

BALBOA TRUNK SEWER REHABILITATION

Construction Update

Anticipated Completion: June 2014
Contractor work hours are
7 a.m. - 6 p.m.
Mondays - Fridays

The corresponding intersections will be closed to cross traffic intermittently for the duration of the project.

Some work may require 24 hour operations. OCSD and the contractor will take measures to ensure that noise is kept to a minimum.

Occasional lane closures will be necessary. Balboa Blvd. will remain open to thru traffic.

Parking along the median will be restricted. To avoid citation, please obey the parking restrictions.

Street sweeping will be suspended in the active construction areas in order to minimize parking impacts. Signs will be covered to show that parking is allowed during normal street sweeping times.

During times of construction, residents may notice a sweet smelling odor. This odor is caused from Styrene, a colorless liquid used in part of the pipeline installation process. The styrene levels during this process are below permissible exposure limits - and will not pose any hazardous conditions, even for the crews working on the pipeline.

For Updated Project Information
Please call our Construction Hotline at
(714) 679-2088 or email us at
