January 4, 2024

Dear Food Service Establishment Owner/Operator:

The City of Newport Beach wishes to thank you for participating in its Fats, Oils, and Grease (FOG) Control Program. The City adopted a FOG Control Program in 2004 (Newport Beach Municipal Code 14.30) as an important component of the City's wastewater system maintenance program. Additionally, the City is mandated by the State of California to implement a FOG Control Program to prevent Sanitary Sewer Overflows. Per the Newport Beach Municipal Code Chapter 14.30.020, all Food Service Establishments (FSEs) must obtain a Grease Disposal Permit prior to the operation and discharge of FOG into the wastewater system. At this time this is a no fee permit approved by the Utilities Department Director in accordance with the application and guidelines of NBMC Chapter 14.30. You can apply for a grease disposal permit on the City's website at www.newportbeachca.gov/civic.

The City of Newport Beach representative, Jon Kinley DBA Environmental Compliance Inspection Services, is visiting your establishment to see how the program is working at your facility. As part of the annual inspection, training and oil collection logs will be checked along with a physical inspection of the facility. The City appreciates your continued participation in the FOG Control Program to help us maintain a clean and reliable wastewater collection system.

If you have any further questions, please feel free to contact the Utilities Department at (949) 644-3011. Thank you for your compliance with this required program and your efforts to keep our community clean and safe.

All documents within this binder are available at the City's website, <https://www.newportbeachca.gov/government/departments/utilities/wastewater/fog-control-program>

Sincerely,

Casey Parks
Utilities Superintendent
