

# Adding eBooks to the Nook Classic/Glowlight from Overdrive on Windows

To begin, visit the Newport Beach Public Library website at [www.newportbeachlibrary.org](http://www.newportbeachlibrary.org). Move your mouse cursor to the **eBranch** tab and click on the **eBooks** link from the drop down menu. To check out books from Overdrive, click in the blue Overdrive button on the page.

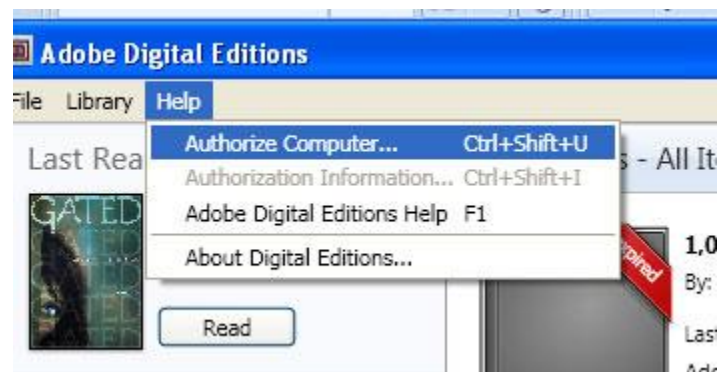

## Setting Up Adobe Digital Editions

Before checking out eBooks from Overdrive, it is recommended that you have Adobe Digital Editions installed and authorized on your computer. To do this, download the software (for free) from <http://www.adobe.com/products/digital-editions/download.html>. Be sure to click the WINDOWS download option.

Download and install Adobe Digital Editions. If you already have an older version of the software, you will have the opportunity to transfer previously downloaded titles to the new version.

Once Adobe Digital Editions has been installed, the program will launch. To authorize your computer to receive eBooks, click **Help** from the toolbar and select **Authorize Computer**.

You may get a notice saying that your computer is not authorized. If so, click the Continue button. You will reach a screen asking you to sign in with an Adobe ID. If you already have an Adobe ID, put in your information and click **Authorize**.

The screenshot shows a dialog box titled "Computer Authorization" for Adobe Digital Editions. The main heading is "Authorize Your Computer". Below this, it explains that authorizing the computer enables users to: easily transfer DRM items, read DRM items on up to three computers and three mobile devices, and restore content from backup. The user is prompted to "Enter your login ID and password below". There are three input fields: "eBook Vendor" (a dropdown menu currently showing "Adobe ID"), "Adobe ID", and "Password". To the right of the "eBook Vendor" field is a link "Create an Adobe ID". To the right of the "Password" field is a link "I forgot my password". At the bottom of the dialog, there are three buttons: "Cancel", "Go Back", and "Authorize".

If you do not have an Adobe ID, click the **Create an Adobe ID** link. You'll be taken to Adobe's website to make one. Just supply a current, valid email address and password along with your full name. Write down your password! If you forget it, you will need to go through Adobe to reset it. When finished, type your Adobe ID into Adobe Digital Editions and click **Authorize**. Your computer is now ready to receive eBooks!

## Transferring eBooks To Your Nook

Search for and check out a book from Overdrive. For more information on this process, please visit [http://newportbeachlibrary.org/sites/review.nbpl.org/files/Searching%20Overdrive\\_0.pdf](http://newportbeachlibrary.org/sites/review.nbpl.org/files/Searching%20Overdrive_0.pdf)

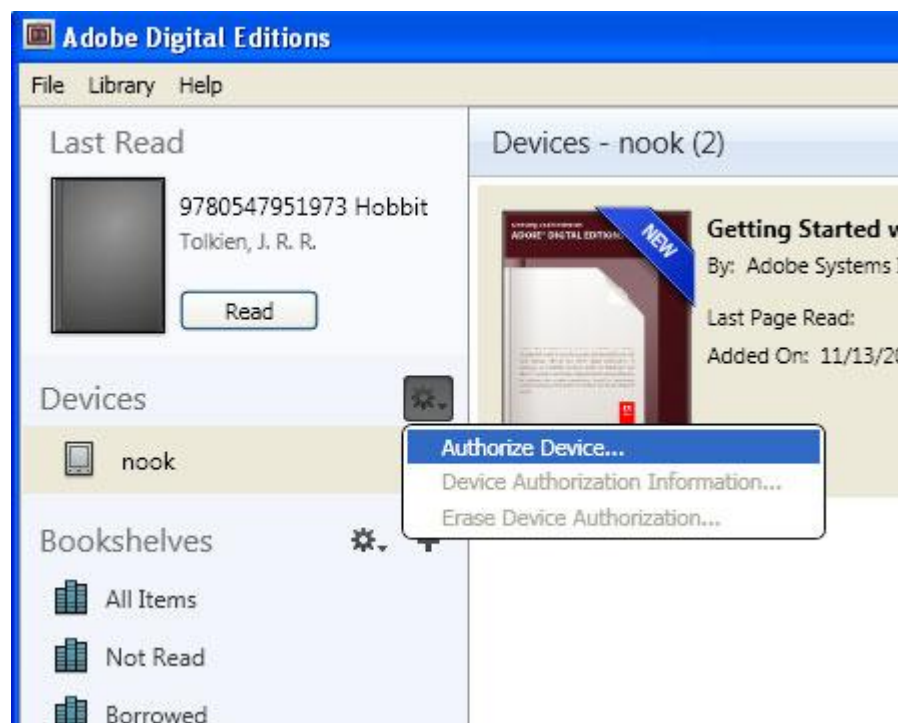

### IMPORTANT!!

**To read Overdrive books on your Nook, you MUST select the Adobe EPUB format when checking out.**

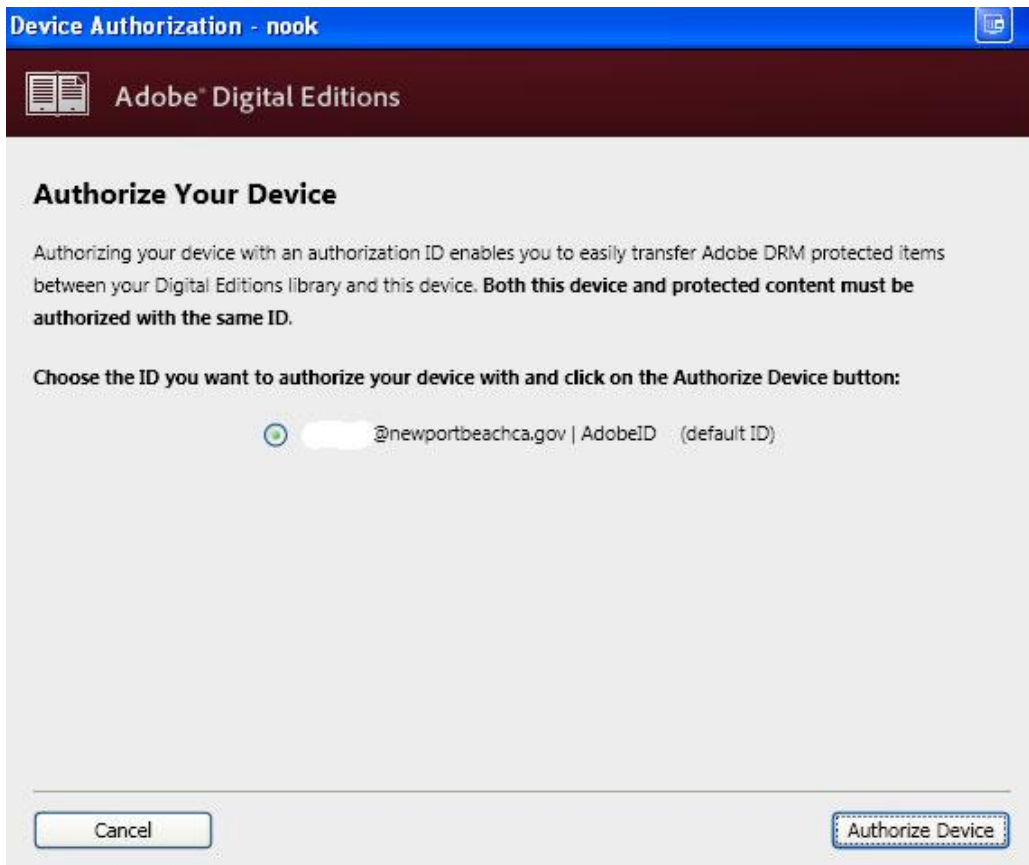

Check out an EPUB title. When prompted to Save or Open the file (with Adobe Digital Editions), choose Open and the software will take over and authorize it before opening.

To transfer the book to your device, plug the Nook into your PC or laptop using the packaged USB cable. Once connected, Adobe Digital Editions should recognize it and prompt you for authorization. **If the program does not recognize your device, unplug your device, close the program, open the program again and plug in your device.**

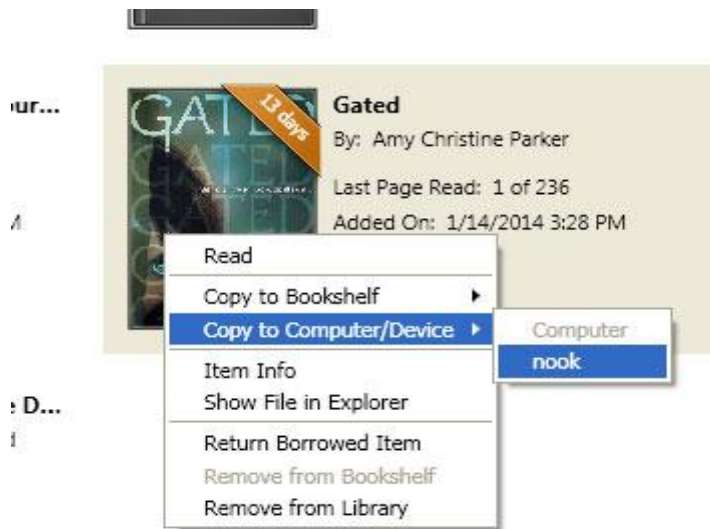

Your Nook will appear under **Devices**. Click the small gear icon to bring up a menu. Click **Authorize Device**.

In the popup menu, verify that the Adobe ID is yours. Click **Authorize**. Your Nook is now authorized to read EPUB files from Overdrive!

Right click the title you want to put on your Nook. Select **Copy to Computer/Device** and find your device (it may be listed as “nook” or “Nook”). Wait a moment for the file to copy. When done, disconnect your device.

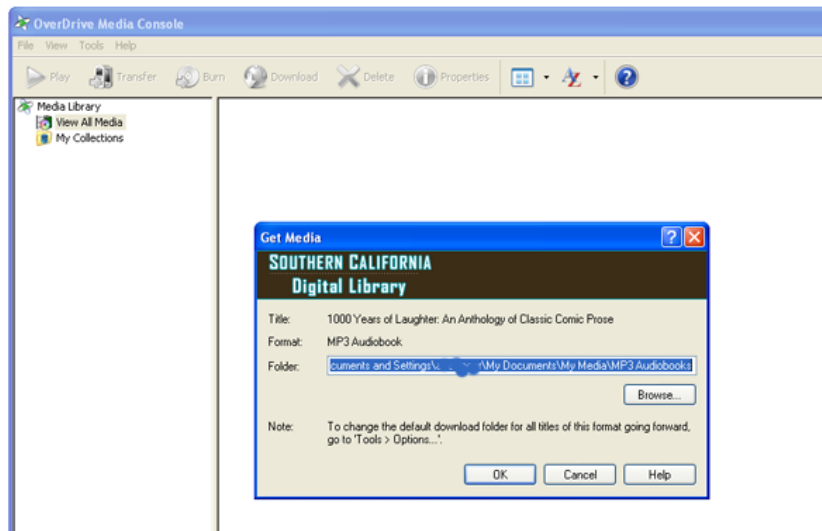

From the Nook itself, go to your Library and your transferred books will be waiting to be read.

## Adding MP3 audiobooks from Overdrive to the Nook

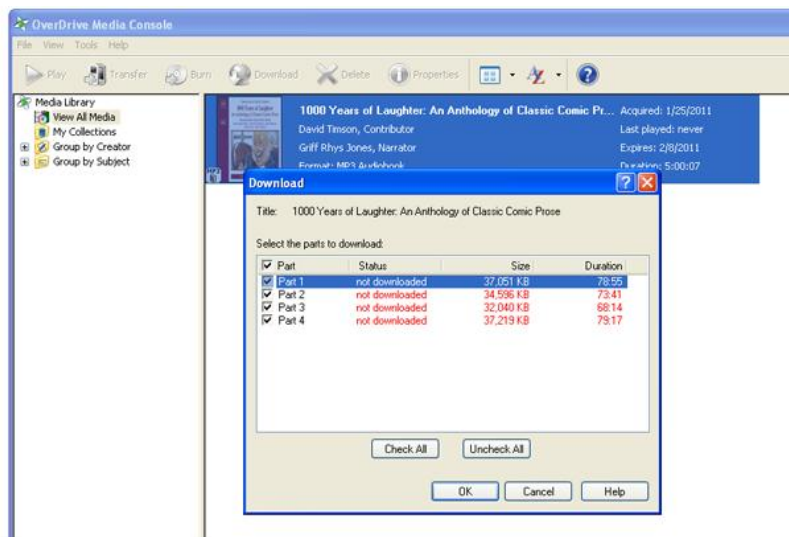

**Note: Audiobooks cannot be played on the Nook Glowlight and Simple Touch**

The process of adding MP3 audio books to your Nook is similar to transferring them to an MP3 player. **Note:** You must have OverDrive Media Console installed on your computer, which can be downloaded for free from <http://omc.overdrive.com/>.

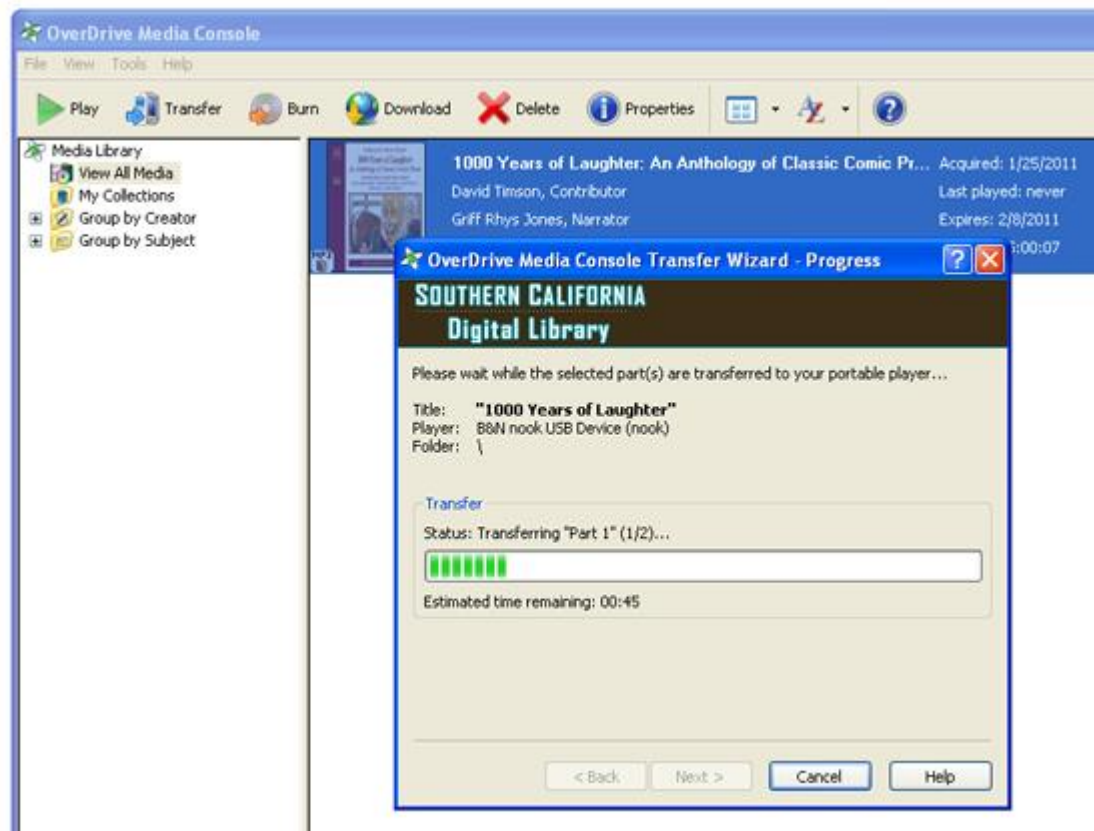

After downloading the audiobook from Overdrive, double click the file. If the Overdrive Media Console has been installed, it will take over and guide you through the process.

In order to transfer the audio book to your Nook, you will first need to download at least one part of the book. Overdrive will, by default, select all parts of the book for you. You can track the progress of your download by looking at the bottom of the Overdrive Media Console window.

Once the download has been completed, connect your Nook to the computer. Click the **TRANSFER** button on the upper section of the Overdrive program window (it is found next to the **PLAY** button). Overdrive will automatically detect your device, so all you have to do is hit the "Next" button until OverDrive initiates the transfer.

Once the transfer is complete, disconnect your Nook from the computer.
