BOND MARKET OVERVIEW

For the Month Ended

March 31, 2016

- Real average hourly earnings for all employees increased 0.2% from February to March, seasonally adjusted. This result stems from a 0.3% increase in average hourly earnings being partially offset by a 0.1% increase in the Consumer Price Index for All Urban Consumers. (U.S. Bureau of Labor Statistics)
- Regional and state unemployment rates were little changed in March. The national jobless rate, 5.0%, was little changed from February and was 0.5% lower than in March 2015. (U.S. Bureau of Labor Statistics)
- The Consumer Price Index for All Urban Consumers increased 0.1% in March on a seasonally adjusted basis. Over the last 12 months, the all items index rose 0.9% before seasonal adjustment. (U.S. Bureau of Labor Statistics)

* The Transaction Detail/Trading Activity reports provide our most up-to-date transactional details. As such, these reports are subject to change even after the other reports on the website have been locked down. While these reports can be useful tools in understanding recent activity, due to their dynamic nature we do not recommend using them for booking journal entries or reconciliation.

GLOSSARY OF TERMS

- **Accrued Interest** - The interest that has accumulated on a bond since the last interest payment up to, but not including, the settlement date. Accrued interest occurs as a result of the difference in timing of cash flows and the measurement of these cash flows.
- **Amortized Cost** - The amount at which an investment is acquired, adjusted for accretion, amortization, and collection of cash.
- **Average Credit Rating** - The average credit worthiness of a portfolio, weighted in proportion to the dollar amount that is invested in the portfolio.
- **Convexity** - The relationship between bond prices and bond yields that demonstrates how the duration of a bond changes as the interest rate changes.
- **Credit Rating** - An assessment of the credit worthiness of an entity with respect to a particular financial obligation. The credit rating is inversely related to the possibility of debt default.
- **Duration** - A measure of the exposure to interest rate risk and sensitivity to price fluctuation of fixed-income investments. Duration is expressed as a number of years.
- **Fair Value** - The price that a given property or asset would fetch in the open marketplace.
- **Income Return** - The percentage of the total return generated by the income from interest or dividends.
- **Market Value** - An assets fair value plus any accrued interest.
- **Original Cost** - The original cost of an asset takes into consideration all of the costs that can be attributed to its purchase and to putting the asset to use.
- **Par Value** - The face value of a bond. Par value is important for a bond or fixed-income instrument because it determines its maturity value as well as the dollar value of coupon payments.
- **Price Return** - The percentage of the total return generated by capital appreciation due to changes in the market price of an asset.
- **Purchase Yield** -The measure of a bond's recurring realized investment income that combines both the bond's coupon return plus it amortization.
- **Total Return** - The actual rate of return of an investment over a given evaluation period. Total return is the combination of income and price return.
- **Unrealized Gains/(Loss)** - a profitable/(losing) position that has yet to be cashed in. The actual gain/(loss) is not realized until the position is closed. A position with an unrealized gain may eventually turn into a position with an unrealized loss, as the market fluctuates and vice versa.
- **Weighted Average Effective Maturity** – The average time it takes for securities in a portfolio to mature, taking into account the possibility that any of the bonds might be called back to the issuer.
- **Weighted Average Life** - The average number of years for which each dollar of unpaid principal on an investment remains outstanding, weighted by the size of each principal payout.
- **Weighted Average Maturity** - The average time it takes for securities in a portfolio to mature, weighted in proportion to the dollar amount that is invested in the portfolio. Weighted average maturity measures the sensitivity of fixed-income portfolios to interest rate changes.
- **Yield** - The income return on an investment. This refers to the interest or dividends received from a security and is expressed as a percentage based on the investment's cost and its current market value.
- **Yield to Maturity at Cost (YTM @ Cost)** - The internal rate of return anticipated on a bond if held until the end of its lifetime.
- **Yield to Maturity at Market (YTM @ Market)** - The internal rate of return of a bond adjusted for any capital gains or losses the price represents relative to the current market value.
