower-income housing. **Figure 3-11** below displays the sites identified to accommodate the City's low and very low income RHNA allocation. The **Housing Plan** section outlines actions the City will take to promote the development of affordable units within the following focus areas:

- + Airport Vicinity Area
- + West Newport Mesa Area

- + Dover-Westcliff Area
- + Newport Center Area
- + Coyote Canyon Area
- + Banning Ranch Area

The key assumptions and unit projections related to each focus area are shown below in **Table 3-21** and the focus areas are shown geographically below in **Figure 3-10**.

| Focus Area | Feasible Acreage (AC) | % Projected to Redevelop | Low/Very Low-Income Affordability | Rezone Density | Potential Low/Very Low-Income Units |
|------------------------|-----------------------|--------------------------|-----------------------------------|----------------|-------------------------------------|
| Airport Vicinity Area | 162 AC | 30% | 80% | 50 du/ac | 1,941 units |
| West Newport Mesa Area | 48 AC | 20% | 80% | 45 du/ac | 347 units |
| Dover-Westcliff Area | 14 AC | 10% | 10% | 30 du/ac | 4 units |
| Newport Center Area | 158 AC | 25% | 10% | 45 du/ac | 178 units |
| Coyote Canyon Area | 22 AC | 100% | 10% | 40 du/ac | 88 units |
| Banning Ranch Area | 46 AC | 100% | 15% | 30 du/ac | 206 units |
| TOTAL | 450 AC | -- | -- | -- | 2,764 units |

Figure 3-10: Focus Areas for Rezones

Development of Nonvacant Sites to Accommodate Low and Very Low Income

Of the 239 non-vacant sites, 19 were also identified in the 5th cycle. In accordance with AB 1397 the City will establish a program that permits By-Right development for projects that propose 20 percent of all units to be affordable to low and very low-income units. The program is outline in detail in **Section 4: Housing Plan**.

REGIONAL HOUSING NEEDS ALLOCATION

Future Housing Needs

Future housing need refers to the share of the regional housing need that has been allocated to the City. The State Department of Housing and Community Development (HCD) supplies a regional housing goal number to the Southern California Association of Governments (SCAG). SCAG is then mandated to allocate the housing goal to city and county jurisdictions in the region through a RHNA Plan. In allocating the region's future housing needs to jurisdictions, SCAG is required to take the following factors into consideration pursuant to Section 65584 of the State Government Code:

- + Market demand for housing.
- + Employment opportunities.
- + Availability of suitable sites and public facilities.
- + Commuting patterns.

- + Type and tenure of housing.
- + Loss of units in assisted housing developments.
- + Over-concentration of lower income households; and • Geological and topographical constraints.

HCD, through a determination process, allocates units to each region across California. It is then up to each region to determine a methodology and process for allocating units to each jurisdiction within that region. SCAG adopted its final Regional Housing Needs Allocation (RHNA Plan) in February 2021. This RHNA covers an 8-year planning period (starting in 2021) and addresses housing issues that are related to future growth in the region. The RHNA allocates to each city and county a “fair share” of the region’s projected housing needs by household income group. The major goal of the RHNA is to assure a fair distribution of housing among cities and counties within the Southern California region, so that every community provides an opportunity for a mix of housing for all economic segments.

Newport Beach’s share of the SCAG regional growth allocation is 4,845 new units for the current planning period (2021-2029). **Table 3-22, Housing Needs for 2021-2029**, indicates the City’s RHNA need for the stated planning period.

| Table 3-22: Housing Needs for 2021-2029 | | |
|---|------------------------|----------------|
| Income Category (% of County AMI) | Number of Units | Percent |
| Extremely Low (30% or less) | 728 units | 15% |
| Very Low (31 to 50%) ¹ | 728 units | 15% |
| Low (51 to 80%) | 930 units | 19% |
| Moderate (81% to 120%) | 1,050 units | 22% |
| Above Moderate (Over 120%) | 1,409 units | 29% |
| Total | 4,845 units | 100% |
| Note 1: Pursuant to AB 2634, local jurisdictions are also required to project the housing needs of extremely low-income households (0-30% AMI). In estimating the number of extremely low-income households, a jurisdiction can use 50% of the very low-income allocation or apportion the very low-income figure based on Census data. | | |

ADEQUACY OF SITES FOR RHNA

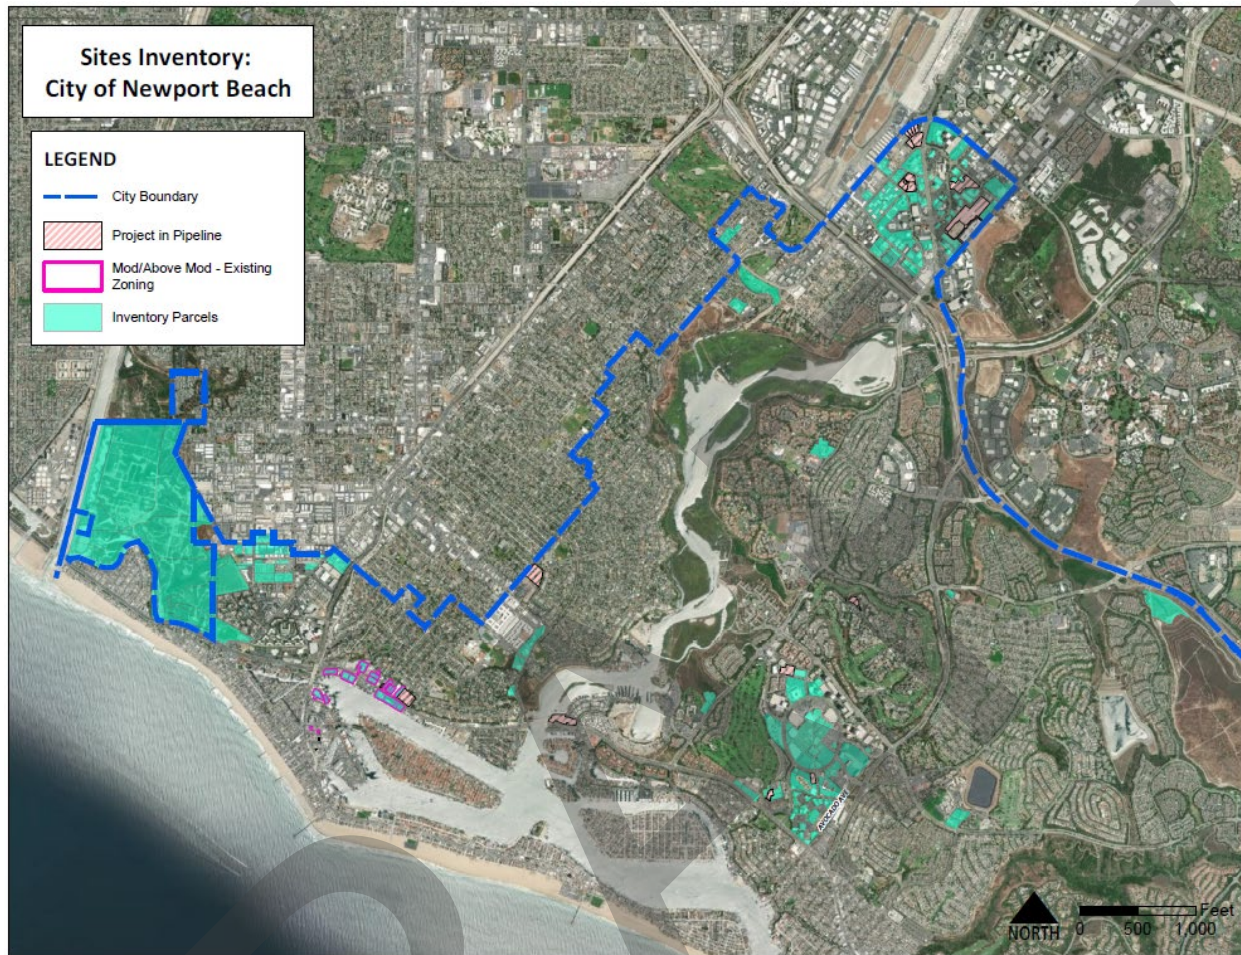

Newport Beach has identified sites with a capacity to accommodate 4,512 lower income dwelling units, which is in excess of its 2,386-unit lower income housing need. Sites designated are on parcels that permit residential development as a primary use up to 50 dwelling units per acre.

The City of Newport Beach has a total 2021-2029 RHNA allocation of 4,845 units. As demonstrated previously, the City can take credit for 2,815 units currently within the planning process, lowering the total RHNA obligation to 2,632 units as shown in **Table 3-23**. The Housing Element update lists sites that can accommodate approximately 7,407 additional units, in excess of the required 2,632 units. As described in this section, the City believes that due to recent State legislation and local efforts to promote accessory

living unit production, the City can realistically anticipate the development of 336 ADUs within the 8-year planning period. Overall, the City has adequate capacity to accommodate its 2021-2029 RHNA.

| Table 3-23: Summary of RHNA Status and Sites Inventory | | | | | |
|---|---|-------------------|------------------------|------------------------------|--------------|
| | Extremely Low/ Very Low Income | Low Income | Moderate Income | Above Moderate Income | Total |
| 2021-2029 RHNA | 1,456 | 930 | 1,050 | 1,409 | 4,845 |
| RHNA Credit (Units Built) | TBD | TBD | TBD | TBD | TBD |
| Remaining RHNA | 1,456 | 930 | 1,050 | 1,409 | 4,845 |
| Total RHNA Obligations | 1,456 | 930 | 1,050 | 1,409 | 4,845 |
| Sites Available | | | | | |
| Projects in the Pipeline | 121 | 0 | 2,183 | 2,304 | |
| Accessory Dwelling Units | 228 | 100 | 6 | 334 | |
| Existing Zoning Capacity (No Rezones) | 0 | 342 | 40 | 382 | |
| Remaining RHNA | 2,037 | 608 | -- | 2,645 | |
| Airport Vicinity Rezone | 1,941 | 485 | 0 | 2,426 | |
| West Newport Mesa Rezone | 347 | 86 | 0 | 433 | |
| Dover-Westcliff Rezone | 4 | 2 | 35 | 41 | |
| Newport Center Rezone | 178 | 89 | 1,515 | 1,782 | |
| Coyote Canyon Rezone | 88 | 88 | 704 | 880 | |
| Banning Ranch Rezone | 206 | 207 | 962 | 1,375 | |
| Total Potential Capacity of Rezones | 2,764 | 957 | 3,216 | 6,937 | |
| Sites Surplus/Shortfall (+/-) | +727 | +349 | +3,217 | +4,292 | |

Figure 3-11: Sites Inventory and RHNA Obligations

Summary of Sites Inventory and RHNA Obligations

The data and map detailed in **Figure 3-11** above shows the City of Newport Beach’s ability to meet the 4,845 RHNA allocation in full capacity with a 4,306-unit buffer. Along with the identifying appropriate sites to meet the current and future housing needs, the City has established a Housing Plan to support its efforts in providing housing opportunities for all income levels in Newport Beach.

2. Financial Resources

Providing an adequate supply of decent and affordable housing requires funding from various sources, the City has access to the following finding sources.

Section 8 Housing Choice Voucher

The Section 8 Housing Choice Voucher program is a Federal government program to assist very low-income families, the elderly, and the disabled with rent subsidy payments in privately owned rental housing units. Section 8 participants can choose any housing that meets the requirements of the program and are not limited to units located within subsidized housing projects. They typically pay 30 to 40 percent of their income for rent and utilities. The Orange County Housing Authority administers Section 8 Housing Choice vouchers within the City of Newport Beach. As of October 30, 2020, the City has allocated 112

Section 8 vouchers to residents within the community: 30 for families, 20 for persons with disabilities, and 62 for seniors.

Community Development Block Grants (CDBG)

The Community Development Block Grant (CDBG) program provides annual grants on a formula basis to cities to develop viable urban communities by providing a suitable living environment and by expanding economic opportunities, principally for low- and moderate-income persons (up to 80 percent AMI).

CDBG funds can be used for a wide array of activities, including:

- Housing rehabilitation.
- Lead-based paint screening and abatement.
- Acquisition of buildings and land.
- Construction or rehabilitation of public facilities and infrastructure, and:
- Public services for low income households and those with special needs.

According to the Federal regulations, the City of Newport Beach is allowed to spend no more than of 20% of CDBG funding on program administration, and 15% on community services such as senior meal delivery or homeless prevention programs. The remaining amount must be used other eligible projects that meet national objectives that principally benefit low- and moderate-income households or the disabled.

HUD requires Newport Beach to complete a Five-Year Consolidated Plan (Con Plan) to receive HUD's formula grant programs. The Con Plan identifies the City's 5-year strategies related to priority needs in housing, homelessness, community development, and economic development. It also identifies short- and long-term goals and objectives, strategies, and timetables for achieving its goals. Developed with the input of citizens and community groups, the Con Plan serves four basic functions:

- It is a planning document for the community built upon public participation and input.
- It is the application for funds under the CDBG Program.
- It articulates local priorities.
- It is a five-year strategy the City will follow in implementing HUD programs.

Additionally, HUD requires the City to prepare a One-Year Action Plan for each of the five years covered by the Con Plan. The City of Newport Beach reports a total of \$372,831 CDBG funds from HUD in the 2020-2021 Action Plan. In same report, the City reports an anticipated \$2.07 million of CDBG resources during the five-year period from July 1, 2020, through June 30, 2025.

HOME Investment Partnership Program (HOME)

The HOME program provides federal funds for the development and rehabilitation of affordable rental and ownership housing for households with incomes not exceeding 80 percent of area median income. The program gives local governments the flexibility to fund a wide range of affordable housing activities through housing partnerships with private industry and non-profit organizations. HOME funds can be used for activities that promote affordable rental housing and homeownership by low income households. The City of Newport Beach does not currently receive HOME funds.

3. Opportunities for Energy Conservation

Energy Use and Providers

The primary uses of energy in urban areas are for transportation lighting, water heating, and space heating and cooling. The high cost of energy demands that efforts be taken to reduce or minimize the overall level of urban energy consumption. Energy conservation is important in preserving non-renewable fuels to ensure that these resources are available for use by future generations. There are also a number of benefits associated with energy conservation including improved air quality and lower energy costs.

Southern California Gas Company (SCG) provides natural gas service for the City. Natural gas is a “fossil fuel” and is a non-renewable resource. Most of the major natural gas transmission pipelines within the City are owned and operated by SCG. SCG has the capacity and resources to deliver gas except in certain situations that are noted in state law. As development occurs, SCG will continue to extend its service to accommodate development and supply the necessary gas lines. Electricity is provided on an as-needed basis to customers within existing structures in the City. Southern California Edison Company (SCE) is the distribution provider for electricity in Newport Beach. Currently, SCE has no immediate plans for expansion of infrastructure, as most of the City is built out. However, every year SCE expands and improves existing facilities according to demand.

Energy Conservation

The City’s energy goals, stated in the Natural Resources Element of the General Plan, make every effort to conserve energy in the City thus reducing dependence on fossil fuels. The City’s policies relating to energy include increasing energy efficiency in City facilities and operations and in private developments and reducing the City’s reliance on fossil fuels. In order to reach the City’s goals, objectives include the following:

- Develop incentives that encourage the use of energy conservation strategies by private and public developments,
- Promote energy-efficient design features,
- Promote or provide incentives for “Green Building” programs that go beyond the requirements of Title 24 of the California Administrative Code and encourage energy efficient design elements as appropriate to achieve “green building” status; and,
- Provide incentives for implementing Leadership in Environmental and Energy Design (LEED) certified building such as fee waivers, bonus densities, and/or awards recognition programs.¹²

The City of Newport Beach’s Energy Action Plan (EAP) is identified as a roadmap for the City of Newport Beach to reduce GHG through reductions in energy used in facility buildings and operations. According to the City’s EAP, the City’s long-term vision for energy efficiency focusses on the following objectives:

- Reduce the City’s carbon footprint and its adverse effect on the environment
- Conserve energy at the local government facilities
- Raise energy conservation awareness in local community and improve the quality of life

¹² City of Newport Beach Natural Resource Element, 2006.

Currently, the City of Newport Beach has developed the “Building Green” construction manual, created by the City’s Task Force on Green Development. The City has also enacted a City-wide streetlight LED replacement program, replacing 400 units to date, and is continuing marketing. Education, and outreach to the community regarding every efficiency and conservation.

DRAFT

Section 4:

HOUSING PLAN

The Housing Plan describes the City of Newport Beach 2021-2029 policy program. The Housing Plan describes the specific goals, policies, and programs to assist City decision makers to achieve the long-term housing objectives set forth in the Newport Beach Housing Element. This Plan identifies goals, policies, and programs aimed at providing additional housing opportunities, removing governmental constraints to affordable housing, improving the condition of existing housing, and providing equal housing opportunities for all residents. These goals, policies, and programs further the City's overall housing policy goal is to Inspire a more diverse, sustainable, and balanced community through implementation of strategies and programs that will result in economically and socially diversified housing choices that preserve and enhance the special character of Newport Beach.

A. Regional Housing Needs Assessment

The Southern California Association of Governments (SCAG) has conducted a Regional Housing Needs Assessment (RHNA) to determine the City's share of the affordable housing needs for the Orange County region. The RHNA quantifies Newport Beach's local share housing needs for the region by income category. Income categories are based on the most current Median Family Income (MFI) for Orange County. The current 2020 MFI (for an assumed family of 4 persons) for Orange County is \$103,000. The MFI may change periodically, as it is updated on an annual basis. The City's 2021-2029 RHNA growth need of 4,845 housing units is allocated into the following income categories:

- 1,456 units - Very low income (0-50% County MFI)
- 930 units - Low income (51-80% of County MFI)
- 1,050 units - Moderate income (81-120% of County MFI)
- 1,409 units - Above moderate income (120% or more of County MFI)

A. Housing Goals

The City of Newport Beach has identified the following housing goals as part of this Housing Element Update:

Housing Goal #1: Provision of adequate sites to accommodate projected housing unit growth needs identified by the 2021-2029 RHNA.

Housing Goal #2: Quality residential development and the preservation, conservation, and appropriate redevelopment of housing stock.

Housing Goal #3: A variety of housing types, designs, and opportunities for all social and economic segments.

Housing Goal #4: Housing opportunities for as many renter- and owner-occupied households as possible in response to the market demand and RHNA obligations for housing in the City.

Housing Goal #5: Preservation of the City's housing stock for extremely low-, very low-, low-, and moderate-income households.

Housing Goal #6: Housing opportunities for special needs populations.

Housing Goal #7: Equal housing opportunities in the City for all people.

Housing Goal #8: Effective and responsive housing programs and policies.

The goals listed above are described below and on following pages with accompanying policies and programs to achieve them.

B. Housing Policies and Program Actions

This Housing Element expresses the Newport Beach community’s overall housing goals and supporting policies, and programs actions to achieve them. The stated Housing Program Actions are based on a review of past performance of the 5th Cycle Housing Element, analysis of current constraints and resources, and input from Newport Beach residents and stakeholders.

Housing Goal #1

Provision of adequate sites to accommodate projected housing unit growth needs.

Housing Policy 1.1: identify a variety of sites to accommodate housing growth need by income categories to serve the needs of the entire community

IMPLEMENTATION ACTIONS

Adequate Sites to Accommodate 2021-2029 RHNA

The City of Newport Beach has a total Regional Housing Needs Assessment (RHNA) allocation of 4,845 units. State law requires the City of Newport Beach to identify adequate sites to accommodate its fair share allocation for the 6th Cycle Housing Element. This City has identified a variety of candidate sites through extensive analysis in collaboration with the City’s Housing Element Update Advisory Committee, interested residents at a variety of workshops, and consultation with property owners. The City of Newport Beach has identified an adequate amount of land that has been determined as “feasible” or “Potentially Feasible” for future development. Only a portion of these candidate sites will be necessary to accommodate the City’s RHNA planning obligation. These sites have undergone a rigorous process to evaluate site features, development potential, developer/owner interest and other factors to deem them appropriate for housing during the 2021-2029 Planning Period.

As part of the analysis is adequate sites, the City has comprehensively review opportunity sites citywide and have identify eight primary areas of opportunity:

- Airport Area Environs
- West Newport Mesa
- Dover/Westcliff
- Newport Center
- Banning Ranch
- Coyote Canyon
- 5th Cycle Housing Element Sites
- Accessory Dwelling Units

In addition, the City has identified several opportunity sites in the 5th Cycle that will be utilized in the 6th Cycle Housing Element. These sites will require additional policy considerations as stated in this Policy Program

These opportunities sites are described in map and tabular format in Appendix B of this Housing Element.

Policy Action 1A: Airport Environs Sub Area

The City will establish a housing opportunity overlay district, or similar rezoning strategy, in the Airport Environs area for 162 acres of land to provide for the accommodation of at least 2,426 housing units in the Very Low, Low, Moderate and Above Moderate-income categories. A Map and Table Summary of these sites are provided in Appendix B of this Housing Element. The overlay, or similar rezone strategy, will allow development of variety of residential product types at a permitted density of 50 dwelling units per acre.

Implementation of this program will also include development standards, entitlement procedures to encourage the development housing for persons of Very Low and Low incomes. In developing the overlay, or similar rezone strategy, the City will evaluate the potential to include a variety of incentive tools as appropriate, including but not limited to floor area bonus, density bonus, entitlement streamlining, fee waivers or reductions. .

Timeframe: Complete Code Amendments within 36 months of Housing Element Adoption

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 1B: Newport Mesa

The City will establish a housing opportunity overlay, or similar rezoning strategy, in the Newport Mesa area for 48 acres of land to provide for the accommodation of at least 433 housing units in the Very Low, Low, Moderate and Above Moderate-income categories. A Map and Table Summary of these sites are provided in Appendix B of this Housing Element. The overlay, or similar rezone strategy, will allow development of variety of residential product types at a permitted density of 45 dwelling units per acre.

Implementation of this program will also include development standards, entitlement procedures to encourage the development housing for persons of Very Low and Low incomes. In developing the overlay, or similar rezone strategy, the City will evaluate the potential to include a variety of incentive tools as appropriate, including but not limited to floor area bonus, density bonus, entitlement streamlining, fee waivers or reductions and other considerations.

Timeframe: Complete Code Amendments within 36 months of Housing Element Adoption

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 1C: Newport Center

The City will establish a housing opportunity overlay, or similar rezoning strategy, in the Newport Center area for 158 acres of land to provide for the accommodation of at least 1,782 housing units in the Very Low, Low, Moderate and Above Moderate-income categories. A Map and Table Summary of these sites are provided in Appendix B of this Housing Element. The overlay, or similar rezone strategy, will allow development of variety of residential product types at a permitted density of 45 dwelling units per acre.

Implementation of this program will also provide for development standards, entitlement procedures to encourage the development housing for persons of Very Low and Low incomes. In developing the Overlay, or similar rezone strategy, the City will evaluate the potential to include a variety of incentive tools as appropriate, including but not limited to floor area bonus, density bonus, entitlement streamlining, fee waivers or reductions and other considerations.

|---|

Policy Action 1D: Dover / Westcliff

The City will establish an overlay, or similar rezoning strategy, in the Dover / Westcliff an area for 14 acres of land to provide for the accommodation of at least 41 housing units in the Very Low, Low, Moderate and Above Moderate-income categories. A Map and Table Summary of these sites are provided in Appendix B of this Housing Element. The overlay, or similar rezone strategy, will permit development of variety of residential product types at a permitted density of 30 dwelling units per acre.

Implementation of this program will also include development standards, entitlement procedures to encourage the development housing for persons of Very Low and Low incomes. In developing the overlay, or similar rezone strategy, the City will evaluate the potential to include a variety of incentive tools as appropriate, including but not limited to floor area bonus, density bonus, entitlement streamlining, fee waivers or reductions and other considerations.

Policy Action 1E: Banning Ranch

The City has identified the Banning Ranch area as a potential site to accommodate future housing need. The City has previously approved housing development on this site, but the approved project was subsequently denied by the California Coastal Commission. The City believes this site is still a viable opportunity to provide housing for a variety of income levels and will continue to support development potential in the Banning Ranch Area.

The site is currently within the City’s Sphere of Influence. The City will work collaboratively with the County of Orange for annexation of the property and pursue entitlement of the area to provide opportunities for up to 1,357 units at an average density of 30 dwelling units per acre.

Implementation of this program will also include development standards, entitlement procedures to encourage the development housing for persons of Very Low and Low incomes.

Timeframe: Complete necessary Code, General Plan and LCP Amendments within 36 months of Housing Element Adoption

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 1F: Coyote Canyon

The Coyote Canyon area is a closed landfill that is owned and managed by the County of Orange. The area is of substantial acreage and has limitation of growth and development due to various environmental considerations. The City evaluated the entire landfill area and has concluded that 22 acres of the area are not subject to environmental constraints. Additionally, the County has expressed interest in participating in a transfer of a portion of the property to accommodate residential opportunity.

The City will rezone at least 22 acres of land on the Coyote Canyon site, as shown in Appendix B, to accommodate up to 880 housing units at an average density of 40 dwelling units per acre.

Implementation of this program will also include development standards, entitlement procedures to encourage the development housing for persons of Very Low and Low incomes.

Timeframe: Complete Code Amendments within 36 months of Housing Element Adoption

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 1G: 5th Cycle Housing Element Sites

The City has identified 28 acres of sites in its sites inventory contained in Appendix B of this Housing Element that contain infill sites that were identified in the 5th Cycle Housing Element. To comply with State law, the City will amend Title 20 of the Newport Beach Municipal Code (NBMC) to permit residential uses by-right for housing development projects in which at least 20-percent of the units are affordable to lower income households. For the purpose of implementation of this program, by-right shall mean the City will not require a Site Development Review, Conditional Use Permit, a Planned Unit Development Permit, or other discretionary permit application that what would constitute a “project” as described in Section 21100 of the Public Resources Code. For sites in the coastal zone, the City will continue to require coastal development permits to determine compliance with the City’s certified Local Coastal Program.

Timeframe: Complete Code Amendments within 36 months of Housing Element Adoption

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 1H: Accessory Dwelling Unit Construction

The City of Newport Beach believes Accessory Dwelling Units (ADUs) are a demonstrated method to provide affordable housing in the City. Due to recent legislation, the ability to entitle and construct ADUs has increased significantly. The City recognizes the significance of this legislation as evidenced by a marked increase in ADU permit applications. Due to this legislation, the City believes aggressive support for ADU construction will result in increased opportunities for housing including affordable units.

The City will aggressively support and accommodate the construction of at least 336 ADUs by a variety of methods, including but not limited to:

- Developing a implementing a public awareness campaign for construction of ADUs with a systematic approach utilizing all forms of media and outreach distribution
- Preparing and maintaining a user-friendly website committed to information related to codes, processes, and incentives pertaining to the development of ADUs and JADUs in the City.
- Evaluating and assessing the appropriateness of additional incentives to encourage ADU development.
- and implement Developing permit-ready standard plans to permit new ADU construction to minimize design costs, expedite permit processing, and provide development certainty for property owners.

Timeframe: Analyze methods within 12 months of Housing Element adoption; Establish programs within 24 months of Housing Element adoption.

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 1I: Accessory Dwelling Units Monitoring Program

The City will establish an ADU Monitoring Program during the 2021-2029 Housing Element Planning Period to formally track ADU development. The analysis will track applications for ADUs, location, and other important features. The intent of the Monitoring Program is to track progress in meeting 2021-2029 ADU construction goals and to evaluate the need to adjust programs and policies if the pace of construction is less than anticipated.

Timeframe: Ongoing, Annual

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 1J: Accessory Dwelling Units Amnesty Program

The City will establish a program to allow owners with existing unpermitted ADUs to obtain permits to legalize the ADUs during the 2021-2029 planning period. The intent of the Amnesty Program's is permit, inspect, and legalize existing unpermitted ADUs of any size.

Timeframe: Develop Amnesty Program within 24 months of Housing Element adoption

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 1K: Inclusionary Housing

The City has a substantial RHNA obligation of affordable housing that will be challenged by project development costs to accommodate them. Therefore, the City must evaluate a variety of policy prescriptions that will encourage and facilitate the construction of below market-rate workforce housing. The City will investigate inclusionary housing policy options as a means to provide a variety of housing types and opportunities for very low, low- and moderate-income households in Newport Beach. The City will adopt an interim inclusionary policy and then assess and analyze a variety of inclusionary housing policy options as appropriate. Based upon this assessment, the City will determine the appropriateness and application of inclusionary policies, and adopt policies, programs or regulations addressing inclusionary housing.

The City has determined that a base inclusionary requirement of 15-percent for new residential development to be affordable to very low, low- and moderate-income households is appropriate. Applicability of this requirement will not be limited to projects of a certain size.

Timeframe: Adopt interim inclusionary policy within 6 months of Housing Element adoption. Evaluate Inclusionary Options within 24 months of Housing Element adoption. Adopt Inclusionary Policies, as appropriate within 36 months of Housing Element Adoption.

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Housing Goal #2

Quality residential development and preservation, conservation, and appropriate redevelopment of housing stock.

Housing Policy 2.1: Support all reasonable efforts to preserve, maintain, and improve availability and quality of existing housing and residential neighborhoods, and ensure full utilization of existing City housing resources for as long into the future as physically and economically feasible.

IMPLEMENTATION ACTIONS

Policy Action 2A: Neighborhood Preservation

The City will continue to improve housing quality and prevent deterioration of existing neighborhoods by strictly enforcing applicable Building Code, Fire Code, and Zoning Code regulations and abating Code violations and nuisances. The City of Newport Beach will continue to prepare a quarterly report on code enforcement activities in the 6th cycle.

Timeframe: Ongoing, Semi-Annual

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 2B: Residential Building Record Program

The City will maintain and continue to implement the Residential Building Records (RBR) program to reduce and prevent violations of building and zoning ordinances by providing a report to the all parties involved in a transaction of sale of residential properties, and providing an opportunity to inspect properties to identify potentially hazardous conditions, resources permitting. The report provides information as to permitted and illegal uses/construction, and verification that buildings meet applicable zoning and building requirements

The City will continue to implement program as RBR applications are submitted to the City. The City will continue to promote the availability of program to the public and local real estate professionals by maintaining information on website and developing brochure and other promotional materials.

Timeframe: Ongoing, Annual

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 3C: Preservation of At-Risk Units

The City shall maintain registration as a Qualified Preservation Entity with HCD to ensure that the City will receive notices from all owners intending to opt out of their Section 8 contracts and/or prepay their HUD-insured mortgages. The City will consult with the property owners and potential preservation organizations regarding the potential use of Community Development Block Grant (CDBG) funds and/or Affordable Housing Fund monies to maintain affordable housing opportunities in those developments listed in Table 3-17 of Chapter 3 of this Housing Element. The City may assist in the non-profit acquisition of the units to ensure long-term affordability, upon receiving notice that a property owner of an existing affordable housing development intends to convert the units to a market-rate development.

The City will maintain registration as a Qualified Preservation entity with HCD and continuously the implement policy as notices are received from property owners in the 6th Cycle.

Timeframe: Ongoing, Annual

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Housing Goal #3

A variety of housing types, designs, and opportunities for all social and economic segments.

Housing Policy 3.1: Encourage preservation of existing and provision of new housing affordable to extremely low-, very low-, low-, and moderate-income households.

Housing Policy 3.2: Encourage housing developments to offer a wide spectrum of housing choices, designs, and configurations.

IMPLEMENTATION ACTIONS

Policy Action 3A: Objective Design Standards

State Housing law includes various exemptions for projects with an affordable housing component, which limits the City's ability to apply discretionary design review requirements to certain residential projects. State Housing law specifies having objective design standards available to apply to housing projects where the City's discretion over design review is otherwise preempted per State law. The City of Newport Beach will review existing entitlement processes for housing development and will eliminate discretionary review for all housing development proposals that include affordable housing. The City will also review the appropriateness of its current development standards to ensure that it reasonably accommodates the type and density of housing it is intended to support. The City will also amend existing development standards to replace or remove all subjective standards with appropriate objective standards to support the type and density of housing it is intended to allow.

Policy Action 3B: SB 35 Streamlining

The City will establish written procedures to comply with California Government Code Section 65913.4 and publish those procedures for the public, as appropriate, to comply with the requirements of SB 35, Chapter 366 Statutes 2017. These requirements apply at any point in time when the City does not meet the State mandated requirements, based upon the SB 35 Statewide Determination Summary Report for Housing Element progress and reporting on Regional Housing Needs Assessment (RHNA)., the City will process development projects with at least 50 percent affordable units through a streamlined permit process (i.e., 90 days for projects with up to 150 units). All projects covered by SB 35 are still subject to the objective development standards of the Newport Beach Municipal Code that includes the Building and Fire Codes. However, qualifying projects cannot be subject to Design Review or public hearings; and in many cases the City cannot require parking. Per SB 35 requirements, no parking requirements may be imposed on a SB 35 qualified streamlining project if it is located:

1. within a half-mile of public transit;
2. within an architecturally and historically significant historic district;
3. in an area where on-street parking permits are required but not offered to the occupants of the development; or
4. where there is a car-share vehicle located within one block of the proposed project.

One parking space per unit may be required of all other SB 35 projects. The City currently has consistently exceeded RHNA performance goals during the 5th Cycle. The City's status regarding SB 35 could change during the 6th Cycle dependent upon RHNA progress throughout the 2021-2029 Planning Period.

Timeframe: Adopt procedures within 24 months of Housing Element adoption

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 3C: Preservation of Rental Opportunities

The City will continue to maintain rental opportunities by restricting conversions, demolition and reconstruction/reconfiguration of rental units to condominiums in a development containing 15 or more units unless the vacancy rate in Newport Beach for rental housing is an average of 5 percent or higher for four (4) consecutive quarters, and unless the property owner complies with condominium conversion regulations contained in Newport Beach Municipal Code Chapter 19.64. The City will complete a vacancy rate survey upon submittal of condominium conversion application of 15 or more units.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 3D: Priority of Affordable Housing

The City will continue to take all feasible actions, through use of development agreements, expedited development review, and expedited processing of grading, building and other development permits, to ensure expedient construction and occupancy for projects approved with lower- and moderate-income housing requirements. The City will continue to implement this program as affordable housing projects are submitted to the City.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 3E: Mortgage Revenue Bonds

The City will continue to participate with the County of Orange in the issuance of tax-exempt mortgage revenue bonds to facilitate and assist in financing, development, and construction of housing affordable to low and moderate-income households. The City will continue to implement program per project submittal as the developer applies for these bonds. The City will adjust this policy to include the promotion of available bonds to the public and developers in the 6th Cycle.

Timeframe: Ongoing, Annual

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 3F: Annual Reporting Program

The City will conduct an annual compliance-monitoring program for units required to be occupied by very low-, low-, and moderate-income households. The City of Newport will complete review by the last quarter of each year and report within the annual General Plan Status Report including Housing Element Report provided to OPR and HCD by April 1st each year.

Timeframe: Ongoing, Annual

Responsible Agency: City of Newport Beach Community Development

Funding Source: General Fund

Policy Action 3G: Entitlement Assistance

The City will provide entitlement assistance, expedited entitlement processing, and waive application processing fees for developments in which 5 percent of units are affordable to extremely low-income households. To be eligible for a fee waiver, the units shall be subject to an affordability covenant for a minimum duration of 55 years . The affordable units provided shall be granted a waiver of park in-lieu fees (if applicable) and City traffic fair share fees.

The City will continue to implement this program as affordable housing projects are submitted to the City in the 6th cycle.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 3H: Prioritization of Affordable Housing Funds

The City will continue to give highest priority for use of Affordable Housing Fund monies to affordable housing developments providing units affordable to extremely low-income households. The City will continue to implement program as affordable housing projects are submitted to the City.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: Affordable Housing Fund

Policy Action 3I: Public Information About Affordable Housing

The City will continue to maintain a brochure of incentives offered by the City for the development of affordable housing including fee waivers, expedited processing, density bonuses, and other incentives. Provide a copy of this brochure at the Planning Counter, the website and also provide a copy to potential developers.

The City will update brochure as needed to provide updated information regarding incentives including updated fees and a reference to the most up to date Site Analysis and Inventory.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 3J: Priority in Kind Assistance for Affordability

The City shall provide more assistance for projects that provide a higher number of affordable units or a greater level of affordability. At least 15 percent of units shall be affordable when assistance is provided from Community Development Block Grant (CDBG) funds or the City's Affordable Housing Fund. The City will continue to implement program as housing projects are submitted to the City in the 6th Cycle.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 3K: Coastal Zone Development Affordability

The City shall follow Government Code Section 65590 and implement Municipal Code Titles 20.34 and 2134 "Conversion or Demolition of Affordable Housing" for new developments proposed in the Coastal Zone areas of the City. All required affordable units shall have restrictions to maintain their affordability for a minimum of 55 years.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 3L: Proactive Education and Outreach to Prospective Developers

The City will continue to advise and educate existing landowners and prospective developers of affordable housing development opportunities available within Banning Ranch, the Airport Area, West Newport Mesa, Newport Center, Mariners' Mile, and Balboa Peninsula areas. The City of Newport Beach will continue to implement program as prospective developers contact City seeking development information. The City will maintain designated staff persons that can be contacted to provide housing opportunity information and incentives for development of affordable housing within the 6th cycle.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 3M: Regional Coordination of Housing Issues

The City will continue to participate in other programs that assist production of housing. The City will attend quarterly OCHA (Cities Advisory Committee) meetings to keep up to date on rehabilitation programs offered by the County in order to continuously inform homeowners and rental property owners within the City of opportunities and to encourage preservation of existing housing stock in the 6th cycle.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 3N: Housing Impact Studies

The City will continue to study housing impacts of proposed larger-scale, significant commercial/industrial projects during the development review process. Prior to project approval, a housing impact assessment shall be developed by the City with the active involvement of the developer. Such assessment shall indicate the magnitude of jobs to be created by the project, where housing opportunities are expected to be available, and what measures (public and private) are requisite, if any, to ensure an adequate supply of housing for the projected labor force of the project and for any restrictions on development due to the “Charter Section 423” initiative. The City will continue to implement program as major commercial/industrial projects are submitted to the City in the 6th Cycle.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Housing Goal #4

Housing opportunities for as many renter- and owner-occupied households as possible in response to the market demand and RHNA obligations for housing in the City.

Housing Policy 4.1: Mitigate potential governmental constraints to housing production and affordability by increasing the City’s role in facilitating construction of market-rate housing and affordable housing for all income groups.

Housing Policy 4.2: Enable construction of new housing units sufficient to meet City quantified goals by identifying adequate sites for their construction.

IMPLEMENTATION ACTIONS

Policy Action 4A: Affirmatively Furthering Fair Housing

Pursuant to AB 686, Chapter 958, Statutes 2018, the City will affirmatively further fair housing by taking meaningful actions in addition to resisting discrimination, that overcomes patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected classes, as defined by State law.

To accomplish this, the City or designated contracted organization will collaborate with local and regional organizations to review any housing discrimination complaints, assist in dispute resolution, and, where necessary, refer complainants to appropriate state or federal agencies for further investigation, action, and resolution.

Section 3 of this Housing Element contains an analysis of fair housing activities in Newport Beach and the Orange County region. The analysis found that:

- ▶ The City does not have any racial or ethnic groups that score higher than 60 on the dissimilarity index, indicating that while there are racial and ethnic groups with higher levels of segregation

than others within Newport Beach, none meet the standard score to identify segregated groups.

- ▶ The City does not have any racially or ethnically concentrated census tracts (R/ECAPs) as identified by HUD. This indicates that there are no census tracts within Newport Beach with a non-white population of 50 percent or more or any census tracts that have a poverty rate that exceeds 40 percent or is three or more times the average tract poverty rate for the metropolitan/micropolitan area. However, one R/ECAP was identified in the neighboring City of Irvine, near the University of California Irvine. This will be considered in the housing plan as students within the R/ECAP may look for housing in Newport Beach.
- ▶ The UC Davis Regional Opportunity Index shows that most residents within Newport Beach have a high level of access to opportunity throughout the majority of the City, with only two census tracts showing a moderate level of access to opportunity. No census tracts were shown as having the lowest level of access to opportunity.
- ▶ The analysis of the TCAC/HCD opportunity Area Maps shows that most census tracts in Newport Beach are classified with the “Moderate Resource” “High Resource” or “Highest Resource” designation. This indicates that these census tracts are within the top 40 percent in the region in terms of areas that lower-income residents may thrive if given the opportunity to live there. All but two census tracts within Newport Beach register within the top 20 percent in the index. One census tract registered as a “Low Resource” area, citing high economic opportunity and low educational opportunity.
- ▶ The Opportunity Indices identify overall high access to quality resources including economic and job proximity, educational access, and transportation access. However, there is a low health index, indicating increased pollution and low environmental quality across all racial/ethnic groups in the City. Additionally, the opportunity indices identify low affordable transportation options to both the Asian or Pacific Islander (Non-Hispanic) and Native American (Non-Hispanic).

The City will continue to collaborate with the community, stakeholders, and appropriate organizations to address potential constraints to fair housing. This may include, but not limited to:

- Analysis and identification of barriers to entry into homeownership or rental opportunities,
- Review of historic policies or restrictions that may have prevented and/or may still prevent disadvantaged groups from locating in Newport Beach
- Specific actions that contribute to Newport Beach’s ability to foster a more inclusive community to all racial, social, and economic groups.

Timeframe: Ongoing 2021-2029

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 4B: Streamlined Project Review

The City will provide a streamlined “fast-track” development review process for proposed affordable housing developments. The City of Newport will continue to implement this program as affordable housing projects are submitted to the City in the 6th Cycle.

Timeframe: Evaluate program features within 24 months, Adopt updated procedures within 36 months of Housing Element adoption

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 4C: Density Bonus and Incentives for Affordable Housing

The City will update its Density Bonus Ordinance to be consistent with State Law, as amended. Additionally, the City shall either grant a density bonus as required by state law if requested, or provide other incentives of equivalent financial value when a residential developer agrees to construct housing for persons and families of very low, low, and moderate income above mandated requirements. The City will continue to implement provisions of Chapter 20.32, as amended (Density Bonus) of the Zoning Code as housing projects are submitted to the City during the 6th Cycle. The City will further encourage affordable housing and the potential use of density bonus statutes to accommodate additional affordable units.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 4D: List of Pre-Approved Development Incentives

The City will develop a pre-approved list of incentives and qualifications for such incentives to promote the development of affordable housing. Such incentives include the waiver of application and development fees or modification to development standards (e.g., setbacks, lot coverage, etc.). The City will continue to work with the Affordable Housing Task Force to develop the list within the 6th Cycle.

Timeframe: Evaluate program features within 24 months, Adopt procedures within 36 months of Housing Element adoption

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 4E: Airport Area Policy Exceptions for Affordable Housing

The City recognizes that General Plan Policy LU6.15.6 may result in a potential constraint to the development of affordable housing in the Airport Area, and as a result, the City shall maintain an exception to the minimum 10-acre village requirement for projects that include a minimum of 30 percent of the units affordable to lower income households. It is recognized that allowing a smaller scale development within an established commercial and industrial area may result in land use compatibility problems and result in a residential development that does not provide sufficient amenities (i.e. parks) and/or necessary improvements (i.e. pedestrian walkways). Therefore, it is imperative that the exception includes

provisions for adequate amenities, design considerations for the future integration into a larger residential village, and a requirement to ensure collaboration with future developers in the area. The City of Newport Beach will maintain the exception and continue to implement this program as projects are submitted to the City in the 6th Cycle.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 4F: Encourage Development of Opportunity Sites

The City will continue to encourage and facilitate residential and mixed-use development on sites listed in Appendix B by providing technical assistance to interested developers with site identification and entitlement processing. The City will continue to support developers funding applications from other agencies and programs.

The City shall post the Sites Inventory, as showing in Appendix B on the City's webpage and produce marketing materials for residential and mixed-use opportunity sites, and it will equally encourage and market the sites for both for-sale development and rental development. The City shall educate developers of the benefits of density bonuses and related incentives, identify potential funding opportunities, offer expedited entitlement processing, and offer fee waivers and/or deferrals to encourage the development of affordable housing within residential and mixed-use developments. The City will continuously implement program as housing projects are submitted to the City. Review and update as necessary the Site Inventory and provide information to interested developers.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 4G: Annual RHNA Sites Inventory Monitoring

The City will monitor and evaluate the development of vacant and underdeveloped parcels on an annual basis and report the success of strategies to encourage residential development in its Annual Progress Reports required pursuant to Government Code 65400. The City of Newport will respond to market conditions and will revise or add additional sites where appropriate or add additional incentives, if identified strategies are not successful in generating development interest. The City will include the report in its annual General Plan Status Report including Housing Element Report to OPR and HCD by April 1st each year.

Timeframe: Ongoing, Annual

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 4H: Definition of Family

Pursuant to State law, the City will update, as appropriate, the definition of “family” and “single-housekeeping unit” and “ Dwelling, single unit” to ensure compliance with all federal and state fair housing laws. To comply with State law, the definitions should not distinguish between related and unrelated persons and should not impose limitations on the number of people that may constitute a family.

Timeframe: Complete Code Amendments within 12 months of Housing Element adoption
Responsible Agency: City of Newport Beach Community Development
Funding Sources: General Fund

Housing Goal #5

Preservation of the City’s housing stock for extremely low-, very low-, low-, and moderate-income households.

Housing Policy 5.1: Continue or undertake the following programs to mitigate potential loss of “at risk” units due to conversion to market-rate units. These efforts utilize existing City and local resources. They include efforts to secure additional resources from public and private sectors should they become available.

Housing Policy 5.2: Improve energy efficiency of all housing unit types (including mobile homes).

IMPLEMENTATION ACTIONS

Policy Action 5A: Preservation of Affordability Covenants

The City will contact owners of affordable units approaching the expiration of affordability covenants to obtain information regarding their plans for continuing affordability on their properties, inform them of financial resources available, and to encourage the extension of the affordability agreements for the developments listed beyond the years noted.

The City will conduct an annual compliance monitoring program and a contact list shall be maintained on City website and updated annually during the 6th Cycle

Timeframe: Ongoing, as necessary
Responsible Agency: City of Newport Beach Community Development
Funding Sources: General Fund

Policy Action 5B: Section 8 Participation

The City shall maintain information on the City's website and prepare written communication for tenants and other interested parties about Orange County Housing Authority Section 8 opportunities and to assist tenants and prospective tenants acquire additional understanding of housing law and related policy issues.

The City will attend quarterly OCHA (Cities Advisory Committee) that provide updates on OCHA Section 8 waiting list and housing opportunities to ensure information provided on City website is up to date. If Section 8 waiting list is opened, promote the availability of the program through marketing materials made available to the public.

Timeframe: Ongoing, Annual

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 5D: Incentivize for Preserving of Affordability Covenants

The City will investigate the potential for providing additional modify its current policy to incentivize to property owners for the maintenance of the affordability of units on their property during the 6th Cycle.

Timeframe: Investigate and adopt incentives, as appropriate, within 24 months of Housing Element Adoption

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 5E: Mobile Home Park Conversions

The City will continue to employ the provisions of NBMC Title 20 provision of the Mobile Home Park Overlay to maintain and protect mobile home parks in a stable environment with a desirable residential character. The City will review the existing provisions of the Mobile Home Park Overlay for consistency with State law in accordance with Government Code Section 65863.7. The City will continue to implement program as projects are submitted to the City.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 5F: Orange County Housing Authority Advisory Committee

The City of Newport Beach will continue to participate as a member of the Orange County Housing Authority (OCHA) Advisory Committee and work in cooperation with the OCHA to provide Section 8 Rental Housing Assistance to residents of the community. The City will continue to attend quarterly OCHA (Cities Advisory Committee). Continue to maintain information on City's website informing landlords of the program benefits of accepting Section 8 Certificate holders.

The City will, in cooperation with the Housing Authority, recommend and request use of modified fair-market rent limits to increase the number of housing units within the City that will be eligible to participate

in the Section 8 program. The Newport Beach Planning Division will prepare and implement a publicity program to educate and encourage landlords within the City to rent their units to Section 8 Certificate holders, and to make very low-income households aware of availability of the Section 8 Rental Housing Assistance Program.

Timeframe: Ongoing
Responsible Agency: City of Newport Beach Community Development
Funding Sources: General Fund

Policy Action 5G: Water Efficiency for Residential Projects

The City will continue to implement and enforce the Water Efficient Landscape Ordinance and Landscape and Irrigation Design Standards in compliance with AB 1881 (Chapter 559 Statutes 2006). The ordinance establishes standards for planning, designing, installing, and maintaining and managing water-efficient landscapes in new construction and rehabilitated projects. The City will continue to implement program as housing projects are submitted to the City. The City will also encourage the retrofit of existing residential developments to install water efficient appliances and fixtures.

Timeframe: Ongoing
Responsible Agency: City of Newport Beach Community Development
Funding Sources: General Fund

Policy Action 5H: Energy Efficiency in Residential Projects

The City of Newport Beach will continue to require that any affordable housing developments that receive City assistance from Community Development Block Grant (CDBG) funds or from the City's Affordable Housing Fund shall be required, to the extent feasible, include installation of energy efficient appliances and devices that will contribute to reduced housing costs for future occupants of the units. The City will continue to implement program as housing projects are awarded funds from the City in the 6th Cycle.

Timeframe: Ongoing
Responsible Agency: City of Newport Beach Community Development
Funding Sources: General Fund & Community Development Block Grant (CDBG) funds

Housing Goal #6

Housing opportunities for special needs populations.

Housing Policy 6.1: Encourage approval of housing opportunities for senior citizens and other special needs populations.

IMPLEMENTATION ACTIONS

Policy Action 6A: Homeless Program Assistance

In the 5th Cycle, the City was successful in providing funding to local organizations for providing shelter and services the individuals experiencing homelessness.

The City will continue to apply annually for United States Department of Urban Development Community Development Block Grant (CDBG) funds and allocate a portion of such funds to subrecipients who provide shelter and other services for the homeless as well as submit Annual Action Plan to HUD in May of each year.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 6B: Repair Loans and Grant Programs for Seniors, Persons with Physical and Development Disabilities and Lower Income Households

The City, in partnership with OASIS Senior Center and Habitat for Humanity Orange County, has developed a Senior Home Repair Assistance Program (SHARP) that is aimed at assisting low income seniors in need of critical home repair or modifications due to accessibility needs, safety concerns, health and well-being. The program is available to homeowners aged 60 and older who fall within the 50th percentile of the Orange County median income.

Additionally, The City will continue to cooperate with the Orange County Housing Authority to pursue establishment of a Senior/Disabled or Limited Income Repair Loan and Grant Program to underwrite all or part of the cost of necessary housing modifications and repairs. Cooperation with the Orange County Housing Authority will include continuing City of Newport Beach participation in the Orange County Continuum of Care and continuing to provide CDBG funding.

The City will continue to attend quarterly OCHA (Cities Advisory Committee) meetings to keep up to date on rehabilitation programs offered by the County in order to continuously inform homeowners and rental property owners within the City of opportunities and to encourage preservation of existing housing stock.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 6C: Leverage CDGB and other Federal Formula Grant Funding

The City receives annual allocation of CDBG and Funds for use in a variety of housing-related activities. The City shall make every effort to leverage these annual funds from various agencies to further the City's housing goals. These may include, but are not limited to, the follow State, Regional and private resources:

State Resources

- State Low-Income Housing Tax Credit Program
- Building Equity and Growth in Neighborhoods Program (BEGIN)
- CalHome Program
- Multifamily Housing Program (MHP)
- Housing Related Parks Grant
- CalHFA Single and Multi-Family Program
- Mental Health Service Act (MHSA) Funding

Regional Resources

- Orange County Housing & Finance Agency (OCHFA) Funding
- Southern California Home Financing Authority (SCHFA) Funding
- Orange County Continuum of Care Program
- Orange County Housing Authority (OCHA) Programs

Private Resources

- Federal Home Loan Bank Affordable Housing Program (AHP)
- Community Reinvestment Act Programs
- United Way Funding
- Private Contributions
- Public-Private Partnerships

In addition, the City of Newport Beach will continue to maintain a list of “Public and Private Resources Available for Housing and Community Development Activities” and maintain a list of resources on City website and update as necessary in the 6th Cycle.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 6D: Child Daycare Facilities

The City will continue to encourage the development of day care centers as a component of new affordable housing developments and grant additional incentives in conjunction with the review and approval of density bonus projects pursuant to NBMC Chapter 20.32 (Density Bonus).

Timeframe: Modify

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 6E: Housing Assistance for Seniors

The City of Newport Beach was successful in assisting the funding of senior housing services through the 5th Cycle including Atria, Vivante and Harbor Pointe senior housing developments . The City shall continue to encourage senior citizen independence through the promotion of housing and services related to in-

home care, meal programs, and counseling, and maintain a senior center that affords seniors opportunities to live healthy, active, and productive lives in the City.

The City will encourage and approve senior housing developments if there is a market demand provided the projects include appropriate support services including transportation. Projects that provide housing and services for low- and moderate-income seniors shall take precedence over market-rate senior housing.

The City will continue to provide social services, support groups, health screenings, fitness classes, and educational services at the City’s OASIS Senior Center or other facilities. Offer affordable ride-share transportation and meal services to seniors who are unable to drive and/or prepare their own meals or dine out and have little assistance in obtaining adequate meals during the 6th Cycle.

Policy Action 6F: Emergency Shelters, Transitional and Supportive Housing

To comply with State law, the City of Newport Beach will amend certain sections of its Municipal Code to address the following requirements:

- Supportive Housing Streamlined Approvals (AB 2162) - To comply with AB 2162 (Chapter 753, Statutes 2018), the City of Newport Beach will amend its Municipal Code to permit supportive housing as a use permitted by right in all zones where multiple family and mixed-use development is permitted.
- Emergency and Transitional Housing Act of 2019 (AB 139) – The City will update its Municipal Code to comply with the requirements of Gov Code 65583 to address permit requirements, objective standards, analysis of annual and season needs, and parking and other applicable standards and provisions.
- Amend the City of Newport Beach Municipal Code to comply with the definitions for “Supportive Housing”, “Supportive Services”, “Target Population” consistent with applicable sections the California Government Code.
- Amend the Newport Beach Municipal Code to ensure Emergency Shelters, Transitional and Supportive Housing are permitted in appropriate zones, consistent with State law.

| |
|---|
| <p>Timeframe: Adopt Code Amendments within 12 months of Housing Element adoption</p> <p>Responsible Agency: City of Newport Beach Community Development</p> <p>Funding Sources: General Fund</p> |
|---|

Housing Goal #7

Equal housing opportunities in the City for all people.

Housing Policy 6.1: Support fair and equal housing opportunities, and environmental justice considerations for all housing opportunities in the City.

IMPLEMENTATION ACTIONS

Policy Action 7A: Supportive Housing / Low Barrier Navigation Centers

State law has been updated to require approval 'by right' of supportive housing with up to 50 units and low barrier navigation centers that meet the requirements of State law. Low barrier navigation centers are generally defined as service-enriched shelters focused on the transition of persons into permanent housing.

Low barrier navigation centers provide temporary living facilities will persons experiencing homelessness to income, public benefits, health services, shelter, and housing. To comply with State law, The City of Newport Beach will adopt policies, procedures, and regulations for processing this type of use as to establish a non-discretionary local permit approval process must be provided to accommodate supportive housing and lower barrier navigation centers per State law. In the interim, any submitted application for this use type will be processed in accordance with State law.

The City will provide for annual monitoring of the effectiveness and appropriateness of existing adopted policies. Should any amendments be warranted to existing policies pursuant to State law, the City will modify its existing policies, as appropriate.

Timeframe: Adopt Code Amendments within 24 months of Housing Element adoption

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 7B: Transitional and Supportive Housing

In compliance with Senate Bill 2 (Chapter 364 , Statutes 2017)and SB 745 Chapter 185, Statutes 2013)the City will ensure the Zoning Code is amended to encourage and facilitates emergency shelters and limits the denial of emergency shelters and transitional and supportive housing under the Housing Accountability Act. This Program would permit transitional and supportive housing by-right in all zones allowing residential uses, subject only to those regulations that apply to other residential uses of the same type in the same zone. In addition, the Zoning Code will be amended to define “supportive housing”, “target population” and “transitional housing” pursuant to state law. The City will continue to monitor the inventory of sites appropriate to accommodate transitional and supportive housing and will work with the appropriate organizations to ensure the needs of homeless and extremely low-income residents are met. The City if committed to prioritizing funding and other available incentives for projects that provide housing for homeless and extremely low-income residents whenever possible.

Timeframe: Adopt Code Amendments within 12 months of Housing Element adoption

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 7C: Housing for Persons with Developmental Disabilities

The housing needs of persons with developmental disabilities are typically not fully addressed by local zoning regulations. Persons with disabilities may require, in addition to basic affordability, slight modifications to existing units, and in some instances, a varying range of supportive housing facilities. To accommodate residents with developmental disabilities, the City will review and prioritize housing construction and rehabilitation including supportive services targeted for persons with developmental disabilities.

Newport Beach will also explore the granting of regulatory incentives, such as expedited permit processing, and fee waivers and deferrals, to projects targeted for persons with developmental disabilities. To further facilitate the development of units to accommodate persons with developmental disabilities, the City will encourage development of projects targeted for special needs groups. As housing is developed or identified, Newport Beach will collaborate with the Regional Center of Orange County (RCOC) to implement an outreach program informing families within the City of housing and services available for persons with developmental disabilities. The City will provide information at City Hall and on the City's website.

Timeframe: Adopt Code Amendments within 24 months of Housing Element adoption

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 7D: Fair Housing Services

The City was successful in reaching out to the community about fair housing services during the 5th Cycle. The City of Newport Beach will continue to contract with an appropriate fair housing service agency for the provision of fair housing services for Newport Beach residents. The City will also work with the fair housing service agency to assist with the periodic update of the Analysis of Impediments to Fair Housing document required by HUD. The City will continue to provide a minimum two public outreach and educational workshops a year, and distribute pamphlets containing information related to fair housing in the 6th Cycle.

Timeframe: Ongoing

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Housing Goal #8

Effective and responsive housing programs and policies.

Housing Policy 7.1: Review the Housing Element on a regular basis to determine appropriateness of goals, policies, programs, and progress of Housing Element implementation.

IMPLEMENTATION ACTIONS

Policy Action 8A: Annual Reporting Program

The City of Newport Beach shall report on the status of all housing programs as part of its annual General Plan Review and Annual Progress Report (APR). The Annual Progress Report discusses Housing Programs and is submitted to the California Department of Housing and Community Development in accordance with California state law. The City will continue to annually report its efforts within the annual General Plan Status Report including Housing Element Report provided to OPR and HCD by April 1st each year.

Timeframe: Ongoing, Annual

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Policy Action 8B: Water and Sewer Service Providers

Pursuant to SB 1087, Chapter 727, Statutes of 2005, the City of Newport Beach is required to deliver its adopted housing element and any amendments thereto to local water and sewer service providers. This legislation allows for coordination between the City and water and sewer providers when considering approval of new residential projects, to ensure that the providers have an opportunity to provide input on the Element. Additionally, review of the Housing Element ensures that priority for water and sewer services is granted to projects that include units affordable to lower-income households. The City will submit the adopted 6th Cycle Housing Element to local water and sewer providers for their review and input.

Timeframe: Transmit document immediately upon adoption of future amendment

Responsible Agency: City of Newport Beach Community Development

Funding Sources: General Fund

Summary of Quantified Objectives

[TBD]

Appendix A:

REVIEW OF PAST PERFORMANCE

A. Review of Past Performance

The following chart is a review of the City's housing project and program performance in the 2014-2021 Planning cycle. It is an evaluation of the 5th cycle's Policy Program and considers all current and existing programs and projects as well as the most current accomplishments and effectiveness and appropriateness.

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|---|--|--|
| Policy 1.1 Support all reasonable efforts to preserve, maintain, and improve availability and quality of existing housing and residential neighborhoods, and ensure full utilization of existing City housing resources for as long into the future as physically and economically feasible. | | | |
| 1.1.1 Improve housing quality and prevent deterioration of existing neighborhoods by strictly enforcing Building Code regulations and abating Code violations and nuisances. | Prepare quarterly report on code enforcement activities | The building inspectors and code enforcement officers continually enforce code regulations, abatement violations, and nuisances. The City conducts quarterly reports on code enforcement activities and keeps them on file at City Hall. <ul style="list-style-type: none"> In 2020, the City Council awarded funding for the Senior Home Assistance Repair Program. | Ongoing In accordance with State Law, the City will continue to enforce Building Code regulations and address violations and nuisances. |
| 1.1.2 Investigate the use of federal funds and local funds, including Community Development Block Grants (CDBG) and the Affordable Housing Fund, to provide technical and/or financial assistance, if necessary, to existing lower- and moderate-income, owner occupants of residential properties | Through Code Enforcement notifications and correction activities, attempt to identify property owners in need of financial assistance and overall resource allocation for a rehabilitation program. Attend quarterly OCHA (Cities Advisory Committee) | On April 29, 2015, the City published Request for Proposal (RFP) No. 15-55 for use of the City's Affordable Housing Fund toward affordable housing development or programming. Three projects received approval of the funding from City Council on November 24, 2015: <ol style="list-style-type: none"> Senior Home Assistance Repair Program (SHARP) - An agreement with Habitat for Humanity Orange County (Habitat OC) granted up to \$600,000 for critical home repair for low-income seniors. The total the City has used in the program to date is \$243,466 for a total of 11 projects. | Ongoing During the 5 th Cycle Planning Period, the City was successful in providing additional funding to 3 projects that resulted in new affordable housing units for low-income seniors and veterans and in the rehabilitation of |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|--|---|--|
| through low-interest loans or emergency grants to rehabilitate and encourage the preservation of existing housing stock. | meetings to keep up to date on rehabilitation programs offered by the County and investigate the availability of federal funds in February of each year, when new funding opportunities are typically announced. | <ul style="list-style-type: none"> ○ In 2020, the program worked on 2 projects and expended a total of \$9,222.11. Projects included home weatherization, roof repair and accessibility modifications. The total we have used in the program to date is \$228,023 for a total of 11 projects. ○ In 2019, the City worked on 2 projects and expended a total of \$30,682. Projects included home weatherization, roof repair and accessibility modifications. ○ In 2018, there was \$194,000 spent with 8 projects completed and 1 in the process at the end of the year. These projects include repairing and weatherizing roofing, bringing landscaping up to code, repairing stairs and railings, and replacing furnaces and windows. ○ In 2017, the first project was completed in West Newport in March 2017. The second project was completed in Corona del Mar in October 2017. The third and fourth projects were close to completion in Bayview and Santa Ana Heights in December 2017. Additionally, there were 3 projects in the application process in 2017 in West Newport Mesa, Bayside Village, and Peninsula Point. ○ In 2016, the first project was funded and underway in West Newport in December 2016 to repair the following: siding, roof, paint, chimney, faucets, outlets, smoke and | residences belonging to lower income seniors. The City will continue to seek funding opportunities from federal and local funds for lower- and moderate-income households. This will continue assisting seniors and lower income households in maintaining their homes and incentivizes developers to create affordable housing for the community. |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|---------------|-----------|---|------------------------|
| | | <p>carbon monoxide detectors. Anticipated completion is early 2017. The second project was in the initial inspection phases at a Santa Ana Heights residence for exterior clean-up items to address code enforcement issues such as landscape, garage door, paint and a broken window</p> <p>2. An agreement with Community Development Partners granting \$1,975,000 to assist with the acquisition, rehabilitation and conversion of an existing 12-unit apartment building located at 6001 Coast Boulevard for affordable housing – 6 for low-income veterans and 6 with a priority for low-income seniors and veterans (The Cove, formally known as the Newport Veterans Project). In June 2017, the project closed on construction financing. Building permits were issued and construction began in July 2017. The lease-up of the units were completed in 2018.</p> <p>3. Seaview Lutheran Plaza Project – Seaview Lutheran Plaza was awarded \$1.6 million to assist with the rehabilitation of an existing 100-unit apartment building that is affordable to low-income seniors located at 2800 Pacific View Drive. On July 26, 2016, the City and Seaview Lutheran entered into an affordable housing grant agreement for \$800,000 of the award for upgrades to existing bathrooms. The design and permits were approved late 2016 and construction was underway throughout 2017. By spring 2018 all 100 units were complete. The grant agreement extended the</p> | |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|---|--|--|--|
| | | <p>affordability requirement through 2069. Subsequent to the grant, Seaview Lutheran decided to not pursue the remaining \$800,000 for a loan 3 PROGRAM STATUS agreement. Therefore, this money remains in the City's affordable housing account.</p> | |
| <p>1.1.3 Require replacement of housing demolished within the Coastal Zone when housing is or has been occupied by very low-, low-, and moderate-income households within the preceding 12 months. The City shall prohibit demolition unless a determination of consistency with Government Code Section 65590 has been made. The specific provisions implementing replacement unit requirements are contained in Chapter 20.34 of the Municipal Code.</p> | <p>Use Chapter 20.34 "Conversion or Demolition of Affordable Housing" to implement Program continuously as projects are submitted.</p> | <p>On October 29, 2019, the Community Development Director determined that Newport Beach Municipal Code (NBMC) Chapters 20.34 and 21.34 (Conversion of Demolition of Affordable Housing) are no longer required. These chapters of the NBMC implement the Mello Act (Government Code Sections 65590 - 65590.1 Low- and Moderate-Income Housing Within the Coastal Zone). The regulations require the replacement of housing units lost within the coastal zone that are occupied by low- and moderate-income households under certain circumstances when feasible. Both the NBMC and the Mello Act provide when there is less than 50 acres in aggregate, of privately owned, vacant land available for residential use within the City's coastal zone, and 3 miles therefrom, the replacement requirement is not required.</p> <p>The Planning Division completed a land use inventory in October 2019 to determine if 50 aggregate acres of privately owned, vacant land is available for residential use within the City's coastal zone and within 3 miles inland of the coastal zone. The inventory conducted found less than 50 qualifying acres.</p> | <p>Removed This policy action is no longer being considered at this time. The City is continuing to look for ways to protect and create affordable housing through the 6th Cycle Policy Actions and Sites Inventory.</p> |
| <p>1.1.4 The City will continue to implement the Residential</p> | <p>Continuously implement program as RBR applications are</p> | <p>This City report allows the City to verify that its residential buildings meet zoning and building code requirements, life safety requirements as set forth by the City's Municipal</p> | <p>Ongoing The City will continue implementing the RBR</p> |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|---|---|--|
| Building Records (RBR) program to reduce and prevent violations of building and zoning ordinances by providing a report to the all parties involved in a transaction of sale of residential properties, and providing an opportunity to inspect properties to identify potentially hazardous conditions, resources permitting. The report provides information as to permitted and illegal uses/construction, and verification that buildings meet zoning and building requirements, including life safety requirements. | submitted to the City. Promote the availability of program to the public and local real estate professionals by maintaining information on website and developing brochure and other promotional materials. | Code, and fulfill the State's requirement that all homes have both smoke detectors and seismic strapping of water heaters (California Health and Safety Code, Section 19211). <ul style="list-style-type: none"> In 2020, there were 1,629 RBRs processed. In 2019, there were 1,405 RBRs processed. In 2018, there were 1,059 RBRs processed. In 2017, there were 1,547 RBRs processed. In 2016, there were 1,447 RBRs processed. In 2015, there were 1,432 RBRs processed. In 2014, there were 1,392 RBRs processed. | program through the 6 th Planning Cycle. This allows the City to track the sale of properties, ensure the home meets Code regulations for life and safety purposes, and provide new homeowners with detailed information on the permitting history of their property. |
| Policy 2.1 Encourage preservation of existing and provision of new housing affordable to extremely low-, very low-, low-, and moderate-income households. | | | |
| 2.1.1 Maintain rental opportunities by restricting conversions of rental units to condominiums in a development containing 15 or more units unless the | Complete a vacancy rate survey upon submittal of condominium conversion application of 15 or more units. | A vacancy rate survey is completed upon receiving an application for the conversion of 15 or more rental units to condominiums. Between 2014 and 2020 no project of 15 or more units were submitted. | Modified. This program was ongoing during the 5 th cycle; however, no projects of this nature were submitted. The program is important in retaining the City's |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|---|--|---|---|
| vacancy rate in Newport Beach for rental housing is an average of 5 percent or higher for 4 consecutive quarters, and unless the property owner complies with condominium conversion regulations contained in Chapter 19.64 of the Newport Beach Municipal Code. | | | existing rental housing and will be continued in the 6 th cycle with appropriate modifications. |
| 2.1.2 Take all feasible actions, through use of development agreements, expedited development review, and expedited processing of grading, building and other development permits, to ensure expedient construction and occupancy for projects approved with lower- and moderate-income housing requirements. | Continuously implement program as affordable housing projects are submitted to the City. | Pending applications that include affordable housing will be expedited. <ul style="list-style-type: none"> • 2020: Newport Airport Village • 2020: Residences at 4040 Von Karmen 2019: 4 very low-income applications submitted (1 ADU and 3 multi-unit). • 2018: 3 very low-income applications submitted (3 ADUs). | Ongoing The City will continue to promote the development of affordable housing by expediting the development process. The Regional Housing Needs Allocation (RHNA) requires the City to add 2,381 lower income homes and 1,048 moderate income homes; this policy action incentivizes the development of such housing. |
| 2.1.3 Participate with the County of Orange in the issuance | Continuously implement program per project submittal | The issuance of tax-exempt mortgage revenue bonds is project driven, and the developer typically applies for the bonds. | Modify The City will continue to incentivize the |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|---|--|--|
| of tax-exempt mortgage revenue bonds to facilitate and assist in financing, development and construction of housing affordable to low and moderate-income households. | as the developer applies for these bonds. | No applications were received, 2020-2014. | development of affordable housing units; however, the policy will be adjusted to include the promotion of available bonds to the public and developers. |
| 2.1.4 Conduct an annual compliance-monitoring program for units required to be occupied by very low-, low-, and moderate-income households. | Complete review by the last quarter of each year and report within the annual General Plan Status Report including Housing Element Report provided to OPR and HCD by April 1st each year. | Annual compliance monitoring has been conducted for 2014-2020 and the report for the City's income- and rent-restricted units by Priscila Davila & Associates, Inc. (consultant) found all units in compliance. | Ongoing The City will continue to maintain the availability of affordable housing units for lower income and moderate-income households. |
| 2.1.5 Provide entitlement assistance, expedited entitlement processing, and waive application processing fees for developments in which 5 percent of units are affordable to extremely low-income households. To be eligible for a fee waiver, the units shall be subject to an affordability covenant | Continuously implement program as affordable housing projects are submitted to the City. | In 2018 the building permit fees were waived for the Seaview Lutheran Plaza Project. Planning staff assisted as a liaison between the applicant and the Building Division to assist in resolving Building Code issues during the plan check process for the Seaview Lutheran Plaza Project and assisted with coordinating plan check and expediting permitting for the Newport Beach Veterans project. | Ongoing The City, in accordance with recent updates to State Law, will continue to promote the development of affordable housing by committing to taking actions within the 2021-2029 Housing Element to expedite the entitlement process. |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|---|--|---|---|
| for a minimum duration of 30 years. The affordable units provided shall be granted a waiver of park in-lieu fees (if applicable) and traffic fairshare fees. | | | |
| 2.1.6 Affordable housing developments providing units affordable to extremely low-income households shall be given the highest priority for use of Affordable Housing Fund monies. | Continuously implement program as affordable housing projects are submitted to the City. | In 2020, the City released an RFQ for Permeant Supportive Housing consultant to assist the City in developing a PSH. See status of Program 1.1.2. | Ongoing The City will continue to prioritize the creation or conversion of housing units for extremely low-income households. |
| Policy 2.2 Encourage the housing development industry to respond to existing and future housing needs of the community and to the demand for housing as perceived by the industry. | | | |
| 2.2.1 Maintain a brochure of incentives offered by the City for the development of affordable housing including fee waivers, expedited processing, density bonuses, and other incentives. Provide a copy of this brochure at the Planning Counter, the website and also provide a | Update brochure as needed to provide updated information regarding incentives including updated fees and a reference to the most up to date Site Analysis and Inventory. | A brochure is maintained and provided on the City website and in the public lobby. | Ongoing The City will continue to promote affordable housing to the community. The City will continue in the 6 th Cycle planning period to pursue methods of outreaching to the local development community, including non-profit developers, to explore partnerships. |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|---|--|--|---|
| copy to potential developers. | | | |
| 2.2.2 The City shall provide more assistance for projects that provide a higher number of affordable units or a greater level of affordability. At least 15 percent of units shall be affordable when assistance is provided from Community Development Block Grant (CDBG) funds or the City's Affordable Housing Fund. | Continuously implement program as housing projects are submitted to the City. | <p>The City provides financial assistance based on a project by project analysis, depending on need and overall project merits.</p> <p>This program was considered in evaluating the proposals for the RFP and choosing the projects described in Program 1.1.2.</p> | Ongoing The City will continue to provide assistance, through CDBG funds or the City's Affordable Housing Fund, for projects that provide a higher number of affordable housing units. |
| 2.2.3 For new developments proposed in the Coastal Zone areas of the City, the City shall follow Government Code Section 65590 and Title 20. All required affordable units shall have restrictions to maintain their affordability for a minimum of 30 years. | Use Zoning Code Chapter 20.34 "Conversion or Demolition of Affordable Housing" to implement this program continuously as projects are submitted. | <p>See status of Program 1.1.3.</p> <p>The City uses NBMC Chapter 20.34 Conversion or Demolition of Affordable Housing by monitoring demolition requests and permits. One applicable project (PA2018-051) was submitted in 2018, requesting the demolition of 4 units; none of the 4 units were found to be occupied by low- or moderate-income households.</p> <p>Resulting from Mello Act Compliance for the Echo Beach project approved in 2014, 6 existing studio units at 305 E. Bay Avenue were remodeled and converted to very low and low-income rental units in 2016. The units were available to rent in 2017.</p> | Ongoing The City will continue to ensure the number of affordable housing options within the City is not decreased. The 6 th Cycle RHNA calculations add to the number of needed affordable housing units, therefore maintaining the affordability of units does not add to the amount the City must |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|---|---|---|
| | | | develop between 2021 and 2029. |
| 2.2.4 All required affordable units shall have restrictions to maintain their affordability for a minimum of 30 years. | Continuously implement program as housing projects are submitted to the City. | <p>Staff continues to include this affordability restriction as a standard condition on all affordable housing projects, unless an otherwise longer affordability covenant is agreed upon.</p> <p>On February 21, 2019, the 350-unit Newport Crossings Mixed-Use Project was approved, which includes 78 units affordable to low-income households. 52 units were restricted for a term of 55 years in compliance with density bonus law and the remaining 26 non-density bonus units were restricted for a term of 30 years.</p> <p>The Newport Veterans project has an affordability requirement of 50 years and the Seaview Lutheran project will add 30 additional years to their existing requirement, resulting in a new expiration date of 2069.</p> | Ongoing The City will continue to maintain a 30-year minimum restriction for affordable housing units to protect residents currently residing in such units and, in conjunction with other policy actions, incentivize the development of affordable housing in the City. |
| 2.2.5 Advise and educate existing landowners and prospective developers of affordable housing development opportunities available within the Banning Ranch, Airport Area, Newport Mesa, Newport Center, Mariners' Mile, West Newport | Continuously implement program as prospective developers contact City seeking development information. Maintain a designated staff person that can be contacted to provide housing opportunity information and incentives for | A brochure has been created and distributed that outlines development incentives and entitlement assistance available in the City. The brochure is maintained at the public counter in Bay C at the Civic Center and on the City website. | Ongoing The City will continue to promote affordable housing sites to prospective developers. The 6 th Cycle Housing Element will identify opportunity sites for housing that should be actively presented to developers through this policy action. |

| Highway, and Balboa Peninsula areas. | development of affordable housing. | | |
| 2.2.6 Participate in other programs that assist production of housing. | Attend quarterly OCHA (Cities Advisory Committee) meetings to keep up to date on rehabilitation programs offered by the County in order to continuously inform homeowners and rental property owners within the City of opportunities and to encourage preservation of existing housing stock. | City staff attends Orange County Housing Authority (OCHA) Cities Advisory Committee meetings to keep up-to-date with programs that assist in the production of housing. | Ongoing The City will continue to participate in OCHA meetings and programs that assist in the production of housing. This policy action is necessary in order to achieve other actions (2.2.1) that inform the public of funding opportunities and programs to further develop the City's housing stock. |
| 2.2.7 New developments that provide housing for lower-income households that help meet regional needs shall have priority for the provision of available and future resources or services, including water and sewer supply and services. | Provide a copy of the Housing Element to water and sewer service providers. Pursuant to state law, water and sewer providers must grant priority to developments that include housing units affordable to lower-income households which is implemented | In 2017, the Newport Crossings Mixed-Use project, a 350-dwelling unit mixed-use development, was submitted within the Airport Area under the Residential Overlay of the Newport Place Planned Community. The proposed project includes 78 dwelling units affordable to low-income households. The Environmental Impact Report (EIR) was certified and the project was approved by the Planning Commission on February 21, 2019. The EIR concluded that adequate water and sewer capacity exist to support the development. The plan check for construction drawing review | Ongoing The City will continue to incentivize the production of affordable housing units by prioritize the allocation of resources towards new development that provide housing for lower income households. |

| | continuously as these projects are submitted. | was submitted on November 17, 2020, with building permit issuance expected in Summer 2021. | |
| 2.2.8 Implement Chapter 20.32 (Density Bonus) of the Zoning Code and educate interested developers about the benefits of density bonuses and related incentives for the development of housing that is affordable to very low-, low-, and moderate-income households and senior citizens. | Continuously implement program as housing projects are submitted to the City. | <p>Implemented as projects are submitted. Density bonus information and incentives are included in an informational brochure available to the public.</p> <p>In 2017, the Newport Crossings Mixed-Use project, a 350-dwelling unit mixed-use development, was submitted within the Airport Area under the Residential Overlay of the Newport Place Planned Community. In exchange for providing 78 units affordable to low-income households, the developer has requested a density bonus of 91 units (35 percent bonus), an incentive to allow for flexibility with unit mix, and a development waiver of building height. The Environmental Impact Report (EIR) was certified and the project was approved by the Planning Commission on February 21, 2019.</p> <p>In December 2019, an application was submitted for a new mixed-use development located at 2510 West Coast Highway that includes the development of 36 dwelling units, 3 of which would be restricted for very low-income households. In exchange for providing the very low-income units, the developer has requested a density bonus of 9 units (35 percent bonus) and development waiver of building height. The project was approved by the Planning Commission in February of 2021 and is pending review by the City Council.</p> | Ongoing In accordance with State Law, the City will continue to provide density bonuses to developments that provide housing to lower income households. This action proved successful during the 5 th Planning Cycle as 3 projects applied for density bonuses that resulted in the creation of 94 affordable housing units for lower income households. |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|---------------|-----------|--|------------------------|
| | | <p>In 2020 an application was submitted for Residences at 4400 Von Karman, which included 312 apartments of which 13 very-low income housing units. The project was approved by the City Council in February 2021. Newport Airport Village - A General Plan Amendment, Planned Community Development Plan (PCDP), and a Development Agreement that would allow for the future redevelopment of the 16.46-acre property with up to 444 dwelling units (329 base units and 115 density bonus units) and 297,572 square feet of retail, office, and other airport supporting uses. The project was approved by City Council on September 22, 2020.</p> <p>Residences at 4400 Von Karman - In 2020, the former Koll Center Residences project was actively reviewed under a new project submittal called The Residences at 4400 Von Karman. The request consists of 637 rezoning nonresidential property to mixed-use land uses, including up to 260 residential units plus an allowance for density bonus units up to a total of 312 units (13 Very-Low Income units). On November 5, 2020, the Planning Commission considered the project and recommended approval to the City Council. The City Council approved the project on February 9, 2021, outside the reporting period.</p> | |

| Policy 2.3 Approve, wherever feasible and appropriate, mixed residential and commercial use developments that improve the balance between housing and jobs. | | | |
| 2.3.1 Study housing impacts of proposed major commercial/industrial projects during the development review process. Prior to project approval, a housing impact assessment shall be developed by the City with the active involvement of the developer. Such assessment shall indicate the magnitude of jobs to be created by the project, where housing opportunities are expected to be available, and what measures (public and private) are requisite, if any, to ensure an adequate supply of housing for the projected labor force of the project and for any restrictions on development due to the "Charter Section 423" initiative. | Continuously implement program as major commercial/industrial projects are submitted to the City. | <p>In conjunction with the environmental review required under the California Environmental Quality Act (CEQA), potential impacts to population, housing, and employment is reviewed and analyzed. Recent development trends have consisted of redevelopment of commercial and industrial sites for residential development or mixed-use, which has created new housing opportunities in the City.</p> <p>No major commercial/industrial projects were submitted in 2020-2014.</p> | Ongoing The City will continue to analyze the impacts of proposed commercial and industrial projects on housing the City. While no projects were proposed between 2014 and 2019 that triggered the requirement for an impact assessment, the analysis in coordination with CEQA identifies potential effects on housing and the City's ability to reach RHNA allocations. |

| Policy 3 Mitigate potential governmental constraints to housing production and affordability by increasing the City of Newport Beach role in facilitating construction of affordable housing for all income groups. | | | |
| 3.1.1 Provide a streamlined “fast-track” development review process for proposed affordable housing developments. | Continuously implement program as housing projects are submitted to the City. | The City prioritizes the development review process for all affordable housing projects. The renovation for the Cove project, the Seaview Lutheran rehabilitation and any Senior Home Repair Program rehabilitation projects were provided “fast-track” plan check. | Ongoing The City has been successful in streamlining projects that add to the affordable housing stock of Newport Beach. The City will continue to streamline and “fast-track” the development review process of affordable housing to incentivize developers to create affordable housing. |
| 3.1.2 When a residential developer agrees to construct housing for persons and families of very low, low, and moderate income above mandated requirements, the City shall either (1) grant a density bonus as required by state law, or (2) provide other incentives | Continuously implement provisions of Chapter 20.32 Density Bonus in the Zoning Code as housing projects are submitted to the City. | The City considers density bonuses and other incentives on a project-by project basis. Chapter 20.32 (Density Bonus) is included in the Zoning Code and is implemented as projects are submitted. As mentioned in Program 2.2.8, the approved Newport Crossings Mixed Use project includes 78 units affordable to low-income households, and the developer has requested a density bonus of 91 units (35 percent bonus), an incentive to allow for flexibility with unit mix, and a development waiver of building height. | Ongoing In accordance with State Law, the City will continue to provide density bonuses to developments that provide housing to lower income households. |

| of equivalent financial value. | | Additionally, a 2020 development, Residences at 4400 Von Karman Project includes 312 apartment units (2510 West Coast Highway). Of which, 13 were designated very-low income. | |
| 3.1.3 Develop a pre-approved list of incentives and qualifications for such incentives to promote the development of affordable housing. Such incentives include the waiver of application and development fees or modification to development standards (e.g., setbacks, lot coverage, etc.). | Work with the Affordable Housing Task Force to develop the list and obtain City Council approval by Fall 2014. | <p>Waivers and incentives are considered by the Planning Commission and City Council on a project-by-project basis. Staff received information from the Department of Housing and Community Development (HCD) on examples of pre-approved incentive programs from the City of Los Angeles and the City of Anaheim. Staff will continue research with HCD to develop pre-approved incentives.</p> <p>As mentioned in Program 2.2.8, the Newport Crossings Mixed-Use project includes 78 units affordable to low-income households, and the developer has requested a density bonus of 91 units (35 percent), an incentive to allow for flexibility with unit mix, and a development waiver of building height.</p> <p>As mentioned in Program 2.2.8, the Newport Crossings Mixed-Use project includes 78 units affordable to low-income households, and the developer has requested a density bonus of 91 units (35 percent bonus), an incentive to allow for flexibility with unit mix, and a development waiver of building height. The plan check for construction drawing review was submitted on November 17, 2020, with building permit issuance expected in Summer 2021.</p> | Ongoing The City will continue coordinating with HCD to develop pre-approved incentives for developing affordable housing and review the eligibility of projects for fee waivers and incentives. |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|---|---|---|--|
| Policy 3.2 Enable construction of new housing units sufficient to meet City quantified goals by identifying adequate sites for their construction. Development of new housing will not be allowed within the John Wayne Airport (JWA) 65 dB CNEL contour, no larger than shown on the 1985 JWA Master Plan. | | | |
| 3.2.1 When requested by property owners, the City shall approve rezoning of developed or vacant property from nonresidential to residential uses when appropriate. These rezoned properties shall be added to the list of sites for residential development. | Continuously implement program as property owners bring their requests to the City. | <p>The City continually monitors requests for zone changes of vacant and developed properties from nonresidential to residential and approves when determined to be compatible and feasible. When approved, these sites are mapped for residential uses on both the Zoning District Map and General Plan Land Use Map.</p> <p>Residences at 4400 Von Karman - In 2020, the former Koll Center Residences project was actively reviewed under a new project submittal called The Residences at 4400 Von Karman. The request consists of rezoning nonresidential property to mixed-use land uses, including up to 260 residential units plus an allowance for density bonus units up to a total of 312 units (13 Very-Low Income units). On November 5, 2020, the Planning Commission considered the project and recommended approval to the City Council. The City Council approved the project on February 9, 2021, outside the reporting period.</p> <p>Newport Airport Village - A General Plan Amendment, Planned Community Development Plan (PCDP), and a Development Agreement that would allow for the future redevelopment of the 16.46-acre property with up to 444 dwelling units (329 base units and 115 density bonus units) and 297,572 square feet of retail, office, and other airport supporting uses. The project was approved by City Council on September 22, 2020.</p> | Ongoing The City has been successful in rezoning properties from nonresidential to residential uses. The 6 th Cycle Housing Element identifies potential sites that could be rezoned to permit housing developments. The City will continue to review rezoning applications when appropriate for housing development. |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|---------------|-----------|---|------------------------|
| | | <p>Residences at Newport Center - Redevelopment of an underutilized commercial site in Newport Center to develop 28 condominiums. The project was submitted to the City in February 2020 and the application was deemed complete in December 2020. The City is currently preparing the draft environmental impact report for public distribution in the spring 2021.</p> <p>2510 West Coast Highway - In December 2019, an application was submitted for a new mixed-use development located at 2510 West Coast Highway that includes the development of 35 dwelling units, 3 of which would be restricted for Very Low Income households. In exchange for providing the Very Low Income units, the developer has requested a density bonus of 9 units (35 percent bonus), a development waiver for building height and a waiver regarding the unit mix. The project was approved by the Planning Commission in February 2021, and the decision will be reviewed by the City Council.</p> <p>In 2012, the City adopted an amendment to the North Newport Center Planned Community and approved an additional 79 residential units for construction within North Newport Center. The amendment now allows for the total construction of up to 524 residential units within the San Joaquin Plaza sub-area. On December 12, 2013, plans were submitted for the construction of a 524-unit apartment complex and building permits and demolition permits were issued in November 2014. Construction commenced in late 2014 and was completed in Summer 2017.</p> | |

|--|--|---|--|
| amenities, design considerations for the future integration into a larger residential village, and a requirement to ensure collaboration with future developers in the area. | | the Airport Area under the Residential Overlay. In exchange for providing 78 units affordable to low-income households, the project is eligible for the 10-acre site requirement, a 91-unit density bonus, and development incentives and waivers. The application included a Site Development Review to ensure that the sufficient amenities and neighborhood integration improvements are provided. The project provides extensive on-site recreational amenities, including separate pool, entertainment, and lounge courtyards with eating, seating, and barbeque space; a rooftop terrace; a fifth-level view deck; a club room for entertainment and gatherings; and a fitness facility. In addition, a 0.5- acre public park is proposed to be constructed and dedicated to the City, and a public plaza is located in front of the retail shops facing the main corner of the project at Corinthian Way and Martingale Way. | |
| 3.2.3 The City will encourage and facilitate residential and mixed-use development on vacant and underdeveloped sites listed in Appendix H3 by providing technical assistance to interested developers with site identification and entitlement processing. The City will support developers funding | Continuously implement program as housing projects are submitted to the City. Review and update as necessary the Site Analysis and Inventory and provide information to interested developers. | Appendix H3 is the Sites Analysis and Inventory which identifies sites that can be developed for housing within the planning period and that are sufficient to provide for the City's share of the regional housing need allocation to provide realistic opportunities for the provision of housing to all income segments within the community. Appendix H3 can be found in the Housing Element available at the Planning Division or online at: http://www.newportbeachca.gov/index.aspx?page=2087 The City has completed the following: 1. A user-friendly Sites Analysis and Inventory is on the City's website. | Ongoing AB 1486 requires that the City identify and provide a list of sites designated in the sites inventory if they are owner by the City. Through the 6 th Housing Element Planning Cycle, the City will review the opportunity sites identified and continue |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|-----------|---|------------------------------|
| <p>applications from other agencies and programs. The City will post the Sites Analysis and Inventory on the City's webpage and marketing materials for residential and mixed-use opportunity sites, and it will equally encourage and market the sites for both for-sale development and rental development. To encourage the development of affordable housing within residential and mixed-use developments, the City shall educate developers of the benefits of density bonuses and related incentives, identify potential funding opportunities, offer expedited entitlement processing, and offer fee waivers and/or deferrals.</p> | | <p>2. A brochure is available on the website and in the public lobby that promotes the incentives and opportunities for affordable housing projects, which includes information of the City's Sites Analysis and Inventory.</p> <p>3. A layer and note have been added in the City's Geographic Information System (GIS) to identify sites within the inventory to assist staff in providing information to interested developers.</p> <p>The City will encourage density bonus and offer incentives to interested developers.</p> <p>Effective January 1, 2020, State law (Assembly Bill 1486, Statutes of 2019) requires a listing of sites owned by the City, that are included in the sites inventory, and that have been sold, leased, or otherwise disposed of in the prior year. The list shall include the entity to whom each site was transferred and their intended use. The City does not own any of the sites listed in the current housing opportunity sites; therefore, no listing of sites is provided.</p> | marketing opportunity sites. |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|---|--|---|
| <p>3.2.4 The City will monitor and evaluate the development of vacant and underdeveloped parcels on an annual basis and report the success of strategies to encourage residential development in its Annual Progress Reports required pursuant to Government Code 65400. If identified strategies are not successful in generating development interest, the City will respond to market conditions and will revise or add additional incentives.</p> | <p>Annually report staff's findings within the annual General Plan Status Report including Housing Element Report provided to OPR and HCD by April 1st each year.</p> | <p>The City has significant projects on sites identified as underutilized:</p> <ul style="list-style-type: none"> • In 2019, construction began the development of the Plaza Corona del Mar project, 6 detached residential condominiums units on an identified vacant site in Corona del Mar. Building permits were issued in 2017. • Uptown Newport was approved in February 2013, for the construction of up to 1,244 residential units, 11,500 square feet of retail commercial, and 2.05 acres of park space. The Uptown Newport Planned Community requires densities between 30 du/acre and 50 du/acre, consistent with the densities of the General Plan, and allows additional density opportunities with a density bonus. Construction of the first phase of the project (462 apartment units, including 91 affordable units) began in 2014 and 227 of these units were completed and finalized in 2019. • The Newport Crossings Mixed-Use project is located on a site identified as underutilized. The project was submitted in 2017 and was under review in 2018. The project includes the development of 350 residential apartment units, including 78 units affordable to low-income households. The Environmental Impact Report (EIR) was certified and the project was approved by the Planning Commission on February 21, 2019. • Residences at 4400 Von Karman - In 2020, the former Koll Center Residences project was actively reviewed under a new project submittal called The | <p>Ongoing The City has been successful in identifying underutilized sites and aiding/facilitating the development of housing on said properties.</p> <p>The City will continue to seek out underutilized sites at the time of the annual General Plan Status Report or OPR and HCD.</p> |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |

|---|---|--|---|
| | | housing units. The project was approved by the City Council in February of 2021. | |
| Policy 4.1 Continue or undertake the following programs to mitigate potential loss of “at risk” units due to conversion to market-rate units. These efforts utilize existing City and local resources. They include efforts to secure additional resources from public and private sectors should they become available. | | | |
| 4.1.1 Annually contact owners of affordable units for those developments listed as part of the City’s annual monitoring of affordable housing agreements to obtain information regarding their plans for continuing affordability on their properties, inform them of financial resources available, and to encourage the extension of the affordability agreements for the developments listed beyond the years noted. | Conduct as part of the annual compliance monitoring program required by Program 2.1.4. Contact list shall be provided on City website and updated annually. | Staff maintains an updated contact list for affordable units in conjunction with the 2014-2021 Housing Element. LDM Associates (consultant) included this information that was sent to the owners as a part of the annual monitoring. During the RFP process for the expenditure of the affordable housing funds, the City and LDM Associates reached out to the owners of the existing affordable housing units within the City and there was no interest to extend the existing affordable housing covenants except from Seaview Lutheran (see Program 1.1.2 for details). | Ongoing The City will continue to annually update its monitoring list of affordable housing units and contact the property owners for details on whether they will continue offering affordable units on their property. This promotes relations between the public, developers, and the City, as well as forecast the availability of affordable housing through the City. |
| 4.1.2 | Maintain registration as a Qualified | The City of Newport Beach is registered as a Qualified Preservation Entity with HCD as of 2012. When notification | Ongoing |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|--|---|--|
| The City shall maintain registration as a Qualified Preservation Entity with HCD to ensure that the City will receive notices from all owners intending to opt out of their Section 8 contracts and/or prepay their HUD insured mortgages. Upon receiving notice that a property owner of an existing affordable housing development intends to convert the units to a market-rate development, the City shall consult with the property owners and potential preservation organizations regarding the potential use of Community Development Block Grant (CDBG) funds and/or Affordable Housing Fund monies to maintain affordable housing opportunities in those developments listed in Table H12 or assist in the non-profit acquisition of | Preservation entity with HCD. Continuously implement program as notices are received from property owners. | is received, City staff will evaluate the potential use of monies to preserve the affordable units. | The City has not received notification between 2014 and 2019 of developments seeking to convert affordable housing into market-rate housing. The City will maintain its registration as a registered Qualified Preservation Entity to provide additional funding to developers who seek to make this change during the 6 th planning cycle. |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|--|--|---|
| the units to ensure long-term affordability. | | | |
| 4.1.3 Continue to maintain information on the City's website and prepare written communication for tenants and other interested parties about Orange County Housing Authority Section 8 opportunities and to assist tenants and prospective tenants acquire additional understanding of housing law and related policy issues. | Attend quarterly OCHA (Cities Advisory Committee) that provide updates on OCHA Section 8 waiting list and housing opportunities to ensure information provided on City website is up-to-date. If Section 8 waiting list is opened, promote the availability of the program through marketing materials made available to the public. | Pamphlets informing prospective tenants and landlords about the Orange County Housing Authority (OCHA) Section 8 program have been made available in the public lobby and information is posted on the City website. | Ongoing The City will continue to provide residents and developers with information in the OCHA Section 8 program and attend Cities Advisory Committee meetings to remain up-to-date on opportunities relevant to the City. |
| 4.1.4 Investigate availability of federal, state, and local programs and pursue these programs, if found feasible, for the preservation of existing lower-income housing, especially for preservation of lower-income housing that may convert to market rates during the next 10 years. In | Investigate availability of programs in February of each year when new funding opportunities are typically announced. | The City attends OCHA meetings and has continued to investigate available programs and evaluate the feasibility of participating in such programs. The Cove project worked directly with OCHA to obtain project-based Veterans Affairs Supportive Housing (VASH) vouchers. Orange County is provided VASH vouchers which are distributed to the Cities via OCHA. The project was awarded the project based VASH vouchers in 2016. Renovations of the units began in 2017 and lease-up of the project-based voucher units was complete in spring 2018. Additionally, the project received Veterans Housing and | Ongoing The City will continue to seek availability of programs for funding of affordable housing and make this information available to the public. |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|--|--|---|
| addition, continually promote the availability of monies from the Affordable Housing Fund as a funding source for the preservation and rehabilitation of lower income housing. A list of these programs, including sources and funding amounts, will be identified as part of this program and maintained on an ongoing basis. | | Homelessness Prevention (VHHP) funding through the Department of Housing and Community Development. | |
| 4.1.5 The City shall inform and educate owners of affordable units of the State Preservation Notice Law (Government Code Section 65863.10-13), if applicable. Pursuant to the law, owners of government-assisted projects cannot terminate subsidy contract, prepay a federally assisted mortgage, or discontinue use restrictions without first providing an exclusive Notice of Opportunity to | Conduct as part of the annual compliance monitoring program required by Program 2.1.4. | Staff and consultant LDM Associates (“LDM”) were able to coordinate meetings and phone calls with property owners of existing units subject to affordable housing covenants or agreements. The owners were not interested in extending the existing affordable housing covenants. Staff worked with LDM to provide a notice to potentially affected property owners. <ul style="list-style-type: none"> • 2019 - Newport Harbor I at 1538 Placentia Avenue is in the process of terminating. Their six-month notice was flagged by HCD. The City’s new Housing Consultant, Priscila Davila & Associates, Inc. and City staff worked to resolve the issue with HCD, without requiring the notices to be resent. The final termination document was under review by City Attorney and is anticipated to be complete by March 2021. | Modify The policy action was unsuccessful at encouraging property owner to maintain the affordable housing on their property during the 5 th Cycle planning period. Consequently, the policy should be modified to incentivize property owner maintain the affordability of the units on their property. |

| Policy Action | Objective | Program Accomplishments | Status for Sixth Cycle |
|--|-----------|--|------------------------|
| Submit an Offer to Purchase. Owners proposing to sell or otherwise dispose of a property at any time during the 5 years prior to the expiration of restrictions must provide this Notice at least 12 months in advance unless such sale or disposition would result in preserving the restrictions. The intent of the law is to give tenants sufficient time to understand and prepare for potential rent increases, as well as to provide local governments and potential preservation buyers with an opportunity to develop a plan to preserve the property. This plan typically consists of convincing the owner to either (a) retain the rental restrictions in exchange for additional financial incentives or (b) sell to a preservation buyer at fair market value. | | <ul style="list-style-type: none"> • 2018 - LDM discovered that 1 of the expiring affordable housing covenants did not provide the state law required noticing to their tenants. In May 2017, LDM notified the owner and management of 1544 Placentia Avenue and as a result, the expiration date of the affordability covenant was extended into 2018 to meet state law noticing requirements. In 2018 the following covenants for affordable housing expired and staff was unable to reach an agreement to extend the affordability agreements: <ul style="list-style-type: none"> ○ 849 West 15th Street - 15 units ○ 1544 Placentia – 25 units ○ 843 West 15th Street – 65 units | |

The portion of the Annual Report discussing Housing Programs is to be distributed to the California Department of Housing and Community Development in accordance with California state law. | Annually report staff's findings within the annual General Plan Status Report including Housing Element Report provided to OPR and HCD by April 1st each year. | This annual Housing Element Report will be submitted to HCD. | Ongoing As required by HCD, the City will continue to provide annual reports on the status of all housing programs to ensure progress. |

Appendix B:

SITES ANALYSIS

A. Adequate Sites Analysis

1. Candidate Sites Analysis Overview

The Candidate Sites Analysis process in Newport Beach was community-driven and lead by the Housing Element Update Advisory Committee (HEUAC). Chaired by Mr. Larry Tucker, the committee consisted of a variety of professionals with relevant experience in housing policy, local development, and community engagement. The primary role of the committee was to provide analysis and feedback on the selection of sites to be included in the Adequate Sites Inventory. The Focus Areas for housing development, which are detailed in this document, were created by the HEAUC. Within each focus area, the committees assigned parcels a feasibility – analyzing the parcel’s propensity to redevelop during the planning period. To further bolster this assessment, the City then sent letters to each property deemed “feasible” by the HEAUC. This information was the basis for the sites inventory presented in this document.

The Housing Element is required to identify sites by income category to meet the City’s RHNA Allocation. The sites identified within the Housing Element represent the City’s ability to develop housing at the designated income levels within the planning period (2021-2029). These sites are either residentially zoned, within a specific plan entitled for residential development (but not yet received building permits) or identified for rezone to a residential use from a non-residential use.

A summary of this information is included within the Housing Resources section (**Section 3**) of the City’s 2021-2029 Housing Element.

Table B-1 shows the City’s 2021-2029 RHNA need by income category as well as a summary of the sites identified to meet that need. The analysis within **Appendix B** shows that the City of has the capacity to meet their 2021-2029 RHNA allocation through a variety of methods, including:

- + Identification of additional increased capacity on existing, residentially zoned sites
- + Identification of residential property for rezone to higher-density residential primary use
- + Identification of non-residential property for rezone to residential primary use
- + Future development of accessory dwelling units (ADUs)

Water, Sewer, And Dry Utility Availability

Each site has been evaluated to ensure there is adequate access to water and sewer connections as well as dry utilities. Each site is situated with a direct connection to a public street that has the appropriate water and sewer mains and other infrastructure to service the candidate site.

The City’s Sewer System Management Plan provides for the identification of sewer system distribution throughout the community. All sites identified in the sites inventory have existing sewer system capacity and a sewer system capacity assurance plan is provide as part of the Management Plan to ensure the

availability of future capacity citywide. Threshold criteria have been adopted to trigger any capacity enhancements necessary based upon changes to land use and other considerations.

The City's Jurisdictional Runoff Management Plan addresses stormwater management throughout the City as it provides for the identification and management of facilities to manage stormwater throughout the community. According to the City's Runoff Management Plan, facilities and mitigations for potential peak stormwater flows are not deemed a constraint to future residential development.

The Newport Beach Utilities Department, the Municipal Water District of Orange County, and the Irvine Ranch Water District provide water service and management of the City's potable water system. As a built-out community, the City's existing water system services all areas within the City limits through various trunk lines and mains. Fire flow considerations are the primary factor in determining the adequacy of service for future residential development. The City conducts regular monitoring of the water system in the community and provides for system upgrades via capital improvement program to ensure continued adequate water availability and service to existing and future planned residential development.

Southern California Gas Company provides natural gas services to the City of Newport Beach. SoCal Gas is a gas-only utility and, in addition to serving the residential, commercial, and industrial markets, provides gas for enhanced oil recovery (EOR) and EG customers in Southern California. Southern California Edison (SCE) is the electrical service provider for Newport Beach. SCE is regulated by the California Public Utilities Commission (CPUC) and the Federal Energy Regulatory Commission (FERC) and includes 50,000 square miles of SCE service area across Central, Coastal, and Southern California. SCE will continue to provide adequate services to Newport Beach including increased household growth as projected by the City's RHNA allocation.

In accordance with the California Public Utilities Commission all electric and gas service will be provided for future development in Newport Beach as requested. SoCal Gas and Southern California Edison regularly partner with the City to provide services and obtain authorization to construct any required facilities. The City has a mature energy distribution system that will be able to add additional service connections for future residential land uses.

2. Adequacy of Sites to Accommodate RHNA

Newport Beach has identified sites with a capacity to accommodate 4,512 lower income dwelling units, which is in excess of its 2,386-unit lower income housing need. Sites designated are on parcels that permit residential development as a primary use up to 50 dwelling units per acre.

The City has a total 2021-2029 RHNA allocation of 4,845 units. As demonstrated previously, the City is able to take credit for 2,815 units currently within the planning process, lowering the total RHNA obligation to 2,632 units as shown in **Table B-1**. The Housing Element update lists sites that can accommodate approximately 7,407 additional units, in excess of the required 2,632 units. As described in this section, the City believes that due to recent State legislation and local efforts to promote accessory living unit production, the City can realistically anticipate the development of 334 ADUs within the 8-year planning period. Overall, the City has adequate capacity to accommodate its 2021-2029 RHNA.

| Table B-1: Summary of RHNA Status and Sites Inventory | | | | | |
|---|-----------------------------------|------------|-----------------|-----------------------|---------------|
| | Extremely Low/ Very Low Income | Low Income | Moderate Income | Above Moderate Income | Total |
| 2021-2029 RHNA | 1,456 | 930 | 1,050 | 1,409 | 4,845 |

3. Very Low- and Low-Income Sites Inventory

This section contains a description and listing of the candidate sites identified to meet the City's very low and low income RHNA need. A full list of these sites is presented in **Table B-10**.

Projects in the Pipeline

The City has identified a number of projects currently in the entitlements process which are likely to be developed during the planning period and count as credit towards the 2021-2029 RHNA allocation. Projects with planned affordable components include:

- + Newport Airport Village (17 Very Low-Income Units Planned)
- + Uptown Newport (102 Very Low-Income Units Planned)
- + Residences at 4400 Von Karman (13 Very Low-Income Units Planned)
- + Newport Crossings (78 Low-Income Units Planned)

Accessory Dwelling Units (ADUs)

The City currently has approved an average of 21 ADUs per year for development between January 1, 2018 and December 30, 2020. HCD guidance states that ADUs may be calculated based on the City's production from January 1, 2018 through December 31, 2020. To calculate a total number of ADUs

assumed to be produced from 2021-2029, the average of all ADUs developed from 2018 to 2020 was calculated then multiplied by 2 for each year of the 6th cycle. Through this method, the City identified a total of 334 ADUs assumed for the 8 years. In accordance with State law, ADUs are allowed in all zones that allow single dwelling unit or multiple dwelling unit development. Junior Accessory Dwelling Units (Jr. ADUs) are permitted only in single dwelling unit zones.

As part of the site's analysis found within this appendix, the City has accounted for future ADU and JADU production using the City's 2020 performance to date. SCAG conducted a regional analysis of current market rents that can be used to assign ADUs to income categories in Sixth Cycle Housing Elements, the analysis surveyed, market rents of 158 existing ADUs. The analysis then determined the proportion of ADUs within each income category for both one-person and two-person households and made assumptions for what percentage of ADUs are rented for free based on existing literature and allocate those towards ELI. Finally, the analysis combined rented and non-rented ADUs into single affordability breakdown by county. Newport Beach utilized SCAGs affordability assumptions for ADUs in Orange County. This equates to an anticipated ADU development of 334 ADUs over the next 8 years, 228 of which are anticipated to be affordable. The ADUs not designated to meet the City's lower income RHNA need are anticipated to be 100 affordable at moderate income levels and 6 affordable at the above moderate-income level. The City has identified the following program within the **Section 4: Housing Plan** to encourage the production of ADUs in Newport Beach:

- + Policy Action 1H: Accessory Dwelling Units Construction
- + Policy Action 1I: Accessory Dwelling Units Monitoring Program
- + Policy Action 1J: Accessory Dwelling Units Amnesty Program

Remaining Need

Table B-2 below displays the City's total RHNA allocation obligations for the years 2021-2029 as well as the City's net RHNA allocation obligations after the inclusion of Projects in the Pipeline and ADUs.

| Table B-2: Low and Very Low-Income Remaining Need | | |
|--|------------------------|-------------------|
| | Very Low Income | Low Income |
| RHNA Allocation | 1,456 | 930 |
| Pipeline Projects | 43 | 78 |
| Existing Zoning | 0 | 0 |
| Accessory Dwelling Units | 84 | 144 |
| Remaining Low/Very Low-Income Need | 1,326 | 706 |

Selection of Sites

Sites identified to meet the City's very low and low income RHNA were selected based on the AB 1397 size requirements of at least 0.5 acres but not greater than 10 acres. Based on a public process, sites were selected based on their realistic viability to accommodate lower income housing within the 2021-2029 planning period.

Sites were also evaluated based on access to resources, proximity to additional residential development, transportation and major streetway access, and resources and opportunity indicators. **Section 3: Affirmatively Furthering Fair Housing**, outlines all fair housing, opportunity indicators, and environmental resources in Newport Beach.

The City has identified sites with capacity to accommodate the City's 2021-2029 RHNA. This capacity is based on a rezone strategy for several Focus Areas throughout the City. These Focus Areas are as follows:

- + Airport Area Environs
- + West Newport Mesa Area
- + Dover-Westcliff Area
- + Newport Center Area
- + Coyote Canyon Area
- + Banning Ranch Area

The City has analyzed potential capacity based on rezone strategies specific to each area. Each of the following sections describes the identified areas and contains a table of redevelopment assumptions and projected unit capacities. Additionally, each focus area is followed by a map detailing the adequate sites inventory, organized by area.

Airport Area Environs

The Airport Area Environs has been a focus for development for the City for several years. The development of higher-density residential units within this focus area will be critical to accommodating lower income units. Increasing density within the Airport Area was also a key strategy as part of the City's 4th and 5th Cycle Housing Element Update. **Table B-3** below displays the capacity and opportunity in this area which can accommodate the City's RHNA allocation. **Figure B-1** below maps the sites identified within this region which can accommodate the City's RHNA allocation.

Table B-3: Airport Area Environs - Redevelopment Analysis

| Feasible Acreage | % Projected to Redevelop | Affordability | | Assumed Density | Net Units | | | |
|------------------|--------------------------|---------------|-----------------|-----------------|--------------|-----------|----------------|-------------|
| | | Lower Income | Moderate Income | | Low Very Low | Moderate | Above Moderate | Total |
| 162 acres | 30% | 80% | 20% | 50 du/ac | 1,941 units | 485 units | 0 units | 2,426 units |

Figure B-1: Airport Area Environs – Sites Inventory

Newport Housing Element - 6th Cycle
March 2021 | DRAFT

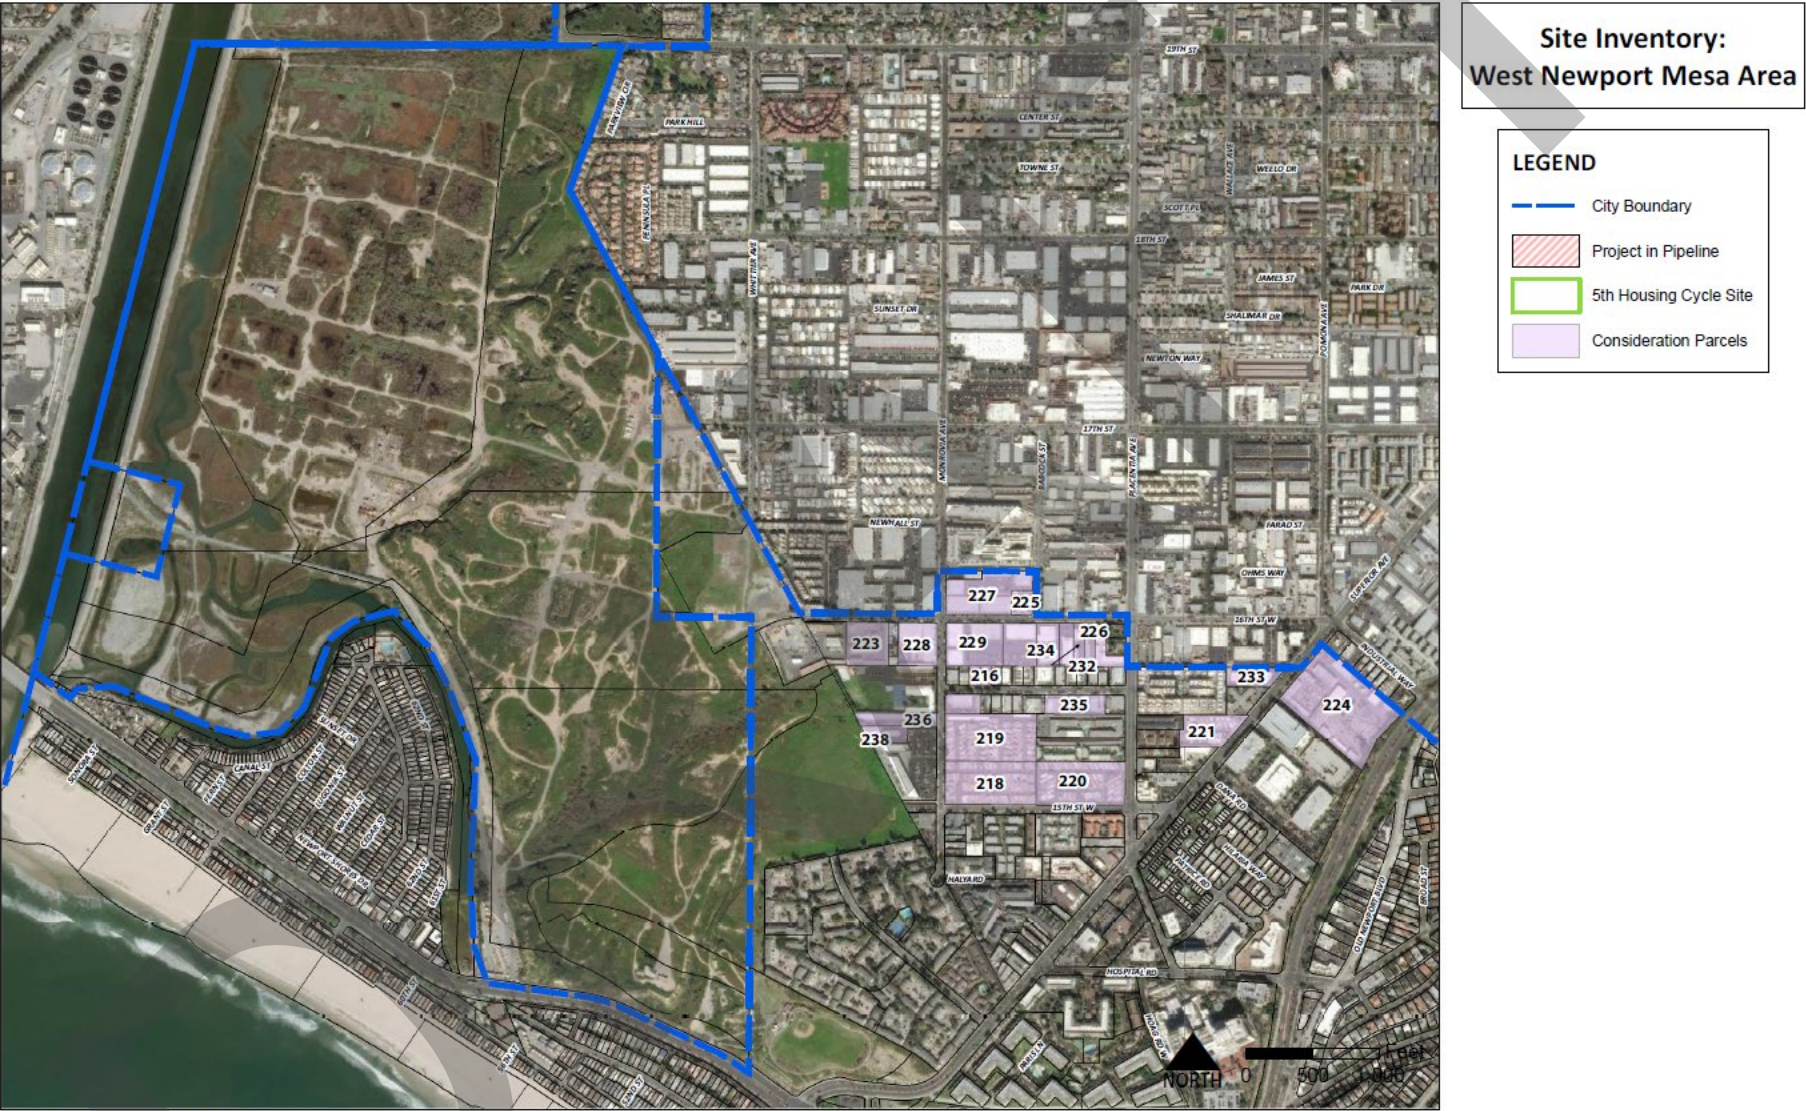

West Newport Mesa Area

West Newport Mesa has been identified by the City as a major reinvestment and redevelopment opportunity, where older industrial, smaller scale development can transition to support future residential development. The adjacent Hoag hospital and supportive medical-related activities supports the opportunity to provide housing opportunities for local workers of various income levels. **Table B-4** below displays the capacity and opportunity in this area which can accommodate the City's RHNA allocation. **Figure B-2** below maps the sites identified within this region which can accommodate the City's RHNA allocation.

| Table B-4: West Newport Mesa Area - Redevelopment Analysis | | | | | | | | |
|--|--------------------------|---------------|-----------------|-----------------|--------------|----------|----------------|-----------|
| Feasible Acreage | % Projected to Redevelop | Affordability | | Assumed Density | Net Units | | | |
| | | Lower Income | Moderate Income | | Low Very Low | Moderate | Above Moderate | Total |
| 48 acres | 20% | 80% | 20% | 45 du/ac | 347 units | 86 units | 0 units | 433 units |

Figure B-2: West Newport Mesa Area – Sites Inventory

Newport Housing Element - 6th Cycle
March 2021 | DRAFT

Dover-Westcliff Area

Dover-Westcliff has been identified as an area with opportunity to support increased density that is compatible with adjacent higher density residential uses and other uses that will support residential development. **Table B-5 below** displays the capacity and opportunity in this area which can accommodate the City's RHNA allocation. **Figure B-3** below maps the sites identified within this region which can accommodate the City's RHNA allocation.

| Table B-5: Dover-Westcliff Area - Redevelopment Analysis | | | | | | | | |
|---|--------------------------|---------------|-----------------|-----------------|--------------|----------|----------------|----------|
| Feasible Acreage | % Projected to Redevelop | Affordability | | Assumed Density | Net Units | | | |
| | | Lower Income | Moderate Income | | Low Very Low | Moderate | Above Moderate | Total |
| 14 acres | 10% | 10% | 5% | 30 du/ac | 4 units | 2 units | 35 units | 41 units |

Figure B-3: Dover Westcliff Area – Sites Inventory

Newport Housing Element - 6th Cycle
March 2021 | DRAFT

Newport Center Area

Newport Center has recently had construction of several new residential developments. The City expects the continuation of these development opportunities that creates housing adjacent to major employment opportunities and support retail. **Table B-6** below displays the capacity and opportunity in this area which can accommodate the City's RHNA allocation. **Figure B-4** below maps the sites identified within this region which can accommodate the City's RHNA allocation.

| Table B-6: Newport Center Area - Redevelopment Analysis | | | | | | | | |
|---|--------------------------|---------------|-----------------|-----------------|--------------|----------|----------------|-------------|
| Feasible Acreage | % Projected to Redevelop | Affordability | | Assumed Density | Net Units | | | |
| | | Lower Income | Moderate Income | | Low Very Low | Moderate | Above Moderate | Total |
| 158 acres | 25% | 10% | 5% | 45 du/ac | 178 units | 89 units | 1,515 units | 1,782 units |

Figure B-4: Newport Center Area – Sites Inventory

Newport Housing Element - 6th Cycle
March 2021 | DRAFT

Coyote Canyon Area

Coyote Canyon is a closed landfill area with limited opportunities for active uses. A portion of the area is not subject to these restrictions and is considered an ideal opportunity for future residential development.

Table B-7 below displays the capacity and opportunity in this area which can accommodate the City's RHNA allocation. **Figure B-5** below maps the sites identified within this region which can accommodate the City's RHNA allocation.

| Table B-7: Coyote Canyon Area - Redevelopment Analysis | | | | | | | | |
|---|--------------------------|---------------|-----------------|-----------------|--------------|----------|----------------|-----------|
| Feasible Acreage | % Projected to Redevelop | Affordability | | Assumed Density | Net Units | | | |
| | | Lower Income | Moderate Income | | Low Very Low | Moderate | Above Moderate | Total |
| 22 | 100% | 10% | 10% | 40 du/ac | 88 units | 88 units | 704 units | 880 units |

Figure B-5: Coyote Canyon Area – Sites Inventory

Banning Ranch Area

Banning Ranch has been utilized in prior planning periods to accommodate future housing need. Banning Ranch was approved by the City but denied by the Coastal Commission in the past. The City understands that future opportunities may still exist in the Banning Ranch area and would like to keep the site under consideration for the 2021-2029 planning period. **Table B-8** below displays the capacity and opportunity in this area which can accommodate the City's RHNA allocation. **Figure B-6** below maps the sites identified within this region which can accommodate the City's RHNA allocation.

| Table B-8: Banning Ranch Area - Redevelopment Analysis | | | | | | | | |
|---|--------------------------|---------------|-----------------|-----------------|--------------|-----------|----------------|-------------|
| Feasible Acreage | % Projected to Redevelop | Affordability | | Assumed Density | Net Units | | | |
| | | Lower Income | Moderate Income | | Low Very Low | Moderate | Above Moderate | Total |
| 46 | 30% | 15% | 15% | 30 du/ac | 206 units | 207 units | 962 units | 1,375 units |

Figure B-6: Banning Ranch Area – Sites Inventory

Newport Housing Element - 6th Cycle
March 2021 | DRAFT

Through a public process, the City has assessed the feasibility of parcels to redevelop residentially during the planning period. Those parcels deemed feasible were then analyzed to ensure compliance with HCD's criteria for sites designated to accommodate lower income development (including sizing criteria). The inventory of feasible area for redevelopment within each focus area was developed with this process. **Table B-9** below summarizes the key statistics for the rezone strategies.

| Focus Area | Feasible Acreage | % Projected to Redevelop | Low/Very Low-Income Affordability | Rezone Density | Potential Low/Very Low-Income Units |
|------------------------|------------------|--------------------------|-----------------------------------|----------------|-------------------------------------|
| Airport Area Environs | 162 | 30% | 80% | 50 du/ac | 1,941 units |
| West Newport Mesa Area | 48 | 20% | 80% | 45 du/ac | 347 units |
| Dover-Westcliff Area | 14 | 10% | 10% | 30 du/ac | 4 units |
| Newport Center Area | 158 | 25% | 10% | 45 du/ac | 178 units |
| Coyote Canyon Area | 22 | 100% | 10% | 40 du/ac | 88 units |
| Banning Ranch Area | 46 | 100% | 15% | 30 du/ac | 206 units |
| TOTAL | 450 | -- | -- | -- | 2,764 units |

The City's history of developing residential uses with affordable units is shown below:

- + Newport Airport Village (17 Very Low-Income Units Planned)
- + Uptown Newport (102 Very Low-Income Units Planned)
- + Residences at 4400 Von Karman (13 Very Low-Income Units Planned)
- + Newport Crossings (78 Low-Income Units Planned)

These projects show that affordable units can be developed at this density. The **Section 4: Housing Plan** outlines actions the City will take to promote the development of affordable units within the Focus Areas.

Calculation of Unit Capacity

Taking into account development standards, unit capacity for sites identified to accommodate low and very low units was calculated by multiplying the net acreage of the site by the assumed density, as established in the City's General Plan Land Use buildout. Depending on the Focus Area, the City assumes that each identified site will develop with 10%-80% percent affordable units. To support this assumption, the City has identified programs and policies to encourage affordable developer interest and feasibility, these programs are detailed in **Section 4: Housing Plan**. Additionally, based on previous development trends, the City assigns each focus area a percentage projected to redevelop – meaning the percentage of sites within the focus area expected to “turn over”, or develop with residential units during the planning period.

Table B-10: Sites Inventory to Accommodate Low and Very Low-Income RHNA Allocation

| Unique ID | Parcel Number | Owner | Zoning | GPLU | Vacancy | 5th Cycle | Existing Units | Gross Acreage | Net Acreage | HCD Size Criteria | Density (Existing) | Density (Rezoned) | Net Units Final | Income Category (Zoned) | Income Category (Rezoned) | Rezone Focus Area | Letter Interest? |

Notes: Banning Ranch numbers have not yet been assigned to specific parcels. These numbers will be adjusted before HCD submittal

4. Moderate and Above Moderate Sites Inventory

This section contains a description and listing of the candidate sites identified to meet the City's very low and low income RHNA need. A full list of these sites is presented in **Table B-14**.

Projects in the Pipeline

The City has identified a number of projects currently in the entitlements process which are likely to be developed during the planning period and count as credit towards the 2021-2029 RHNA allocation. Notably, Projects in the Pipeline can completely accommodate the City's Above Moderate RHNA allocation. **Table B-11** below summarizes the potential units from projects in the pipeline:

| Table B-11: Moderate and Above Moderate-Income Projects in the Pipeline | | |
|---|-----------------|-----------------------|
| | Moderate Income | Above Moderate Income |
| Pipeline Projects | 0 units | 2,183 units |

Accessory Dwelling Units (ADUs)

The City currently has approved an average of 21 ADUs per year for development between January 1, 2018 and December 30, 2020. HCD guidance states that ADUs may be calculated based on the City's production from January 1, 2018 through December 31, 2020. To calculate a total number of ADUs assumed to be produced from 2021-2029, the average of all ADUs developed from 2018 to 2020 was calculated then multiplied by 2 for each year of the 6th cycle. Through this method, this city identified a total of 334 ADUs assumed for the 8 years. In accordance with State law, ADUs are allowed in all zones that allow single dwelling unit or multiple dwelling unit development. Junior Accessory Dwelling Units (Jr. ADUs) are permitted only in single dwelling unit zones.

As part of the site's analysis found within this appendix, the City has accounted for future ADU and JADU production using the City's 2020 performance to date. The City anticipates a total of 100 ADUs affordable at moderate income levels and 6 ADUs affordable at the above moderate-income level. The City has identified programs within the **Section 4: Housing Plan** to encourage the production of ADUs in Newport Beach.

Remaining Need

Table B-12 below displays the City's total RHNA allocation obligations for the years 2021-2029 as well as the City's net RHNA allocation obligations after the inclusion of Projects in the Pipeline and ADUs.

| Table B-12: Moderate and Above Moderate-Income Remaining Need | | |
|---|------------------|--------------------------|
| | Moderate Income | Above Moderate Income |
| RHNA Allocation | 1,050 units | 1,409 units |
| Pipeline Projects | 0 units | 2,183 units |
| Existing Zoning | 348 units | 40 units |
| Accessory Dwelling Units | 100 units | 6 units |
| Remaining Low/Very Low-Income Need | 600 units | No remaining need |

Selection of Sites

Based on a public process, sites were selected based on their realistic viability to accommodate lower income housing within the 2021-2029 planning period.

Sites were also evaluated based on access to resources, proximity to additional residential development, transportation and major streetway access, and resources and opportunity indicators. **Section 3: Affirmatively Furthering Fair Housing**, outlines all fair housing, opportunity indicators, and environmental resources in Newport Beach. A detailed map and list of candidate sites can be found on the City's website.

The City has identified sites with capacity to accommodate the City's 2021-2029 RHNA. This capacity is based on a rezone strategy for several Focus Areas throughout the City. These Focus Areas are as follows:

- + Airport Area Environs
- + West Newport Mesa Area
- + Dover-Westcliff Area
- + Newport Center Area
- + Coyote Canyon Area
- + Banning Ranch Area

The City has developed analyzed potential capacity based on rezone strategies specific to each area.

Through a public process, the City has assessed the feasibility of parcels to redevelop residentially during the planning period. Those parcels deemed feasible were then analyzed to ensure compliance with HCD's criteria for sites designated to accommodate lower income development (including sizing criteria). The inventory of feasible area for redevelopment within each focus area was developed with this process.

Table B-13 below summarizes the key statistics for the rezone strategies.

| Focus Area | Feasible Acreage | % Projected to Redevelop | Moderate Income Affordability | Rezone Density | Potential Moderate-Income Units | Potential Above Moderate-Income Units |
|------------------------|------------------|--------------------------|-------------------------------|----------------|---------------------------------|---------------------------------------|
| Airport Area Environs | 162 | 30% | 20% | 50 | 485 units | 0 units |
| West Newport Mesa Area | 48 | 20% | 20% | 45 | 86 units | 0 units |
| Dover-Westcliff Area | 14 | 10% | 5% | 30 | 2 units | 35 units |
| Newport Center Area | 158 | 25% | 5% | 45 | 89 units | 1,515 units |
| Coyote Canyon Area | 22 | 100% | 10% | 40 | 88 units | 704 units |
| Banning Ranch Area | 46 | 100% | 15% | 30 | 207 units | 962 units |
| TOTAL | 450 | -- | -- | -- | 957 units | 3,217 units |

Calculation of Unit Capacity

Taking into account development standards, unit capacity for sites identified to accommodate moderate and above moderate-income units was calculated by multiplying the net acreage of the site by the assumed density, as established in the City's General Plan Land Use buildout. Depending on the Focus Area, the City assumes that each identified site will develop with 10%-80% percent affordable units (the remainder developing as moderate and above moderate income. To support this assumption, the City has identified programs and policies to encourage affordable developer interest and feasibility, these programs are detailed in **Section 4**. Additionally, based on previous development trends, the City assigns each focus area a percentage projected to redevelop – meaning the percentage of sites within the focus area expected to “turn over”, or develop with residential units during the planning period.

Appendix C:

SUMMARY OF OUTREACH

Summary of Community Outreach

Section 65583 of the Government Code states that, “the local government shall make diligent effort to achieve public participation of all economic segments of the community in the development of the housing element, and the program shall describe this effort.” Meaningful community participation is also required in connection with the City’s Assessment of Fair Housing (AFH). A summary of citizen participation is provided below.

As part of the 6th Cycle Housing Element Update process, Newport Beach has conducted extensive public outreach activities beginning in 2019. In October 2019, the City launched Newport Together, a Listen & Learn process to guide and inform a future General Plan Update. The goal of the Listen & Learn was to hear from a broad spectrum of community members on community values, assess the current General Plan Vision, and provide recommendations for a future General Plan Update. Newport Together was guided by the General Plan Update Steering Committee, a body appointed by City Council to oversee the Listen and Learn process. The following series of Community Workshops occurred in each of the Newport Beach Council Districts:

- November 12, 2019 from 6 – 8 p.m. at 16th Street Recreation Center – *District 2*
- November 14, 2019 from 6 – 8 p.m. Back Bay Science Center – *District 3*
- November 20, 2019 from 6 – 8 p.m. Newport Coast Community Center – *District 7*
- November 21, 2019 from 6 – 8 p.m. OASIS Senior Center – *District 6*
- December 3, 2019 from 6 – 8 p.m. Central Library's Friend Meeting Room – *District 5*
- December 11, 2019 from 6 – 8 p.m. Bonita Creek Community Center - *District 4*
- December 12, 2019 from 6 – 8 p.m. Marina Park Community Center – *District 1*

Beginning in 2020 the City began additional focused discussion for the 6th Cycle Housing Element Update. These recent outreach efforts included Community Workshops, Digital Engagement, Planning Commission Study Sessions, Housing Element Advisory Committee Meetings, digital media, and noticed Public Hearings. Project materials, including summaries from community workshops and public meetings, notices, and draft public review documents are available on the City’s website: <https://www.newporttogether.com/housing>.

Outreach for the 6th Cycle Housing Element to the Newport Beach community, includes the following actions:

- **Community Workshop #1** – The City conducted a virtual community workshop on October 20, 2020. Advertising for the workshop included emailing the City’s list serve, posting on social media, creating an item on the City’s calendar, newspaper ads, water bill notices, and announcing the event on the project website. The recorded workshop is available for viewing on the workshop’s webpage at https://www.newporttogether.com/virtual_workshop. The 82 workshop participants were provided with an overview of the Housing Element Update process, community and housing characteristics, and also participated in engagement activities. Takeaways from the workshop include the following:

- Many believe Newport Beach has opportunities to overcome housing challenges in communities where density may be increased and through a mixture of housing types that meets the needs of many different family types and income levels;
 - Traffic impacts and parking are important issues to be addressed along with housing;
 - Different densities are suitable in different areas of the City;
 - And, some people are opposed to the development of more housing.
- **Community Workshop #2 and #3** – The City conducted a second community workshop on November 16th and 17th, 2020. Advertising for the workshop included emails out to the City’s distribution list, social media posts, creating an item on the City’s calendar, newspaper ads, water bill notices, and announcing the event on the project website. The recorded workshop is available for viewing on the workshop’s webpage at <https://www.newporttogether.com/housing-suitability>. The workshop included an ice breaker that asked participants to guess the density of various housing types. The activity’s goal was to have participants think about density and to associate density numbers with housing projects in Newport Beach. Participants could submit comments and questions via the Zoom chat box in the first half of the workshop. In the second half, during the public comment section, participants could use the “raise hand” function to indicate that they would like to speak verbally, and project staff would then unmute their microphone. Each participant was allotted three minutes to ask questions or provide comments. Participants were also able to submit comments via the chat box. A primary objective of the workshop was allowing participants opportunities to comment on the housing suitability analysis for focus areas in the City. Participants were asked to consider if focus areas were suitable for housing development and if there were challenges and opportunities associated with these specific areas. Attendance for the part 1 and part 2 of the workshop was as follows:
 - **Part 1:** 61 participants (4 called in and 57 participated on the web)
 - **Part 2:** 55 participants (1 called in and 54 participated on the web)
- **Community Workshop #4** – The City conducted a third community workshop on February 24th, 2021. Advertising for the workshop included emails out to the City’s distribution list, social media posts, creating an item on the City’s calendar, newspaper ads, water bill notices, and announcing the event on the project website. The recorded workshop is available for viewing on the workshop’s webpage at <https://www.newporttogether.com/circulation-element-themes2>. The workshop discussed opportunity sites and policy strategies for the Housing Element and provide opportunities for the public to discuss options and provided feedback.
- **Online Community Survey** – [UPDATE AS WE PROCEED] Newport Beach launched an online community survey to gather additional feedback regarding the Housing Element Update. Participants were asked to consider potential policies and programs to include in the Housing Element, as well as potential housing types and opportunities for housing in the City. The survey also solicited feedback regarding potential barriers to housing access and constraints to the development of housing.

- **Planning Commission Study Session** – [UPDATE AS WE PROCEED] The City held a Planning Commission Study Session on March 22nd, 2021. During the study session, the project team provided a presentation with an overview of the Public Review Draft Housing Element and Housing Element update process to date. Community members had the opportunity to give public comments.
- **Housing Element Update Advisory Committee (HEUAC) Meetings** – The City established a Housing Element Update Advisory Committee to:
 - Ensure there is sufficient public outreach and stakeholder input regarding the update to the Housing, Land Use, and Circulation Elements of the Newport Beach General Plan and any other Elements deemed necessary.
 - Review responses to the Request for Proposal for services to update the Housing, Land Use, Circulation, and other Elements deemed necessary.
 - Make recommendations to the City Council regarding the selection of consultants to assist in the update of the Housing, Land Use, Circulation, and other Elements deemed necessary.
 - Provide guidance to City staff and the consultant through the outreach process.
 - Provide guidance to City staff, and the consultant, on goals and policies related to the update of the Housing, Land Use, Circulation Elements, and any other Elements deemed necessary by the Committee or City Council.
 - Make other recommendations to the City Council regarding the update of the General Plan, as necessary.

The HEUAC meeting agendas, minutes, and videos are available on the City's webpage at: <https://ecms.newportbeachca.gov/Web/Browse.aspx?startid=2503780&cnb=BoardsCommissio> ns. Nine Newport Beach residents were appointed by the Mayor and Confirmed by the City Council to be part of the committee.

- **Housing Element Update Website** – A website was developed for public consumption, and can be accessed at <https://www.newporttogether.com/housing>. The website provided relevant information about the update process, key features of the housing element, project timeline and a calendar of events for outreach activities. The website also provided a link to the community survey tool, past recorded meetings and summaries, as well as the contact information of the City for residents and community members to send additional comments or request additional information.

As required by Government Code Section 65585(b)(2), all written comments regarding the Housing Element made by the public have previously been provided to each member of the City Council.

This Appendix contains a summary of all public comments regarding the Housing Element received by the City at scheduled public meetings, and the Appendix has been provided to the City Council.

C.1 Community Workshop 1 Materials

This section contains all the related materials from the virtual Community Workshop 1. This includes the outreach flyer, materials provided to participants, and the workshop summary. Comments were received in the chat box, polling questions, and open-ended questions with types responses. Video recording of the workshop and verbal comments are available at <https://www.newporttogether.com/>.

ENVISIONING THE FUTURE OF HOUSING:
Housing Element Virtual Workshop Summary
October 20, 2020

Introduction

The City of Newport Beach (City) has initiated a focused update to the General Plan Housing Element. In October 2020, the project team hosted the first public workshop to review community input from previous Listen & Learn outreach, identify the process and framework for the Housing Element, explore housing challenges and solutions, and envision a range of housing alternatives.

Takeaways from the Workshop

The virtual workshop produced many different data points, which will be used to inform the Existing Conditions and Visioning part of the General Plan Update process. While this document summarizes the information collected, four key takeaways are important to note.

- Many believe Newport Beach has opportunities to overcome housing challenges including:
 - Communities where density may be increased
 - A mixture of housing types that meets the needs of many different family types and income levels
- Traffic impacts and parking are important issues to be addressed along with housing
- Different densities are suitable in different areas of the City
- Some people are opposed to the development of more housing

Additional public engagement opportunities will help the City learn more, including from people who chose not to respond during this first workshop

Project Overview

The effort to update the City's General Plan Housing Element will enable the City to comply with State housing law. Compliance is mandatory, although details of how the City complies is left to the City, subject to approval by the State. This amendment will focus on housing mandates, but will also necessarily result in amendments to the Land Use and Circulation Elements, and the incorporation of environmental justice policies.

The Housing Element will provide for policies, programs and actions addressing existing and projected future housing needs in the community for the 2021-2029 planning period. The Land Use Element will need to be updated for consistency with required changes to the Housing Element to accommodate future housing growth needs as determined by the State.

The Circulation Element will describe policies, programs, and actions that consider the implications of future growth on the City's transportation and circulation system. The update will be evaluated and the impacts to Level of Service (LOS) and Vehicle Miles Travelled (VMT) will be examined within an Environmental Impact Report. This will include the incorporation of Complete Streets policies.

The Environmental Justice Element, as required by SB 1000, describes related goals, policies, and objectives that identify "disadvantaged communities" within the area covered by the General Plan. The environmental justice goals, policies, and objectives will identify objectives and policies (1) to reduce the unique or compounded health risks in disadvantaged communities by means that include, but are not limited to, the reduction of pollution exposure, including the improvement of air quality, and the promotion of public facilities, food access, safe and sanitary homes, and physical activity, (2) to promote civil engagement in the public decision-making process, and (3) prioritize improvements and programs that address the needs of disadvantaged communities.

Public Outreach Overview

Public outreach is integral to each step of the process. Phase 1 Existing Conditions, Education, and Visioning; Phase 2 Policy Development; and Phase 3 Draft Plan Development. Members of the public may participate in workshops, activities on the project website, and in Community Advisory Committee meetings. Phase 4 Draft & Final Plan Development/EIR/CEQA, the draft plan will be circulated for comments, which will also be received at Planning Commission and City Council meetings.

Virtual Workshop 1: Envisioning the Future of Housing Activities

Objectives

During the first workshop, the goals were to review input from the Listen & Learn outreach that took place during Winter 2020, identify the process and framework for the Housing Element, and engage and educate participants in the discussion of housing alternatives compliant with state law and challenges presented by the State's requirements.

Date, Time, Platform, and Attendance

The meeting took place during the evening of October 20, 2020. The City chose the Zoom platform to involve 82 unique participants.

On average, 65% percent of participants engaged in workshop activities. Those who responded provide a preliminary understanding of the range of opinions among community members. About 35% of participants did not engage in the activities. It is difficult to infer meaning from this data point. However, the comments typed during the workshop may explain some of the reasons for not responding. Through additional engagement the City will deepen its understanding of participant opinions.

Getting the Word Out

Information about the workshop was shared through the City's distribution email, on social media platforms, as an item on the City's calendar, announced on the project website (NewportTogether.com).

Outreach Event Activities and Input

The first workshop was comprised of seven activities, which included entries into the chat box, polling questions, and open-ended questions with typed responses. Each activity is described below along with a summary of results.

Activity 1: Ice Breaker

Using the chat box, participants were invited to introduce themselves by sharing their neighborhood and the view from their windows. Out of 82 participants, 12 people responded.

| Participants Live In | Participants Have Views Of |
|------------------------------------|----------------------------|
| Corona Del Mar | Newport Back Bay |
| Newport Crest | |
| Newport Crest | |
| Newport Crest | |
| The Bluffs | Newport Back Bay |
| West Newport Beach | |
| West Newport Beach | Banning Ranch |
| Newport Island | |
| Trovare Community of Newport Coast | Newport Bay |

Two additional participants are connected to the Airport Area. One is a business owner and the other is a commercial property owner.

Activity 2: What is your connection to Newport Beach?

The second activity provided more information about participants. Chart 1 illustrates the breakdown with residents being the majority.

Chart 1: Participant Connection to Newport Beach

Activity 3: How familiar are you with the term “environmental justice”?

The State requires that local jurisdictions incorporate environmental justice policies into their General Plans. According to the California Environmental Justice Agency¹, environmental justice policies “call for fairness, regardless of race, color, national origin or income, in the development of laws and regulations that affect every community’s natural surroundings, and the places people live, work, play and learn.” Out of 27 respondents, most (37%) are somewhat familiar and a large percentage (33%) are unfamiliar with the term. Chart 2 shows the distribution of responses.

Chart 2: Familiarity With The Term “Environmental Justice”

Activity 4: What surprised you about the community profile?

The presentation included a community profile to provide participants with resident and housing characteristics. Participants were asked what surprised them about the community profile and they were able to type their responses. This question received 31 responses, which are included in Appendix A: Data Summary. The following topics received comments from multiple people.

- **Not a surprise:** Of all participants 11 participants were not surprised by the data.
- **Age:** A few participants commented on age demographics, noting that more than half of the population is 45 years or older.
- **Multi-family housing:** Two participants noted the proportion of multi-family housing, which makes up more than 30% of the housing stock.

¹ <https://calepa.ca.gov/envjustice/>

Activity 5: What are creative solutions to meet our housing needs?

Participants were asked about solutions to meet Newport Beach's housing needs. They were encouraged to make two to three comments in the chat. This question garnered a total of 47 responses. The full list of comments is available in Appendix A: Data Summary. The word cloud in Figure 1 illustrates the text responses. The size of the word represents the number of times it was typed by participants. Increasing density, development in the airport area, and the use of strip commercial/excess retail for residential development were all noted in five comments. Three comments made note of transportation solutions, construction of accessory housing units, and additional multi-family units. The following solutions were noted in two comments each: parking lots, mixed uses, fewer industrial properties, Newport Center, and development in Banning Ranch.

Figure 1: Participant Responses Word Cloud

Activity 6: Envisioning a Range of Housing Alternatives

In addition to solutions, participants were asked about the appropriateness of six different housing types in five areas of the City. The map in Figure 2 shows the five areas and the questions referred to the housing types illustrated below.

Figure 2: Housing Activity Responses

Single Family

Duplex

Townhome

Small Lots

Mid-Rise Housing

High-Rise Housing

The responses presented below are a summary of responses in **Chart 3**.

Area 1: Duplexes are perceived as the most appropriate. Single family, small lots, townhomes, and mid-rise also received relatively high response rates.

Area 2: Like Area 1, duplexes received a high number of responses and small lots, mid-rise, and single family received a high response rate.

Area 3: Higher density was viewed as appropriate in Area 3, with mid-rise being the most popular closely followed by small lots. Town-homes received several responses followed by high-rise and duplexes.

Area 4: Mid-rise, townhomes, and high-rise are viewed as most appropriate in Area 4.

Area 5: Single family homes, with 14 responses, are seen as most appropriate in Area 5. Duplexes, townhomes, and mid-rise also received a notable number of responses.

Chart 3: Appropriateness of Housing Type by Area

Several comments were submitted in the chat during this activity. The complete chat record may be found in Appendix B. Multiple comments addressed the following:

- **Airport Area:** The airport area generated three comments. One reinforced the responses to the polling question. The other two are paraphrased below:
 - Existing business invested in a business environment. There are not sufficient pedestrian and residential amenities.
 - The airport area should be thoughtfully planned with an integrated approach, weaving together a mixed-use landscape in a manner sensitive to existing issues.
- **Area 1:** Three people said that Area 1 has been developed enough, and should be an open area, and needs remediation.
- **Banning Ranch:** Four people noted that do not want housing developed in Banning Ranch.
- **Do not want development:** Several different comments indicate that people would have chosen “none” if it were an option.

Activity 7: What are the challenges to meeting our housing needs?

The ability to overcome challenges is important for the development of housing units. Participants were asked to identify one or more challenges from a list. Chart 4 illustrates responses. Of all the choices, available land, cost of housing, and traffic impacts received the most responses.

Chart 4: Challenges to Meeting Housing Needs

Community Involvement Every Step of the Way

The City has initiated a focused amendment of the Newport Beach General Plan in 2020. The purpose of this amendment is to enable the City to comply with State laws, including the State Housing Law and others relating to transportation and environmental justice.

How do you get involved?

The process chart below offers you a glimpse into the many engagement opportunities you will have to participate in the General Plan Update from Virtual Workshops to Planning Commission Meetings.

Dates and times for items below will be available through NewportTogether.com

Housing Suitability - Virtual Workshop
Held On: November 16 & 17, 2020
Workshop Summary

Prepared by Kearns & West
December 29, 2020

Introduction

On November 16 and 17, 2020, the City of Newport Beach (City) hosted a Housing Suitability Virtual Workshop to gather community input on potential housing sites and their suitability. The City chose to host the virtual workshop in two parts to provide enough time for public input and question and answer sessions for different areas in the City.

Part 1 (November 16) focused on the Airport Area, West Newport, and Newport Mesa. Part 2 (November 17) focused on Newport Center and Coyote Canyon. The workshop built on the community input and exploration of housing alternatives from previous workshops. The workshop summarized in this report focused on presenting the site feasibility analysis and the process used by the Housing Element Update Advisory Committee to identify candidate sites for review.

Workshop Objectives

The workshop had two objectives. The first was to present the site feasibility analysis and potential areas for candidate sites. The second objective was to allow the public to comment on this analysis and the potential sites. A primary driver for this workshop was providing a workshop format to allow members of the public to provide input and engage with staff in a question and answer style meeting.

Getting the Word Out

Information about the workshop was shared through the City's email distribution list, on social media platforms, as an item on the City's calendar, and as an announcement on the project website (NewportTogether.com).

Newport, Together (Online Input Opportunities)

The workshop page on the Newport, Together project website includes recordings from both workshop dates and virtual tools to gather input. The platform allows the project team to expand input opportunities beyond the workshop dates and for participants to engage with the project on-demand. Participants are currently able to submit geo-located comments on identified housing sites.

Workshop Format: Date, Time, Platform, and Attendance Summary

The workshop took place during the evening of November 16 & 17, 2020. Both workshop parts were hosted using Zoom to continue to build participant familiarity with the virtual platform and its tools. Over the two nights, the workshop had a total of 133 registered participants and combined attendance of 116 participants. Attendance details are below.

Part 1:

- Total attendance of 61 participants.
- Four participants called in
- 57 web-based participants

Part 2:

- Total attendance of 55 participants.
- One participant called in
- 54 web-based participants

Activities

The workshop included an ice breaker that asked participants to guess the density of various housing types. The activity's goal was to have participants think about density and to associate density numbers with housing projects in Newport Beach. Response rates for the ice breaker were:

Part 1: 90 responses were submitted

Part 2: 60 responses were submitted

Input Opportunities

Participants could submit comments and questions via the Zoom chat box in the first half of the workshop. In the second half, during the public comment section, participants could use the raise-hand function to indicate that they would like to speak verbally and project staff would then unmute their microphone. Each participant was allotted three minutes to ask questions or provide comments. Participants were also able to submit comments via the chat box.

Major Themes from Public Questions and Comments

A primary objective of the workshop was allowing participants opportunities to comment on the housing suitability analysis for focus areas in the City. Participants were asked to consider if focus areas were suitable for housing development and if there were challenges and opportunities associated with these specific areas.

The following section outlines the key themes and comments highlighted by participants. Themes consider overall responses and ideas shared during the public input section for each area. Chat responses can be found in Appendix A.

Airport Area:

- Participants expressed concern over the impact of noise levels on new housing development. It was noted flight paths could impact development.
- It was suggested that the area could become a higher density area, but the City should have an overall plan that incorporates services, recreation space, and other necessary amenities for a community.
- Participants stated concerns with housing developments sitting close to or within industrial areas that have contamination issues.
- The question was asked how the City makes sure that developments create affordability.

West Newport:

- Participants noted that housing development in the area is limited.
- Concern was expressed over the displacement of mobile homeowners.
- A potential partnership with Hoag Hospital for mixed-use development was mentioned.
- A concern was raised over the number of available sites for development and if property owners would be open to development.
- Concern over limited parking availability for new residents with new development was expressed.
- It was suggested Newport-Mesa Unified School District could be a partner in workforce development.

Newport Mesa: Dover/Westcliff/Mariners Mile

- Some participants noted a preference for lower density housing typologies.
- Comments included concern over developer affordability with development near the coast.
- Another concern involved property ownership interest in the development of low-income units.
- The question was asked if there is any surplus property to be considered for development.

Newport Center

- Some participants identified the possibility of high-rise development as well as mixed-use development.
- Concern was expressed over Irvine Company property ownership development restrictions.
- Residents who live close to Newport Center noted a request to keep existing height restriction agreements in place at Newport Center.
- Property owners expressed interest in market-rate development.
- It was stated that amenities are essential for residents; the City needs to consider community benefits.
- A commenter noted that placing affordable housing near Newport Center would be ideal because of the availability of jobs.
- Questions were posed about the conversion of retail to housing with shifting trends.

Coyote Canyon

- Several participants noted there could be an opportunity for higher density units.
- Participants commented that area development would require further incorporation of services to the area.
- Concern was expressed over environmental impacts because of the potential location of affordable housing units near the landfill.
- Participants noted that development of the non-landfill area on the north section could be most feasible.
- Participants noted future development needs to consider the expansion of infrastructure.
- A commenter noted that access to development might be a concern for development north of the landfill.

Appendix A: Chat Responses

Nov 16 Housing Suitability Virtual Workshop Chat

From Susan Eaton : Park Newport

From Susan De Santis : Susan De Santis, Trovare in Newport Coast

From Bruce Bartram : Bruce Bartram Newport Crest

From Sam Shams : East Bluff

From Jenna Tourje, Facilitator : Thanks everyone for sharing!

From P. Matheis : The Airport Area is, by my observations, a eclectic series of developed properties. Some of these properties are significant class A properties, while others are old and dilapidated. Given the figures of about 4,800 new dwelling units I read in the print news that NB planning officials suggest that this is not possible given self described restrictions. Because of my experience in Newport Beach and understanding of the situation on the ground I dispute this view. If I were to suggest that this housing could be met entirely within the Airport Area can the community development people explain why this is not possible.

From Jenna Tourje, Facilitator : Thanks, P. We will incorporate your comments

From David Tanner : Hi Seimone & Jim, Please provide an overview of the existing setting for the Housing Element Update project. Include the physical and regulatory setting and the impact housing regulations have had on the buildout of the existing General Plan. After you provide the existing setting upon buildout of the General Plan, please summarize how staff proposes to address General Plan buildout in the Housing Element Update Project.

From P. Matheis : As I recall, on or about the 1980s/90s the permitted housing development in Area2 was downzoned in a way that impacted about 320 dwelling units. Is this something that is being reconsidered?

From David Tanner : Please confirm (yes or no) if the existing General Plan is in compliance with state law. If no, what does Staff propose to remedy the deficiencies and will it be a part of the Housing Element Update Project?

From David Tanner : Please provide the legislative steps the City has and is proposing to take relative to the Housing Element Update Project, and the location(s) where Housing Element Update information can be found (GP diagnostic memo, communications between the City and HCD, Congresswoman Norris, SCAG, other cities and legislators, etc.).

From David Tanner : The scope of the Housing Element Project (the other Elements to be amended as part of the Project and how staff hopes to achieve internal consistency among the Elements (example: General Plan Vision Statement)).

From David Tanner : What is Staff's strategy for meeting the HCD deadline for submittal of an adopted Housing Element (if you feel a vote of the public to make the Housing Element Update effective is not required, please provide a detailed explanation. If staff believes other governmental approvals are not required, (example: Coastal Commission review/approval) please explain why.

From Nancy Scarbrough : This area seems like an area that could become a higher density, but I believe the City should have an overall plan for the area that incorporates services, recreation space and other uses that are necessary to a community. We don't want to create an environmentally disabled area.

From David Tanner : This information will provide the public with a clear picture of the situation facing the City, the challenges that lay ahead and the City's plan to address these challenges. this information should be provided to the public prior to asking the public for recommendations.

From Susan De Santis : What is the capacity in the Airport Area for housing if developed on the available sites at 60 units per acre?

From P. Matheis : In the 1990s the entitlements in Newport Center (Area 3) were reduced following a vote of the people. Is this area being considered for future additional development?

From Allyson Presta : what is the response from property owners in the area?

From Adriana Fourcher : I am a property owner and not in favor of this.

From David Tanner : Will existing housing laws allowing ADUs impact the City Jobs Housing Balance?

From David Tanner : Will existing housing laws allowing ADUs impact the city circulation system?

From David Tanner : Will existing housing laws allowing ADUs impact emergency services and public safety?

From Susan De Santis : What is the potential for finding 100 percent affordable housing locations for a workforce housing?

From Nancy Scarbrough : Can we focus on projects that are 100% low income or very low income with a subsidy whether in this area or another area of the city? We can't possibly comply with the state mandates if only 5% of a project is low or very low income housing. If we allow projects with only 5% low and very low income we will have to approve 40,000 (plus or minus) residential units in our city of approximately 45,000 existing residential units

From David Tanner : How many ADUs can be constructed within the City?

From Susan De Santis : How many stories is the Uptown Newport project? How is the noise added?

From Susan De Santis : How is the noise issues addressed in Uptown Newport?

From P. Matheis : I suspect that there a number of properties in the City that could help to meet this State mandate. By focusing on the Airport Area an opportunity seems to exist to answer a good deal of this challenge.

From Adriana Fourcher : Susan - noise was not addressed. Uptown is 5 stories. It is not fully occupied so there is not a lot of information on noise complaints. Plus with Covid all air traffic is unusually low. This will change when things return to "normal".

From David Tanner : Is there a penalty if the RHNA allocation is not met within the timeframe?

From Jonathan Langford : Do we anticipate the 65 dB CNEL line changing?

From Alexis Mondares : If there is a focus of affordable density housing within the airport area, is there a concern that clustering affordable housing within such a noisy area that others find unsuitable would be discriminatory?

From Adriana Fourcher : Jonathan - we have monitored noise levels at 4340 and the decibels range from 65 to 70.

From Adriana Fourcher : Alexis - Environmental Justice is not a term that fits in this discussion.

From P. Matheis : Should legal questions be answered by the people best suited to answer those questions?

From Susan De Santis : Can you discuss how the affordable units in the new Picerne project were created?

From Cesar Covarrubias : How will affordable housing will be incorporated into these focus areas. Density alone will not be create affordable housing in the focus areas. What policies are we putting in place to address AH in the focus areas?

From Nancy Scarbrough : The City just approved a project in the 65 CNEL without regard for noise. They ignored the Airport Commision recommendation.

From Adriana Fourcher : Susan - Only small # of affordable units in Picerne project. Doesn't make a dent.

From David Tanner : Housing in West Newport - What impact will the conversion of housing in west Newport and the Airport area have on Jobs?

From Nancy Scarbrough : If you displace the mobile homes, which are already low income housing, will those individuals who lose their mobile homes new housing that they can afford?

From Adriana Fourcher : Nancy - Thank you. Taxpayers don't want to bear the financial consequences if the City gets sued. The developer fees are driving this.

From David Tanner : If we convert employment areas to housing. What steps will the City take to replace lost jobs and create new jobs for the increase in population?

From Adriana Fourcher : David - Great question!

From P. Matheis : This area seems to have a limited payoff versus the Airport Area.

From Adriana Fourcher : Business owners don't want to be disregarded in the conversation.

From Adriana Fourcher : P. Matheis - there is no payoff, hopefully.

From David Tanner : What will the cumulative impact from RHNA (1.3 million units) have on jobs within Newport Beach?

From Charles Klobe : The pie charts shown in each slide do not reflect a no build answer. Participants were not offered the choice of no units. That translates to the false belief that residents agreed to some additional residential units in each area. This does not reflect actual responses. Why is the total focus of this meeting on affordable housing to our housing element?

From P. Matheis : This area is a significant industrial area, and I wonder if this is something that needs to be maintained for business needs in the City.

From Adriana Fourcher : Charles - Very good point.

From Charles Klobe : We have to TRY to plan. We do not have to succeed.

From David Tanner : What will the cumulative impact from ADUs in Southern California have on jobs within the City?

From Adriana Fourcher : 4,800 units now but what is going to be later and after that. The City of Newport Beach should combine efforts with other Cities and fight back on RHNA allocations.

From Susan De Santis : How many units have already been approved that will be counted towards the RHNA allocation?

From Sam Shams : Is the plan able to assume the conversions of existing properties, or does it require open space? So can the plan basically be that one large development becomes even bigger?

From P. Matheis : I believe it is important that the City plan for this mandate. I suspect that the idea that the City simply work to fail is something that will not succeed in 2020 and beyond.

From Alexis Mondares : Adriana - the City has already appealed its RHNA allocation. However, it is unlikely that the City's share will be reduced in a meaningful way.

From Debbie Stevens : I have concerns with siting housing closer or within industrial areas that have contamination issues, as there are such properties in this area.

From David Tanner : Staff's statement - The City has no choice but to increase density. This is not a foregone conclusion. This is Staff's conclusion. Fact - The City Council is proceeding on a 3 pronged approach. Compliance is one. There is no evidence to date that Compliance is feasible.

From Adriana Fourcher : Alexis - An appeal is the first step. The City has too much to loose to simply accept central planning from Sacramento.

From Sam Shams : Thank you for the response!

From Adriana Fourcher : It seems like we are going thru an exercise but there will not be any meaningful consensus from both residents and businesses.

From Charles Klobe : There is no stated penalty for not finding willing property owners.

From Alexis Mondares : If density housing is created in this area, I would think parking would be an extreme issue for new residents.

From Allyson Presta : in this area isn't the road & track site zoned for residential?

From Sylvia Walker : Doing away with the mobile homes, which are likely affordable housing, to put in other housing seems like a less than opportune way to meet RNHA goals, if that is what was suggested.

From Sam Shams : I am curious if dorm rooms for coastline college would be worth thinking of, I am not familiar with that college though.

From Angelica Astorga : If density housing is built they should provide a parking structure and not street parking so that residents can park.

From P. Matheis : Is senior housing something that is considered "affordable" housing?

From P. Matheis : Due to the proximity to Hoag Hospital it seems like senior housing might be something to consider if it meets the definition of affordable.

From Susan De Santis : Senior and workforce housing are both considered affordable housing.

From Adriana Fourcher : I understand the committee's role in identifying opportunity zones. That same process was used a few years ago which resulted in the business park that our business is located as being marked as an "opportunity zone for residential". Most of the building owners were not part of that discussion. We invested in a business park. We do not believe that residential should be approved in a commercial zone, simply because it gets colored "pink" on a City map.

From David Tanner : Everyone review the State Housing and Community Development ADU handbook published in September 2020 to learn the facts on the potential for ADUs: <https://www.hcd.ca.gov/policy-research/docs/adu-ta-handbook-final.pdf>

From Adriana Fourcher : Senior housing is important.

From Charles Klobe : Anyone notice that they have not answered one of Dave Tanner's questions? Why the total focus on finding sites for affordable housing only? Our housing element includes housing needs for the entire city.

From Adriana Fourcher : Housing needs for young professionals.

From P. Matheis : Staff is doing a great job here.

From Angelica Astorga : Many people are commenting on affordable housing, then that is obviously an issue especially in California.

From Cesar Covarrubias : The Hoag area creates a lot of service sector jobs. It will be appropriate to prioritize affordable housing for the workforce and families.

From Angelica Astorga : I am a college student and we need more affordable housing, discussions around that are extremely important, in all of my circles it is a huge problem.

From Adriana Fourcher : People commute and make their own choices based upon what things are important to them. Irvine has lots of apartments and housing choices that is definitely more affordable than Newport Beach.

From David Tanner : Everyone, ask Staff to share the findings of the General Plan Diagnostic Memo prepared as part of the Housing Element Update. The Memo identifies the existing deficiencies in the General Plan that must be remedied. Ask

Staff to discuss how these deficiencies will be remedied.

From Angelica Astorga : You want to push people out of Newport because they cannot find affordable housing? That is classist. What about students and young people who work in Newport?

From Sylvia Walker : Irvine has an affordable housing issue.

From Angelica Astorga : Sylvia - exactly. both cities need more options.

From P. Matheis : At Dover and West Coast Hwy is an empty lot that is not painted blue. Why?

From Adriana Fourcher : Angelica - College Students can rent rooms in people's homes, share apartments, work 2 jobs, etc. Affordable housing in Newport Beach is a different level of rent than in other Cities.

From Allyson Presta : I am an apartment complex at bayshores and pch

From Allyson Presta : would I be part of this area

From Adriana Fourcher : Angelica - I moved here from the Midwest right out of college and had to adjust to CA. It is expensive here.

From Sylvia Walker : Rents in Newport Beach are not necessarily higher than rents for apartments in Irvine.

From David Tanner : Staff updated the City Council last week on the Housing Element Update. staff warned the City Council that they might have to break the Housing Element Update into 2 stages. If Staff does this only a portion of the General Plan would be updated. Staff said the cost of the total General Plan Update would increase from \$1.5 to \$3.5 million dollars (2 EIRs and 2 General Plan amendment processes). Ask Staff to explain what they are thinking.

From Allyson Presta : not currently

From Angelica Astorga : Well I was born in California, I have lived a life of knowing how important it is to have access to affordable housing. As a student, we do all of those things and the way wages have remained stagnant in this state and housing costs only go up is challenging for new graduates.

From Allyson Presta : that site is rented long term

From David Tanner : Will the Housing Element Update go to a vote of the public per the City Charter? Staff does not want to answer this question. Why? Ask Staff to explain.

From P. Matheis : The properties on West Coast Hwy appear to be under used retail properties.

From Adriana Fourcher : Jenna, thanks for reminding us of those slides. My recollection is someone could earn somewhere above \$50 to \$60K a year and qualify for affordable housing. However, there are very few units. The Picerne project stacks the affordable units to Studio units. That might be fine for a single person but won't work for a young family.

From Allyson Presta : he rented the entire site

From Allyson Presta : russ flutters

From P. Matheis : The proximity to the water is a silent point. This speaks to the value of maximizing the development in the Airport Area for this challenge.

From P. Matheis : Should read "Salient."

From Adriana Fourcher : Mariners Mile is very expensive property. P. Matheis there is a cost to purchasing existing buildings in airport area and scraping the property and then building residential.

From David Tanner : The City's Local Coastal Plan prohibits impacts to coastal bluffs and blockage of ocean/harbor views How can the City possibly make a finding that high density residential is consistent with the Local Coastal Plan?

From Susan De Santis : Should the City provide housing for its seniors and its essential workers?

From Cesar Covarrubias : Have surplus land sites from the City and the Special Districts been identified at opportunity sites?

From Adriana Fourcher : Angelica, that explains why so many residents and businesses have moved out of state. It is not because those states provide them with subsidized housing it is because the cost of development is lower, the cost of land is lower and the government doesn't tax, tax, tax.

From David Tanner : Why is Staff been un-willing to discussing these obvious General Plan inconsistencies? These questions have been asked since day 1.

From Adriana Fourcher : If we give CA a few more months this problem might resolve by the law of natural consequences. The State if Broke. Businesses and residents might move which will make property values decrease and increase supply.

From P. Matheis : I submit that if we take this time to properly plan for this mandate we could design something that is the best it can be under the circumstances. I do not see a change in the political environment in Sacramento in the near term, and it is likely this mandate will stand.

From P. Matheis : How is an area outside the City included in this plan, i.e., item 1?

From David Tanner : Seimone - provide a date certain when these questions will be answered. Quit putting this off!

From Adriana Fourcher : Seimone - the committee has been given an impossible task. The policy recommendations unfortunately impact property owners. Again, we are in a Business Park that was colored "Pink" a few years ago based upon some committee discussion and few community input. Now the business owners are all fighting residential infill proposals.

From Technical Support : www.newporttogether.com.

From Sam Shams : This might sound crazy, but what are the chances of changing the city borders to get some of Costa Mesa?

From Adriana Fourcher : Seimone - the in-fill residential project that is being proposed in our parking lot will take around 3 years to build. That is a real negative impact to the employees and businesses. A parking lot that is common area. Think about that.

From Charles Klobe : The NMUSD property is prime for workforce housing. Susan DeSantis has previously offered this to the committee. Likely nothing will come of this until the new trustees are seated. We should work toward this as it is good for the city, good for the district and good for the NMUSD employees. I hope we pursue this in 2021.

From Adriana Fourcher : Charles - Absolutely no subsidized housing units for Public Sector employees. Do not use our tax dollars to pay for housing for government employees. Sorry.

From David Tanner : All ADUs are assumed by the State to be Affordable Housing.

From Sam Shams : Does rent-control qualify as affordable housing?

From Adriana Fourcher : Sam - good question.

From Sam Shams : I ask because affordable housing options usually don't appreciate much in value relative to market prices, and when you consider mortgage etc, it may be a better alternative for low income people to rent

From Charles Klobe : Not suggesting subsidized by the city. The idea is to take the NMUSD property and have the district build rental housing for their new employees, The offer of this could factor into their labor negotiations

From Adriana Fourcher : Who owns the NMUSD property?

From Charles Klobe : spell check. Fred: I will send you the outline via email.

From Susan De Santis : How will the city and consultants use the input that you received this evening?

From Adriana Fourcher : Charles - this is Adriana.

From Allyson Presta : are we going to cover Newport center tonight?

From David Tanner : ADUs are considered affordable by the State - period. The state requires documentation to demonstrate they are in fact affordable. ADUs can be a few hundred square feet to 1,200 sq. feet How will this not be affordable?

From Charles Klobe : NMUSD owns the property. Banning Ranch Conservancy would not oppose the project of workforce housing for NMUSD employees.

From Debbie Stevens : FYI - Newport Center will be covered tomorrow night.

From Allyson Presta : thank you

From Adriana Fourcher : Charles - no workforce housing for public service employees. That is pure socialism. The next step will be eminent domain to take private property for public sector employee housing.

From Mary Ann Soden : How long will you be looking at input through the website. I have folks not able to attend the workshops. Is there a deadline?

From Susan De Santis : Will the city be pursuing partnerships with Hoag and the school district as part of this process?

From Adriana Fourcher : Thank you Jenna.

From P. Matheis : Can a large developer build in one area and site the affordable units in another area of the City?

From Sam Shams : Thank you!

From Bruce Bartram : My thanks to Staff and everyone for an interesting and informative presentation.

From Sylvia Walker : Good job by Newport Beach staff.

From Debbie Stevens : Nice job and thanks!

From Charles Klobe : Thank You.

From Susan De Santis : Thank you!

From Adriana Fourcher : Thank you.

From Kevin Martin : Good job Newport team. Talk to you tomorrow!

From Mary Ann Soden : See you tomorrow. Thank you.

From Jonathan Langford : Appreciate the work.

From Allyson Presta : see you tomorrow. thank you

Nov 17 Housing Suitability Virtual Workshop Chat

Susan Eaton: Park Newport formerly Eastbluff

Allyson Presta: Big Canyon Resident, property owner thru newport

Charles Klobe: Anyone who participated did not have the option for no housing. So the charts are skewed to give the impression that residents wanted more housing throughout the city.

David Tanner: Hi Seimone & Jim, As a preface to public input at tonight's Housing Suitability meeting please provide the following information in Staff's introductory remarks: 1. As professional planners, please provide an overview of the long-term regional effects of State housing laws. Please assume for this discussion the literal interpretation of the laws which create the potential for development of millions of Accessory Dwelling Units (ADUs) and 1.3 million additional RHNA units (by 2029) within southern California (SCAG boundary). For example, what impacts will likely occur to the following sectors: (beneficial impact, negative impact or no impact) a. The ability of the existing transportation systems and urban infrastructure to accommodate the increased population. b. Jobs and employment opportunities (will people in inland areas continue to commute long distances to Job centers or will urban in-fill take those jobs?). c. Will there be a need for additional Jobs to meet the population increase?

e. Social and economic impacts: i. Will there be higher or lower costs to consumers? ii. Will business be attracted to or leave southern California? f. Public safety and quality of life. i. What will be the regional impact?

Based on the answers to the regional concerns in question #1, what are the potential long-term impacts to the City of Newport Beach from housing laws and RHNA? a. Will the impacts mirror the regional impacts or will Newport Beach be disproportionately impacted? (better or worse) b. What impact will this regional growth have on tourism within Newport Beach? c. What impact will this regional growth have on the city's circulation system and transportation infrastructure? d. Would you expect the increased regional population would put pressure on John Wayne Airport to expand the number of flights beyond current limitations? e. Will there be more competition for jobs in Newport Beach as a result of regional growth? f. If you believe increased population will increase the competition for jobs, can the City expect to get a higher quality workforce?

i. What impact will this have on the City of Newport Beach demographics?

ii. What sectors might benefit and what sectors might decline?

iii. What impact will this have on wages?

g. What will be the regional impact on Newport Beach's fresh water supplies?

David Tanner: Question 3 3. What are the constraints the City faces in formalizing the Housing Element Update? For Example: a. As professional planners would you recommend the City locate housing in: (yes, no, maybe) i. Disadvantaged communities ii. Areas subject flooding iii. Areas subject to wildfire iv. Areas subject to liquefaction v. Areas subject to sea level rise vi. Under the flight path of John Wayne Airport vii. Areas subject to health hazards viii. Areas subject to potentially significant earthquake hazards ix. Within or adjacent to protected biological areas x. Areas subject to high noise levels (65 CNEL or greater) xi. Hazardous waste sites xii. Areas that do not have job opportunities for new residents (areas with a significant jobs/housing imbalance)

xiii. Areas that would result in an unavoidable decline in emergency services/public health and safety.

David Tanner: Question 4 4. What are the consequences to the City if the RHNA housing allocations identified in the Housing Element Update are not met? Is there a difference in the consequences between un-met affordable and market rate units?

Answers to these 4 questions will provide the public with a clearer picture of the regional impacts facing the City. It will provide insight if the City does nothing and the rationale behind the City's plan to address these challenges.

Charles Klobe: There is no stated penalty by the state for trying and failing to find willing landowners who want to rezone

their land for high density lower income housing. The city is trying through the Housing committee but they will almost certainly fail to find landowners to rezone their property without state or federal subsidy.

Alejandra Reyes: Is Jenna breaking for anyone else or only me?

Allyson Presta: I can't hear her either

Andrew Campbell: breaking up for all

Kevin Martin: breaking up for me as well

Taylor York (Technical Support) : Apologies for the technical delays!

Allyson Presta: my site can be high rise

Mary Ann Soden: what site is that?

P. Matheis: is Fashion Island designed for additional building stock?

Sam Shams: I think we need to consider public access to the sand beaches at the dunes, I would imagine there might be some restrictions to development to allow public access.

Charles Klobe: What percentage would you propose as affordable Allyson?

Allyson Presta: i don't know i'm not a developer

Cesar Covarrubias: Is Newport Center a mixed use zone or do you need an overlay for new development

P. Matheis: I foresee significant high-rise potential in Newport Center with the correlating ADUs in the Airport Area.

P. Matheis: Is the Fashion Island property seen as something that might see a change in zoning due to changes in how people shop?

Mary Ann Soden: Another important element is the impact on traffic circulation, so these two general plan updates need to be considered at some point together.

Susan Eaton: Thank you Cesar.

Charles Klobe: No property owner has expressed any interest in developing lower income housing without City, State, or Federal subsidy. NONE! Many owners would like to rezone their property for high density market rate apartments. The City does not need to offer density bonuses beyond what the state requires for any area of Newport Beach. Residents will suffer the increased traffic and drain on resources.

David Tanner: Has the HEUC determined this site is feasible for residential development?

Alejandra Reyes: Echoing a few comments (and responding to others) and as a housing researcher and UCI faculty member, I want to highlight that there are many new state and assembly bills that do emphasize the importance of this Housing Element update: In 2017, SB-35 created consequences for failing to meet local housing targets and AB-1397 now requires cities and counties to ensure that proposed development sites have a demonstrated potential for development. Since 2019, AB-686 also pushes cities to site low-income housing in high opportunity neighborhoods and grants the California Department of Housing and Community Development increased oversight capacity. Also since 2019, SB 330 limits some jurisdictions' abilities to restrict development due to their failure to meet their RHNA goals.

David Tanner: The cost of development on this site makes this site economically infeasible.

David Tanner: Would you want your family members to live on a landfill given its environmental constraints. I see the potential for litigation.

Sam Shams: Development of the non-landfill area here on the north section seems like the most feasible development

I have seen so far in the city.

Allyson Presta: i think the garbage site would be bad for health

P. Matheis: If housing can be developed on the 30 acres then why would the City not use this opportunity given the external pressure.

Lin He: Non-landfill area makes sense as it's close to freeway etc.

David Tanner: It would make a nice site for habitat restoration/mitigation.

Nancy Scarbrough: I think the 30 available acres seems like a great place to build low and very low income homes. It is close the freeway.

P. Matheis: My sense is that the bulk of the opportunity for development of ADUs will be in the Airport Area above SR-73 given the cost limitations.

Charles Klobe: Nearly every single family home in Newport Beach is eligible to have an ADU and junior ADU.

David Tanner: High density development on the 30 acre portion of the landfill would provide a great visual window from the toll road to the high quality homes in the area.

Mary Ann Soden: To Mr. Smith's question and Mr. Barquist's comments now, the City might need to use its own land to meet the planning goals

Sam Shams: What are those two zones on the south if the landfill zone?

P. Matheis: I do not believe that the City should reduce parkland for development.

Allyson Presta: i agree

Allyson Presta: my kids use the sports park for activities

Sam Shams: sure

David Tanner: Are they fule mod zones?

Susan Eaton: Elephant in the room - what are issues to convince owners to consider any level of "Affordable" Housing -

David Tanner: Why doesn't the city satisfy the RHNA requirement with ADUs?

Debbie Stevens: The Newport Tennis Club should be considered as potentially feasible.

P. Matheis: I suspect that area 29 (fire & police station location) are potentially feas

Mary Ann Soden: Please update the maps per Larry Tucker's comments so that the folks who participate through the website will have the corrected maps. Thank you.

Jenna Tourje, Facilitator: Thanks Mary Ann - we will update the maps on the website as well

P. Matheis: I believe that the preservation of the natural resources are critical to this process. While this may result in intensification of development in other areas the City is special because of the natural resources.

Charles Klobe: Every developer may be willing to redevelop their property to market rate apartments. NO developer is willing to redevelop without Federal, State or City subsidy any more than 5% affordable. To get to 2,400 or so affordable they need to build 48,000 market rate apartments @ 5% which pencils according to the developers I have spoken to. Never going to happen although the developers are drooling to build them.

David Tanner: Staff updated the City Council a week ago and said Staff was concentrating on the Housing Element. Please clarify

P. Matheis: As I recall the City was considering moving the police facility to the city yard site at one point, and there is a Newport Beach fire station relocation study that moves the Newport Center Fire Station adjacent to the OCTA bus station.

Mary Ann Soden: How will the housing and circulation elements be harmonized given their separate committees

Brad Avery: Great resident input and effort from the CD team, many thanks! Brad

David Tanner: How can the City possible meet the Housing Element Update by October 2020.

David Tanner: Is this not piecemealing?

David Tanner: Why does the schedule not include a vote of the public per the City charter?

Sam Shams: Thank you everyone!

Debbie Stevens: Great job Jenna, Jim, Dave and Ben!

Alejandra Reyes: Thank you!

Mary Ann Soden: Thank you for this learning opportunity and input opportunity. This is very important.

Allyson Presta: Thank you so much

Susan De Santis: Thank you all. Well-done!

[UPDATE AS WE PROCEED]

**CITY OF NEWPORT BEACH
HOUSING ELEMENT UPDATE ADVISORY COMMITTEE MINUTES
CITY COUNCIL CHAMBERS – 100 CIVIC CENTER DRIVE**

**WEDNESDAY, JULY 1, 2020
REGULAR MEETING – 6 P.M.**

I. CALL MEETING TO ORDER – 6 p.m.

II. WELCOME, INTRODUCTIONS AND ROLL CALL

MEMBERS PRESENT: Chair Larry Tucker, Jeffrey Bloom, Susan DeSantis, Paul Fruchbom, Elizabeth Kiley, Geoffrey LePlastrier, Stephen Sandland, Ed Selich, Debbie Stevens, (Ex Officio Member) Mayor Will O'Neill

MEMBERS ABSENT: None

Staff Present: City Manager Grace Leung, Community Development Director Seimone Jurjis, Deputy Community Development Director Jim Campbell, Principal Planner Jaime Murillo, Senior Planner Ben Zdeba, City Traffic Engineer Tony Brine, Administrative Support Technician Amanda Lee

Chair Tucker welcomed everyone to the inaugural meeting of the Housing Element Update Advisory Committee (HEUAC). The Housing Element Update process begins with the State determining the number of housing units that agencies must plan for over the ensuing planning period.

Mayor O'Neill thanked committee members for their service to the City. The Council spent quite a bit of time in December 2019 and January 2020 thinking about how to address the Housing Element Update. Committee members were selected for specific reasons, including their background and expertise. In 2019, the Council talked to residents to ensure it understood what residents were looking for. Given the size and scope of the Housing Element, the Council will need to engage stakeholders. Finding the number of housing units will be incredibly difficult and will likely be divisive. At the beginning of the year, the Council adopted an approach to object to the State's mandate legally and politically/legislatively and to comply with the mandate. The goal for the HEUAC is to find a way for the City to comply or to explain why the City cannot comply with the mandate. Technically, the Southern California Association of Governments (SCAG) has not provided a certified number of housing units required for this planning cycle. SCAG has requested the California Department of Housing and Community Development (HCD) grant extensions for all municipalities. HCD has not responded. Indications are HCD will deny the request; however, enforcement will be extremely difficult. The City has been working with Senator John Moorlach and Assembly Member Cottie Petrie-Norris. In reference to his role on the HEUAC, Mayor O'Neill explained that he represents the Council, but he cannot speak for the Council without a majority vote on a topic. He may offer his personal opinion and present a topic or question to the Council.

III. PUBLIC COMMENTS ON NON-AGENDA ITEMS

Jim Mosher hoped any conflicts of interest would be handled transparently given committee members' expertise in real property development and HEUAC's recommendations to the Council regarding the use of real property. If people are paid to attempt to influence committee members' opinions, they are regarded as lobbyists and should register with the City.

IV. **CURRENT BUSINESS**

a. **Three-Pronged Strategy of City Council and Focus of the Committee**

Recommended Action: No action taken

Chair Tucker reported the City is working legislatively and with other agencies to better define the Regional Housing Needs Assessment (RHNA) number and credits that can be applied to the number.

Community Development Director Seimone Jurjis advised that the City has engaged with multiple State agencies. SCAG has issued a draft RHNA number of 4,832 housing units for the City. The Mayor has written letters to SCAG opposing the methodology and to HCD requesting clarification. State law requires the City to permit accessory dwelling units (ADUs), but HCD's guidelines do not provide sufficient credits for ADUs to meet RHNA numbers. Staff has drafted legislative changes, and Assembly Member Petrie-Norris has introduced legislation that defines RHNA credits and provides guidelines for substantial evidence. The City needs to build a coalition to support the bill and will appeal its RHNA numbers.

Chair Tucker indicated the City has to identify sites where residential development could occur and prepare an Inventory of Sites. The Tax Assessor's parcel number for each property must be listed on the Inventory. The certified number of RHNA units and credits will not be known for some period of time. Any political efforts to reduce housing units will likely occur late in the process.

Chair Tucker invited the public to comment.

Jim Mosher noted HEUAC's purpose and responsibilities do not include a complete focus on RHNA numbers. HEUAC is more of a forum for public input. The General Plan Update Steering Committee (GPUSC) attempted to conduct outreach and research, which could inform HEUAC's discussions. HEUAC should obtain input from the people who will be impacted by the need for housing as well as developers.

David Tanner suggested HEUAC direct the public as to how it can help HEUAC achieve its goals. He requested an update regarding staff's efforts to expedite the processing of the Housing Element amendment, specifically an exemption from the California Environmental Quality Act (CEQA), to affect the Greenlight provision or Measure S.

Mayor O'Neill noted that Still Protecting Our Newport (SPON) submitted the same request as Mr. Tanner. The City has requested State Representatives sponsor legislation to exempt or at least expedite the CEQA process for a Housing Element Update. The sole purpose of the City's request was to try to meet the timing aspects of the Housing Element Update. The representatives declined the request.

Chair Tucker advised that he raised the issue of a CEQA exemption with the GPUSC in order to emphasize that HCD's schedule would be difficult to meet and if an EIR had to be prepared then additional time would be needed to complete a Housing Element Update. With respect to Mr. Mosher's comments, the resolution directs HEUAC to make any recommendations it believes necessary. To begin the compliance process, HEUAC will need to identify sites. Greenlight will not change the Committee's work, but rather will merely add one more layer of approval, a public

vote, after the Committee, Planning Commission and City Council complete their work. Therefore, Greenlight is outside HEUAC's purview.

In response to a committee member's question, Deputy Community Development Director Jim Campbell understood a housing project that is approved but not completed before June 30, 2021 may be counted towards the City's RHNA numbers. Currently, there is no information regarding counting live-aboards towards RHNA numbers. Staff will provide HEUAC with a tally of housing units.

Committee Member DeSantis noted SCAG has joined the San Diego Association of Governments and the Sacramento Area Association of Governments to sign a letter to the Governor and HCD to push back on the schedule. The Governor or the Legislature can change the timeline for the Housing Element Update, but HCD cannot. HCD recently extended the timeline for the local assistance program by six to eight months.

b. Discuss Methods to Identify Possible Housing Opportunity Sites

Recommended Action: Discuss procedures for (i) identifying and contacting owners of potential housing opportunity sites; (ii) discuss approach to encouraging sites that could enable affordable housing in whole or in part; and (iii) prioritizing sites in case the RHNA requirements are lower than currently anticipated

Chair Tucker related that there may be underutilized or vacant parcels in the City that can be opportunity sites. Newport Center, the west Newport area, and the Airport Area will be opportunity sites. He noted that in GPUSC community workshops, participants favored placing housing in Newport Center, the Airport Area, the area near Hoag Hospital, Banning Ranch, and the former landfill in Newport Coast. HEUAC will have to review each parcel in areas that might provide opportunity sites. The standard for opportunity sites is land that is suitable and available (feasible). Determining whether a parcel is available will require some technical analysis. Determining whether a parcel is suitable will be decided by the full Committee and will require public input. HEUAC will form a subcommittee to analyze sites to see how the process will play out. Anyone with ideas for potential opportunity sites should contact staff or committee members.

Committee Member Fruchbom added that feasibility means economically feasible.

Chair Tucker noted the City is required to plan for development, not to ensure sites are developed. State law states a municipality that plans to use non-vacant land for more than 50 percent of lower-income RHNA requirements has to provide substantial evidence that there are no impediments to the use of the property in order to claim credit for the property.

In reply to Committee Member Kiley's query, Chair Tucker advised that HEUAC will review recent housing applications that were not developed. The first step is to identify sites where development is feasible. If sites are feasible, HEUAC will consider their suitability. The hot topic for the community will be which sites are suitable for housing.

In answer to Committee Member Sandland's inquiry, Chair Tucker agreed that his memorandum proposed HEUAC rank opportunity sites. He did not believe the State would reduce the RHNA numbers materially. However, if the City cannot comply with the RHNA numbers and the State does reduce the numbers, the Council can use the ranking of sites by the Committee and supporting information rather than having to start the process again.

Committee Member DeSantis believed community input on a range of scenarios will be important when HEUAC prioritizes sites. The Orange County Business Council's in-fill capacity study focused on capacity within Orange County for additional housing development. Perhaps HEUAC can invite the study author to present information about changing market trends and the study's results.

Chair Tucker invited the public to comment.

Jim Mosher remarked that the public may not be familiar with committee members, which could be a problem if committee members want to engage with the public. He hoped committee members would have open minds. The infeasibility of the former landfill site is not obvious.

Chair Tucker indicated if development of the former landfill site was feasible, someone would have developed it by now.

An unnamed resident provided an unrelated comment about the COVID-19 pandemic.

c. Formation of Affordable Housing Subcommittee and Opportunity Sites Subcommittee

Recommended Action: Form an affordable housing subcommittee and a housing opportunity sites subcommittee to divide up workload

Chair Tucker reviewed the City's RHNA numbers by income level and stated he thought that three committee members had expertise in development of affordable housing. It was his hope that an affordable housing subcommittee would be able to educate HEUAC regarding choices.

Mayor O'Neill advised that Committee Members Bloom and Fruchbom have experience with affordable housing.

Chair Tucker proposed Committee Members Selich and Sandland form a housing opportunity sites subcommittee, which will analyze sites for feasibility. HEUAC will form a subcommittee for outreach in the future.

Jim Mosher asked if the affordable housing subcommittee will propose revisions to the goals and policies of the Housing Element and engage people living in or seeking affordable housing. Chair Tucker reported the purpose of the subcommittee is to assist HEUAC in understanding the financing and tax aspects of affordable housing and how the City can seek as many new affordable units as possible while still complying with RHNA. The subcommittee will not review the existing Housing Element regarding affordable housing from the vantage point of people living in or seeking affordable housing.

Mayor O'Neill suggested the City not only needs to zone for affordable housing, but has to think it will actually happen. The question of whether the required number of affordable housing units can be constructed given the cost of land is legitimate. The Council needs to know if it is possible. If it is not possible, the Council needs to know the amounts of a subsidy and incentives that could achieve more affordable housing. The Council will need a primer on affordable housing and an explanation of what is needed to achieve affordable housing.

In response to Committee Member DeSantis' question, Chair Tucker stated programs that involve larger employers in the City to incentivize affordable housing is outside HEUAC's purview, although

he noted that is something that Committee Member DeSantis might want to discuss directly with the City Council.

Chair Tucker invited the public to comment. Seeing no one wishing to comment, he moved, seconded by Committee Member Selich, to appoint Committee Members Bloom and Fruchbom and Chair Tucker to the affordable housing subcommittee and Committee Members Selich and Sandland and Chair Tucker to the housing opportunity sites subcommittee.

AYE: Tucker, Bloom, DeSantis, Fruchbom, Kiley, LePlastrier, Sandland, Selich, Stevens

NO: None

ABSTAIN: None

ABSENT: None

d. Discuss Agenda Items for Next Meeting

Recommended Action: No action taken

Chair Tucker requested agenda items for a CEQA project description, a definition of substantial evidence, and an outreach process.

In reply to Committee Member Selich's query, Principal Planner Jaime Murillo advised that the proposed recommendations for substantial evidence were taken from the initial legislative amendments.

Chair Tucker invited the public to comment.

Charles Klobe suggested committee members may be confronted by folks who need a planning incentive to make affordable housing work. Residents may be resigned to the RHNA number, but they may not accept the City granting a subsidy or incentive that the resident has to pay for. HEUAC may not find enough sites to comply with the requirements, but the State will be hard pressed to impose fines for not trying.

V. COMMITTEE ANNOUNCEMENTS OR MATTERS WHICH MEMBERS WOULD LIKE PLACED ON A FUTURE AGENDA FOR DISCUSSION, ACTION OR REPORT (NON-DISCUSSION ITEM)

Committee Member DeSantis requested the author of the in-fill capacity study address HEUAC regarding development trends and data from the study relevant to Newport Beach.

Committee Member Sandland requested staff advise HEUAC regarding the consultant's work and how the consultant's work will affect HEUAC's work.

In answer to Committee Member Bloom's question, Chair Tucker indicated HEUAC will receive information about housing units entitled or permitted before June 30, 2021.

Community Development Director Jurjis recommended a presentation from the consultant regarding HCD's guidelines and information HCD is seeking.

VI. ADJOURNMENT – 7:36 p.m.

Next Meeting: July 15, 2020, 6 p.m. in the City Council Chambers.

**CITY OF NEWPORT BEACH
HOUSING ELEMENT UPDATE ADVISORY COMMITTEE MINUTES
CITY COUNCIL CHAMBERS – 100 CIVIC CENTER DRIVE**

**WEDNESDAY, JULY 15, 2020
REGULAR MEETING – 6 P.M.**

I. CALL MEETING TO ORDER – 6 p.m.

II. WELCOME AND ROLL CALL

MEMBERS PRESENT: Chair Larry Tucker, Jeffrey Bloom, Susan DeSantis, Paul Fruchbom, Elizabeth Kiley, Geoffrey LePlastrier, Stephen Sandland, Ed Selich, Debbie Stevens

MEMBERS ABSENT: (Ex Officio Member) Will O'Neill – arrived at 6:31 p.m.

Staff Present: Community Development Director Seimone Jurjis, Deputy Community Development Director Jim Campbell, Principal Planner Jaime Murillo, Senior Planner Ben Zdeba, City Traffic Engineer Tony Brine, Administrative Support Specialist Clarivel Rodriguez

III. PUBLIC COMMENTS ON NON-AGENDA ITEMS

Deborah Allen, Harbor View Hills Community Association President, questioned the rationale of holding a public meeting on such an important topic in light of the coronavirus and suggested the City fight the State regarding the timing of the Housing Element Update.

Jim Mosher asked if the City would defend voters' disapproval of the Housing Element Update in a court because a provision of AB 1063 authorizes a court to order the Housing Element Update approved if the City submits it timely but final approval is delayed due to a local requirement for voter approval.

Philip Bettencourt believed consultants Kimley-Horn and LSA would serve the City well and appreciated the substantial materials provided to the public.

Dorothy Kraus hoped members of the Housing Element Update Advisory Committee (Committee) would introduce themselves and noted the foremost objective of the Committee is to serve as a public forum as stated in the Council resolution forming the Committee.

David Tanner inquired about the City's strategy to successfully update the Housing Element and public involvement in the process.

Chair Tucker advised that Committee members would introduce themselves later in the meeting. The Committee will serve as a forum for public comments. The Council needs a draft Housing Element Update to consider and possibly adopt if it chooses to comply with the California Department of Housing and Community Development's (HCD) requirements. With respect to AB 1063, if thresholds are met and a Measure S vote is required, there will be a further approval process for Council actions. Measure S means the electorate can decide whether to proceed.

IV. **CONSENT CALENDAR**

a. **Minutes of July 1, 2020**

Recommended Action: Approve and file

Chair Tucker noted his and Mr. Mosher's revisions.

Chair Tucker moved, seconded by Committee Member Selich, to approve the minutes of the July 1, 2020 meeting as amended by himself and Mr. Mosher.

AYE: Tucker, Bloom, DeSantis, Fruchbom, Kiley, LePlastrier, Sandland, Selich, Stevens
NO: None
ABSTAIN: None
ABSENT: None

V. **CURRENT BUSINESS**

a. **Overview of Project Schedule**

Recommended Action: No action; receive presentation from Kimley-Horn on the tentative project schedule and discuss as necessary.

David Barquist, Kimley-Horn & Associates, reported the State of California has imposed deadlines on all Metropolitan Planning Organizations (MPO), and the Southern California Association of Governments (SCAG), the MPO for Newport Beach, has imposed deadlines on all jurisdictions within its region. The Housing Element planning period extends from October 15, 2021 to October 15, 2029, and the Housing Element due date is October 15, 2021. The October 15, 2021 due date may be delayed for up to six months. Legislative action is required to extend the due date. The State provides the Regional Housing Needs Assessment (RHNA) allocations. The RHNA process includes development of allocations, an appeal period, and final adoption of the allocations at SCAG. Because of a number of issues, the State postponed the appeal period for up to 120 days, and the final allocations may not be approved until the end of 2020. In order to update the Housing Element, the City is assuming the draft allocation will be its final allocation. The baseline analysis, which will extend through October 2020, includes a demographic housing profile, a constraints and resources analysis, analysis of fair housing issues, and a review of the performance of the prior Housing Element. Drafting of the Housing Element will extend through February 2021. The public review period will extend from March through July 2021. A draft Housing Element will be submitted to HCD for compliance review in June 2021. HCD has 60 days to review the draft Housing Element. During that review, HCD staff and City staff can and will communicate regarding issues. Staff anticipates public hearings will be held in September or early October 2021 in order to comply with the adoption deadline.

Committee Member Sandland requested the fiscal analysis, Task 7.3, begin prior to February 2021.

In response to Chair Tucker's questions, Mr. Barquist advised that the market analysis will be conducted by Keyser Marston Associates. The analysis will look at the implications of growth as it relates to the fiscal model prepared by a prior City consultant. It will determine the cost dynamic for such things as future opportunities for growth, affordability levels, and the rental market versus the owner market. Task 2.2, development of housing plan, is the policy component of the Housing Element, and work on it will occur along with Task 2.4, draft Housing Element. A draft Housing Element could be ready for presentation by November 2020, but work and analyses may be

presented to the Committee prior to November. The project description is scheduled for an extended time period because there could be some issues with sites and decisions may affect the project description. Before the Environmental Impact Report (EIR) process begins in earnest, the project description should be accurate. The scoping meeting is typically held just after the notice of preparation is issued, but it can be held earlier or later in the process. The scoping meeting will define the bounds of the project for the public. The Initial Study, notice of preparation, and public process to begin the EIR is meant to focus on specific environmental issues.

In reply to Committee Member Selich's inquiries, Mr. Barquist indicated the EIR public review period is generally the final two months of the process. The public review period will be determined by the hearing dates before the Planning Commission and City Council. The public review period could occur between June and September 2021.

In answer to Committee Member DeSantis' query, Mr. Barquist related that the length of a Housing Element Update process depends on the jurisdiction and outreach and collaboration opportunities. The average process extends for 12-16 months. The COVID situation, the nature of outreach, and potential legislative changes will influence the length of the process. The proposed schedule is feasible.

In response to Committee Member Sandland's question, Mr. Barquist stated funding and financing opportunities for affordable housing are part of the requisite analysis for the Housing Element. The analysis will consider existing local programs and regional, state, federal and private programs for affordable housing. A summary of the programs will be provided to the Committee.

In reply to Committee Member DeSantis' inquiries, Mr. Barquist noted the area subject to the VMT analysis will be determined in the next few weeks and will be shared with the Committee. October or November may be too early to have information from VMT analyses.

In answer to Committee Member Stevens' query, Mr. Barquist advised that a baseline assessment is part of the Housing Element policy. Committee Member Stevens suggested including the baseline environmental study as a separate task. The scoping meeting should be held during the public comment period for the Initial Study and notice of preparation.

Jim Mosher agreed that the scoping meeting seems to be scheduled late in the process. He inquired about the City's position regarding the SoCal Connect Plan. He wanted to know what the public review draft, Item 2.6, would be and how long the review period would be.

David Tanner stated under normal times, the Housing Element Update process would extend over two years. The schedule is unrealistic. If it is realistic, there will not be any public participation. The schedule shows very little public involvement. He requested inclusion of Measure S in the schedule because Measure S will be required. He asked why the City is pursuing legislation that will exempt Measure S from a vote.

Chair Tucker assumed the consultant prepared the schedule based on the due date. The process will include public input. The Committee's task is to complete a draft Housing Element. Measure S is not within the Committee's purview.

b. Lessons Learned from Prior Outreach and Discussion of Future Outreach

Recommended Action: No action; receive presentation from staff on previous outreach efforts under the now dissolved General Plan Update Steering Committee and discuss future outreach efforts.

Senior Planner Ben Zdeba reported a major product of the General Plan Update Steering Committee was branding for the overall General Plan Update effort. Public engagement disclosed that the Land Use and Housing Elements were two of the most important elements for the community. A public workshop was held in each Council district on different days. More than 600 people were engaged in person and online during those workshops. One lesson learned from the prior outreach is engaging the public on such a complicated matter is not easy. The prior process developed a list of shared community values. Early in the process, outreach focused on community values and a vision statement. Approximately 400 people attended a kickoff event. The first workshop garnered the highest attendance with 68 people, and a workshop in December garnered the lowest attendance with 8 people. Workshops included an exercise for participants to map locations for housing. A large amount of housing was placed in the Airport Area, Banning Ranch, the Hoag area, Newport Coast, and Fashion Island/Newport Center. Some housing was scattered around the City and placed in boats off the coast.

Chair Tucker advised that he attended five of the seven workshops and found the usual community members at the workshops. An Outreach Subcommittee will be appointed, but engaging the community is difficult.

Mildred Perez, Kennedy Commission, suggested the City engage community organizations early in the process to discuss meeting the housing needs of low-income people and to engage low-income communities. The Kennedy Commission would like to assist with public outreach.

David Tanner remarked that the questions asked at the workshops reflected the consultant's view and not the public's view. He requested a discussion of the numerous impacts to the General Plan from housing laws.

Dorothy Kraus suggested advertising begin now for the Housing Element Update, perhaps through a banner on the City's homepage and announcements on social media platforms.

Committee Member Stevens noted the pandemic, the closure of City Hall, and misconceptions are impediments to outreach.

Committee Member DeSantis believed outreach would probably not be in person; therefore, different strategies and technologies will be needed.

c. Overview of Current Housing Opportunity Sites, HCD Guidebook for Site Selection Criteria and Substantial Evidence

Recommended Action: No action; receive presentation from Kimley-Horn and staff regarding current housing opportunity sites inventory of the Housing Element as well as the current site selection criteria pertaining to the update. The discussion should also touch on what "substantial evidence" means.

Nick Chen, Kimley-Horn, reported sites are suitable for residential development if zoned appropriately and available for residential use during the planning period. Approximately half of the City's RHNA allocation is designated for very-low-income and low-income housing. HCD's

memorandum is generally oriented toward meeting the lower-income need. The analysis of sites begins with units entitled after the start of the projection period, June 30, 2021, which can be counted towards the RHNA allocation. Next are the most available or the easiest to develop sites, also known as vacant sites, but vacant sites are not a readily available resource in Newport Beach. Next in the analysis are non-vacant or underutilized sites, which are sites currently zoned for residential or other uses that are deemed, based on substantial evidence, re-developable for affordable housing within the planning period. New guidance states if 50 percent or more of the allocation is fulfilled with non-vacant or underutilized sites, there is an impediment to housing development and further evidence must be provided, evidence such as past performance in developing these types of sites or market analysis. The City is not responsible for development of sites, but for providing an environment for development of sites. Creative measures or alternative methods, such as accessory dwelling units, can be used to fulfill the allocation. HCD's memorandum provides methods for anticipating the number of accessory dwelling units that can be counted toward the allocation. Boats as housing units may be an alternative method. Development has to result in no net housing loss, and any loss of units has to be accounted for in the Housing Element and sites analyses. Fair housing and the equitable distribution of housing has to be addressed and analyzed. The HCD memorandum defines substantial evidence as facts, reasonable assumptions or expert opinion that can be supported by facts.

In reply to Committee Member Fruchbom's query, Mr. Chen advised that if the analysis shows that fulfilling a requirement is infeasible, staff would have to discuss with HCD next steps and an approach for addressing the situation.

Chair Tucker commented that locating affordable units on the coast will result in fewer units than locating them near Hoag or the airport. Equitable distribution will be a challenge. Mr. Chen explained that equitable distribution ensures units are not concentrated in lower resource areas. All census tracts in Newport Beach are likely high resource areas. Chair Tucker noted the Airport Area is zoned for a different school district. HCD suggests a jurisdiction vary its development standards if it cannot generate sufficient affordable units. At some point, increased density becomes counterproductive. Landowners' decisions to redevelop their properties will be driven by economics.

In response to Committee Member LePlastrier's inquiry, Principal Planner Jaime Murillo explained staff's development of the sites inventory prepared for the 2006 General Plan Update. Staff included justification for the sites being legitimate opportunity sites. The Airport Area provided the greatest opportunity for housing, followed by Newport Center, Mariners Mile, and a few smaller sites. More analysis is needed to determine sites that can accommodate lower-income units. State law provides that if a site can accommodate at least 30 dwelling units per acre, it is presumed the site can accommodate lower-income housing. The Airport Area is the only area in the City with that minimum density. The Airport Area requires a minimum 10-acre site, and the City implemented a housing overlay exempting a development with at least 30 percent affordable units from the site requirement. Lower-income housing sites are concentrated in the Airport Area, but it is a high resource area. Unfortunately, development projects have reduced the number of lower-income units that can be developed in the Airport Area.

Committee Member Kiley remarked that because of the proximity to employment and transportation, the Airport Area is the logical location for affordable housing. In answer to her query, Principal Planner Murillo related that staff is looking at the possibility of accessory dwelling units (ADU) qualifying as affordable units. The potential for development of ADUs in the City is great. SCAG is developing pre-approved methodologies to count ADUs regionally. At the time of

permitting, property owners complete a questionnaire indicating the rent for an ADU, and in some cases the ADUs can be counted as low-income housing units.

In answer to Committee Member Fruchbom's question, Principal Planner Murillo explained that in the Airport Area the minimum density is 30 units per acre and the maximum is 50 units per acre. Staff used 30 units per acre and parcel size to develop the realistic capacity for the Airport Area. The actual capacity of the Airport Area is closer to 4,000 units. Staff did not consider 60 or 80 units per acre because the General Plan does not allow such high densities.

Chair Tucker recalled the Mayor's letters to legislators regarding credit for ADUs. Public opinion seems to be split as to whether ADUs will be developed.

In response to Committee Member DeSantis' inquiries, Principal Planner Murillo believed the Committee will explore the potential for redeveloping existing land uses as housing. Changes in retail business models and the pandemic may provide justification for redevelopment of sites as housing.

Chair Tucker indicated surface parking lots are being redeveloped for other uses. The Sites Subcommittee is exploring all possibilities and hopes to find sites on the perimeter of town.

In reply to Committee Member Sandland's inquiry, Principal Planner Murillo reported the Newport Crossings project with 350 units and Uptown Newport project with approximately 600 units have been entitled, but they have not been submitted for plan check. As such, it is likely they will be counted towards the City's RHNA allocation for the upcoming cycle. Unfortunately, the units that can be counted will be moderate or above-moderate-income units because the lower-income components have been completed. Staff will prepare a list of projects and units for the next meeting.

Jim Mosher commented that the vast majority of opportunity sites identified in 2013 have not been redeveloped during the current planning period, but some of the areas that have been redeveloped with housing were not identified as housing opportunity sites. The Committee may want to know the number of ADUs to which the safe harbor provisions of the HCD memo refer. Locating housing on the County's portion of Banning Ranch may not be a good idea because of the requirements to annex the property and to assume the County's RHNA allocation for the site.

Deborah Allen indicated the community strongly supports locating 4,800 units on the periphery of the City.

David Tanner requested clarification of the viability under the new regulations of opportunity areas previously shown on the General Plan and not developed. Current laws allow each residential property owner within the City to construct an ADU on his property. More than 40,000 ADUs could be built within the City.

Dorothy Kraus inquired about preparation of a baseline number of units that have been built and the remaining capacity and about the Coastal Commission's review of opportunity sites in the Coastal Zone and the impact of the Coastal Commission's review on the October 2021 deadline.

Chair Tucker advised that opportunity sites within the Coastal Zone are not under consideration presently.

Deputy Community Development Director Jim Campbell explained that the City has a robust GIS database of density. Much of the under-built density is located on R-2 properties. Staff has not created any summaries but has created maps, which have been provided to the consultant for evaluation of the current baseline. Staff will work with HCD to develop projections for ADUs and work with the community to increase development of ADUs. Redeveloping single-family homes on R-2 lots as duplexes may be an untapped resource for housing units, but it could be difficult to justify to HCD because staff would have to assess the amount of redevelopment over the next eight years based on a nonexistent program.

In response to Committee Member Kiley's inquiry, Deputy Community Development Director Campbell related that staff would like to count existing, unpermitted ADUs. However, HCD might take the position that existing ADUs are not a net increase in housing. The City may need to develop policies and programs to promote permitting of existing unpermitted ADUs and redevelopment on R-2 parcels so that HCD will accept the housing units.

d. CEQA Project Description

Recommended Action: No action; receive presentation from staff on the project description as it pertains to compliance with the California Environmental Quality Act (CEQA) and discuss as necessary.

Deputy Community Development Director Campbell reported the environmental review will be programmatic. The CEQA analysis will be based on discrete geographies and specific densities, which are the fundamental components of a project description. This approach to a programmatic environmental review will likely result in an EIR that reflects more impacts than what will be approved. There will not be an opportunity to change the project description to match the final inventory.

In reply to Chair Tucker's questions, Deputy Community Development Director Campbell explained sites may be removed from the inventory if they are not feasible or do not meet legal definitions, but sites cannot be added to the inventory. The project scope may be larger than the final sites inventory. Amendments to the Circulation Element may require environmental review and analysis. Policies added to the Housing Element and Land Use Element may need to be evaluated. The project description has to be broader than potential sites. Many components will need to be analyzed before preparation of the EIR begins. The sites inventory will be specific while areas of interest can be fairly broad. Sites will be considered in parallel to preparation of the EIR. Staff and the consultants will prepare a project description and present it to the Committee for review and action. Meanwhile, the Committee will be reviewing potential sites. A Statement of Overriding Considerations is a possibility even if the RHNA allocation is fulfilled. While Level of Service has been replaced with Vehicle Miles Traveled, a Level of Service analysis will be needed to properly plan for intersections and to ensure housing fits as best it can within projections.

In answer to Committee Member DeSantis' inquiry, Deputy Community Development Director Campbell indicated staff will attend SCAG's workshop regarding a new tool for the site inventory.

In response to Committee Member Fruchbom's query, Deputy Community Development Director Campbell related that there has been talk about exempting the Housing Element Update from CEQA requirements so that jurisdictions can complete it on time. Staff will proceed under the assumption that the Housing Element Update is not exempt from CEQA requirements.

David Tanner stated the project description should not be developed by staff or consultants. The City's Traffic Phasing Ordinance will require a Level of Service analysis. There will be massive gridlock if ADUs are developed and RHNA numbers are met.

e. Subcommittee Progress Reports

Recommended Action: Receive verbal progress reports from both subcommittees and discuss as necessary.

Chair Tucker advised that the Affordable Housing Subcommittee discussed funding, financing, tax credits, subsidies, and rent restrictions for affordable housing. The challenge will be creating incentives that allow the construction of as much affordable housing as possible. At this time, achieving the RHNA allocations for affordable housing does not appear realistic.

Committee Member Fruchbom introduced himself as an affordable housing developer. The cost of providing an affordable unit in Newport Beach is higher than in many other cities, but state and federal regulations for affordable housing rents do not consider that fact. Tax credits generally do not provide sufficient income to construct the required number of affordable units. Because rents are high in Newport Beach, increasing the density to some economic limit creates more value for projects in Newport Beach than in an area with lower rents. Hopefully, the developer's profit from high-rent units will be sufficient to subsidize the affordable rents.

Committee Member Jeffrey Bloom introduced himself as the head of commercial lending for a regional bank. In addition, he oversees the bank's investment in low-income housing tax credits. Finding tax credit investments in higher-income areas is extremely difficult. Incentives are needed for developers to construct projects in high-income areas and allocate funds saved from that project to projects in less-costly areas.

Chair Tucker indicated the Sites Subcommittee began analyzing parcels in a portion of the Airport Area for potential opportunities. There are many large parking lots in the area; however, office buildings have the rights to park in those lots. The subcommittee will probably draft letters to the property owners. The Airport Area is limited to 550 infill units, but that number will probably change.

Committee Member Selich introduced himself as a housing developer and a former member of the Newport Beach City Council, Planning Commission, Affordable Housing Task Force, and Local Coastal Program Implementation Committee.

Committee Member Sandland introduced himself as a licensed architect and retired real estate developer, primarily in infill and reuse projects. He has served on the City Hall Design Committee and the Building and Fire Board of Appeals. The Sites Subcommittee also discussed buildings that could be repurposed or demolished for a higher and better use and wrap and podium projects. For all of these projects, the property owner has to be willing to redevelop his property.

Committee Member LePlastrier introduced himself as a business adviser and a member of the Board for Olson Urban Housing.

Committee Member Kiley introduced herself as a commercial real estate appraiser.

Committee Member DeSantis introduced herself as a consultant for stakeholder engagement and advised that she has worked with the California Association of Realtors, as the Director of the State Department of Housing, and with an urban planning firm.

Committee Member Stevens introduced herself as an environmental consultant primarily for CEQA documents and as President of the Corona del Mar Residents Association.

Chair Tucker introduced himself as a former attorney for residential, retail and industrial real estate developers, an investor in commercial properties, and a former licensed real estate broker. He has also served on the Planning Commission, City Hall Design Committee, and Finance Committee.

Jim Mosher appreciated the introductions and the detailed subcommittee reports and hoped future agendas would include subcommittee reports.

f. New Subcommittee Appointments

Recommended Action: Appoint an additional opportunity sites subcommittee and appointment an outreach subcommittee.

Chair Tucker appointed Committee Members LePlastrier, Selich and Kiley to the Opportunity Sites Subcommittee for West Newport/Mesa and Committee Members DeSantis and Stevens to the Outreach Subcommittee.

Chair Tucker moved, seconded by Committee Member Selich, to confirm the appointments to the Opportunity Sites Subcommittee and the Outreach Subcommittee.

| | |
|----------|--|
| AYE: | Tucker, Bloom, DeSantis, Fruchbom, Kiley, LePlastrier, Sandland, Selich, Stevens |
| NO: | None |
| ABSTAIN: | None |
| ABSENT: | None |

VI. COMMITTEE ANNOUNCEMENTS OR MATTERS WHICH MEMBERS WOULD LIKE PLACED ON A FUTURE AGENDA FOR DISCUSSION, ACTION OR REPORT (NON-DISCUSSION ITEM)

Chair Tucker did not believe a presentation of the 2018 Orange County Business Council study would be useful even though it is an interesting study. The study could be good support for a draft Housing Element Update.

VII. ADJOURNMENT – 8:41 p.m.

Next Meeting: August 19, 2020, 6 p.m. in the City Council Chambers.

**CITY OF NEWPORT BEACH
HOUSING ELEMENT UPDATE ADVISORY COMMITTEE MINUTES
CITY COUNCIL CHAMBERS – 100 CIVIC CENTER DRIVE**

**WEDNESDAY, SEPTEMBER 2, 2020
REGULAR MEETING – 6 P.M.**

I. CALL MEETING TO ORDER – 6 p.m.

II. WELCOME AND ROLL CALL

MEMBERS PRESENT: Chair Larry Tucker, Jeffrey Bloom, Susan DeSantis, Elizabeth Kiley, Geoffrey LePlastrier (remote), Stephen Sandland, Ed Selich, Debbie Stevens, (Ex Officio Member) Will O'Neill (arrived at 6:10)

MEMBERS ABSENT: Paul Fruchbom

Staff Present: Community Development Director Seimone Jurjis, Deputy Community Development Director Jim Campbell, Principal Planner Jaime Murillo, Senior Planner Ben Zdeba, City Traffic Engineer Tony Brine, Administrative Technician Amanda Lee

III. PUBLIC COMMENTS ON NON-AGENDA ITEMS

David Tanner inquired regarding the City's strategy for updating the Housing Element; the rationale for spending more than \$2 million to update the Housing Element; a Greenlight election; and the City's involvement in AB 1063. He offered to explain an alternative strategy that would save the City time and money.

Jim Mosher noted there have not been agenda items to discuss the frequency of the Housing Element Update Advisory Committee (HEUAC) meetings or the consultant's work on the Environmental Impact Report (EIR). The Circulation Element Update has been delegated to the Planning Commission when the City Council charged the HEUAC with updating the Circulation Element.

Nancy Scarbrough asked if the City has applied for any planning grants offered by the California Department of Housing and Community Development (HCD).

Senior Planner Ben Zdeba reported the City has been awarded grants under the SB 2 planning grant program and the Local Early Assistance Planning (LEAP) grant program. The grant funds have been used to update the City's land management software.

Chair Tucker suggested the City Council is the appropriate body to consider Mr. Tanner's alternative strategy. The City Council has indicated a Greenlight vote will be held if the Housing Element Update triggers one. Chair Tucker believed a vote would be necessary. AB 1063 failed to receive the support necessary for advancing through the Legislature. The HEUAC will meet as needed and when necessary information is available. The HEUAC will receive updates regarding the environmental document. The decision has been made to delegate the Circulation Element Update to the Planning Commission.

Mayor O'Neill advised that the need for a Greenlight vote will not be known until the end of the update process.

IV. CONSENT CALENDAR

a. Review Minutes of the July 15, 2020 Meeting

Recommended Action: Approve and file the minutes of July 15, 2020

At Committee Member Sandland's request, Principal Planner Jaime Murillo clarified that the Newport Crossings project has been entitled, but it has not been submitted for plan check. Staff anticipates the project's housing units can be counted towards the City's Regional Housing Needs Assessment (RHNA) allocation for the upcoming cycle.

Committee Member Sandland requested the minutes reflect Mr. Murillo's clarification of comments in the fifth paragraph on page 6 and reflect Building and Fire Board of Appeals rather than Building and Life Safety Board of Appeals on page 8.

David Tanner asked the City to create a folder to store all public comments rather than including public comments in each agenda item.

Chair Tucker requested the incorporation of Mr. Mosher's correction of typographical errors and proper names.

Committee Member Sandland moved, seconded by Committee Member Selich, to approve the minutes of the July 15, 2020 meeting as amended.

AYE: Tucker, Bloom, DeSantis, Kiley, LePlastrier, Sandland, Selich, Stevens
NO: None
ABSTAIN: None
ABSENT: Fruchbom

V. CURRENT BUSINESS

a. Community Outreach Plan

Recommended Action: Review and discuss the draft outreach plan. Provide direction to staff on how to proceed.

David Barquist, Kimley-Horn & Associates, reported the purpose of the plan is to ensure community engagement is sustained throughout the planning process. The overall goal is to provide a transparent process that provides sufficient and varied opportunities for public participation. The plan can be adapted to respond to the COVID situation. The process chart depicts the planning phases and outreach activities for each phase. He summarized the use of Bang the Table, the online platform, and workshops; the HEUAC's and City Council's involvement; and opportunities for feedback regarding the EIR.

Committee Member DeSantis appreciated staff and the consultant incorporating the outreach subcommittee's comments in the plan. In response to her questions, Mr. Barquist recommended a four-week lead time to promote the initial workshop in October. Staff and consultants are working on the details of the workshop. A specific date in October has not been announced. Consultants will suggest technologies they feel are best for tasks. Bang the Table can be used for polling,

analysis, mapping, and many other activities and will be the base technology. Workshops will be recorded and available for the public to review and provide feedback.

In reply to Committee Member Stevens' inquiry, Senior Planner Zdeba advised that the website has been updated and is live. A member of the public has commented on the removal of the prior planning effort, and staff is working on returning it to the website. The website will be updated throughout the process.

In answer to Committee Member Sandland's queries, Mr. Barquist indicated the overall schedule and associated action items are being updated and will be provided to the HEUAC at or before its next meeting.

Chair Tucker remarked that the HEUAC needs to review and understand information about housing sites before it can provide direction regarding outreach. The HEUAC needs the information in order to obtain specific input from the public.

Deborah Allen, Harbor View Hills Community Association President, agreed with Chair Tucker's comments. The sites will be the issue for public comment. Notices of meetings and workshops should be provided to community associations and homeowners associations for distribution to the members.

Jim Mosher inquired regarding the anticipated deliverables from the workshops and the purpose of outreach. For outreach to be effective, the topic for public comment should be specific, and the input should have a meaningful effect on the outcome of the process. The HEUAC should consider better branding for the update effort. The number of community members who have used the outreach tools is probably small, and community familiarity with the tools is not sufficient reason to continue using the tools. Stakeholders should include potential future residents with low incomes.

David Tanner suggested the workshops be dialogs with the community such that the community helps draft the document. The schedule should be revised to accommodate a Greenlight election and Coastal Commission approval. None of the documentation refers to updating the Safety Element. Voters want to know the assumptions being used in modeling.

Nancy Scarbrough expressed concern about the timing of the outreach program. The content of workshops should be reviewed in advance to ensure the workshops will be productive and effective. Community input needs to be more than responses to questions.

Chair Tucker believed sites would drive discussions and community input. Hopefully, the outreach program will be designed to elicit input about sites. Stakeholders are residents, businesses, and owners of commercial properties where housing sites may be located.

Committee Member Stevens suggested a review of the housing sites subcommittee's work would help the public understand the complexities of selecting sites.

Committee Member DeSantis understood the community wants to know the location of housing sites and the effect of development at those sites on the look of the community. This will add another layer to the complexity of identifying sites.

Chair Tucker expected the look of potential developments to be a factor in decisions. In all likelihood, only a small number of sites could accommodate an all affordable housing project. The

majority of affordable units would likely be components of large, above-moderate-income development projects.

b. Subcommittee Progress Reports

Recommended Action: Receive verbal progress reports from all subcommittees and discuss as necessary.

Chair Tucker reported the sites subcommittee has reviewed sites in the Airport Area to determine possible sites for housing. He reviewed each of the sites and pros and cons for redeveloping the sites.

Committee Member Selich advised that limited housing opportunities are available in West Newport areas zoned for residential, medical office, and public facility uses. Housing may be possible in areas zoned for industrial/commercial uses and in areas containing mobile home lots.

Chair Tucker explained that a zoning overlay retains the current use and adds a new use. An overlay may be important for the east side of MacArthur Boulevard. Tenants of affordable housing pay rent, but the rent amount is based upon income. Incentives will be needed for the development of affordable housing.

Committee Member Kiley related that rezoning a one or two-story commercial building to residential could increase the utilization of the site, which may be preferable to the property owner. The cost of demolishing a commercial building from the 1970s and replacing it with housing could be less than remodeling the commercial building.

Jim Mosher believed the State allows housing with adequate sound attenuation in 65 dB areas. However, Noise Element Policy N 3.2 prohibits new residential development in 65 dB areas. A General Plan amendment has been noticed for the September 8 City Council meeting. The amendment would extend the existing overlay for housing into an area where housing is not allowed. He requested clarification of Committee Member Bloom's concept of incentives for development of projects in high-income areas.

Chair Tucker indicated developers could pay a fee for projects in high-income areas, and the fees would be used for affordable housing projects in areas with lower land costs.

In answer to Committee Member DeSantis' questions, Chair Tucker stated the HEUAC does not advise the Council regarding planning applications. If the Council approves the General Plan amendment, the HEUAC will have less to consider. The units have been incorporated into the roadmap.

c. Housing Element Sites Strategy

Recommended Action: Receive an overview of current projects in the development pipeline that can count towards the RHNA allocation and discuss strategies to identify housing opportunities.

Senior Planner Zdeba reported the City's draft RHNA allocation will be increased to 4,834 units. The roadmap is simplistic and does not include income designations. Entitled and unbuilt projects may be under construction but have not received a certificate of occupancy and will provide 1,136 units. Projects under review have not been entitled and could provide 878 units.

In reply to Chair Tucker's questions, Senior Planner Zdeba indicated the unit count for the Uptown Newport project pertains to Phase 2. Phase 2 will begin when TowerJazz's lease expires. Principal Planner Murillo explained that the Newport Crossings project was approved under the Newport Place affordable housing overlay. The overlay allows housing development up to 50 dwelling units per acre subject to design review only. To qualify for housing under the overlay, the developer has to commit to providing a minimum of 30 percent of units at the low-income level. The developer has received a density bonus in exchange for low-income housing. This is the first application to utilize the overlay. Plans have not been submitted for plan check. The Airport Area has a maximum development limit of 2,200 units, but most of those units have to be developed through the conversion of commercial floor area. Five hundred fifty infill units are also allowed. The Residences at 4400 Von Karman project is utilizing 260 of those infill units. The developer received a density bonus for providing very-low-income units. The Newport Village project complies with minimum commercial standards and maximum residential standards and is currently under review. The project does not seek more intensity than is allowed.

Committee Member Kiley suggested the RHNA allocation and business closures caused by COVID may provide an opportunity to amend the General Plan to support more residential and less commercial space in mixed-use projects.

In answer to Mayor O'Neill's queries, Principal Planner Murillo explained that if a project is permitted and built prior to June 30, 2021, the units in the project will be credited to the current cycle. The guidelines state the cutoff date is the date of entitlement, permitting, or issuance of a certificate of occupancy. Staff relies on the date a certificate of occupancy is issued. The Newport Crossings project has been entitled but has not obtained permits. The Uptown Newport project is subject to a Development Agreement.

Senior Planner Zdeba advised that 781 units from the 2014-2021 Housing Element inventory could count if they comply with the guidelines for the current cycle. The number of units does not include any units at Banning Ranch because annexation probably could not occur prior to the deadline.

In response to Committee Member Sandland's inquiry, Senior Planner Zdeba indicated the 781 units are based on the realistic development capacity of the existing inventory and do not include sites slated for redevelopment. He agreed to provide a tabulation of the units.

Senior Planner Zdeba described alternatives to new construction as preservation of existing affordable units and conversion of market-rate units to affordable units. The guidelines limit the number of alternative units to 25 percent of the City's very low and low-income requirements. Mobile home units can be identified as committed and preserved for affordable housing, but the 55-year minimum affordability term may be a deterrent to property owners taking that action.

In reply to Chair Tucker's queries, Senior Planner Zdeba stated realistically 12 units could be preserved within the timeframe for the current cycle. Chair Tucker believed there are few opportunities to achieve the 594 units.

Senior Planner Zdeba related that 1,000 units is an aggressive target for the production of accessory dwelling units (ADUs). With the changes in State law, the production of ADUs is much easier. To achieve this number, the City would have to commit to promoting ADUs, monitoring ADU production, and being held accountable should 1,000 units not be achieved. The ADU target number is open for discussion.

In response to Chair Tucker's inquiries, Senior Planner Zdeba indicated there would be consequences for failing to achieve 1,000 ADUs. State law does not allow the imposition of new or existing private restrictions on ADUs.

Senior Planner Zdeba explained that the City could commit to a rezoning program that would account for shortfalls in achieving goals.

In answer to Committee Member Sandland's questions, Senior Planner Zdeba advised that the beginning of the planning period is June 30, 2021. None of the goals include potential units at Banning Ranch. Principal Planner Murillo reported live-aboards with permanent utility hookups can count towards the allocation. Moorings in Newport Harbor do not provide permanent utility hookups and cannot count.

In reply to Committee Member Selich's queries, Senior Planner Zdeba reported the number of units obtained through rezoning could be 445 if the other goals are achieved. Staff has not analyzed the number of units from the existing inventory to suggest a realistic number of units that could be achieved. The assumptions for existing inventory sites, alternatives to new construction, and ADUs will affect the target for rezoning.

Committee Member Bloom remarked that the net number of needed units is 2,009 absent income restrictions. With income restrictions, the target for low-income units is about 3,300 units. Approximately 6,200 units will be needed to satisfy the income restrictions. Principal Planner Murillo related that only 88 of the 1,136 units entitled and unbuilt are lower-income units. Staff needs to present the number of units per income category for each target.

In answer to David Tanner's question, Chair Tucker stated the HEUAC will attempt to find sufficient sites to accommodate housing. If the HEUAC cannot accomplish that, it will report it to the Council. Mr. Tanner suggested the HEUAC ask staff and consultants about the strategy if the allocation cannot be fulfilled. He inquired about opportunities for public input in the roadmap.

Jim Mosher remarked that the HEUAC is not envisioning all affordable housing projects. The goal for low and very-low-income units is more than 2,000. To achieve 2,000 units, the number of overall units will have to be more than 4,834. The City Council has asked the Harbor Commission to review live-aboards, perhaps with the idea of counting them towards the RHNA allocation. The Harbor Code prohibits houseboats.

Chair Tucker reported approximately 2,400 units in the lower affordability range are required. If market-rate housing projects can include no more than 20 percent affordable housing, 12,000 housing units will be needed to provide 2,400 affordable units.

Mayor O'Neill recalled the Council's direction for three paths: providing a compliant Housing Element, pushing back legislatively, and pushing back legally. The Council will consider an appeal and legal options when it receives the formal RHNA allocation. The Council's legislative efforts ended when the bill it supported died. Completing the Housing Element Update in 14-15 months is not possible. The expectation for the HEUAC is to find as much compliance as possible and make recommendations to the Council. The Council will then review its options.

In reply to Committee Member Selich's question, Principal Planner Murillo advised that a rezoning program, if needed, would be contained in the Housing Element that the City Council adopts. The City will have three years to complete rezoning, which could include General Plan amendments. A

Greenlight vote would not occur until rezoning and associated General Plan amendments are proposed. A Greenlight vote and Coastal Commission approval are not needed to submit the Housing Element to HCD.

Committee Member DeSantis remarked that affordable housing does not have to be achieved through inclusionary requirements only. The HEUAC can explore other methods to achieve affordable housing that will not increase the number of overall units. A housing trust fund and mortgage programs are examples of such methods. Newport Beach employers could be interested in contributing to a housing trust fund for workforce housing.

Chair Tucker commented that the HEUAC will need to document and describe the reasons it cannot meet the RHNA allocation, if that occurs.

Mayor O'Neill referred to the City's efforts to subsidize permanent supportive housing, which could aid compliance with the RHNA allocation.

Mary Ann Soden encouraged the HEUAC to consider nonprofit and affordable housing partners to build affordable housing.

In answer to Committee Member Sandland's question, Chair Tucker indicated he is working with staff to draft a letter to property owners regarding redevelopment of their properties.

d. Appointment of an Additional Sites Subcommittee

Recommended Action: Appoint an additional sites subcommittee.

Chair Tucker moved, seconded by Committee Member Selich, to establish an Additional Sites Subcommittee composed of Chair Tucker and Committee Members Selich and Stevens.

AYE: Tucker, Bloom, DeSantis, Kiley, LePlastrier, Sandland, Selich, Stevens
NO: None
ABSTAIN: None
ABSENT: Fruchbom

VI. COMMITTEE ANNOUNCEMENTS OR MATTERS WHICH MEMBERS WOULD LIKE PLACED ON A FUTURE AGENDA FOR DISCUSSION, ACTION OR REPORT (NON-DISCUSSION ITEM)

Chair Tucker requested details of affordable housing.

VII. ADJOURNMENT – 8:39 p.m.

Next Meeting: October 7, 2020, 6 p.m. in the City Council Chambers.

**CITY OF NEWPORT BEACH
HOUSING ELEMENT UPDATE ADVISORY COMMITTEE MINUTES
CITY COUNCIL CHAMBERS – 100 CIVIC CENTER DRIVE**

**WEDNESDAY, OCTOBER 7, 2020
REGULAR MEETING – 6 P.M.**

I. CALL MEETING TO ORDER – 6 p.m.

II. WELCOME AND ROLL CALL

MEMBERS PRESENT: Chair Larry Tucker, Jeffrey Bloom, Susan DeSantis, Paul Fruchbom (remote), Geoffrey LePlastrier, Stephen Sandland, Ed Selich, Debbie Stevens

MEMBERS ABSENT: Elizabeth Kiley (excused), (Ex Officio Member) Will O'Neill

Staff Present: Community Development Director Seimone Jurjis, Deputy Community Development Director Jim Campbell, Principal Planner Jaime Murillo, Senior Planner Ben Zdeba, Administrative Support Specialist Clarivel Rodriguez

III. PUBLIC COMMENTS ON NON-AGENDA ITEMS

Jim Mosher noted the City Council has amended the General Plan and approved a development agreement for a developer to build housing that does not require low-income or very-low income units on property adjacent to the Airport. Allowing all developers to do this would result in the need to find locations for up to 49,000 units to achieve quotas for affordable housing.

Nancy Scarbrough commented that the Circulation Element had been delegated to the Planning Commission without a Council vote or public awareness. She wanted to know when and where that decision was made and whether staff or consultants have begun work on updating the Circulation Element.

IV. CONSENT CALENDAR

a. Minutes of the September 2, 2020

Recommended Action: Approve and file the minutes of September 2, 2020

Chair Tucker indicated Mr. Mosher has provided a minor correction.

Chair Tucker moved, seconded by Committee Member Selich, to approve the minutes of the September 2, 2020 meeting as presented.

AYE: Tucker, Bloom, DeSantis, LePlastrier, Sandland, Selich, Stevens
NO: None
ABSTAIN: Fruchbom
ABSENT: Kiley

V. CURRENT BUSINESS

a. Subcommittee Progress Reports

Recommended Action: Receive verbal progress reports from all subcommittees and discuss as necessary.

Chair Tucker reported the sites subcommittees for the Airport Area and West Newport Mesa have completed their reviews, and staff has posted the subcommittees' notes to the website. The site subcommittee for the remainder of the City is awaiting information from staff. The goal is to have the subcommittee's review complete and its notes posted prior to the next HEUAC meeting and the workshop.

Senior Planner Ben Zdeba advised that the information should be available for the subcommittee the following week.

Chair Tucker explained that the sites subcommittees graded each site as feasible, potentially feasible, or infeasible. Feasible sites have physical characteristics that may allow housing development. Infeasible sites appear not to have the ability to accommodate housing. Potentially feasible sites may accommodate housing, but the subcommittee could not make a determination based upon current information. After public input, the HEUAC will decide if a parcel is suitable for housing.

Committee Member Sandland requested staff maintain a tabulation of the number of acres and potential units the sites could generate in each category. Deputy Community Development Director Jim Campbell advised that staff will maintain a tabulation of the acreage of the sites and could provide a range of densities or unit yields at different densities.

In response to Deputy Community Development Director Campbell's query, Chair Tucker explained that the HEUAC should determine sites are suitable for housing prior to staff contacting the property owners. The subcommittees have no decision-making authority. Deputy Community Development Director Campbell expressed concern because the HEUAC would receive public input prior to making a decision, and public input would occur over a number of months. Staff should contact property owners sooner rather than later to learn of their interest in building housing on their properties. In addition, staff should probably contact more property owners than the HEUAC identifies in order to gather additional information about sites. Chair Tucker expected the workshops to provide public input regarding the sites that could accommodate housing. The October 20, 2020 workshop could provide input for the HEUAC to consider in its October 21 meeting. The HEUAC will review sites in the Airport Area and West Newport Mesa on October 21 and the rest of the City on November 4. By November 4, the HEUAC should have enough input for staff to begin contacting property owners. Deputy Community Development Director Campbell did not believe the October 20 workshop would consider specific sites; therefore, the HEUAC would not have public input regarding specific sites for its October 21 meeting.

Jim Mosher requested a more logical numbering system for the parcels and suggested the HEUAC webpage contain a list of subcommittees, subcommittee members, and the task of each subcommittee.

Chair Tucker related that the numbering system was provided to the subcommittee, and the subcommittee did not change it.

Deputy Community Development Director Campbell indicated the webpage could be updated to include a list of subcommittees.

Dorothy Kraus remarked that the lack of a response to Ms. Scarbrough's comments about the Circulation Element leaves an unsettling feeling. She inquired about the rationale for deeming the Road and Track building as infeasible when the underlying zoning for the parcel is residential.

Chair Tucker explained that he made a recommendation to staff and the Mayor that the Planning Commission update the Circulation Element as it has experience with traffic matters and HEUAC members do not. He was not privy to how the decision occurred.

Committee Member Selich advised that the subcommittee was informed that the Road and Track building is undergoing remodeling for a private school's educational offices. With the school's investment in the building, the subcommittee felt it was infeasible for housing. In addition, a major portion of the parking lot for the building is in the public right-of-way for the extension of 15th Street.

Deputy Community Development Director Campbell reported several years ago the Hearing Officer granted an extension of the nonconforming office use for Kobe's project at the Road and Track site. Pacifica Christian School is making similar investments and extending that nonconforming privilege. Changing zoning on the site from residential to commercial would require a General Plan Amendment. Also, the shape and size of the parcel makes a residential development on the site challenging. In order to include the site in the Housing Element Update, the City needs reasonable evidence that the site could change land uses during the planning period.

Chair Tucker appreciated Ms. Kraus' input as the type of input the HEUAC wants to receive.

b. Strategy for Public Input on Sites

Recommended Action: Discuss and provide direction on how to best seek public input on the housing opportunity sites inventory.

Chair Tucker wanted to receive quality input regarding the suitability of sites listed in the subcommittees' notes. Following the October 20 workshop, the HEUAC will review feasible and potentially feasible sites, hear public input provided at the workshop, and determine sites suitable for housing. HEUAC review of sites in the Airport Area and West Newport Mesa will be scheduled for October 21, and sites in the remainder of the City will be scheduled for November 4.

In response to Chair Tucker's question, David Barquist, Kimley-Horn and Associates, advised that the City has the right to adopt a Housing Element as it sees fit, but the City has to abide by State law. If the City adopts a Housing Element that does not comply with statutory requirements, the State will not certify the Housing Element. There are some challenges to self-certifying a Housing Element. In his opinion, the community's desires and statutory requirements should be considered equally. Chair Tucker understood penalty provisions contained in recent legislation apply pressure on cities to achieve their RHNA allocations. Mr. Barquist could provide the HEUAC with relevant legislation.

Chair Tucker did not want the public to participate in the engagement process and then feel as though the HEUAC ignored its input. He read the Code section regarding public participation.

c. Outreach Plan Update

Recommended Action: Receive an overview of the outreach plan efforts, including information on the schedule moving forward and the upcoming October 20 virtual workshop and the November 16 virtual workshop for the Circulation Element Update.

Mr. Barquist reviewed opportunities for community engagement, which include digital engagement, committee/advisory meetings, in-person or virtual workshops, online video presentations, and webinars. The first community workshop is scheduled for October 20, 2020, will be held online, and will be interactive without a presentation. Engagement opportunities will be available through the website and HEUAC meetings

Senior Planner Zdeba related that 36 people have registered via Zoom for the October 20 workshop. The community was notified of the workshop through email blasts and Nextdoor posts. The community may register for the workshop on the website. A Circulation Element kickoff workshop is scheduled for November 16, 2020.

In response to Committee Member DeSantis' inquiries, Mr. Barquist emphasized the interactive nature of the October 20 workshop. The workshop will include lessons learned from prior outreach efforts, the context for RHNA, a series of activities, and next steps. Scenario building or modeling with different densities will occur after the October workshop. Vehicle miles traveled (VMT) and circulation will be part of the analysis. Mitigation measures for VMT impacts and many other topics will be part of community education.

In answer to Committee Member Stevens' question, Mr. Barquist stated the Lego exercise will not be repeated as staff has clearly directed the consultant team not to repeat activities. The workshop will focus on locations within areas of the City.

Chair Tucker remarked that if the HEUAC cannot achieve the RHNA allocation during the update process, sites will be selected based on their ability to provide housing units, which is not a good planning method.

Committee Member DeSantis referred to a letter from Olen Properties. Visioning is not reviewing individual sites but preparing a realistic model for an area based on available sites and the development community's input regarding feasibility.

In reply to Committee Member Selich's query, Mr. Barquist explained that during the workshop, participants can respond to polls and share their ideas.

Jim Mosher hoped the workshop will have some form. He expressed concern about having to provide information to Zoom in order to register for the workshop. He inquired whether workshops would be recorded and posted on the website. He requested clarification of the Circulation Element workshop and the center column of the chart for outreach opportunities.

Charles Klobe commented that without State and Federal subsidies, the City will not find enough sites to accommodate 49,000 housing units, which will include the required number of affordable housing units. The HEUAC should decide it will submit an incomplete Housing Element. He suggested staff reach out to coastal cities in the same position as Newport Beach and develop a regional coalition to approach the State.

Dorothy Kraus expressed confusion regarding the role of the outreach subcommittee in obtaining public input on sites. The HEUAC seems to be glossing over Committee Member DeSantis' comments regarding visioning. The Outreach Plan and the websites are confusing and do not relate to each other.

Chair Tucker advised that Committee Members DeSantis and Stevens form the outreach subcommittee. They coordinate the outreach program with staff and consultants in order to obtain meaningful public input. The City can fight its RHNA allocation or update the Housing Element to achieve the allocation. If individuals feel the City should fight the allocation, they should address the City Council.

Deputy Community Development Director Campbell indicated the workshops will be recorded and posted on the website. A detailed script or agenda of the workshop is not ready for publication. Zoom registration requires a name and email address. Staff will update the City Council on October 13, 2020, but currently no other meetings with the Planning Commission or City Council have been scheduled.

Chair Tucker requested the workshop script be provided to the outreach subcommittee for comment. The affordable housing subcommittee is awaiting information from Principal Planner Jaime Murillo.

Committee Member DeSantis noted Orange County has a housing trust fund, and cities may create a local fund to subsidize housing units.

Senior Planner Zdeba explained that the Circulation Element webinar is listed at the top of the chart.

In response to Committee Member Sandland's question, Deputy Community Development Director Campbell clarified that workshops and webinars will allow the community to participate through chat and polling features.

Chair Tucker recommended the workshop include an announcement of the HEUAC's schedule for reviewing sites in the Airport Area, West Newport Mesa, and the remainder of the City.

d. Affordable Housing Compliance

Recommended Action: Receive an overview of what "affordable housing" means in the context of Orange County, as well as the new affordable housing requirements related to the housing opportunity sites inventory. Discuss strategies for compliance.

Mr. Barquist defined affordability as the ability to pay based on income and housing cost. Affordability is based on median family income (MFI), which is calculated by the Department of Housing and Urban Development (HUD) for each county. Orange County's MFI of \$103,000 is high in comparison to many counties in the state. RHNA assumes a family of four individuals. The Housing Element is required to identify sites by income category. Affordability for a site is generally based upon the density allowed for the site. According to the State, 30 dwelling units per acre is the default density for affordable units. Sites can accommodate more than one income category. The Department of Housing and Community Development (HCD) recommends a 15-30 percent buffer for additional dwellings to cover no net loss.

In reply to Committee Member Selich's questions, Mr. Barquist indicated the City would have to find sites to accommodate affordable housing that a developer does not build on a site designated for affordable housing. Staff will track affordable housing sites and construction of affordable housing. A subsidy could be a policy solution for construction of affordable housing.

Chair Tucker advised that most sites in Newport Beach are non-vacant, which is required for housing in the lower-income range. Therefore, the substantial evidence rule will come into effect.

In answer to Chair Tucker's query, Mr. Barquist explained that different strategies and methods can encourage property owners to redevelop their land.

Committee Member Selich remarked that the City cannot provide enough incentives, fee reductions, or bonus programs to make up the deficit of constructing affordable housing.

Committee Member Fruchbom related that coastal cities have the most difficulty providing affordable housing because their rents are higher than countywide rents, on which RHNA requirements are based. He calculated a developer's loss in constructing a hypothetical one-bedroom apartment unit at 50-60 percent AMI in Huntington Beach and in Newport Beach. According to his very rough estimation, a bond measure levying \$6,000 on every man, woman, and child in Newport Beach could provide funding for affordable housing. Theoretically, it is possible for tax credits and cheap land to fill a developer's deficit, but the demand for tax credits is immense. The City could offer increased density in exchange for affordable units. In the past, he surveyed the City for sites that could accommodate a development with affordable housing and found only one site, City-owned land near the maintenance yard.

Chair Tucker questioned whether the State would accept a Housing Element that utilizes strategies to achieve affordable housing allocations, regardless of the success of the strategies.

Committee Member Selich expressed concern regarding the no net loss requirement.

Chair Tucker suggested the no net loss requirement will have to be covered through an overlay that requires affordable housing as part of a residential development.

In response to Committee Member DeSantis' inquiry, Mr. Barquist stated the City could use in-lieu fees to construct affordable housing in other cities. Committee Member DeSantis noted UCI has a fund for silent second mortgages on affordable housing. The City of Livermore and the County of Marin are subsidizing mortgages to attract residents. Chair Tucker added that UCI is subsidizing affordable housing located on UCI's property. He questioned whether the State would accept affordable housing built in another city.

Mr. Barquist clarified that the Housing Element contains courses of actions that should achieve the RHNA allocation. The specific details of those actions do not have to be included in the Housing Element. To obtain affordable housing, the City could provide incentives or streamline permitting for accessory dwelling units (ADU), increase densities, create affordable overlay zones, promote the preservation of existing affordable units, or promote the conversion of market-rate units to affordable units.

In reply to Committee Member Sandland's questions, Mr. Barquist explained the City's ability to count affordable units when their affordable covenants, which are set to expire, are renewed. Deputy Community Development Director Campbell reported the current Housing Element

contains a list of project sites subject to affordable covenants. Staff has registered with the State to receive notice prior to the expiration of covenants. Theoretically, the City could negotiate with property owners to pay for an extension of the covenants. Staff has contacted property owners where the covenants were about to expire, and all property owners have rejected offers to extend the covenants. Senior Planner Zdeba indicated covenants on 12 properties will expire during the 2021-2029 planning cycle.

In answer to Committee Member Selich's query, Mr. Barquist related that the no net loss requirement applies to the entire RHNA allocation.

Chair Tucker commented that staff and consultants will provide the HEUAC with alternatives for affordable units. The HEUAC will likely consider an inclusionary fee.

Mr. Barquist indicated HCD considers whether the Housing Element meets the spirit and intent of the law and substantially complies with the law. Staff can discuss potential programs and strategies with HCD prior to completing the Housing Element.

Committee Member DeSantis suggested salaries for Newport Beach jobs should be prominent in the workshop discussion so that the community can relate to residents of affordable housing

Jim Mosher suggested staff clarify the statement that HCD considers a density of 30 units per acre as suitable for affordable housing and the application of that density to the Newport Airport Village project.

Deputy Community Development Director Campbell reported a site identified for affordable housing must have a density of 30 units per acre. He recommended the Housing Element reflect the number of affordable units proposed for the Newport Airport Village project rather than the maximum number of units that could be built on the site. His recommendation would apply to the Newport Crossings project and any remaining development in the Uptown Newport project.

e. RHNA Appeal Filing-Council Item for October 13

Recommended Action: Receive and file.

Chair Tucker remarked that the appeal lists retail commercial and industrial properties without describing economic constraints on converting those properties to residential uses. He has submitted language addressing that issue to staff. In determining the number of housing units needed, the State did not consider the availability of land for housing.

Jim Mosher stated other cities will appeal their allocations and make arguments similar to Newport Beach's arguments.

Deputy Community Development Director Campbell advised that a draft letter has been included in the meeting packet and will be presented to the City Council on Tuesday along with a request to authorize an appeal. The Southern California Association of Governments (SCAG) will convene its litigation committee, which could mean SCAG is considering litigation regarding RHNA.

In answer to Committee Member DeSantis' query, Principal Planner Murillo reported the deadline to submit an appeal is October 26, 2020. A 45-day comment period will follow the deadline. Once the comment period expires, SCAG will hold hearings, which are estimated to last four to six weeks.

The appeal process is expected to conclude in late January or early February 2021. At that time, cities will have their final RHNA allocations.

VI. COMMITTEE ANNOUNCEMENTS OR MATTERS WHICH MEMBERS WOULD LIKE PLACED ON A FUTURE AGENDA FOR DISCUSSION, ACTION OR REPORT (NON-DISCUSSION ITEM)

Chair Tucker requested a presentation by the Kennedy Commission and a discussion of the appropriate time for staff to contact property owners about building housing on their properties.

Committee Member DeSantis' requested a presentation by Renaissance Housing, an affordable housing developer. Chair Tucker suggested that occur when the Affordable Housing Subcommittee has information to share.

Committee Member Sandland requested Mr. Barquist provide an updated outreach schedule by October 21, 2020.

VII. ADJOURNMENT – 8:23 p.m.

Next Meeting: October 21, 2020, 6 p.m. in the City Council Chambers.

**CITY OF NEWPORT BEACH
HOUSING ELEMENT UPDATE ADVISORY COMMITTEE MINUTES
CITY COUNCIL CHAMBERS – 100 CIVIC CENTER DRIVE**

**WEDNESDAY, OCTOBER 21, 2020
REGULAR MEETING – 6 P.M.**

I. CALL MEETING TO ORDER – 6 p.m.

II. WELCOME AND ROLL CALL

MEMBERS PRESENT: Chair Larry Tucker, Jeffrey Bloom, Susan DeSantis, Elizabeth Kiley, Geoffrey LePlastrier, Stephen Sandland, Ed Selich, Debbie Stevens

MEMBERS ABSENT: Paul Fruchbom, (Ex Officio Member) Will O'Neill (excused)

Staff Present: Community Development Director Seimone Jurjis, Deputy Community Development Director Jim Campbell, Principal Planner Jaime Murillo, Senior Planner Ben Zdeba, City Traffic Engineer Tony Brine, Administrative Support Specialist Clarivel Rodriguez

III. PUBLIC COMMENTS ON NON-AGENDA ITEMS

Jim Mosher remarked that a loophole in the Housing Crisis Act allows people to merge lots and demolish multifamily housing if the new development is limited to a single unit, which seems contrary to the intent of the Housing Crisis Act.

IV. CONSENT CALENDAR

a. Minutes of the October 7, 2020 Meeting

Recommended Action: Approve and file the minutes of October 7, 2020

Chair Tucker advised that Mr. Mosher has suggested some minor corrections to the October minutes.

Chair Tucker moved, seconded by Committee Member Selich, to approve the minutes of the October 7, 2020, meeting with Mr. Mosher's revisions.

AYE: Tucker, Bloom, DeSantis, Kiley, LePlastrier, Sandland, Selich, Stevens
NO: None
ABSTAIN: None
ABSENT: Fruchbom

V. CURRENT BUSINESS

a. Presentation by The Kennedy Commission

Recommended Action: Receive a presentation from Cesar Covarrubias of The Kennedy Commission followed by brief questions and answers.

Chair Tucker indicated The Kennedy Commission is an affordable housing advocacy group that was founded in 2001. The Housing Element Update Advisory Committee (HEUAC) is interested

in hearing about strategies, policies, and incentives that will result in affordable housing development.

Cesar Covarrubias shared information regarding median home price, household income, affordability, and Regional Housing Needs Assessment (RHNA) allocations for Orange County. Two cities in Orange County have specific policies for affordable housing and have met their RHNA allocations in the very-low-income and low-income categories. Overlays and specific plans can encourage housing as part of mixed-use developments. Institutional and church campuses are potential sites for mixed-use concepts. The Surplus Land Act, a mixed-income housing ordinance, an affordable housing strategic plan, housing opportunities zoning or an overlay, and an affordable housing land trust support affordable housing. The Veterans and Affordable Housing Bond Act, the No Place Like Home program, the Orange County Housing Finance Trust/JPA, the Orange County Housing Trust, the Orange County Housing Bond 2020, and the Mental Health Services Act can be used to fund affordable housing.

Chair Tucker commented that there are areas in the City where property owners may be enticed to build housing on their properties. Policies that relax development standards and increase allowed density can encourage housing development, but at some point increased density makes construction costs infeasible.

Mr. Covarrubias suggested incorporating the City's housing objectives into an overlay or zoning change. Changes to the State Density Bonus Law may result in more affordable housing. Office buildings can be redeveloped with a more intense and intentional use. Adopting policies and programs for affordable housing is essential to the development of affordable housing.

In answer to Committee Member Sandland's question, Mr. Covarrubias advised that The Kennedy Commission is reviewing the potential for housing located in areas such as Banning Ranch and portions of the Airport Area located within the 65 dB CNEL contour. Planning growth around existing uses is challenging but doable.

In reply to Committee Member DeSantis' query, Mr. Covarrubias indicated he is aware of cities discussing agreements to use funding from one city to build affordable housing in the other city. However, he did not anticipate such agreements would work well because of each city's need to fulfill its allocation for low and very-low-income housing.

In response to Committee Member Stevens' comment, Mr. Covarrubias remarked that if amenities are located close to housing, residents will probably make fewer vehicle trips.

b. Orange County Mayors' Letter to the Southern California Council of Governments (SCAG)

Recommended Action: Receive and file.

Chair Tucker felt the Mayors' letter could be more fruitful in reducing RHNA allocations than other approaches. The public should be aware of the letter.

Jim Mosher inquired regarding the reasons for the Mayors of Dana Point and San Clemente not signing the letter.

c. Subcommittee Progress Reports

Recommended Action: Receive verbal updates from each subcommittee, as appropriate.

Chair Tucker reported that the subcommittee for opportunity sites in the remainder of Newport Beach met the prior day, and a report will be scheduled for the next HEUAC meeting. The affordable housing subcommittee will review different approaches to obtain affordable housing at different income levels and may craft an inclusionary plan.

d. October 20, 2020 Virtual Housing Workshop Recap

Recommended Action: Receive an overview of the first virtual housing workshop and discuss any takeaways. Provide feedback or direction to staff and the consultants on any changes or considerations for future workshops.

David Barquist, Kimley-Horn and Associates, reported 72 people participated in the workshop. Analysis of feedback provided during the workshop is underway, and a report will be available via the Newport Together website. Engagement occurred during the workshop and will continue online. During the workshop, members of the public inquired about a no housing response to questions. In light of the draft RHNA allocation for Newport Beach, the consultant team does not believe a no housing response is practical. In subsequent stages of outreach, the team can explore the most appropriate locations for growth and development and different types of housing. The public can view the workshop and provide feedback on the Newport Together website.

In reply to Committee Member Stevens' question, Mr. Barquist advised that the team will explore methods to obtain public input for individual opportunity sites during both in-person and virtual meetings. Committee Member Stevens remarked that the interactive portion of the workshop was easy and a good start to obtaining public feedback.

Committee Member DeSantis suggested future virtual workshops include more opportunities for two-way communication. The presentations and polling were well done. The workshop could have been longer to allow more dialog with the community. She emphasized the importance of creating visions for opportunity areas while reviewing parcels in the areas. Mr. Barquist noted the difficulty of sustaining the public's attention for an extended period of time. Engagement will build and improve as the schedule progresses. The team is working with the City's Public Information Officer to distribute information to the community through different avenues. The public and committee members can assist by sharing links and posts to meetings and information.

Deborah Allen, Harbor View Hills Community Association President, advised that she discussed the workshop with seniors at OASIS, a number of whom attended the workshop, and neither the seniors nor she felt the technology was easy to use or the workshop encouraged community input. The input may have been too structured for a community that is accustomed to voicing their opinions. Questions have to have a no project response. If the goal is to obtain community input, the public has to be allowed to express opinions.

Nancy Scarbrough noted 18 of those present for the workshop were staff and committee members. The inability to converse was extremely frustrating. Future workshops need to be more interactive with the public.

Jim Mosher concurred with comments regarding the lack of two-way communication. The workshop did not mention HEUAC meetings, and the website does not list all HEUAC meetings.

Adriana Fourcher felt the workshop was not collaborative. In-person meetings with small group discussions should be possible. She had some difficulty participating in the polling and did not believe her responses were counted. Input from the business community is needed.

Melanie Schlotterbeck, representing Olen Properties, expressed disappointment with the repetition of information during the workshop. She supported the use of breakout rooms during virtual meetings to allow individuals to comment. There has been no mention of new and innovative housing types and mixed-use development. Housing options need to include a range of sizes, prices, and affordability. The City needs a vision for the Airport Area.

Hoiyin Ip suggested community groups will help distribute information about meetings and workshops. One city in Orange County has been assessing in-lieu housing fees for many years.

David Tanner hoped the City would work with The Kennedy Commission to learn about the effects of affordable housing on public services. Staff is intentionally misinforming the public regarding the scope of the Housing Element Update by discussing only RHNA information.

Dorothy Kraus remarked that workshop participants were the usual group who attend or participate in public meetings. Staff and the consultants need to use more traditional means to notify the public about meetings.

Chair Tucker advised that the State has disrupted the City's planning process and shortened the time for a planning process. Staff has not intentionally misled anyone. Public comments have included some valid criticisms of the outreach process. The HEUAC is charged with preparing a plan to comply with State requirements. Consequently, no development is not an option.

Committee Member Stevens related that the City's Public Information Manager asked the outreach subcommittee to distribute information about the workshop, and the subcommittee sent emails to almost 1,000 people. The community may not be interested in planning efforts.

e. Sites Rundown: Airport Area

Recommended Action: Review the list of potential sites and discuss feasibility. Solicit input from the public on the list and the Committee's discussion.

Chair Tucker directed staff to begin contacting the owners of properties identified as feasible or potentially feasible for housing. He assumed members of the public would agree with the subcommittee's designations for sites as the public has expressed interest in locating housing in the Airport Area. He reviewed the subcommittee's consideration of parcels 43, 113, 37, 69, 95, 87, 23, 70, 80, 81, 111, 9, 24, 131, 135, 38, and 79 and the Saunders site.

Committee Member Sandland suggested the parcel numbers for the Saunders site should be provided. If the prohibition of housing in the 65 dB CNEL is relaxed, parcels 87 and 23 may be potentially feasible rather than infeasible. Chair Tucker indicated the subcommittee may reconsider designations for parcels located within the 65 dB CNEL if the prohibition is relaxed.

Committee Member Bloom commented that abandoning streets so that parcels may be combined would theoretically create more land and larger parcels. Parcels could be even more feasible for housing. Chair Tucker clarified the comment as abandoning private circulation rather than streets.

Jim Mosher did not recall the HEUAC agreeing with the subcommittee's approach of not considering parcels within the 65 dB CNEL. Based on the statement that the subcommittee is not considering parcels within the 65 dB CNEL at this time, he inquired when the subcommittee would consider those parcels. Chair Tucker suspected the subcommittee would consider those sites if all other sites do not provide sufficient housing to comply with the RHNA allocation or if someone proposes a project on a parcel within the 65 dB CNEL.

In reply to Chair Tucker's inquiry, Deputy Community Development Director Jim Campbell related that a policy in the Noise Element of the General Plan states parcels within the 65 dB CNEL are not appropriate for housing development. The Airport Land Use Commission would find housing development incompatible with the 65 dB CNEL.

Chair Tucker reviewed the subcommittee's consideration of parcels 51, 72, 88, 71, 91, 122, 52, 138, 77, 68, 106, 121, 19, 33, 117, 116, 119, and 120.

Adriana Fourcher remarked that the dB rating pertains to jet traffic. Noise studies are needed for small plane traffic because the departure pattern for small planes is over the parcels being considered for housing. Deputy Community Development Director Campbell advised that the noise contours are based on a composite of both runways and represent a 24-hour average of all aircraft traffic.

Chair Tucker reviewed the subcommittee's consideration of parcels 66, 67, 83, 61, 62, 63, 76, 16, 105, 47, 31, 13, 99, and 104. The subcommittee omitted parcels 39 and 89, which are located partially within the 65 dB CNEL. Parcel 39 is small, and the building on parcel 89 has been refurbished. Therefore, parcel 39 is infeasible and parcel 89 is feasible.

Committee Member Stevens expressed concern that airplane noise was last studied and the CNEL contours determined in 1985. Deputy Community Development Director Campbell indicated an update of CNEL maps is not on the horizon. Staff could discuss the topic with Airport Land Use Commission staff and provide a report to the HEUAC.

Chair Tucker reviewed the subcommittee's consideration of parcels 4, 1, 5, 6, 2, 3, 8, 9, 10, 11, 13-16, 17, 12, 37-42, 43-69, 70, and 71-76.

Adriana Fourcher advised that helicopters from a helicopter school and the Orange County Sheriff's Office fly over the area and beneath the departure pattern for small planes. A noise study is needed.

Chair Tucker reviewed the subcommittee's consideration of parcels 77, 78, 79, 80, 81, 82, 19, 20, 25-27, 31, 21-24, 28-30, 34-36, and 83.

Adriana Fourcher noted many property owners oppose the residential project proposed for the parking lot of Koll Center Newport.

Melanie Schlotterbeck, representing Olen Properties, indicated parcel 19 is an Olen Properties building and is not part of a residential project. The review of parcels focuses on site selection rather than the integration of sites with their surroundings. She questioned whether sites would be excluded if a property owner did not respond to a request for information. This is an opportunity for the City to partner with landowners and developers to enact a vision for the area. The focus on housing and not mixed uses is a lost opportunity to create a community. The Airport Area could

become a vibrant, walkable, bikeable, mixed-use, urban core that attracts a range of residents, incomes, and opportunities. She encouraged the HEUAC to create a vision for the Airport Area.

f. Sites Rundown: West Newport-Mesa

Recommended Action: Review the list of potential sites and discuss feasibility. Solicit input from the public on the list and the Committee's discussion.

Committee Member Selich noted the West Newport Mesa area contains medical office uses, mobile home parks, various densities of residential uses, older single-story industrial/commercial buildings, and a series of institutional uses. The subcommittee has discussed the need to preserve opportunities for smaller-scale industrial and service businesses and recommends a zoning overlay concept as some but not all parcels may convert to residential uses. It is important not to convert everything to residential in order to have a well-balanced land use plan. He reviewed the subcommittee's consideration of parcel 56 (Newport Health Care); parcel 27 (Ebb Tide); parcels 62 and 64 (Road & Track Building); parcel 63 (Coastline College); the private school site north of parcel 50; the City Utilities Yard; the City General Services Yard; parcels 36, 116, 123, and 182 (four mobile home parks); the area bordered by Superior, 15th, and Monrovia; the area bordered by Hospital Road, Placentia, and Superior; and parcels 12, 41, 42, and 49.

Commissioner Member Sandland suggested combining parcels 13 and 11 could result in a designation of potentially feasible. Perhaps staff could send a letter to the property owners inquiring about interest in building housing on the parcels. Committee Member Selich noted the demand for medical office buildings is high at the current time. Committee Member Kiley concurred with sending a letter as the owners can indicate no interest.

Chair Tucker advised that parcels 14 and 44 will be designated infeasible and parcels 13 and 11 will be designated potentially feasible.

Committee Member Selich reviewed the subcommittee's consideration of the small residential parcels between Dana and Flagship; parcels 3, 39, 48, 117, 124, and 228; parcels 74 and 122; parcels 24 and 40; parcels 17 and 51; parcels 2, 10, and 23; parcels 5-7, 9, 18-22, 26, 28, 29, 31-34, 36, 37, 46, 47, 53, 55, 60, 61, and 227; parcels 4 and 16; and parcels 50 and 59. The HEUAC may wish to consider contacting Hoag Hospital regarding construction of workforce housing in the area.

Deputy Community Development Director Campbell advised that the business located on parcel 47 has some air quality issues and has installed equipment to hopefully resolve the issues. Committee Member Stevens indicated the business has been reviewed for both ground and soil contamination. The cleanup requirements for industrial uses are different from the requirements for residential uses. The time and expense to clean up the site for residential uses may be prohibitive.

An unidentified speaker appreciated the suggestion to contact Hoag Hospital. The small amount of land available for construction is dismaying. The Mayors' letter may be the best approach to seek a reduction in the RHNA allocation.

VI. COMMITTEE ANNOUNCEMENTS OR MATTERS WHICH MEMBERS WOULD LIKE PLACED ON A FUTURE AGENDA FOR DISCUSSION, ACTION OR REPORT (NON-DISCUSSION ITEM)

Chair Tucker noted the subcommittee for housing sites in the remainder of Newport Beach will report at the next meeting. He requested a discussion of inclusionary zoning and fees.

Committee Member Sandland requested a discussion of large employers that could support housing.

VII. ADJOURNMENT – 8:53 p.m.

Next Meeting: November 4, 2020, 6 p.m. in the City Council Chambers.

**CITY OF NEWPORT BEACH
HOUSING ELEMENT UPDATE ADVISORY COMMITTEE MINUTES
CITY COUNCIL CHAMBERS – 100 CIVIC CENTER DRIVE**

**WEDNESDAY, NOVEMBER 4, 2020
REGULAR MEETING – 6 P.M.**

I. CALL MEETING TO ORDER – 6 p.m.

II. WELCOME AND ROLL CALL

MEMBERS PRESENT: Chair Larry Tucker, Susan DeSantis, Paul Fruchbom, Elizabeth Kiley, Geoffrey LePlastrier, Stephen Sandland, Ed Selich, Debbie Stevens, (Ex Officio Member) Will O'Neill

MEMBERS ABSENT: Jeffrey Bloom (excused)

Staff Present: Community Development Director Seimone Jurjis, Deputy Community Development Director Jim Campbell, Senior Planner Ben Zdeba, Administrative Support Specialist Clarivel Rodriguez

III. PUBLIC COMMENTS ON NON-AGENDA ITEMS

Deputy Community Development Director Jim Campbell reported 47 of 197 jurisdictions located within the Southern California Association of Governments (SCAG) region have filed appeals of their Regional Housing Needs Assessment (RHNA) allocations. Eighteen agencies in Orange County filed appeals. Four agencies, including the City of Newport Beach, filed appeals against the City of Santa Ana. The City has sent a letter to SCAG trying to get sponsorship of legislation that will protect local jurisdictions subject to another agency's oversight.

IV. CONSENT CALENDAR

a. Minutes of the October 21, 2020 Meeting

Recommended Action: Approve and file the minutes of October 21, 2020

Chair Tucker noted Mr. Mosher has submitted corrections to the October 21, 2020 minutes.

Chair Tucker moved, seconded by Committee Member Selich, to approve the minutes of the October 21, 2020 meeting with Mr. Mosher's revisions.

AYE: Tucker, DeSantis, Fruchbom, Kiley, LePlastrier, Sandland, Selich, Stevens
NO: None
ABSTAIN: None
ABSENT: Bloom

V. CURRENT BUSINESS

a. Subcommittee Progress Reports

Recommended Action: Receive verbal updates from each subcommittee, as appropriate.

Chair Tucker advised that the affordable housing subcommittee met to discuss methods for financing and developing affordable housing projects. The subcommittee will prepare a report of potential incentives to generate affordable housing. The Housing Element Update Advisory Committee (HEUAC) may discuss the subcommittee's report during its December 2, 2020 meeting, and the Council will determine which, if any, approach to pursue.

b. Sites Rundown: Remainder of Town

Recommended Action: Review the list of potential sites and discuss feasibility. Solicit input from the public on the list and the Committee's discussion.

Chair Tucker noted the report is in draft form and will be revised and attached to the agenda for the next HEUAC meeting. Before any parcel is approved for inclusion on the sites inventory list, the HEUAC will have to find that housing is a suitable use for the parcel. The intent of the review is to narrow the number of sites that staff will investigate and the HEUAC will consider after receiving public input. Sites that the subcommittee determines are infeasible or does not review may later be determined to be feasible or potentially feasible and may be evaluated for suitability. Sites may be brought to the subcommittee's attention and may be ultimately included in the sites inventory after public input.

In reply to Committee Member DeSantis' questions, Chair Tucker related that defining feasible, potentially feasible, and infeasible is more art than science. Crafting definitions other than those previously stated is not possible. The feasibility determination for any site could change if the site is viewed in the context of a vision for the area. However, the State form requires a listing of sites by parcel number. Committee Member DeSantis believed a site inventory is a critical piece of the Housing Element Update, but neither the HEUAC nor the community can provide adequate input without a vision for the major opportunity areas. Seeking community input without providing a vision is meaningless.

In response to Committee Member Fruchbom's query, Chair Tucker clarified Committee Member DeSantis's position as the HEUAC should be doing more than reviewing sites. In order to begin the planning process, the HEUAC needs to understand the source of traffic trips and where housing can be placed.

Committee Member Stevens noted combining some sites could result in a designation of feasible. Listing more than one parcel number per site on the State's form is probably acceptable.

Chair Tucker stated undeveloped sites listed in the sites inventory for the fifth cycle are considered feasible for the sixth cycle. He reviewed the designations for Parcels 1, 2, 3, 4, 6-9, 10, 12, 11, 13, 14-17, 18, 19, 20, and 21.1.

Jim Mosher reiterated his request for staff to list the subcommittees and their members on the website. He questioned whether the feasibility of sites pertains to technical or economic feasibility; whether income level affects feasibility; the term "remainder of town" when the maps do not show all of Newport Beach outside the Airport Area and West Newport Mesa; and the numbering system for parcels.

Chair Tucker explained that the term "remainder of town" resulted from the subcommittee's request for staff to prepare information for certain sites. The subcommittee may have inadvertently overlooked some sites. He reviewed the designations for the Dunes west of the lagoon and Parcels 22, 23, 24, 25, 36, 39, 40, 42, 43, 44, 35, 34, and 33.

Mayor O'Neill related that he as Mayor will send a formal invitation for the Irvine Company to participate in the Housing Element Update process unless there are strong objections to doing so. Chair Tucker and Committee Members Kiley, Stevens, Sandland, and DeSantis encouraged Mayor O'Neill to send an invitation. Committee Member DeSantis proposed Mayor O'Neill send invitations to Hoag Hospital, major employers within Newport Center, and churches that own large parcels.

Jim Mosher noted there is no analysis or conclusion for Parcel 37.

Committee Member Kiley clarified that feasibility for the sites pertains to the ability to physically construct housing on a site. The property owners will determine whether housing is financially feasible.

Chair Tucker reviewed the designations for Fashion Island and Parcels 30, 29, 27, 28, 31, 32, 114-120, 122, 121, 105-109, 104, 110-113, 107 (the County bus depot), 98-102, 103, 91-97, 87-89, 77, 78, 80-86, 57-61, 63-76, 45, 47-56, and 52.

Committee Member Sandland proposed revising the designation for Parcels 98-102 and 103 to feasible. The Irvine Company may be willing to discuss Parcels 46-54.

Debra Allen, Harbor View Hills Community Association President, reported the sight plane ordinance applies to certain areas and limits building heights in those areas.

Jim Mosher remarked that buildings on Parcels 45 and 47-56 should not obstruct views from Fashion Island Circle.

Chair Tucker reviewed the designations for Parcels 123, 124, 125, 126, 127, and 128.

Committee Member Sandland suggested the subcommittee explore the parcels across Pacific Coast Highway from Parcel 22, the City's Avon parking lot, and the parking lot for Mariner's Square.

Committee Member Selich advised that Lower Castaways Park is deed restricted to parkland.

Chair Tucker noted the parking lot for Mariner's Square is subject to a height limit and located in the Coastal Zone. In addition, the parking would have to be replaced.

Committee Member Kiley indicated a number of lots along the Peninsula and Bay are included in the Housing Element for the fifth cycle and covered by paragraph 1 of the subcommittee's report.

Jim Mosher requested the maps reflect the sites listed in the fifth cycle. One or two housing units could be built on a small lot; therefore, small lots should not be deemed infeasible based on size alone.

Charles Klobe proposed contacting a developer that is constructing a residential project on a closed landfill to determine if housing can be built on Parcel 128.

Johnny advised that night lighting around the Library and the Orange County Transportation Authority bus depot needs to be brighter.

Mary Ann Soden encouraged the HEUAC to consider projects that provide housing for very-low, low, and moderate-income households.

Chair Tucker reported Parcels 46-54, Avon parking lot, and the Mariners Square Parking Lot will be added to the list as potentially feasible, and he will inquire regarding construction of residential units on a closed landfill.

In answer to Committee Member DeSantis' query, Chair Tucker indicated the subcommittee will explore an exchange of zoning for land on which 100-percent affordable housing may be built. Committee Member DeSantis encouraged the affordable housing subcommittee to explore those possibilities so that the bulk of affordable units is not provided through inclusionary zoning.

Chair Tucker requested staff add the sites from the fifth cycle Housing Element to the map.

In reply to Committee Member Sandland's inquiries, Chair Tucker related that staff may prepare a tabulation of acreage from sites designated feasible and potentially feasible after learning of property owners' interest in developing housing. Deputy Community Development Director Campbell advised that staff plans to send letters to property owners in the next few weeks and follow up with property owners in an effort to obtain their responses by the end of the year.

c. Site Suitability Input and Community Engagement

Recommended Action: Receive an overview of the outreach plan moving forward, including how the community will be engaged on the suitability of the sites that are identified as feasible or potentially feasible. Provide feedback and direction to staff and the consultant on the outreach plan.

Senior Planner Ben Zdeba reviewed public engagement opportunities in October through HEUAC, City Council, and Planning Commission meetings and a virtual community workshop and in November through HEUAC, City Council, and Planning Commission meetings, two virtual housing suitability workshops, and a virtual Circulation Element workshop. The housing suitability workshops will begin to consider density, which has policy implications. The public will be able to comment verbally and through the chat box and to respond to polls during the housing and Circulation Element workshops.

In answer to Committee Member DeSantis' questions, Senior Planner Zdeba advised that the public may provide feedback regarding parcels identified by the subcommittee and other parcels during the workshops. On the Newport Together website, community members may place pins on a GIS map to indicate their preferences for locations of housing types. If the HEUAC agrees with the plans for November workshops, staff will begin an extensive promotion of the workshops through social media and email blasts. Committee Member DeSantis suggested posts and emails contain a link to Newport Together and information about providing feedback through the website. Senior Planner Zdeba noted a potential social media campaign to drive more traffic to the website. The City's appeal of the RHNA allocation should be resolved in February 2021. If the City's appeal is successful, the City's allocation could theoretically be reduced by half. Committee Member DeSantis commented that focusing messaging on the needs of the community rather than a State mandate could generate more community interest and feedback.

In response to committee Member Stevens' inquiries, Senior Planner Zdeba indicated the potential housing sites will be divided between the two housing workshops. Activities utilized during the workshops will be available on the website for the public to provide feedback after the workshops. Staff has prepared a flyer promoting the workshops to distribute in the community.

Chair Tucker remarked that "none of the above" will not be a response to questions about locations for housing because the City has to find enough sites to comply with the RHNA allocation.

Jim Mosher inquired whether the workshops will extend for the full two hours. He suggested staff publish questions from the workshops ahead of the workshops so that community members have time to consider their responses. Community members are less likely to provide feedback if they feel it will not have a practical effect on HEUAC discussions and decisions.

Debra Allen suggested information for the workshops include a list of sites to be discussed in each workshop and instructions for participating in polling and verbal and chat box comments.

Senior Planner Zdeba clarified that flyers will include a list of areas to be discussed in each workshop. Discussion topics for the workshops will be published on the website prior to the workshops. The workshops will extend for two hours unless the public completes their questions and comments in less than two hours.

Mary Ann Soden concurred with requests for publication of workshop information and suggested staff promote the workshop in print media and allow the community to participate in workshops from the Community Room.

Chair Tucker advised that the HEUAC will not meet on November 18, 2020.

VI. ADJOURNMENT – 8:04 p.m.

Next Meeting: November 18, 2020, 6 p.m. in the City Council Chambers.

**CITY OF NEWPORT BEACH
HOUSING ELEMENT UPDATE ADVISORY COMMITTEE MINUTES
ZOOM**

**WEDNESDAY, DECEMBER 2, 2020
REGULAR MEETING – 6 P.M.**

I. CALL MEETING TO ORDER – 6 p.m.

II. WELCOME AND ROLL CALL

MEMBERS PRESENT (remote): Chair Larry Tucker, Jeffrey Bloom, Susan DeSantis, Paul Fruchbom, Elizabeth Kiley, Geoffrey LePlastrier, Stephen Sandland, Ed Selich, Debbie Stevens

MEMBERS ABSENT: (Ex Officio Member) Will O'Neill (excused)

Staff Present (remote): Community Development Director Seimone Jurjis, Principal Planner Jaime Murillo, Senior Planner Ben Zdeba, Administrative Support Technician Amanda Lee

III. PUBLIC COMMENTS ON NON-AGENDA ITEMS

David Tanner indicated the public has been told that they will get answers to their questions at this meeting, but there is not an agenda item for this topic. He inquired as to when the public will have an opportunity to ask questions and receive answers.

Hoiyin Ip remarked that virtual meetings are missing the energy of in-person meetings and suggested more interaction with the public during workshops and activities before and after workshops to get participants thinking about housing topics.

IV. CONSENT CALENDAR

a. Minutes of the November 4, 2020 Meeting

Recommended Action: Approve and file the minutes of November 4, 2020

Committee Member Sandland corrected the third paragraph of page 4 to read "Chair Tucker reported Parcels 46-54, the Avon parking lot, and the Mariners Square parking lot will be added to the list as potentially feasible, and he will inquire regarding construction of residential units on a closed landfill."

Chair Tucker moved, seconded by Committee Member Sandland, to approve the minutes of the November 4, 2020 meeting as amended.

AYE: Tucker, Bloom, DeSantis, Fruchbom, Kiley, LePlastrier, Sandland, Selich, Stevens
NO: None
ABSTAIN: None
ABSENT: None

V. CURRENT BUSINESS

a. Subcommittee Progress Reports

Recommended Action: Receive verbal updates from each subcommittee, as appropriate.

Chair Tucker reported the sites subcommittees have completed their work temporarily. The notes for sites in the remainder of town have been revised. The affordable housing subcommittee met on October 27, 2020 to discuss the Regional Housing Needs Assessment (RHNA) numbers and preparation of a full report to the Housing Element Update Advisory Committee (HEUAC). The purpose of the report is to educate the HEUAC regarding the various methods for financing and developing affordable housing projects. Understanding the affordable housing business will help the HEUAC reach a recommendation for the Council. Chair Tucker indicated he has prepared a first draft of the report and sent it to staff for review. He will modify the report after staff's review, if necessary, and circulate it to subcommittee members for revision. The report should be complete in December.

In response to Chair Tucker's question, Senior Planner Ben Zdeba advised that staff is preparing maps containing all sites and a list of properties from the fifth cycle that have not been developed. Staff hopes to provide both at the next meeting as a "receive and file" agenda item.

Committee Member Fruchbom related that he read information indicating Shopoff sold an acre in Uptown Newport for 66 luxury condominiums at an average price of almost \$400,000 per unit or more than \$24 million for the real property. If the information is true and the City can create land through increased densities, the land value of the units will be extraordinarily high and should allow the City to extract some reasonable fees for added density.

Charles Klobe added that the Uptown Newport project is entitled for 66 luxury condominiums with no requirement for anything less than above moderate, which should increase the price of land. The entitlements that Picerne is seeking for the 4400 Von Karman project only allows 5% of the total units to be low-income units while the apartments will be market rate.

Chair Tucker recalled Shopoff building a fair number of affordable units in the first phase of the project and Picerne seeking a density bonus of 20 percent in exchange for either 10 percent low-income units or 5 percent very-low-income units. Picerne chose 5 percent very-low-income units.

David Tanner asked about the validity of statements that staff is considering placing housing within the 65 decibel (dB) CNEL contour and, if true, the rationale for doing that. It would seem to open the City to litigation.

b. Virtual Workshops Recap

Recommended Action: Discuss the virtual workshops so far and takeaways from them. Receive an overview of the outreach plan timeline moving forward and provide feedback to staff and the consultant.

Senior Planner Zdeba reported the November 16 and 17, 2020, site suitability workshops obtained community input regarding potential density, scale, and attributes that could be applied to sites and the suitability of housing on the sites. Forty to 50 people attended each night, and dialog with the public was greater during the second workshop. The November 23 Circulation Element workshop included a good discussion with the community and solicited good feedback.

Jenna Tourje, Kearns & West, advised that the public provided good information through the chat feature, and she shared that information with all participants during the workshop.

Chair Tucker noted participants could offer multiple comments and were not limited to one 3-minute time period. Staff and the consultants have addressed the shortcomings of the first workshop.

In reply to Committee Member Sandland's inquiries, Ms. Tourje indicated recordings of workshops are available on newporttogether.com. The team is preparing an after-action report that will include key comments from the workshops and printouts of comments from the chat feature. The report should be ready in the next week. The team can capture comments regarding specific sites.

In answer to Committee Member DeSantis' queries, Ms. Tourje related that the team has been promoting the Newport Together website through ads, emails, and campaigns. Seventeen people have provided input on the map. Many people have visited the website without providing feedback on parcels. One thousand thirty-six unique IP addresses have visited the website over the past month. Currently, there is nothing tangible to which the public can respond. Senior Planner Zdeba added that the next utility bill will include a postcard regarding the January Circulation Element workshop. Hopefully, the postcard will drive a little more traffic to Newport Together and generate input. Staff is exploring contacting homeowners' associations (HOA) in the vicinity of the affected areas to generate interest.

Deborah Allen, Harbor View Hills Community Association President, commented that staff has attempted to make the process as transparent as possible and that she has heard good feedback from participants in the second workshop. Contacting HOAs with a list of sites should generate interest and input.

Nancy Scarbrough believed the format of the two workshops was much more interactive than previous workshops. Twelve to 13 of the participants were staff and committee members, and another ten were people who regularly attend public meetings. Some participants told her they left the workshops early because they did not feel their opinions would affect the outcome.

Chair Tucker advised that he sent an email about the workshops to 75 people who were likely to attend, and one email recipient attended the first night.

Adriana Fourcher encouraged the HEUAC to engage business owners in discussions of Airport Area sites.

Committee Member DeSantis suggested presenting information about specific sites to HOAs interested in those sites. Chair Tucker indicated the HEUAC needs to narrow the list of sites before talking to HOAs.

c. Housing Element Update Progress Documents
Recommended Action: Discuss, receive, and file.

David Barquist, Kimley-Horn and Associates, reviewed the five basic components of the Housing Element Update. Drafts of the Community Profile and Review of Past Performance components have been prepared.

Chair Tucker advised that this item will come back at the next meeting for additional thoughts and comments because of the substantial amount of information contained in the documents.

Mr. Barquist indicated there will be a number of opportunities to comment on the draft documents as the process progresses. For the Community Profile, the Government Code requires an assessment of housing needs and an inventory of resources and constraints, specifically an analysis of the population, employment trends, and household characteristics. The analysis tells stories about the community and assists with the development of policies and programs that address needs. The Review of Past Performance document evaluates the 2014-2021 Housing Element goals, objectives, policies, and programs to determine whether they contributed to attaining the State's housing goals and were effective in attaining the community's goals and objectives, and to determine the progress of the City in implementing the Housing Element. Past performance is a good basis for including policies from the fifth cycle in the sixth cycle. Many policy changes will relate to new and emerging needs.

In response to Committee Member Stevens' question, Mr. Barquist related that census data will not be available for this analysis. Much of the information is based on projections.

In reply to Committee Member DeSantis' inquiries, Mr. Barquist stated the HEUAC can discuss specific policies and explore options at any time. The subcommittees and staff have already begun the discussions. Chair Tucker added that the HEUAC and the public need to understand affordable housing in order to stimulate ideas about meeting the RHNA allocation. The HEUAC may not need to meet with affordable housing developers because one is a committee member. Talking with a developer may not be appropriate as developers will compete for any sites the update process generates. Committee Member DeSantis anticipated the HEUAC needing to explore the parameters of an inclusionary zoning policy. Chair Tucker indicated committee members and the public can ask questions about inclusionary zoning when the affordable housing subcommittee presents its report.

Adriana Fourcher noted the population growth forecast for the City of Newport Beach is 8.4 percent over the next 20 years. Meeting the RHNA numbers may result in more housing units than are actually needed. Building housing in the Airport Area may displace jobs.

Chair Tucker noted the HEUAC is tasked with complying with the RHNA allocation.

Jim Mosher commented that if the HEUAC oversees the writing of the Housing Element with public guidance, having an outline of the new Housing Element would be valuable. Misstatements of facts in the two documents detract from the credibility of the documents.

Hoiyin Ip appreciated the interesting presentation.

d. RHNA Sites Identification Strategy

Recommended Action: Receive an overview of a strategy to comply with the RHNA allocation through the sites inventory and alternative housing opportunities.

Mr. Barquist advised that Table B in the November 24, 2020 memo contains incorrect information. In the very low column, projects in the pipeline should be 135, the total should be 146, and the net remaining need should be 1,307. The text below the table will be revised accordingly. The City of Newport Beach has been allocated 4,834 housing units and has to identify sites that can accommodate that allocation through the planning period. After subtracting existing capacity, projects in the pipeline, and accessory dwelling units (ADU), the City's net remaining RHNA allocation is 1,307 very-low-income units, 831 low-income units, 1,022 moderate-income units, and

0 above-moderate-income units. The next step is to determine candidate sites that will subsequently undergo evaluation of their suitability for housing. The HEUAC has identified a number of candidate sites, and letters have been sent to the property owners to determine their interest in redeveloping their properties. A number of property owners have responded to the letters. Next, the net remaining need will be refined based on each property owner's interest in redevelopment, site conditions and constraints, statutory limitations and constraints, and prioritization of sites. Finally, the HEUAC, staff, and the community will begin to create policy and programmatic solutions to meet the unaccommodated need.

In reply to Chair Tucker's questions, Mr. Barquist reported the number of housing units generated by projects in the pipeline is correct, but the numbers are fluid due to assumptions. The law states that cities must identify RHNA obligations by income category, but it does not require a developer to identify affordability categories when developing a project. The City is obligated to ensure there is no net loss when projects are developed. If there is a net loss, the City has 120 days to provide rezoning that accommodates the net loss. Essentially, the City needs to accommodate more units than its RHNA obligation to avoid the net loss scenario. The California Department of Housing and Community Development's (HCD) general recommendation is to plan for 10 to 30 percent more units than allocated. If the HEUAC determines sites will not accommodate the full amount of growth, the Housing Element may contain a program of actions to address the deficiency. At the time of adoption, the Housing Element may identify all sites to accommodate the RHNA allocation or include a policy mechanism to identify all sites within three years.

Committee Member Stevens noted the City will need to create policies that encourage developers to include more units in the very-low and low-income categories in their projects.

In answer to Committee Member Sandland's queries, Mr. Barquist related that sites will be divided into the four categories. The sites inventory will list the seven descriptors for each site, and the required HCD form will provide the information.

Committee Member Sandland stated some sites will have to be identified for 100 percent affordable housing in order to meet the RHNA allocation.

Committee Member Kiley understood the HEUAC would identify sites, and the Council would develop policies, including a policy to fund 100 percent affordable housing. The City previously had a program that required developers to pay a fee for luxury residential developments, and the City used the funds for affordable housing. The City of Irvine has a similar program.

Chair Tucker noted affordable housing projects typically provide 50 or so units rather than 400 units. Financing for 100 percent affordable housing projects is more complicated than financing for any other type of affordable housing project. In-lieu fees are not sufficient to construct the number of affordable units for which the fees are paid.

Committee Member Fruchbom advised that more than \$0.5 billion would be needed to fund the required number of affordable housing units. The shortfall for each affordable housing unit is about \$250,000. The problem is exacerbated by higher costs and rents in Newport Beach.

Chair Tucker highlighted the difficulties of meeting the allocation for affordable units.

Committee Member Selich viewed the excess number of above-moderate units as increasing the total number of units needed. As developers build mainly above-moderate units and few very low,

low and moderate units, the City will be in a never-ending cycle of zoning for the no net loss scenario.

Committee Member Sandland remarked that the City will have to look to property owners with other economic interests. Perhaps employers and churches will be willing to give up a portion of their properties for housing in exchange for a concession.

In response to Committee Member DeSantis' inquiry, Mr. Barquist reported the total number of ADUs was based on the number of ADUs constructed in the City. HCD provides criteria for affordability of ADUs located in the Southern California Association of Governments (SCAG) region. The intent is to expand the opportunities for construction of ADUs through policies and programmatic enhancements.

Committee Member DeSantis noted Vancouver has imposed a tax on vacant units to fund affordable housing and has increased the tax three times in the past 12 months.

In answer to Committee Member Bloom's query, Mr. Barquist advised that the sites inventory does not have to include the feasibility of developing a site. Whether or not a site is developed as planned comes into play with the no net loss scenario.

Adriana Fourcher believed a tax or fee imposed to fund affordable housing would be passed to consumers. Imposing a tax on vacant homes conflicts with the City's concerns about VRBO and Airbnb. Property owners pay property taxes and should not have to pay a fee or rent their home if they choose to take an extended vacation.

David Tanner suggested the HEUAC develop estimates of in-lieu fees for units in the different affordability levels. He inquired about the penalty for the Housing Element not attaining its goals. Chair Tucker indicated the answer to Mr. Tanner's question is probably unknown at this point.

Nancy Scarbrough asked if Mayor O'Neill has contacted the City of Irvine about sharing information with the City. Chair Tucker indicated he has not received any information about it.

Jim Mosher remarked that Table B seems to reinforce the historical anomaly that Newport Beach has great difficulty producing moderate housing units. He inquired whether the production of moderate-income housing in Newport Beach is a real problem, whether the barriers are known, and whether it can be corrected. Chair Tucker suggested increasing density to 50 to 60 units per acre may generate moderate housing.

e. Formation of an Additional Sites Subcommittee

Recommended Action: Form an additional sites subcommittee to review the potential for housing sites within the 65 dB CNEL contour in the Airport Area.

Chair Tucker reported a property owner has expressed interest in developing housing on his property located within the 65 dB CNEL area. Building housing within the 65 dB CNEL is not unlawful, but the interior noise level must be mitigated to below the noise threshold. The Mayor has suggested a subcommittee explore the feasibility of developing properties within the 65 dB CNEL contour.

Chair Tucker appointed Committee Members Sandland and DeSantis to the Additional Sites Subcommittee.

David Tanner advised that the noise standard for the exterior living environment is 65 dB and for the interior living environment is 45 dB. He suggested the Additional Sites Subcommittee consult with a noise consultant or the City's CEQA consultant to learn the law on this topic. This will result in nothing more than litigation for the City.

Committee Member Sandland was aware of apartment buildings being constructed within the 65 dB CNEL and adjacent to freeways in other cities.

Fred Fourcher indicated his office is located beneath the flight path of the left runway at John Wayne Airport and outside the 65 dB CNEL area. He cannot have his windows open and conduct phone calls because aircraft noise is too loud. The area is not hospitable for people attempting to enjoy the outdoors.

VI. ADJOURNMENT – 8:25 p.m.

Next Meeting: January 6, 2021, 6 p.m. in the City Council Chambers.

**CITY OF NEWPORT BEACH
HOUSING ELEMENT UPDATE ADVISORY COMMITTEE MINUTES
ZOOM MEETING, NEWPORT BEACH, CA**

**WEDNESDAY, JANUARY 20, 2021
REGULAR MEETING – 6 P.M.**

I. CALL MEETING TO ORDER – 6 p.m.

II. WELCOME AND ROLL CALL

MEMBERS PRESENT: Chair Larry Tucker, Jeffrey Bloom, Susan DeSantis, Elizabeth Kiley, Geoffrey LePlastrier, Stephen Sandland, Debbie Stevens, (Ex Officio Member) Will O'Neill

MEMBERS ABSENT: Paul Fruchbom

Staff Present: Community Development Director Seimone Jurjis, Deputy Community Development Director Jim Campbell, Principal Planner Jaime Murillo, Senior Planner Ben Zdeba, Administrative Support Specialist Clarivel Rodriguez

III. PUBLIC COMMENTS ON NON-AGENDA ITEMS

None

IV. CONSENT CALENDAR

a. Minutes of the December 2, 2020 Meeting

Recommended Action: Approve and file the minutes of December 2, 2020.

Committee Member Sandland moved, seconded by Committee Member DeSantis to approve the minutes of the December 2, 2020 meeting as presented.

AYE: Tucker, Bloom, DeSantis, Kiley, LePlastrier, Sandland, Selich, Stevens

NO: None

ABSTAIN: None

ABSENT: Fruchbom

V. CURRENT BUSINESS

a. Subcommittee Progress Reports

Recommended Action: Receive verbal updates from each subcommittee, as appropriate.

In answer to Chair Tucker's inquiry, Senior Planner Ben Zdeba advised that the update of parcel numbers for the map of the remainder of town and information for the 65 decibel (dB) Community Noise Equivalent Level (CNEL) subcommittee hopefully will be ready on January 21, 2021.

Chair Tucker indicated that he will finalize reports for the Airport Area, the Hoag industrial area, and the remainder of town and ask staff to attach them to an agenda. Committee Member Sandland

will report regarding the safety zones and the noise contour of the 65 dB CNEL area later in the meeting, and the Housing Element Update Advisory Committee (HEUAC) will review sites in the 65 dB CNEL at the next meeting.

In response to Committee Member Stevens' inquiry, Committee Member Sandland stated there are approximately 200 properties in the 65 dB CNEL area.

b. Housing Element Update Progress Documents

Recommended Action: Discuss, receive, and file.

Chair Tucker recalled that committee members did not have sufficient time to review the voluminous Community Profile and Review of Past Performance documents provided for the December 2, 2020 meeting. Consequently, he had requested this agenda item for committee members to provide comments and ask questions.

c. Update on Property Owner Responses

Recommended Action: Receive an update from staff on the progress being made with receiving responses from property owners of properties identified as either "potentially feasible" or "feasible."

Chair Tucker recalled the HEUAC's desire to learn of property owners' interest in redeveloping their properties prior to discussing the suitability of properties for redevelopment.

Deputy Community Development Director Jim Campbell reported that the letter attached to the staff report was sent to several hundred property owners and some owners of mobile homes. Staff has received many calls and some emails from owners.

Senior Planner Zdeba advised that he informs mobile homeowners who respond to the letter about the Newport Together website to be involved in the process. Staff sent the letter to about 500 people, including mobile homeowners. Of note, Tait has expressed interest in redeveloping the Coyote Canyon landfill site. Some property owners have indicated no interest in redeveloping their properties. Staff does not attempt to change the property owners' minds but ensures they understand the process and the opportunities. Staff has received mixed interest from property owners in the Airport Area, Newport Center, Corporate Plaza, and the Dover Westcliff area. Staff is compiling the responses in a spreadsheet.

In reply to Chair Tucker's inquiry, Senior Planner Zdeba estimated 50-75 property owners and mobile homeowners have responded to the letter.

Deputy Community Development Director Campbell indicated that he has scheduled a meeting with Tait Engineering to discuss preliminary concept plans and densities for the Coyote Canyon site. The County of Orange (County), the landfill property owner, submitted a letter expressing support for the effort. Russ Fluter, who owns the Palisades Tennis Club site and several properties in Mariners' Mile, has expressed interest in redevelopment and offered to contact the Hyatt Regency about the adjacent golf course. Owners of some of the mobile home parks on 15th Street are interested in increased density. The owners of Banning Ranch continue to discuss the possibility of public acquisition of Banning Ranch for open space. If that does not occur, the owners will probably be interested in a project. Property owners in Cannery Village have responded to the letter. While the lots in Cannery Village are small, they can accommodate at least one or two

residential units. The consultant will use the spreadsheet of property owners' responses in their analysis of all sites to produce a draft list for the HEUAC in February.

In answer to Chair Tucker's questions, Deputy Community Development Director Campbell related that staff can send follow-up letters to property owners who have not responded and whose properties can accommodate a significant number of units. For the February 17, 2021 meeting, staff can provide a list of acreages based on parcel sizes and propose some densities for discussion purposes. Based on Tait's representations, the 32-acre site at Coyote Canyon is technically neither a landfill nor habitat area. Staff is attempting to confirm that it is not included in a Natural Community Conservation Plan (NCCP) / Habitat Conservation Plan.

In reply to Committee Member Sandland's and Chair Tucker's questions, Deputy Community Development Director Campbell stated he will contact Newport-Mesa Unified School District (NMUSD) about its property adjacent to Banning Ranch. Most of the NMUSD property is located within the city limits. A letter was not sent to Hoag Hospital, but staff will contact Hoag immediately. Senior Planner Zdeba clarified that letters were sent to NMUSD and Hoag Hospital.

Council Member O'Neill requested staff notify him of the date of the HEUAC's discussion of the Coyote Canyon site as he needs to ensure community members are aware of the discussion.

In response to Chair Tucker's inquiry, Deputy Community Development Director Campbell explained that staff intends to submit a draft sites inventory with a progress draft of the Housing Element to the California Department of Housing and Community Development (HCD) in mid-May. David Barquist, Kimley-Horn and Associates, reported the submission needs to contain all requisite documents and analyses and should contain the majority of the City's policy direction.

In reply to Committee Member DeSantis' query, Deputy Community Development Director Campbell indicated a letter was sent to the owners of the Newport Beach Golf Course, and they have expressed interest in redeveloping the golf course for housing, particularly the portion located south of Irvine Avenue. If the site is deemed suitable, its priority may be lower because of its proximity to John Wayne Airport (JWA).

Dorothy Kraus requested the name of the entity that has expressed interest in developing Banning Ranch and notification of discussions with Newport Banning Ranch (NBR) regarding a possible project.

Community Development Director Seimone Jurjis clarified that staff is actively discussing some level of development on the property with its owner, Newport Banning Ranch, LLC, as a backup plan if public acquisition of the property does not occur.

Nancy Scarbrough noted the Banning Ranch and Coyote Canyon sites are located in the county and inquired regarding the City or the County counting any housing units developed on the sites toward the Regional Housing Needs Assessment (RHNA) numbers.

Chair Tucker believed the County owns the Coyote Canyon site, but it is in the city. The Banning Ranch site is located almost entirely in the county. Deputy Community Development Director Campbell clarified that housing on the portion of the Banning Ranch site located in the city can be counted toward the City's RHNA. If the City annexes the remainder of the site, the City and the County will negotiate RHNA issues.

In answer to Chair Tucker's queries, Deputy Community Development Director Campbell explained that in order to count housing approved for the Banning Ranch site, the City has to show substantial evidence that the housing will be built during the planning cycle. Given the Coastal Commission's oversight of the site and annexation issues, convincing HCD that housing will be built may be difficult. If the number of sites for housing is limited, development of the Banning Ranch site may have to be considered. The City, Newport Banning Ranch, and the Coastal Commission are discussing possible development of the least environmentally constrained portion of the site. He indicated he has not received a response from the Irvine Company, but the Irvine Company may have responded to Community Development Director Jurjis or the Mayor.

Council Member O'Neill advised that the Irvine Company contacted the City Manager, who requested the Irvine Company respond in writing.

d. Affordable Housing Subcommittee Memorandum

Recommended Action: Discuss the draft memorandum and receive comments from the Committee and the public.

Chair Tucker reported affordable housing is a very complicated issue. Virtually all affordable housing projects are tied to 9% tax credits, which are allocated to each state on a per capita basis. Each state allocates the tax credits to projects. Affordable housing projects compete for a limited number of tax credits and typically seek multiple funding sources. Generally, a subsidy or incentive offsets the reduced rent charged for an affordable unit. There are currently two federal programs and one State program. Inclusionary housing ordinances are cities' efforts to encourage affordable housing projects through granting entitlements, waiving fees, and/or altering development standards. For an affordable housing project to be financially viable, the land cost has to be very low. The no net loss law requires a jurisdiction to account for affordable units that are listed on an approved sites inventory but not built as listed. The report contains policies and potential strategy alternatives for the Council's and public's consideration. HCD has determined that 68% of the accessory dwelling units (ADU) projected for the planning cycle may be credited toward the City's lower-income RHNA number. The City will have to achieve a performance metric for construction of ADUs or face repercussions.

Principal Planner Jaime Murillo advised that since 2018, 78 ADU applications have been approved or are under review, which is approximately 25 ADUs per year. Over the next eight-year cycle, the projection is about 200 ADUs. The projection will have to be supported by a policy that aggressively promotes and incentivizes ADUs. Ultimately, HCD will want the City to commit to a monitoring program and provide a backup plan if it fails to meet estimates for ADUs. HCD will accept some assumed affordability rates for ADUs.

Chair Tucker remarked that if the City seeks a higher number of ADUs, it will need to implement a program to promote ADUs. Some residents may be unhappy with the program if a neighbor constructs an ADU such that it obstructs the light and air on their property.

Committee Member Kiley noted the projection of 25 ADUs per year does not consider the State law that eliminates most restrictions on ADU construction. Principal Planner Murillo explained that staff is debating the impact of the law on the number of ADUs with HCD. The number of ADU applications was small in 2018, increased in 2019, and was quite large in 2020. Staff has considered using the trend to exponentially increase the projection for ADUs. If the projection is aggressively large, HCD will probably require monitoring and support for the projection.

Committee Member Stevens appreciated the affordable housing report because it simplifies a complex issue. In response to her inquiry, Chair Tucker related that the total amount of 9% tax credits is negotiated through Congress. Federal and state governments place regulations on the use of the tax credits.

Committee Member Bloom related that Amazon recently announced a \$560 million investment in the preservation and protection of 2,300 units in the Seattle area. That is a subsidy of approximately \$243,000 per unit and demonstrates the magnitude of subsidies required for affordable housing.

Council Member O'Neill stated the City's RHNA for very-low-income units is 1,451. Using a loss of value of \$494,000 per unit, constructing the RHNA requirement will require almost \$717 million in subsidies. Chair Tucker clarified that the loss of value analysis in the report does not include the value enhancement of the City granting entitlements for projects. A loss of value analysis is nuanced and needs to be conducted for each project. The relevant point is that there is a limit to the number of affordable units a project can provide and remain financially viable.

Hoiyin Ip remarked that some residents may not appreciate having a 100% affordable housing project in their neighborhood. The California Energy Commission is hosting a conference about sustainable affordable housing, and one of the topics is funding.

Chair Tucker clarified that 100% affordable housing projects and projects with a mix of housing individually do not provide a large number of affordable units. In order to achieve the number of affordable units in the RHNA, the City will need many market-rate units to subsidize the affordable units.

In answer to Committee Member DeSantis' inquiry, Principal Planner Murillo indicated a property owner related to him a cost of around \$80,000 to convert a garage to an ADU. New construction could cost as much as \$200,000-\$300,000. Mr. Barquist advised that an estimate of \$10,000 for an ADU conversion is extremely low.

e. Update Schedule Moving Forward

Recommended Action: Receive an overview of the schedule moving forward and discuss, as necessary.

Deputy Community Development Director Campbell reported on February 17, 2021, the HEUAC will begin the policy discussion. A virtual public workshop is scheduled for February 24. Staff will present a draft Housing Element Update to the HEUAC on March 17, the public on March 22, the Planning Commission on April 7, and the Council on April 27. Once HCD provides its comments on the progress draft, staff can schedule additional meetings.

In response to Chair Tucker's questions, Deputy Community Development Director Campbell advised that the February 17 sites analysis discussion will begin with entitled projects that are eligible for the Housing Element Update and a placeholder for ADUs and move to sites that can provide units to fill the gap between the RHNA requirement and the number of units provided by entitled projects and ADUs. The discussion will include property owner interest, densities, and constraints. The progress draft needs to correlate policies and the availability of sites. HCD may have difficulty understanding the breadth of housing policies if the sites inventory is not part of the progress draft. The sites inventory will be refined over the summer. Also on February 17, staff will present an initial narrative and outline of the project description for the Environmental Impact Report (EIR).

Chair Tucker recommended scheduling an HEUAC meeting on March 3, 2021 to continue discussion of the sites inventory and obtain additional public feedback.

Committee Member Sandland suggested moving discussion of the 65 dB CNEL area, including safety zones and the contour, to February 3 to provide more time for the sites analysis discussion on February 17.

In reply to Committee Member Stevens' question, Principal Planner Murillo reported the City's appeal of Santa Ana's RHNA allocation was heard and denied on Friday. The City's appeal of its RHNA allocation was heard and denied on January 19. Of the many appeals filed, the County of Riverside's appeal is the only one to be granted thus far, and it may result in a small increase in the City's allocation. The Southern California Association of Governments (SCAG) has not yet determined if it will litigate the State's regional allocations.

Committee Member Kiley suggested discussions with the Irvine Company about further development of Newport Center should be a priority. Deputy Community Development Director Campbell indicated receipt of the Irvine Company's letter, depending on its content, will open discussions between the Mayor, Community Development Director Jurjis, or Deputy Community Development Director Campbell and the Irvine Company's executive management. Council Member O'Neill clarified that the Irvine Company's communication with the City Manager appears to indicate the Irvine Company does not intend to engage significantly in a discussion of the City's RHNA allocation. Consequently, the City Manager requested a written response.

Committee Member DeSantis requested an update regarding housing legislation that takes effect in 2021 and requested staff update and provide the memorandum of housing legislation prepared for the General Plan Update Steering Committee.

Deputy Community Development Director Campbell advised that staff will explore updating the housing legislation memorandum. An update regarding recent legislation can be scheduled for a future meeting.

Chair Tucker preferred a legislative update focus on legislation that affects site selection and the sites inventory.

VI. ADJOURNMENT – 7:49 p.m.

Next Meeting: February 3, 2021, 6:00 p.m. via Zoom.

**CITY OF NEWPORT BEACH
HOUSING ELEMENT UPDATE ADVISORY COMMITTEE MINUTES
ZOOM MEETING, NEWPORT BEACH, CA**

**WEDNESDAY, FEBRUARY 3, 2021
REGULAR MEETING – 6 P.M.**

I. CALL MEETING TO ORDER – 6 p.m.

II. WELCOME AND ROLL CALL

MEMBERS PRESENT: Chair Larry Tucker, Jeffrey Bloom, Susan DeSantis, Paul Fruchbom, Elizabeth Kiley, Geoffrey LePlastrier, Stephen Sandland, Debbie Stevens (joined at 6:06 p.m.), Will O'Neill (Ex Officio) (joined at 6:03 p.m.)

MEMBERS ABSENT: None

Staff Present: Community Development Director Seimone Jurjis, Deputy Community Development Director Jim Campbell, Principal Planner Jaime Murillo, Senior Planner Ben Zdeba, Administrative Support Specialist Clarivel Rodriguez

III. PUBLIC COMMENTS ON NON-AGENDA ITEMS

Jim Mosher expressed surprise to learn of an unscheduled vacancy on the Housing Element Update Advisory Committee (Committee) and the qualifications for the position. The enabling resolution does not contain a position with the qualifications listed for the vacant position. Also, the enabling resolution designates the current Mayor as the Council's representative to the Committee, and Council Member O'Neill is no longer Mayor.

IV. CONSENT CALENDAR

a. Minutes of January 20, 2021 Meeting

Recommended Action: Approve and file the minutes of January 20, 2021.

Chair Tucker moved, seconded by Committee Member Bloom to approve the minutes of the January 20, 2021 meeting with revisions proposed by Jim Mosher, Hoiyin Ip, and Chair Tucker.

AYE: Tucker, Bloom, DeSantis, Fruchbom, Kiley, LePlastrier, Sandland
NO: None
ABSTAIN: None
ABSENT: Stevens

V. CURRENT BUSINESS

a. Subcommittee Progress Reports

Recommended Action: Receive verbal updates from each subcommittee, as appropriate.

Chair Tucker reported he provides the affordable housing memorandum to parties who contact him about affordable housing. Based on comments submitted to him, he will revise the memorandum and circulate it to the Affordable Housing Subcommittee for approval. In addition, he received requested information for the memorandum pertaining to sites in the remainder of town after the agenda deadline for the current meeting. Updated memoranda will be placed on the agenda for the next Committee meeting.

b. Feasibility of Housing in the 65 dB CNEL and Subcommittee Action Report

Recommended Action: Receive an update from Committee Members Sandland and DeSantis on their exploration of properties as being "potentially feasible," "feasible," or "infeasible" within the 65 dB CNEL areas near the John Wayne Airport. Discuss the analysis prepared and receive and file.

Committee Member Sandland advised that the subcommittee only considered parcels that were physically able to accommodate housing in place of or in addition to the current use of the parcels. Parcels were designated as feasible, potentially feasible, and infeasible. He provided the subcommittee's criteria for designating sites as feasible, potentially feasible, and infeasible. Parcels that are overlaid with a CNEL contour greater than 70 dB were deemed infeasible. The Airport Land Use Commission (ALUC) has established Site Safety Compatibility policies. Zones 1 and 2, Runway Protection Zones, prohibit residential uses within the zones. Zone 3 is the Inner Turning Zone. Zone 4 is the Outer Approach/Departure Zone, and the basic compatibility indicates residential uses should be limited to low density. Zone 5 contains properties immediately adjacent to the runway and prohibits residential uses. Zone 6 is called the Traffic Pattern Zone. The compatibility policies state that residential land uses shall be allowed in this area. The subcommittee considered these basic compatibility qualities and determined that Zones 1-5 would be infeasible, and Zone 6 could be considered feasible or potentially feasible. John Wayne Airport (JWA) and the City both utilize CNEL contours of 65 and 70 dB, and the subcommittee did not explore alternatives. The subcommittee does not have all the facts regarding the various parcels; therefore, the designations are subjective. Some of the parcels could be reclassified as feasible, potentially feasible, or infeasible. Staff will contact the owners of properties identified as feasible or potentially feasible. Before the Committee approves any parcel for the site inventory list and after public input, the Committee would have to find that housing is a suitable use. Additional deliberations regarding suitability will involve density and could involve development standards. The subcommittee does not endorse housing on any particular site but has narrowed the list of sites that staff will review and that the Committee will consider adding to the site inventory after receiving public input.

Jim Mosher remarked that the 65 dB contour is very old. The actual contour changes with the flight patterns of aircraft departing JWA. The 65 dB contour has contracted such that almost all of Campus Drive is located outside the contour.

Chair Tucker noted the Committee did not consider the 65 dB area initially but may have to if sites are needed.

Deputy Community Development Director Jim Campbell agreed with Mr. Mosher in that noise contours change with traffic at JWA. For planning purposes, the adopted Airport Environs Land Use Plan is the determining factor. Staff anticipates a change over time but not a remarkable change. Some of these sites may be needed to fill a gap between required and identified sites. Sites within the 65 dB noise contour may be the last sites included on the list because of noise.

Chair Tucker added that there may be more opportunities for more affordable units at these sites.

Brett Feuerstein, owner of a portion of the Newport Beach Golf Course, indicated the property is located within the 65 dB CNEL and split between Zones 6 and 4. If the City needs to utilize sites within the 65 dB contour, the property would be perfect for some type of residential use. Based on his interpretation of the Airport Safety Zones, a residential use located in Zone 4 should have a density equal to the average density of all surrounding uses. If needed, the property could provide up to 100 units

Chair Tucker requested staff review the details of Zone 4 because the summary language for Zone 4 is confusing.

In response to Committee Member Kiley's inquiry, Mr. Feuerstein felt a density that provided more than 100 units might be aggressive for Zone 4. The portion of his property located in Zone 6 could provide up to 50 units per acre.

Committee Member Sandland reviewed the subcommittee's designations for Parcels 1, 1.5, 2, 3, 4, 6, 7, 8, 11, 48, 50, and 9. At the Committee's request, Committee Member Sandland only went over Parcels 17, 19, 21, 22, 29, 24, 41, 41.1, 114, 115, 119, 122, 123, 124, 125, 126, 128, 129, 142, 141, 146, 147-155, 158, 163, 165-169, 156, 157, 159, 160, 161, 189, 190, and 191, which the subcommittee designated as feasible or potentially feasible.

Committee Member Bloom noted that constructing a parking structure on the portion of the Newport Beach Golf Course property located in Zone 4 and constructing residential uses on the portion in Zone 6 may be feasible.

Committee Member Stevens concurred with Mr. Mosher's concern about relying on old data, equipment, and aircraft and with Deputy Community Development Director Campbell's comment that this is the data we are stuck with. The subcommittee handled the analyses well and found some potentially decent-sized parcels.

Chair Tucker related that the Council will have to deal with the safety issue if units within the 65 dB CNEL contour are needed to meet the Regional Housing Needs Assessment (RHNA) number.

Committee Member Sandland added that the subcommittee attempted to follow policies from the Basic Compatibility Qualities.

Charles Klobe remarked that Mr. Feuerstein proposed low-income housing in the form of condominiums and questioned whether Mr. Feuerstein understands that the Committee is looking for low- to very-low-income units.

Chair Tucker clarified that some of the property may be condominiums, but they would not be affordable housing. Nothing will be built if the burdens of affordability render projects infeasible. The State will have to confront the low-income issues when it reviews Housing Elements submitted by 197 jurisdictions.

Deborah Allen felt a residential project at the Newport Beach Golf Course would be wildly popular with the Newport Beach community regardless of density and affordability because development would constrain John Wayne Airport's (JWA) expansion.

c. Approach for Accessory Dwelling Units (ADU)

Recommended Action: Receive an overview of the possible approaches for using ADUs to count towards the RHNA requirement.

Chair Tucker commented that ADUs as potential units are different from other housing types. Assumptions have to be made in estimating the number of units that will be built. The City will receive credit for ADUs at certain affordability levels that are quite attractive. The disadvantage to ADUs is they may be built next to neighbors who are not expecting them. The Council will have to set the policies.

David Barquist, Kimley Horn and Associates, reported the memorandum describes the process and considerations for ADUs. Attached to the memo are the Southern California Association of Governments' (SCAG) methodology and excerpts from the Site Inventory Guidebook developed by the California Department of Housing and Community Development (HCD). ADUs are one strategy to accommodate growth needs, and single-family residences and multifamily developments will be needed to accommodate growth. HCD's approach to counting ADUs is called the Safe Harbor Approach and utilizes historical trends to project a yearly average of production over the course of the planning period. This approach eliminates the need to calculate affordability levels. Supplemental policies and programs may be needed to encourage development of ADUs.

In response to Committee Member Fruchbom's query, Mr. Barquist indicated ADU production has been approximately 25 units per year, and projecting that over the planning period provides the City's Safe Harbor.

Mr. Barquist continued the presentation, stating the ADU unit yield is 200 for the planning period. The City may take a more aggressive approach and adopt policies and programs that support a more aggressive approach. HCD will review these aggressive approaches on a case-by-case basis. The City is obligated to perform to the aggressive approach through the planning period and should balance its vision with a realistic projection to avoid no net loss implications.

In answer to Chair Tucker's inquiries, Mr. Barquist explained that theoretically the City could accommodate 4,834 ADUs. The question is the realistic number of ADUs that can be built during the planning period because the City is obligated to produce that number of ADUs. The Council will have to balance the tensions among the policies it creates for each type of housing. In his experience, jurisdictions are utilizing the Safe Harbor Approach.

Principal Planner Jaime Murillo advised that housing laws require the City to plan and zone for a variety of housing types and different densities. ADUs are viewed as an alternative to the sites inventory. HCD staff has stated clearly that the Safe Harbor Approach is acceptable, but they are open to an aggressive approach. Because the majority of ADU applications are pending in plan check, staff has to ensure the ADU projections for the Safe Harbor Approach are appropriate. A projection of 1,000 ADUs may be aggressive. While ADUs are allowed in any residential zone, there has to be a demand for ADUs. HCD will likely request a monitoring program for an aggressive approach. If the City does not meet its production targets, HCD will require the City to find alternative sites.

In reply to Committee Member Stevens' queries, Principal Planner Murillo stated HCD will probably not require monitoring for a Safe Harbor Approach. However, recent conversations with HCD staff seem to indicate monitoring may be required for a Safe Harbor Approach. Mr. Barquist indicated

the City may adjust its zoning for other housing types if ADU production exceeds projections. Basically, the City has to show it can accommodate its unaccommodated need.

In answer to Committee Member Sandland's question, Chair Tucker reiterated that the City would have to justify its ADU projections regardless of the method for calculating the projections.

Committee Member LePlastrier indicated he is working with family members to plan an ADU. The cost for a freestanding ADU is approximately \$300 per square foot.

Committee Member Kiley believed a projection of 400 ADUs is realistic with the recent changes in housing laws. An amnesty program for existing illegal ADUs could capture additional units. Projecting the number of ADUs based on a percentage of single-family lots is reasonable.

Committee Member DeSantis concurred with the feasibility of a projection for more than 200 ADUs. San Diego is exploring ways to provide financing and preapproved architectural drawings and site plans for ADUs. Using best practices from other Southern California cities, the City should be able to craft a program that will support an increase in the projections. Developing a program that makes sense for Newport Beach, is supported by the community, and facilitates this is reasonable.

In response to Committee Member Kiley's inquiry, Committee Member DeSantis advised that staff has access to the Turner report and the website for best practices.

Nancy Scarbrough supported an aggressive approach because there is no history for ADUs. With education, Newport Beach residents would probably strongly prefer 2,000 ADUs over tens of thousands of high-density units concentrated in the City. Once the City zones for high-density projects, it will be impossible to reduce that zoning.

Charles Klobe supported an aggressive approach. The report indicates Newport Beach's historical rent for an ADU is approximately half that reported in other jurisdictions. That history of low rent should support an aggressive approach for low- and very-low-income ADUs. Achieving 2,000 ADUs over the next nine years is highly likely.

Chair Tucker commented that affordable units have to happen on private property, and private developers are not going to lose money to build affordable housing. The construction of affordable units just is not going to happen as designed.

VI. ADJOURNMENT – 7:42 p.m.

Chair Tucker noted on March 17, 2021 the Committee is scheduled to make a recommendation for the Planning Commission and City Council to consider in April. The Committee will likely continue working on the sites inventory after it makes a recommendation.

Deputy Community Development Director Campbell reported a first housing opportunities list will be presented at the next meeting. A public workshop regarding the policy framework and the first sites analysis is scheduled for February 24th. The process will repeat in March. The Council study session on February 9, 2021 will include the RHNA appeal, the Committee's progress, and ADUs.

In answer to Committee Member DeSantis's question, Deputy Community Development Director Campbell related that a workshop for the Circulation Element will be held on February 10.

Next Meeting: February 17, 2021, 6 p.m. via Zoom.
