

# *Upgrade and Save!*

## **Reduce Your Water Use With Water Efficient Devices**

Orange County water providers are offering rebates on water-saving devices that can help you reduce your water bill. Rebates are currently being offered on high efficiency clothes washers, smart irrigation controllers, and rotating sprinkler nozzles. Get your rebate now and help preserve our water resources!

# Water Use Efficiency Rebate Programs

## Rotating Nozzle Rebate Program

Up to 70% of the water used at Orange County homes is used for watering landscape. You can reduce water waste and eliminate water runoff by replacing traditional sprinkler heads with rotating sprinkler nozzles. Rotating nozzles water more uniformly and efficiently than traditional sprinkler heads, reducing your outdoor water use by up to 30%.

## High Efficiency Clothes Washer Rebate Program

Did you know that high efficiency clothes washers use 55% less water than standard clothes washers? Less water means less energy needed for heating water, which can help lower your energy bill as well.

## Smart Controller Rebate Program

Replace your basic irrigation timer with a “smart” irrigation controller. Smart controllers use information about your plants, soil, slope, and weather conditions to give your landscape the right amount of water. This helps reduce the amount of water runoff that flows off your property and eventually enters the ocean.
